# STRATEGIC IMPERATIVES

## Objectives

Grow the manufacturing sector to promote industrial development, job creation, investment and exports

Improved conditions for consumers, artists and opening up of markets for new patents players

Strengthened capacity to deliver on **the dti** mandate

## Goals

1. To facilitate transformation of the economy to promote industrial development, investment, competitiveness and employment creation

2. Build mutually beneficial regional and global relations to advance South Africa's trade, industrial policy and economic development objectives;

3. Facilitate broad-based economic participation through targeted interventions to achieve more inclusive growth;

4. Create a fair regulatory environment that enables investment, trade and enterprise development in an equitable and socially responsible manner;

5. Promote a professional, ethical, dynamic, competitive and customer-focused working environment that ensures effective and efficient service delivery.

## Vision

A dynamic industrial, globally competitive South African economy, characterised by inclusive growth and development, decent employment and equity, built on the full potential of all citizens.

# ECONOMIC OVERVIEW - GLOBAL

**Global growth remains skewed & the forecast in October 2019 is revised 0.2 percentage point lower than it was in July 2019, the weakest since 2009.**

While the easing of monetary policy in many countries could provide some support to the global growth, downside risks seem to dominate the outlook. Some of these risks include:

- Further disruptions to trade and supply chains;
- The continued build-up of financial vulnerabilities; and
- Geopolitical tensions and domestic political uncertainty.

Some risks peculiar to SA's domestic growth include:

- A highly contested domestic policy environment;
- Subdued growth in private sector fixed investment; and
- Increased risks to the fiscal outlook.

# SA DODGES A TECHNICAL RECESSION

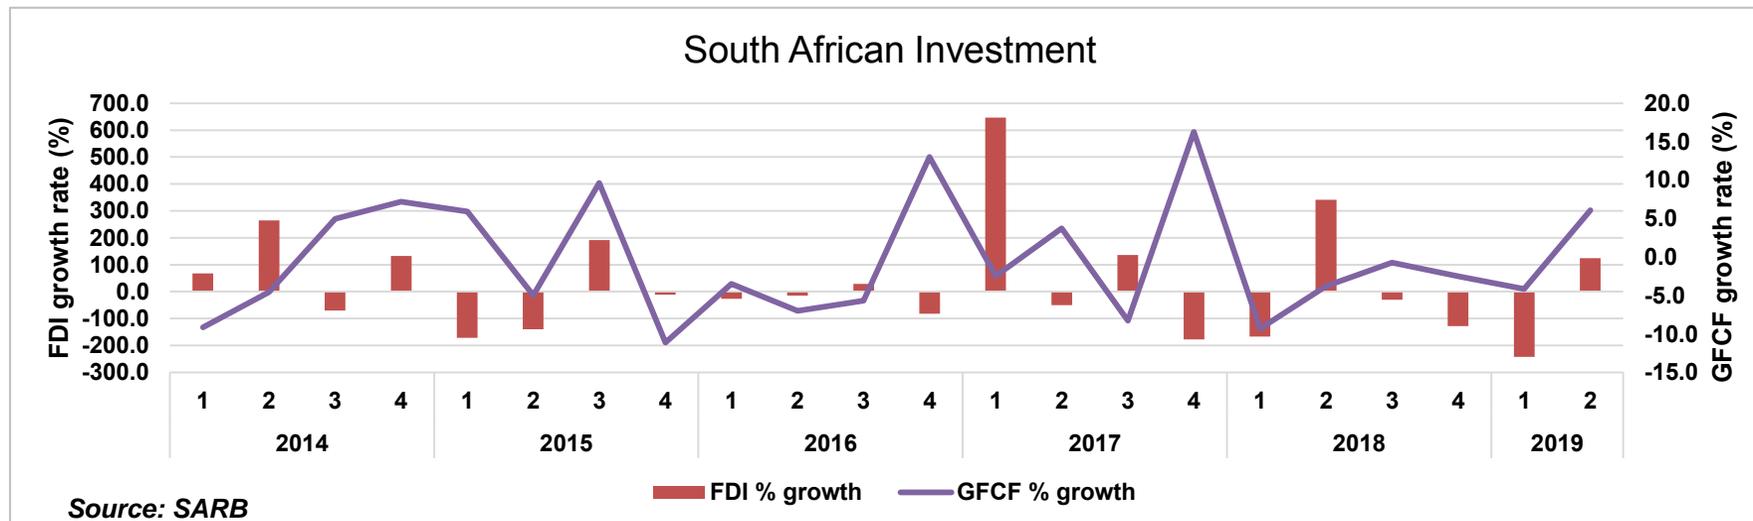

- ❑ Real gross domestic product (GDP) bounced back much stronger than expected in 2019Q2 – registering a 3.1% (q-on-q saar) growth, from a shock contraction in 2019Q1.
- ❑ Most economic research and forecasting engines had anticipated a GDP growth rate of 2.3% during the period of analysis.
- ❑ The unexpected growth 2019Q2 GDP was driven by the recovery in the Mining and Manufacturing sectors, at the back of the restoration of consistent electricity output.
- ❑ On a year-on-year basis, the GDP grew marginally by 0.9%.

# DOMESTIC AND FOREIGN INVESTMENT EDGED UP

- ❑ GFCF grew by 6.1% (q-on-q, saar) in 2019Q2; from R598bn in Q1 to 607bn in Q2.
- ❑ This was a positive growth following declines in the past five consecutive quarters.
- ❑ **Private sector** (15.3% q-on-q), resuscitated total domestic investment while the other two categories declined (**public corporations -6.7%** and **general government -17.3%**).
- ❑ Disappointing investment by the general government and the public corporations was as a result of continuing austerity measures; lower revenue streams collected from taxes; and re-organisation programmes the government plans on embarking upon.
- ❑ FDI inflows increased from R11.7bn in 2019Q1 to R26.3bn in 2019Q2 - driven by domestic private sector companies acquiring debt; equity funding from foreign parent companies, though to a lesser extent; and 17 new projects announced for the quarter to the total value of R25.1 bn.

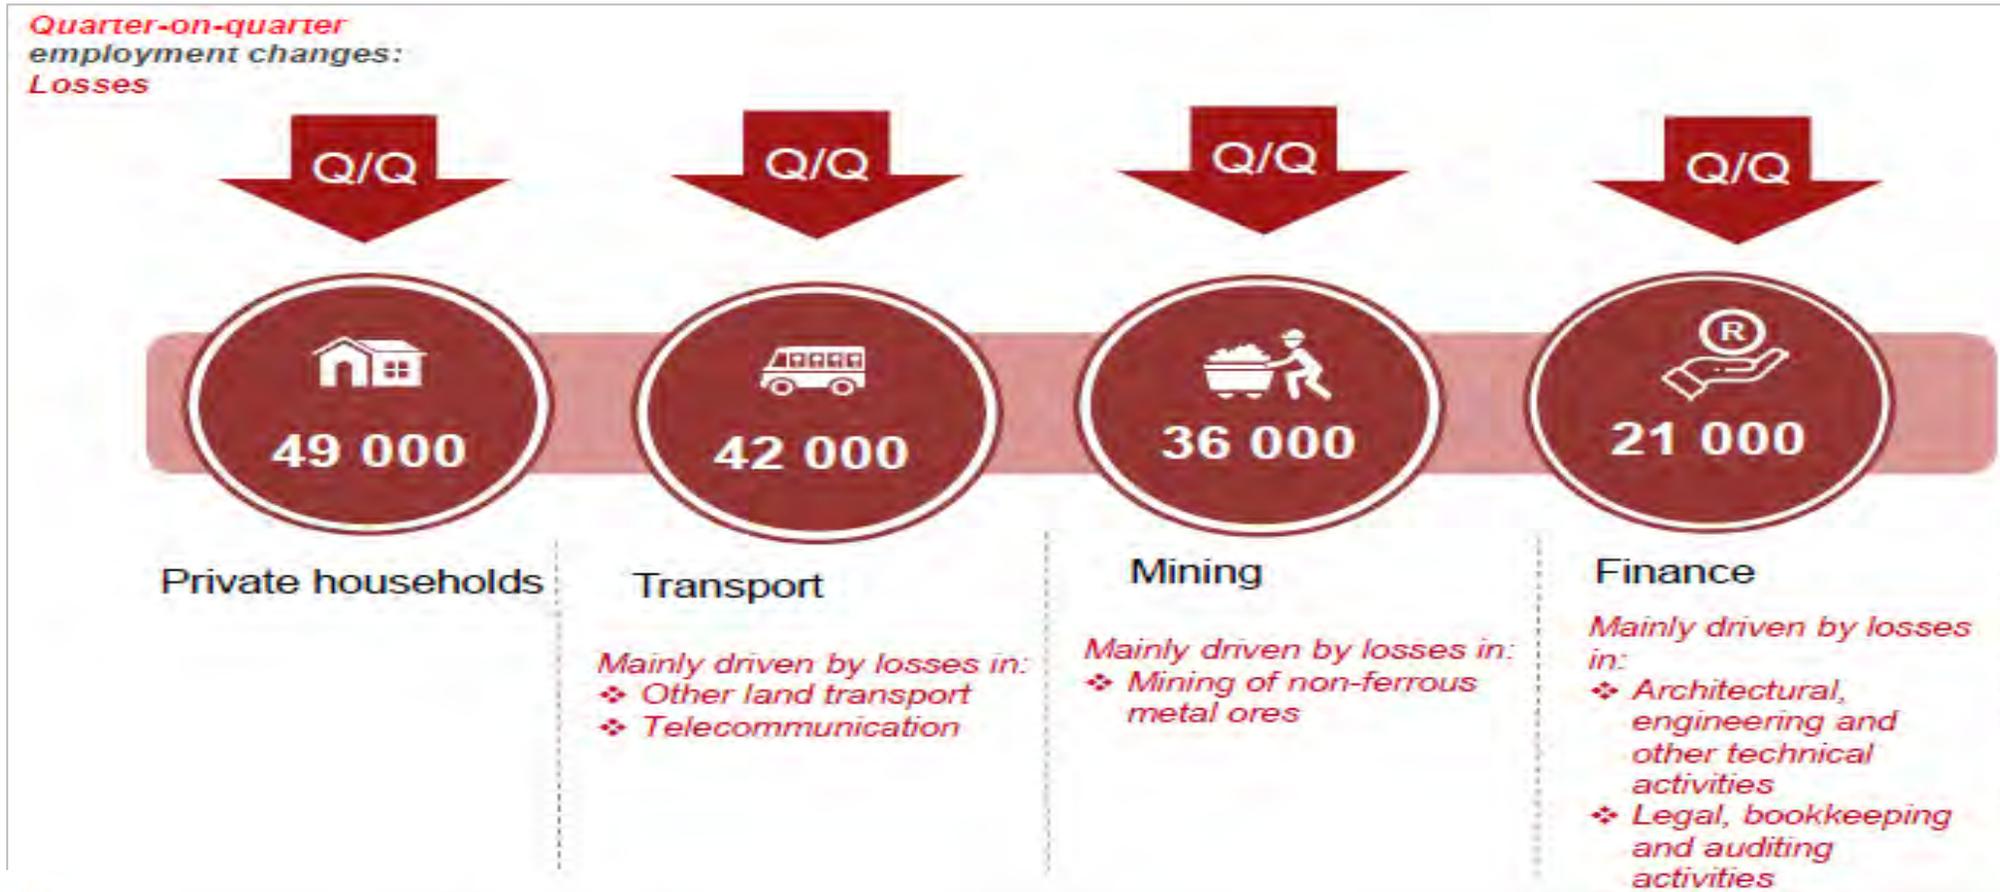

# JOBS CREATED IN Q2 2019

- ❑ The net number of employed persons in South Africa increased by 21 000, from 16.29 to 16.31 million (q-on-q) in 2019Q2.
- ❑ The growth in employment primarily came from four sectors – trade, services, construction and manufacturing.
- ❑ Manufacturing employment was driven by the continuous recovery in manufacturing output in 2019Q2 – and businesses were able to stay resilient.

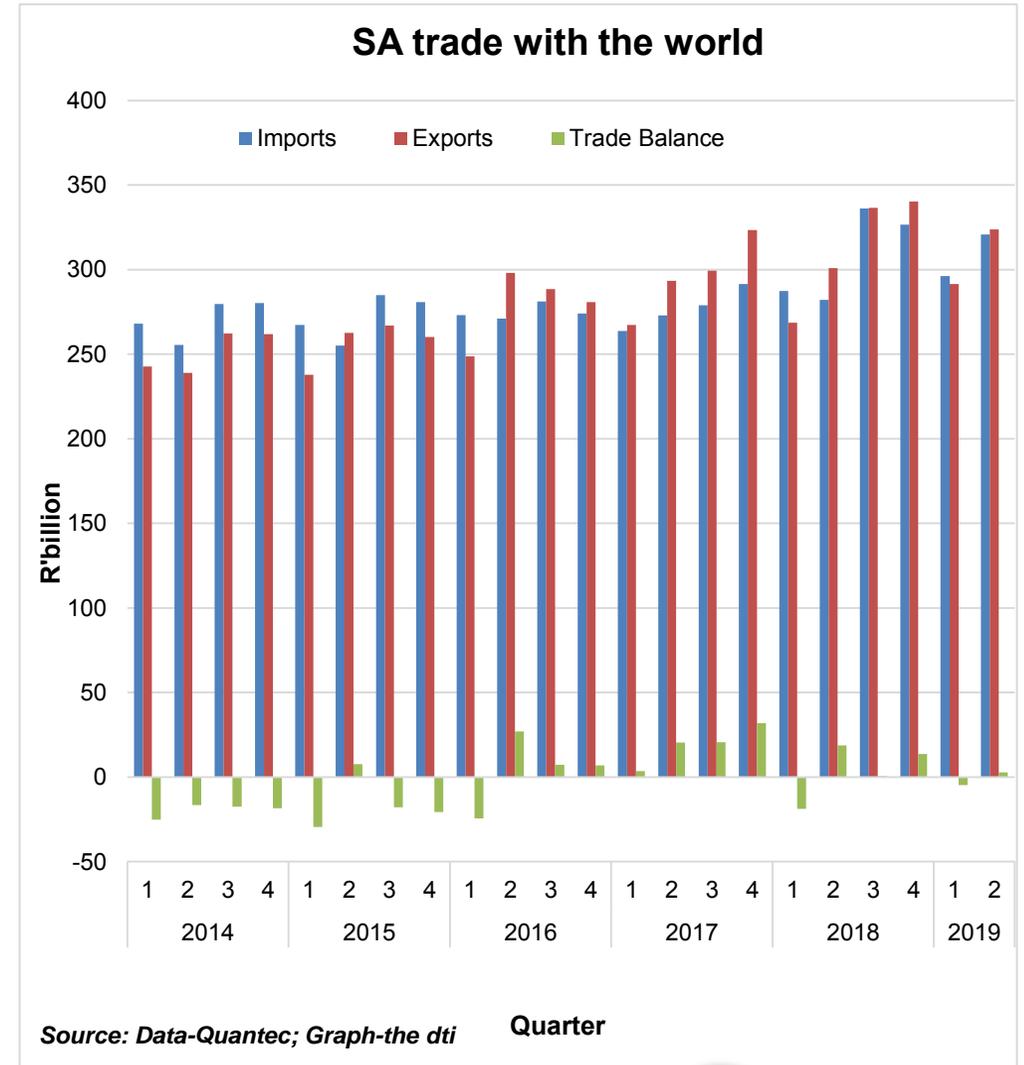

# UNEMPLOYMENT RATE REMAINS PERSISTENT

- ❑ Despite employment creation in 2019Q2, the official unemployment rate rose to 29% in 2019Q2 from 27.6% in the previous quarter.
- ❑ This is the highest unemployment rate since 2008Q1.
- ❑ Key drivers for employment losses in Q2 of 2019 were:

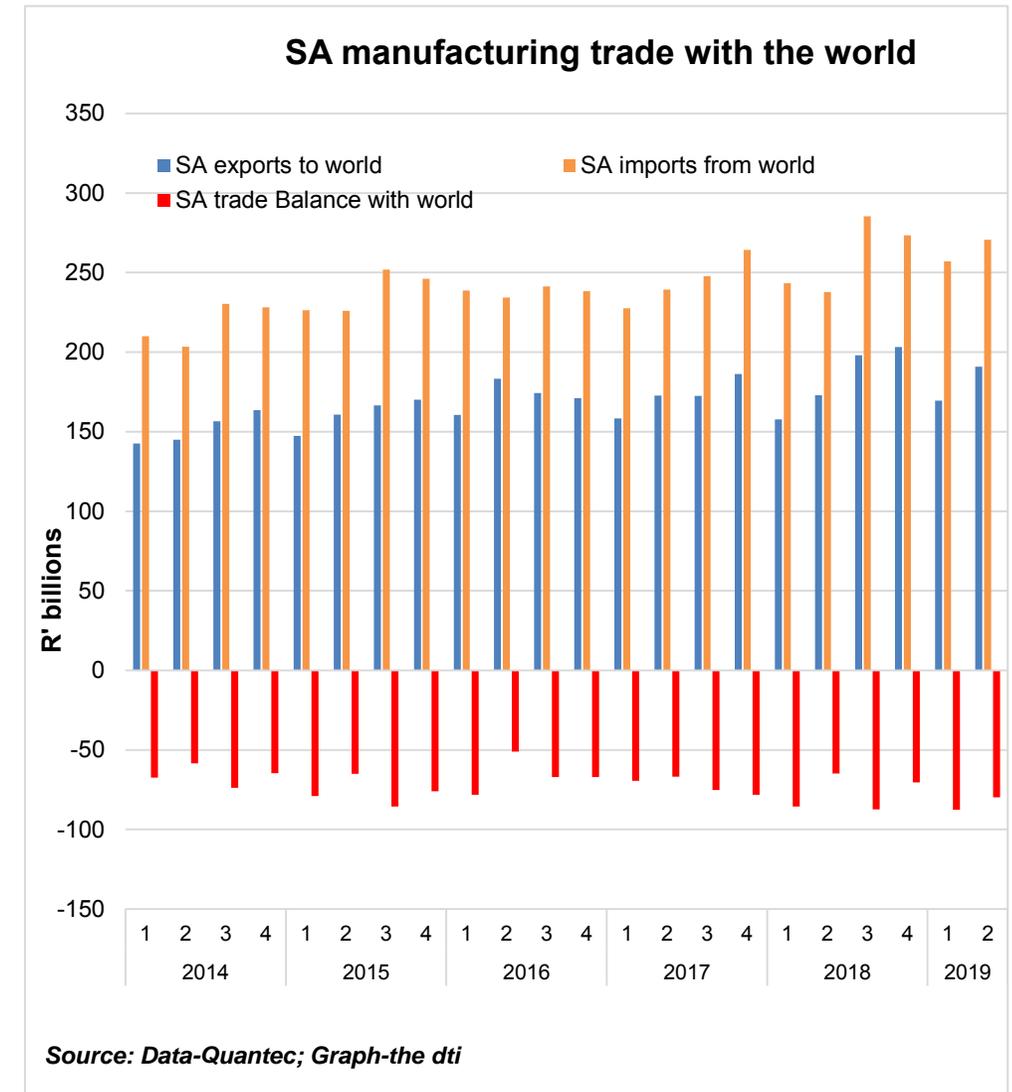

# SA RECORDED TRADE SURPLUS WITH THE WORLD

- ❑ In 2019Q2, SA had a trade surplus of R2.8 billion with the rest of the world – after recording R4.8bn deficit in 2019Q1.
- ❑ The positive trade balance was as a result of increased exports for all key sectors of the economy:
  - Mining exports increase was driven by the platinum group metals; iron ore; and coal, which collectively, increased by 59%.
  - Motor vehicles; Basic iron and steel products; Basic chemicals; Coke, petroleum products and nuclear fuel; Parts and accessories contributed 51% to the increase in manufacturing exports.
  - Agriculture, forestry and fishing exports also increased, driven up by Agriculture (94.7%), fishing (3.4%) and forestry (1.9%).

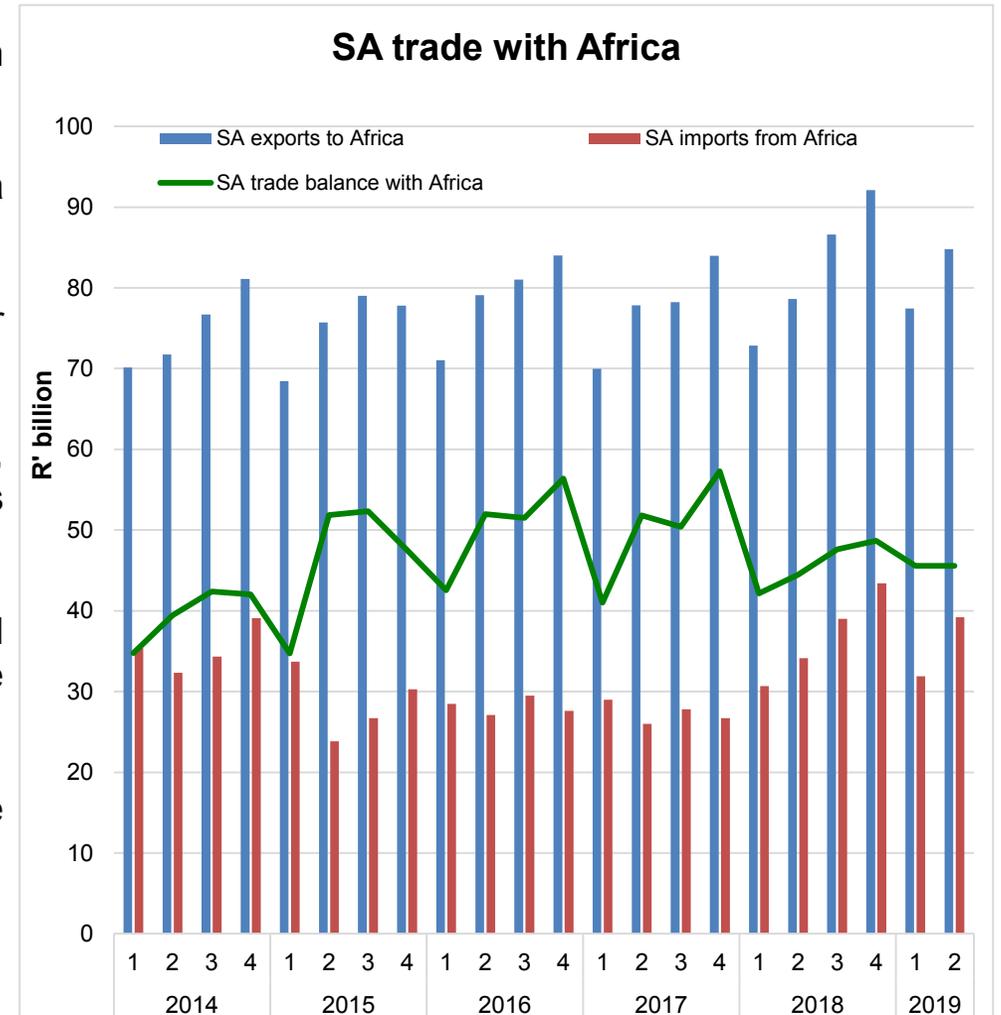

# MANUFACTURING TRADE DEFICIT NARROWED

- ❑ The conditions in the manufacturing sector remain largely unfavourable as businesses experienced difficult conditions in the past few years.
- ❑ Several manufacturing sub-sectors are operating below production capacity, largely due to insufficient demand from both local and foreign markets.
- ❑ In 2019Q2, the manufacturing trade deficit narrowed to R79.8bn from R87.5bn in Q1 of 2019. This was a result of increased exports by Motor vehicles; Basic iron and steel products; and Basic chemicals.

# SA TRADE SURPLUS WITH AFRICA WIDENED

- ❑ Exports to Africa increased by R7bn to reach R84bn in 2019Q2 from R77bn in 2019Q1.
- ❑ Though exports increased, the trade balance with the rest of Africa remained constant at R45bn in 2019Q2.
- ❑ However, South African exports to the continent were largely destined for the SADC region, principally to SACU member states.
- ❑ With opening of markets in Africa through the Continental Free Trade Area, higher export penetration to other sub-Saharan African economies is anticipated.
- ❑ Despite the positive trade balance with Africa, SA's approach to regional integration is that of investment-led industrial and infrastructure development as key levers to unlock the potential of the African continent.
- ❑ This will rebalance trade with fellow African countries and ensure that the benefits of integration are spread across the continent.

# SA TRADE DEFICIT WITH BRIC NARROWED

- ❑ South Africa's trade response within BRICS has been positive in the past year as reflected by deficit narrowing from R35bn in 2018Q3 to R23bn in 2019Q2.
- ❑ Despite the progress, SA recorded a huge trade deficit with China and Brazil valued at R21bn and R3.6bn in 2019Q2, respectively.
- ❑ However, SA had a trade surplus with India and Russia of R1.7bn and R629mn, respectively.
- ❑ The increase in imports, particularly manufactured imports from BRICS remains four times greater than that of exports on average.
- ❑ This disparity is reflected in the country's trade balance, which has been consistently negative.
- ❑ However, the on-going engagements at BRICS Business Council will address some of the inequalities in trade by developing programmes that support industrialisation amongst member states.

# FINANCIAL PERFORMANCE

- ❑ As depicted on previous slides, expenditure is largely on track with most Divisions spending within a 10% variance of actual drawings. This is an improvement as compared with the same period of the 2018/19 financial year.
- ❑ Recorded expenditure for program 3 is R76 million or 133,2% of the actual drawings. This is due to the projected expenditure which was brought forward from the 3<sup>rd</sup> Q to the 2<sup>nd</sup> Q to support the B-BBEE Commission and the National Productivity Institute. The expenditure is however still within the budget for the year.
- ❑ In line with prior years expenditure trends, spending on the incentive programmes is lower at the beginning of a financial year and improves as the year progresses.
- ❑ Spending is closely monitored and there are continuous engagements with Divisions to ensure that spending is largely on track in line with performance objectives.
