2. Organisational Structure

3. Foreword by the Minister

Minister of Trade, Industry and Competition Ebrahim Patel

The impact on the economy of the COVID-pandemic is serious and damaging on growth, jobs, inclusivity and investment. This, together with the budget adjustments made in the wake of the pandemic, requires a change to Annual Performance Plans.

On 19 April 2020, I tabled the original Annual Performance Plan of **the dtic** in Parliament and indicated that “the Annual Performance Plan may further be aligned to implementing the National Sector Master Plans and Government’s response to the COVID-19 pandemic, both during the period of the National Disaster declared by President Ramaphosa, and thereafter as we adapt to the new economic reality. Should the adjustments be made, a revised Plan will be submitted to Parliament.”

I hereby table a revised Annual Performance Plan on behalf of **the dtic**. This new Plan seeks to respond more effectively to COVID-19 in industry and across the economy and to do so with more limited budget resources.

the dtic has played an active role in the first few months of the pandemic, to support firms, workers and consumers. This response has come in the form of industrial financing, trade facilitation and tariff measures, action to fight price gouging and excessive pricing, unblocking investment, and supporting industries navigate their new challenges.

The impact of the coronavirus will be felt for a number of years and the full extent of this has not yet become apparent.

There are significant dangers and opportunities.

The need to fight the spread of the coronavirus has led to increased local manufacturing of hand sanitisers, disinfectant, personal protective equipment like face masks, and ventilators, positioning South Africa well to

service the needs of citizens and the rest of the Continent. The response to the virus has also led to a greater digitisation of the workplace, as many South Africans have adapted to the need to maintain social distance while still being economically active.

Many industries have suffered as a result of the new reality, including tourism and personal services, while many others have been affected by reduction in demand (for example, manufacturing and construction).

Many of the fault-lines in the economy and society have been exposed in the period.

In this context, **the dtic** will have an important role in South Africa's economic reconstruction, and it will have to do this with a reduced budget.

The Re-Imagined Industrial Strategy, outlined by President Ramaphosa in his State of the Nation Address at the start of the Sixth Administration, is even more vital against the new challenges we face; and will drive the work of the department over the medium term.

The development of sector master plans will continue to play an important role in using a range of cross-cutting measures to re-invigorate key industries; many of the programmes will focus on opportunities to integrate delivery platforms, focus more on the growth potential through exports to the rest of Africa and build more resilient supply-chains through greater levels of localisation.

This new APP has a number of significant adjustments, with a refocus within programmes to respond to these new needs, using available policy tools to address the economic challenges and utilise the opportunities.

In each of the ten programmes, changes have been made: in some cases, by adding new indicators, or amending existing indicators, or by including a reporting requirement that focuses on the new priorities.

Some of the initiatives which the department will implement as part of the re-focussed APP include:

- Developing a shared service framework for **the dtic** entities to avoid duplication of costs and release resources for front-line programmes
- Strengthening coordination capabilities to support trade and protect South Africa's industrial base
- Creating an SEZ Project Management Unit, to enable better-performing Special Economic Zones
- Supporting increased localisation of products, including PPEs
- Reviewing key legislation to take account of experiences to date
- Refocusing industrial support not only for new growth but also to maintain existing jobs and industrial capacity and assets
- Prioritising growth of exports to other African countries, which include focused work on the AfCFTA, and supporting new export markets (outside of Africa) and new products for export; and
- Enabling the implementation of the 2018 and 2019 Investment Conference commitments of projects.

The pandemic lends urgency to the need to build greater levels of state capability and agility; to deepen partnerships with the private sector and labour, to do things in new ways and to focus more on output and crucially, outcomes.

A handwritten signature in black ink, appearing to read 'Ebrahim Patel', with a long horizontal stroke extending to the right.

Mr Ebrahim Patel

Minister of Trade, Industry and Competition

4. Overview by the Director-General

Director-General Lionel October

The revised Annual Performance Plan 2020/21, prepared through consultation with management, is hereby submitted in accordance with the Revised Framework on Strategic and Annual Performance Plans.

Mr Lionel October
Director-General

5. Official Sign-Off

It is hereby certified that this Annual Performance Plan was:

Developed by the Department of Trade, Industry and Competition management under the guidance of the Minister, Mr Ebrahim Patel;

Prepared in line with the current strategic plan of the Department of Trade, Industry and Competition; and

Accurately reflects the performance targets, which the Department of Trade, Industry and Competition will endeavour to achieve given the resources made available in the budget for 2020 to 2021.

Part A: Our Mandate

6. Vision

A dynamic industrial, globally competitive South African economy, characterised by meaningful economic transformation, inclusive growth and development, decent employment and equity, built on the full potential of all citizens.

7. Mission

the dtic's mission is to:

- promote structural transformation, towards a dynamic industrial and globally competitive economy;
- provide a predictable, competitive, equitable and socially responsible environment, conducive to investment, trade and enterprise development;
- broaden participation in the economy to strengthen economic development;
- continually improve the skills and capabilities of **the dtic** to effectively deliver on its mandate and respond to the needs of South Africa's economic citizens;
- coordinate the contributions of government departments, state entities and civil society to effect economic development; and
- improve alignment between economic policies, plans of the state, its agencies, government's political and economic objectives and mandate.

8. Values

- Advance South Africa's Constitution, notably the chapters on human rights, cooperative governance and public administration
- Promote decent work outcomes (more and better jobs), industrialisation, equitable and inclusive growth and social inclusion
- Operational excellence with regard to service delivery standards, international best practice, Batho Pele Principles, continuous improvement and ethical conduct
- Intellectual excellence with regard to continuous shared learning, innovation, relevant knowledge and skills improvement and knowledge management
- Quality relationships with regard to improved and continuous communication, honesty, respect, integrity, transparency, professionalism, ownership, leadership and teamwork

9. Updates to the Relevant Legislative and Policy Mandates

Act	Purpose
Abolition of the Fuel Research Institute and Coal Act, 1983 (Act No. 30 of 1983)	Repeal the Fuel Research Institute and Coal Act, 1963 (Act No. 35 of 1963) and provide for the vesting of the assets and liabilities, and the transfer of the employees of the Fuel Research Institute in and to the Council for Scientific and Industrial Research (CSIR).
Accreditation for Conformity Assessment, Calibration and Good Laboratory Practice Act, 2006 (Act No. 19 of 2006)	Provide for an internationally recognised and effective accreditation and monitoring system for South Africa by establishing the South African National Accreditation System (SANAS) as a juristic person; to recognise SANAS as the only accreditation body in South Africa for the accreditation of conformity assessment and calibration, as well as the monitoring of good laboratory practice (GLP).
Alienation of Land Act, 1981 (Act No. 68 of 1981)	Regulate the alienation of land in certain circumstances and provide for matters connected therewith.
Broad-Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003)	Establish a legislative framework for the promotion of black economic empowerment (BEE), empower the Minister to issue codes of good practice and publish transformation charters, establish the B-BBEE (Broad-Based Black Economic Empowerment) Advisory Council and provide for matters connected therewith.
Companies Act, 2008 (Act No. 71 of 2008)	Provide a new legislative framework for the incorporation, registration and management of companies; establish a Companies and Intellectual Property Commission (CIPC) and National Consumer Tribunal (NCT); and provide for matters connected therewith.
Competition Act, 1998 (Act No. 89 of 1998)	Provide the Competition Commission with the powers to conduct impact studies on prior decisions and to promote the administrative efficiency of the Competition Commission and Competition Tribunal.
Consumer Protection Act, 2008 (Act No. 68 of 2008)	Promote a fair, accessible and sustainable marketplace for consumer products and services, and for that purpose to establish national norms and standards relating to consumer protection; provide for improved standards of consumer information; prohibit certain unfair marketing and business practices; promote responsible consumer behaviour; promote a consistent legislative and enforcement framework relating to consumer transactions and agreements; establish the National Consumer Commission (NCC); and repeal certain laws.
Convention on Agency in the International Sale of Goods Act, 1986 (Act No. 4 of 1986)	Provide for the application in South Africa of the Convention on Agency in the International Sale of Goods adopted by the United Nations International Institute for the Unification of Private Law.
Copyright Act, 1978 (Act No. 98 of 1978)	Regulate copyright in respect of, among other things, artistic works, dramatic works, computer programs, and musical and literary works.
Counterfeit Goods Act, 1997 (Act No. 37 of 1997)	Strengthen prohibitions on trade in counterfeit goods; confer powers on inspectors and the police to enter and search premises, with and without a warrant; and confer powers on customs and excise to seize and detain suspected counterfeit goods.
Designs Act, 1993 (Act No. 195 of 1993)	Consolidate the law relating to designs, provide for the registration of designs, and delineate the rights pertaining thereto.

Act	Purpose
Export Credit and Foreign Investments Insurance Act, 1957 (Act No. 78 of 1957)	Establish the Export Credit Insurance Corporation (ECIC) and promote trade with countries outside South Africa by providing for the insurance, on behalf of the South African government, of contracts in connection with export transactions, investments and loans or similar facilities connected with such transactions.
Expropriation (Establishment of Undertakings) Act, 1951 (Act No. 39 of 1951)	Provide for the expropriation of land and the taking of the right to use land temporarily for or in connection with the objects or undertakings of national importance.
Housing Development Schemes for Retired Persons Act, 1988 (Act No. 65 of 1988)	Regulate the alienation of certain interests in housing development schemes for retired persons, and provide for matters connected therewith.
Industrial Development Corporation Act (Act No. 22 of 1940);	Constitute a corporation the object of which shall be to promote the establishment of new industries and industrial undertakings and the development of existing industries and industrial undertakings, and to provide for other incidental matters.
Intellectual Property Laws Rationalisation Act, 1996 (Act No. 107 of 1996)	Provide for the integration of intellectual property (IP) rights subsisting in the former homelands (Transkei, Bophuthatswana, Venda and Ciskei) into the national system; extend South African IP rights legislation throughout South Africa; and repeal certain IP laws.
International Trade Administration Act (Act No. 71 of 2002)	Foster economic growth and development in order to raise incomes and promote investment and employment in the Republic and within the Common Customs Area by establishing an efficient and effective system for the administration of international trade subject to this Act.
Legal Metrology Act, 2014 (Act No. 9 of 2014)	Provide for the administration and maintenance of legal metrology technical regulations in order to promote fair trade and protect public health and safety and the environment, and provide for matters connected therewith.
Liquor Act, 2003 (Act No. 59 of 2003)	Establish national norms and standards to maintain economic unity within the liquor industry provide for essential national standards and minimum standards required for the rendering of services, provide for measures to promote cooperative governance in the area of liquor regulation, and provide for matters connected therewith.
Lotteries Act, 1997 (Act No. 57 of 1997)	Establish the National Lotteries Commission (NLC), and regulate and prohibit lotteries and sports pools.
Manufacturing Development Act, 1993 (Act No. 187 of 1993)	Establish the Manufacturing Development Board, provide for the establishment of programmes for manufacturing development, and provide for matters incidental thereto.
Measurement Units and Measurement Standards Act, 2006 (Act No. 18 of 2006)	Provide for the use of the measurement units of the International System of Units; provide for the designation, keeping and maintenance of national measurement units and standards; provide for the establishment and functions of the National Metrology Institute of South Africa (NMISA); and provide for the repeal of certain laws.
Merchandise Marks Act, 1941 (Act No. 17 of 1941)	Make provision concerning the marking of merchandise and coverings in or with which merchandise is sold, and the use of certain words and emblems in connection with business.

Act	Purpose
National Building Regulations and Building Standards Act, 1977 (Act No. 103 of 1977)	Provide for the promotion of uniformity in the law relating to the erection of buildings in the areas of jurisdiction of local authorities and for the prescribing of building standards.
National Credit Act, 2005 (Act No. 34 of 2005)	Establish the National Credit Regulator (NCR) and CT, and promote a fair and non-discriminatory marketplace for access to consumer credit; and, for that purpose, provide for the general regulation of consumer credit and improved standards of consumer information.
National Empowerment Fund Act, 1998 (Act No. 105 of 1998)	Establish a trust for the promotion and facilitation of ownership of income-generating assets by historically disadvantaged persons; set out the objects of the trust; provide for the powers, appointment and mode of operation of the trustees; provide for the establishment of other investment entities for the attainment of the objects; provide for the powers of the minister to give implementation directives; provide for the sale of shares in state-owned commercial enterprises at a discount to the trust or by the trust to the beneficiaries; provide for the control of the financial affairs of the trust; provide for the establishment of an investment holding company by the trust; provide for the promulgation of regulations; provide for the dissolution of the trust; and provide for other incidental matters.
National Gambling Act, 2004 (Act No. 7 of 2004)	Provide for the coordination of concurrent national and provincial legislative competence over matters relating to casinos, racing, gambling and wagering; provide for the continued regulation of those matters, and, for that purpose, establish certain uniform norms and standards applicable to national and provincial regulation and the licensing of certain gambling activities; provide for the creation of additional uniform norms and standards applicable throughout South Africa; retain the National Gambling Board; establish the National Gambling Policy Council; repeal the National Gambling Act, 1996 (Act No. 33 of 1996); and provide for matters incidental thereto.
National Regulator for Compulsory Specifications Act, 2008 (Act No. 5 of 2008)	Provide for the administration and maintenance of compulsory specifications in the interest of public safety, health and environmental protection; and provide for the establishment of the National Regulator for Compulsory Specifications (NRCS).
National Supplies Procurement Act, 1970 (Act No. 89 of 1970)	Empower the responsible minister to manufacture, produce, acquire, hire or import goods; acquire, hire or supply services; exercise control over goods and services, and the manufacture, production, processing and treating of goods; and provide for the establishment and administration of a national supplies procurement fund.
Non-Proliferation of Weapons of Mass Destruction Act, 1993 (Act No. 87 of 1993)	Provide for control over weapons of mass destruction and establish a council to control and manage matters relating to the proliferation of such weapons in South Africa; determine its objectives and functions; and prescribe the manner in which it is to be managed and controlled.
Patents Act, 1978 (Act No. 57 of 1978)	Provide for the registration and granting of letters, patents for inventions, and for the rights of a patentee.
Performers' Protection Act, 1967 (Act No. 11 of 1967)	Provide for the protection of the rights of performers of literary and artistic works.
Property Time-Sharing Control Act, 1983 (Act No. 75 of 1983)	Regulate the alienation of time-sharing interests pursuant to property time-sharing schemes.

Act	Purpose
Protection of Businesses Act, 1978 (Act No. 99 of 1978)	Restrict the enforcement in South Africa of certain foreign judgments, orders, directions, arbitration awards and letters of request; and prohibit the furnishing of information relating to businesses in compliance with foreign orders, directions or letters of request.
Protection of Investment Act, 2015 (Act No. 22 of 2015) [Assented to by the President on 15 December 2015 but has not yet commenced]	Provide for the protection of investors and their investments; achieve a balance of rights and obligations that apply to all investors; and provide for matters connected therewith.
Rationalisation of Corporate Laws Act, 1996 (Act No. 45 of 1996)	Provide that certain corporate laws shall apply throughout South Africa; repeal certain corporate laws; and provide for the retrospective incorporation of certain putative close corporations.
Registration of Copyright in Cinematograph Films Act, 1977 (Act No. 62 of 1977)	Provide for the registration of copyright in cinematograph films and for matters connected therewith.
Share Blocks Control Act, 1980 (Act No. 59 of 1980)	Control the operation of share block schemes – any scheme in terms of which a share, in any manner whatsoever, confers a right to or an interest in the use of immovable property.
Space Affairs Act, 1993 (Act No. 84 of 1993)	Provide for the establishment of a council to manage and control certain space affairs in South Africa, determine its objects and functions, and prescribe the manner in which it is to be managed and controlled.
Special Economic Zones Act, 2014 (Act No. 16 of 2014)	Provide for the designation, development and management of special economic zones (SEZs); establish an advisory board and a fund; regulate the issuing, suspension, withdrawal and transfer of permits; and provide for matters connected therewith.
Standards Act, 2008 (Act No. 8 of 2008)	Provide for the development, promotion and maintenance of standardisation and quality in connection with commodities and the rendering of related conformity assessment services, and, for that purpose, provide for the continued existence of the South African Bureau of Standards (SABS) as the peak national institution; provide for the repeal of the Standards Act, 1993 (Act No. 29 of 1993); and provide for transitional arrangements.
Sugar Act, 1978 (Act No. 9 of 1978)	Consolidate and amend the laws relating to the sugar industry, and provide for matters incidental thereto.
Temporary Removal of Restrictions on Economic Activities Act, 1986 (Act No. 87 of 1986)	Empower the president to suspend temporarily laws or conditions, limitations or obligations thereunder if their application unduly impedes economic development or competition.
Trade Marks Act, 1993 (Act No. 194 of 1993)	Consolidate the law relating to trademarks; and provide for the registration of trademarks, the certification of trademarks and collective trademarks, and for the protection of rights relating thereto.
Unauthorised Use of Emblems Act, 1961 (Act No. 37 of 1961)	Provide for the continued operation of certain laws relating to the use of certain emblems and representations; and extend the scope of such laws.

10. Updates to Institutional Policies and Strategies

The Re-imagined Industrial Strategy is the centrepiece of government's vision, coordinated by the Presidency, and puts emphasis on concrete actions. It presents a multipronged approach to industrial development, with an emphasis on building partnerships with the private sector in order to unleash job-creating investment.

The department aims to develop the Consumer Protection Policy, Lotteries Policy, Companies Policy, Credit and Liquor Policy over the next three years.

Part B: Strategic Focus

11. External Environment Analysis

Global economic context

The International Monetary Fund's (IMF) June 2020 forecast projects global growth to contract by 4.9% in 2020. This represents a significant weakening of the global growth outlook since the IMF's April 2020 forecast when it expected global growth to contract by 3%. The COVID-19 pandemic has had a more negative impact on activity in the first half of 2020 than anticipated, and the recovery is projected to be more gradual than previously forecast. Global growth is forecast to recover to 5.4% in 2021.

These forecasts carry a higher-than-usual degree of uncertainty due to the nature of the COVID-19 pandemic, the volatility of its spread, and the associated need for limits on the movement of people. The baseline projection rests on key assumptions about the fallout from the pandemic. In economies with declining infection rates, the slower recovery path in the updated forecast reflects substantial limits to supply potential from the larger-than-anticipated damage to economic activity during the lockdown in the first and second quarters of 2020; as well as the reduction in productivity as enterprises implement additional workplace safety and hygiene practices. For economies struggling to control infection rates, a lengthier lockdown is anticipated to inflict an additional toll on activity.

The June 2020 forecast also assumes that financial conditions, which have eased following the release of the April 2020 WEO, remain broadly at current levels. Alternative outcomes to those in the baseline are clearly possible, and not just because of how the pandemic is evolving. The extent of the recent rebound in financial markets sentiment appears disconnected from shifts in underlying economic prospects, raising the possibility that financial conditions may tighten more than assumed in the baseline.

The biggest driver of the projected negative global growth in 2020 is the advanced economies group – where several economies are experiencing widespread outbreaks and deploying containment measures – with a projected growth of -8% in 2020. Most economies in this group are projected to contract this year, including the United States (-8.0%), Japan (-5.8%), the United Kingdom (-10.2%), Germany (-7.8%), France (-12.5%), Italy (-12.8%), and Spain (-12.8%). These developments are expected as a result of the unprecedented high number of infections and mortality due to the pandemic in these countries. The socio-economic impact has been very severe with limited prospect of a speedy economic recovery, coupled with high rates of reinfections.

Among emerging market and developing economies (EMDEs), all countries are facing a health crisis, severe external demand shock, dramatic tightening in global financial conditions, and a plunge in commodity prices. These are already having a severe impact on economic activity in commodity exporters. Overall, the group of emerging market and developing economies is projected to contract by 3.0% in 2020. However, a rebound of 5.9% is expected in 2021, largely reflecting the rebound forecast for China (8.2%). The growth rate for the group, excluding China, is expected to be -5.0% in 2020 and 4.7% in 2021.

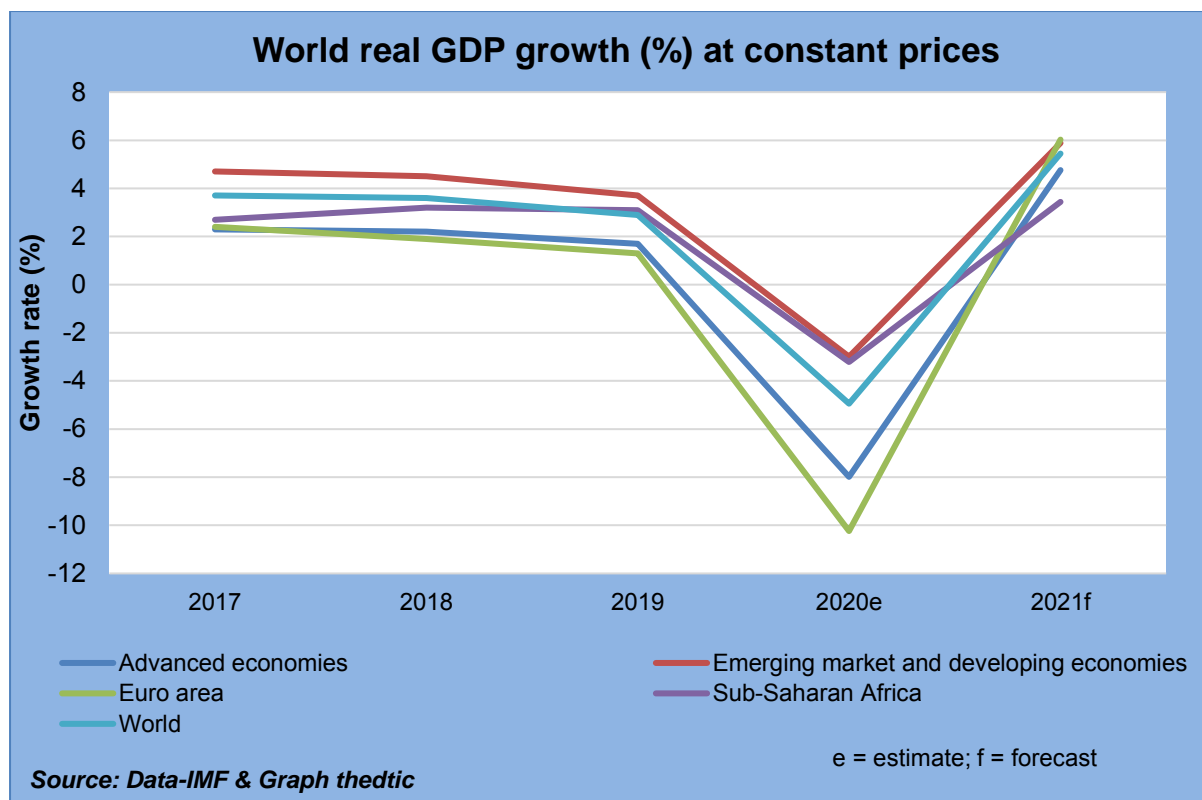

Sub-Saharan Africa is set to shrink by 3.2% in 2020, with Nigeria and South Africa declining by 5.4% and 8.0% during the same period. In 2021 the Sub-Saharan Africa region is projected to recover and record 3.4% growth while Nigeria and South Africa are projected to register growth rates of 2.6% and 3.5%, respectively.

Risks to the Outlook

Fundamental uncertainty around the evolution of the pandemic is a key factor that shapes the economic outlook and makes it difficult to determine the balance of risks. The downturn could be less severe than forecast if economic normalization proceeds faster than currently expected in areas that have reopened – for example in China, where the recovery in investment and services for May was stronger than anticipated. Medical breakthroughs with therapeutics and changes in social distancing behaviour might allow health care systems to cope better without requiring extended, stringent lockdowns. The development of a safe, effective vaccine would lift sentiment and improve growth outcomes in 2021, even if the vaccine production is not scaled up fast enough to deliver immunity by the end of 2021. More generally, changes in production, distribution, and payment systems during the pandemic could spur productivity gains.

Downside risks, however, remain significant and they include the following, amongst others:

- Outbreaks could recur in places that appear to have gone past peak infection, requiring the re-imposition of at least some containment measures.
- A more prolonged decline in activity could lead to further firm closures, surviving firms hesitating to hire jobseekers after extended unemployment spells, and unemployed workers leaving the labour force entirely.
- Financial conditions may again tighten, exposing vulnerabilities among borrowers. This could tip some economies into debt crises and even slower economic activity.
- More generally, cross-border spill-overs from weaker external demand and tighter financial conditions could further magnify the impact of country- or region-specific shocks on global growth.
- The sizable policy response following the initial sudden stop in activity may end up being prematurely withdrawn or improperly targeted due to design and implementation challenges, leading to misallocation and the dissolution of productive economic relationships.

Domestic Economic Context

Gross Domestic Product Performance

The changing global economic and political environment impacts on the South African policy landscape and planning process. The downward revision of economic growth projections for most advanced economies and some EMDEs is likely to impact heavily on the export performance of domestic industries. The demand for South African products in key markets is likely to come under pressure, potentially affecting the overall trade performance.

As shown in figure 2, real gross domestic product (GDP) has contracted since the third quarter of 2019. The contraction of the SA economy accelerated in the first quarter of 2020, as the impact of energy supply challenges and weak investor confidence led to GDP contracting by 2.0%. At industry level, the key drivers of negative growth in the first quarter of 2020 were: mining and quarrying (-21.5%); manufacturing (-8.5%); electricity, gas and water (-5.6%); construction (-4.7%); and trade (-1.2%).

All manufacturing subsectors declined in the first quarter, with the exception of the furniture subsector which grew by 2.8%. The subsectors hardest hit included the petroleum, chemical products, rubber and plastic products (-4.6%); motor vehicle, parts and accessories and other transport equipment (-4.0%); and the basic iron and steel, non-ferrous metal products, metal products and machinery.

The positive performance by agriculture (+27.8%) was a result of growth in horticultural products, animals and field crop production. This comes from a low base due to the drought that has prevailed in SA for some time. The

finance, real estate and business services recorded positive growth emanating from the financial intermediation and 'other' business services subsectors while the transport, storage and communications (+0.5%) sector managed only marginal growth in the quarter.

Despite the weak economic outlook, Government remains confident that stronger partnerships between social partners, structural reforms to the SA economy, sustained implementation of an economic recovery plan and improving global economic prospects will see South Africa returning to strong economic growth.

Figure: 2 Percentage Change in GDP From Q1 2017 – Q1 2020

Investment Performance

Gross Fixed Capital Formation (GFCF)

Real gross fixed capital formation (GFCF) contracted sharply in the first quarter of 2020, for the second consecutive quarter, figure: 3. It decreased by a marked 20.5%, following another dip of 10% (q-on-q) in the fourth quarter of 2019. The main contributors to the decrease were machinery and other equipment, transport equipment and other assets. Weak imports of machinery and other equipment and transport equipment contributed to the decrease in gross fixed capital formation.

The quarter-on-quarter slump in South Africa's domestic investment rate was driven by falling investment across public corporations (-20.9%) and private business enterprises (-25.3%). Domestic investment by the general government sector increased by 7.7% in the first quarter of 2020, after having fallen by 17.6% in the previous quarter. Nevertheless, domestic investment as a ratio of GDP has declined, from 19.4% in the third quarter of 2019 to 19% in the fourth quarter of 2019 before falling even further to 18% in the first quarter of 2020.

Figure: 3 Percentage Change in Gross Fixed Capital Formation

Foreign Direct Investment (FDI) Inflows and Outflows

In the last quarter of 2019, foreign direct investment flows to South Africa shrank for the second consecutive quarter. Foreign direct investment of R10.5 billion flowed into South Africa during the review period, following an inflow of R17.3 billion in the third quarter and an inflow of R26.3 billion in the second quarter of the same year. The fourth quarter inflow reflected foreign parent companies scaling down debt funding to South African subsidiaries. However, this was partly offset by foreign parent companies' increased equity funding of domestic subsidiaries.

Employment

Total Employment

The South African workforce increased by 0.6%, equivalent to 91 000 (year-on-year “y-on-y”) in the first quarter of 2020 compared to the first quarter of 2019. However, the economy lost 38 000 jobs in the first quarter of 2020 – taking down the total number of the employed by 0.2% (q-on-q). This is the second consecutive decline in employment in the first quarter of the year after observing increases in the first quarters of 2017 and 2018.

Of the 10 industries, only three registered q-on-q employment growth in the first quarter of 2020. These were the trade industry that expanded by 71 000 employees, followed by private households with an increase of 30 000 jobs, then the mining industry with 6 000 jobs. The remaining seven industries experienced quarterly employment losses, with the largest decline of 50 000 jobs recorded in the finance industry, 33 000 jobs in the community and social services and 21 000 in agriculture.

Compared to the first quarter of 2019, a net increase of 91 000 (y-on-y) jobs were created in the first quarter of 2020. This increase in jobs were championed by six industries – the most significant contributors being the community and social services with 185 000 new jobs, agriculture with employment creation of 27 000, mining adding 18 000 jobs and the private households posting an additional 15 000 jobs. Nevertheless, the y-on-y employment gains were counter-balanced by declines in four industries – manufacturing (-74 000), utilities (-34 000), transport (-30 000) and trade (-25 000).

The fall in employment, coupled with a significant rise in unemployment in the first quarter of 2020 resulted in an increase in unemployment rate to 30.1% in the quarter under review, from 29.1% in the previous quarter.

Figure: 4 Employments from Q1 2017 – Q1 2020

Trade Performance

State of Global Trade

The COVID-19 pandemic represents an unprecedented disruption to the global economy and world trade, as production and consumption are scaled back across the globe. According to the WTO trade outlook update for June 2020, the volume of merchandise trade shrank by 3% year-on-year in the first quarter of 2020.

The downside risks remain high although the signing of the first phase of a new trade agreement in January 2020 between the US and China after two years of tensions, is expected to provide a better outlook for global trading environment in late 2020. Looking ahead to next year, a slower-than-expected pace of economic recovery would weigh on trade growth.

Implications for domestic trade policy

Trade policy is highly aligned and integrated into the global trading system with major trading partners such as the EU in particular Britain, the US and China. This linkage to the global trading system exposes domestic trade policy to both the downward and upward risks. A stronger than anticipated deceleration in economic activity in these economies could weigh heavily on the performance of South Africa's exports to the world. Trade tensions not only have a bearing on global trade flows, but also affect production activity and investment decisions. They are also leading to trade diversion, thereby intensifying competitive forces within the global marketplace.

To mitigate the potential impact of a "no deal" Brexit, South Africa, along with Lesotho, Eswatini, Namibia, Botswana and Mozambique concluded a new Economic Partnership Agreement (EPA) with the United Kingdom (UK) that will ensure uninterrupted trade.

South Africa's trade with the world

South Africa's seasonally adjusted at annual rate trade balance with the rest of the world recorded a surplus of R87 billion in the fourth quarter of 2019. The trade surplus resulted from an increase in the value of net gold and merchandise exports, alongside a contraction in merchandise imports. The higher value of exports was boosted by both higher volumes and prices while the lower value of imports was driven by lower rand prices against the major currencies (SARB Quarterly Bulletin: December 2019).

The value of merchandise exports increased to R1.57 trillion in the fourth quarter of 2019, from R1.54 trillion in the third quarter of 2019, as the rise in manufactured and agricultural exports more than off-set the contraction in non-gold-mining exports. Manufacturing exports were buoyed by machinery and electrical equipment as well as vehicles and transport equipment along with a continued increase in international demand for locally produced vehicles. The higher value of agricultural exports reflected a sharp rise in citrus exports. South Africa's largest fruit exports were mainly destined for Europe.

In the fourth quarter of 2019, the value of imports contracted, reaching R1.47 trillion, from R1.51 trillion in third quarter of same year, due to a sharp decline in the value of mineral products in particular.

Figure: 5 SA trade with the world

Trade with Africa

Trade Performance

At the end of the fourth quarter of 2019, South Africa's exports to Africa amounted to R92.6 billion while imports from the region increased to R41 billion – resulting in a trade surplus of R41 billion. However, in the first quarter of 2020, both exports and imports fell to R79.5 billion and R37 billion, respectively.

The Southern Africa Development Community (SADC) is the most significant trading bloc for South Africa for both exports and imports, accounting for more than 70% of all South Africa's exports to Africa. Key markets in SADC are Botswana, Namibia, Mozambique, Zambia and Zimbabwe.

The trade prospects are expected to improve gradually in the medium to long term on the back of initiatives led by government. The interventions include amongst others:

- The continent-wide approval of the agreement to establish the African Continental Free Trade Area (AfCFTA) in December 2019;
- AfCFTA commitment to finalise tariff liberalisation commitments expeditiously;
- The establishment of a national committee, comprising representatives from business, labour and government, to develop action plans for the AfCFTA with the aim of identifying products South Africa could export to other African countries and the interventions necessary to realize these exports.

Figure: 5, SA trade with Africa

Medium Term Strategic Framework (2019-2024)

The implementation of 2019-2024 Medium Term Strategic Framework (MTSF) is taking place at the time when both global and domestic economies are facing a number of headwinds such as the 'trade wars'; weaknesses in global finance; and geo-political tensions. The analysis of the external environment, both economic and political,

impacts directly on South Africa's policy landscape and in particular, Government's ability to deliver on the MTSF commitments.

the dtic's commitments are captured under two priorities in the current MTSF. Priority 2: Economic Transformation and Job Creation; and Priority 7: A better Africa and World. The Re-imagined Industrial Strategy is a key element of the Priority 2 and the main intervention is the development and implementation of national priority sector Master Plans. The department will lead the implementation of the Autos, Poultry, Sugar and Retail-Clothing and Textiles Master Plans. In the current financial year, the Steel and Furniture Master Plans are prioritised for development.

In addition, the department will continue its support programmes for SEZs/Industrial parks. It will finalise the implementation plan to address the outcomes of the Competition Commission's market enquiry into data prices and engage stakeholders on a possible agreement on data prices. Regarding youth employment programmes, the department is expected to rollout programs such as the Digital Hubs, Business Centres and Innovation Hubs targeting current infrastructure in both the SEZs and Industrial Parks.

Priority 7: A better Africa and World remain critically important especially in the context of economic protectionism in the form of trade wars. The African Continental Free Trade Area which came into force on 29 May 2019 provides good opportunity for South Africa not only for exports diversification but also for playing a meaningful role in the development of African economies.

12. Internal Environment

In line with the changes and reconfiguration of the executive portfolios and departments ushered by the sixth administration, the President of South Africa pronounced the merger of the Department of Trade and Industry (**the dti**) and the Economic Development Department (EDD) to form the Department of Trade, Industry and Competition (**the dtic**). Furthermore, departments were tasked to design organisational structures that promote accountability and synergy through the National Macro-Organising of Government (NMOG) process. To give effect to the merger process, a departmental project team was established comprising officials of **the dti** and EDD. A two-phased approach was adopted, with Phase 1 focusing on the start-up structure, bringing the two departments together by transferring both departments' functions and resources to **the dtic**, with the exception of the PICC function. The PICC function and budget were transferred to the Department of Public Works and Infrastructure.

The macro start-up structure of **the dtic** was submitted to the Minister of Public Service and Administration for determination in terms of section 3(4)(b) of the Public Service Act, 1994, for the transfer of functions as indicated and concurrence in terms of Public Service Regulation 25(2)(a). Such determination and concurrence was issued, and the matching and placement of staff commenced in consultation with organised labour. The new structure of **the dtic** came into effect on 1 April 2020 and Phase 2 will ensue in the 2020/21 financial year.

To give effect to the strategic imperatives of the department of growing and transforming the economy, creating jobs and protecting consumers, workers and enterprises, it is essential to revisit the internal institutional arrangements for alignment with the strategic objectives. The Corporate Services Management Branch will initiate Phase 2 of the NMOG process to align **the dtic**'s functions, organisational structure and human resources allocation with the strategic imperatives. The alignment of **the dtic** organisational structure will contribute towards the elimination of silos and duplication, thereby streamlining business processes and optimising the utilisation of resources.

Values

The conduct of our employees is informed by **the dtic** values of Quality Relationships, Operational Excellence and Intellectual Excellence. These values are not only the glue that promotes cohesive teams, but are also the bedrock for building a high-performing department that places emphasis on caring for its employees.

Quality Relationships

The value dimension of Quality Relationships intends to create a culture and environment where people are valued and respect one another, and where teamwork and ethical conduct is promoted.

Promoting Operational Excellence

Operational excellence focuses on service delivery, with an emphasis on Batho Pele, service delivery standards and continuous improvement. The operational plans of the various branches in the department are supported by Service Delivery Improvement Plans (SDIPs) that are based on Batho Pele Service Standards.

Towards Intellectual Excellence

The department is knowledge-based and so learning, skills improvement, information management and innovation are critical for the successful delivery of departmental programmes and services.

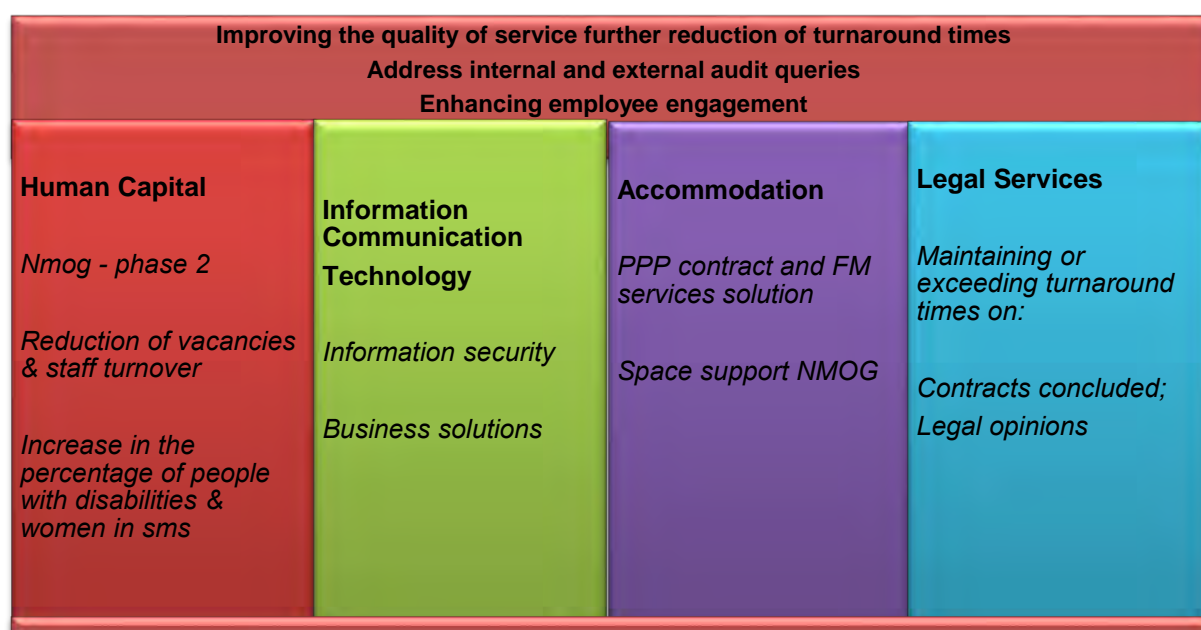

Information Management

Cyber-attacks continue to be a significant risk that could adversely affect the security of information and continuity of business operations. **the dtic** is pleased to report that as at December 2019, there were no successful cyber-attacks, although attempts had been made. This is indicative of the effective general and firewall controls. Availability of key systems averaged 99.76%.

Enabling business through office accommodation

Challenges in the Public Private Partnership (PPP) environment persisted and the department is working with all parties to attain an appropriate outcome. The independent performance audit and benchmarking project has been completed and the results were made available to the concessionaire and lender, as was necessary to enhance service delivery. Lease agreements for the three regional offices are in different phases of renegotiation/extension under the leadership of the NDPWI.

2020/21 Focal areas

Integrated approach

the dtic is responsible for 17 entities and 45 pieces of legislation, covering a substantial part of South Africa's economic policy landscape. These entities and **the dtic's** legislative mandate will be used to address South Africa's triple challenges of poverty, inequality and unemployment.

the dtic and its entities will deploy a suite of targeted incentives that seek to change business behaviour by encouraging investment in competitiveness-enhancing technology, expansion of industrial enterprises and capabilities, resource-efficient machinery and equipment, and investments that foster transformation. These investments contribute to transformation through the requirement that enterprises meet broad-based black economic empowerment (B-BBEE) minimum requirements and by virtue of the SEZ programme, which provides additional support to enterprises investing in SEZs in under-developed parts of South Africa.

In addition to incentives, the department and its entities provide a range of policy and programmatic interventions that seek to support domestic demand – through, for example, trade measures to prevent illegal imports and mandatory local procurement – as well as open access to fast-growing, export markets, particularly on the African continent and in Asia. This necessitates a more integrative approach to the manner in which work is undertaken by **the dtic**. The AfCFTA and investment portfolio will be used to drive this integrative approach.

the dtic utilises its membership of the WTO and the African Union (AU) as well as bilateral trade relations to access export markets and support the role of developing countries in an increasingly challenging trade environment.

An important although often undervalued set of economic policy tools stems from **the dtic's** responsibility to provide legislation, regulations, investigative capacity and the authority to impose appropriate measures and penalties to ensure that the business environment is regulated to serve South Africa's socio-economic needs; to protect consumers, workers and shareholders; and to ensure that firms compete with one another in a manner that encourages job creation, consumer choice and competitive pricing. These policy tools include liquor regulations that prevent liquor outlets from locating close to schools and places of worship, and the Competition Amendment Act, which gives the authorities strengthened powers to undertake market inquiries and impose corrective recommendations to ensure fair competition among enterprises of all sizes, irrespective of their location within value-chains.

The intended direct and indirect beneficiaries of **the dtic** interventions are enterprises, consumers and workers. These include enterprises that receive funding from **the dtic** to induce investment; workers whose jobs are saved or where new jobs are created due to new export opportunities or better protection of the domestic market from unfair trade competition; and consumers who are protected from business practices that exploit their lack of access to legal recourse or encourage reckless selling.

A modern developing economy is composed of complex value-chains and enterprise interdependencies. Consequently, some enterprises, workers and/or consumers may be indirect beneficiaries, for example, where a trade measure seeks to protect a domestic industry from unfair competition and in so doing creates new up or downstream market opportunities for local enterprises.

Figure 1 below provides a conceptual framework for a modern economy like South Africa and shows the linkages between different branches, entities, programmes and interventions.

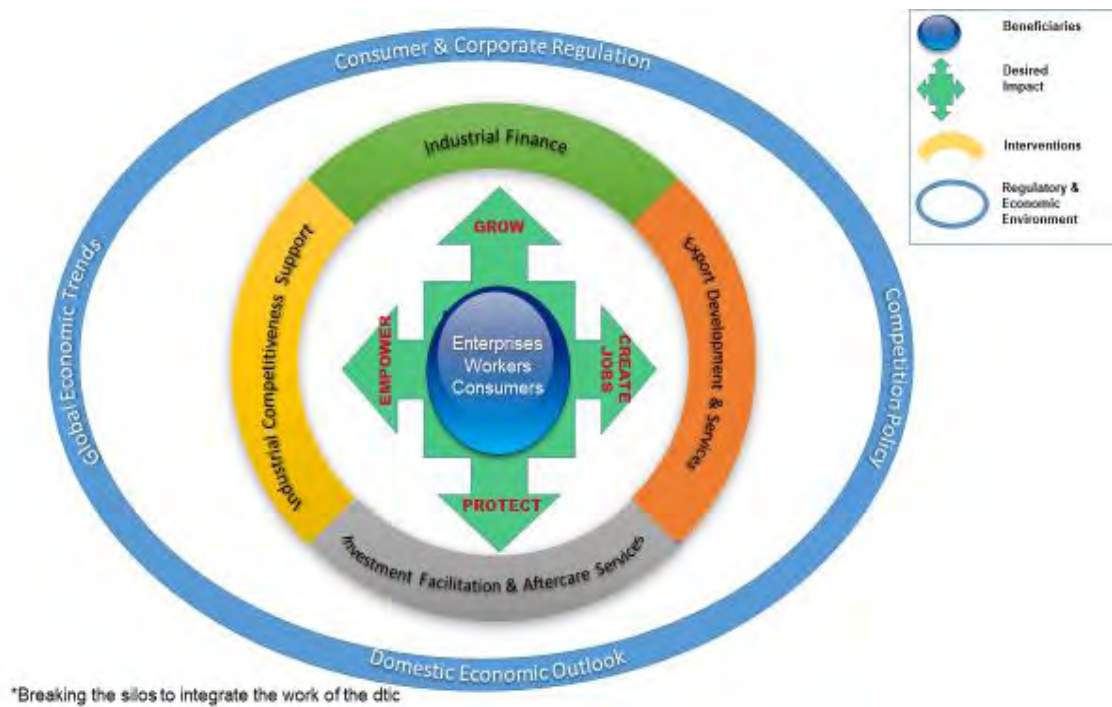

Figure 1: the dtic integrated way of working

Reducing Bureaucracy for Impact

A dedicated project will be established to develop and implement an automated system for planning and reporting compliance requirements. This will result in a reduction in the amount of time managers spend on compliance reporting, thus allowing for more concerted effort on the delivery of the core work of the department.

Part C: Measuring Our Performance

13. Institutional Programme Performance Information

13.1. Programme 1: Administration

a) Purpose

Provide strategic leadership, management and support services to the department.

b) Description of Sub-Programmes

- (i) **The Ministry** provides leadership and policy direction to **the dtic**.
- (ii) **The Office of the Director-General (ODG)** provides overall management of **the dtic's** resources.
- (iii) **Corporate Services** provides customer-centric and integrated resource solutions in human resource management, information and communication technology, legal services and facilities management.
- (iv) **Office Accommodation** is an allocation for accommodation services to **the dtic** regional offices and ensures continued maintenance service.
- (v) **Financial Management** provides support to **the dtic**, with respect to financial resource allocation and the management thereof, to aid the fulfilment of the department's goals and objectives.
- (vi) **Marketing, Communication and Media Relations** facilitates greater awareness of the department's role, increases the uptake of its products and services, and ensures that the department is portrayed positively in the media through influencing the content of media in its favour.

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Outputs	Output Indicators	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23

A report on the Implementation of the Shared Services Framework	Development of a Framework on Shared Services	-	-	-	Shared services model implementation framework submitted for approval

Explanation of planned performance over the medium-term period

The items included aim to ensure adequate human resource capacity to fulfil the mandate of the department, with a focus on quality (professionalism) and quantity (turnover and vacancy rate).

the dtic is proud of its current combined achievement of 4.0% representation of People with a Disability, which is in excess of the target of 2% set by Cabinet. Over the next five years, the target for People with a Disability was adjusted to 3.5%.

The empowerment of women in senior management positions and thus the promotion of equality in the workplace has given rise to quantified measures for achieving this goal. Through active target setting, close monitoring and reporting, the combined representation of women in SMS stands at 54% against the Cabinet target of 50% as at 31 March 2020.

To contribute positively towards the reduction of high youth unemployment and provide graduates with experiential learning, the department over the past three years appointed 204 interns through its Internship Programme. 54 interns will be appointed for a period 2 years in 2020/21 bringing the total number of interns appointed to 162 in the next 5 years. The department will continue to lead by example in the area of paying creditors within 30 days, an important measure that supports the growth of small businesses.

The department will develop a shared service framework for **the dtic** entities to leverage on the resources within the portfolio to maximise the impact of service delivery and improved cost efficiencies. This is intended to mitigate the budget reductions through improved use of resources, which may include providing an 'in-kind' set of services to agencies reporting to **the dtic**, phased in over an appropriate period.

13.2. Programme 2: Trade Policy, Negotiations and Cooperation

a) Purpose

Build an equitable global trading system that facilitates development by strengthening trade and investment links with key economies and fostering African development, including regional and continental integration and development cooperation in line with the AU Agenda 2063.

b) Description of Sub-Programmes

- (i) **International Trade Development** facilitates bilateral and multilateral trade relations and agreements.
- (ii) **African Multilateral Economic Development** facilitates multilateral African trade relations aimed at deepening regional integration.

c) Strategic considerations in current context, which will inform the allocation of Resources and expertise in the period ahead, within the outputs and performance indicators:

- (i) Develop options to fast-track the operationalisation of the AfCFTA, broadening participation and ensuring potential benefits are delivered more rapidly.
- (ii) Strengthening coordination capabilities to support trade and protect South Africa's industrial base through the work of ITAC,

Reports on output indicators will also report on progress against the matters in (c) above.

Explanation of planned performance over the medium-term period

Programme two centres on negotiating trade and investment agreements with trade partners at bilateral, regional and multilateral levels. Such negotiations require balance that reconciles South Africa's economic objectives with those of our partners. As such, the department seeks to ensure that it expands export opportunities for our priority economic sectors, while protecting domestic industrial capacity and employment in sensitive sectors.

In this way, we preserve the policy space to pursue industrial policy and development policies for national priorities. Through international trade negotiations, we seek to create opportunities in legally binding, rules-based arrangements to expand South African exports, particularly for higher value-added products that support industrial development in South Africa.

Impact of COVID-19 on work of Programme 2: Trade Policy, Negotiations and Cooperation (TPNC)

COVID-19 has disrupted the bulk of TPNC work. The work of the branch on international engagements, necessary stakeholder and constituency engagements has been reduced significantly in the short term.

Intensive work in the South African Customs Union (SACU) continued and ensured that the supply of essential medical goods and food products was not unduly impeded by border closures. At the same time, discussions on possible response measures were taken up at the G20. Engagements in BRICS also continue through digital platforms.

Under the AU, there were discussions aimed at adjusting the timeline for negotiations and the operationalisation of the AfCFTA. The COVID-19 pandemic and subsequent decisions by the AU Commission in March 2020 to suspend meetings/engagements effectively postponed negotiations under the AfCFTA. The 13th Extra-Ordinary Summit that had been proposed for 30 May 2020 to adopt the outcomes of the work has been postponed until 3 December 2020. Moreover, it is proposed that commencement of preferential trade under the AfCFTA be shifted from July 2020 to January 2021. The AU Ministers of Trade are engaging with the AU Commission to consider options for continuing work on the negotiating issues, while recognising the practical constraints for engagement among 55 member states.

All structured bilateral engagements have been postponed indefinitely. We can expect that the work intensity in TPNC will be reduced until the pandemic passes across most parts of the globe. Thereafter, however, it would be important to take up relations in very efficient ways as the South African economy will then need to benefit from the trade facilitation achievements typical of these bilateral engagements and from investment flows into the country. This will also apply to the continuous maintenance engagements related to existing preferential trade relations such as the free trade agreements with the EU, European Free Trade Association (EFTA) and the UK. Speedy commencement of all these engagements would be important to not only ensure South Africa's foothold in their agendas, but also to assist South African exporters to maintain smooth and reliable supply chains to their overseas clients, in order to maintain their market share.

The 12th World Trade Organisation Ministerial Conference (WTO MC12) was postponed, which affects the intensity of that work programme. Work does continue through virtual means.

13.3. Programme 3: Spatial Industrial Development and Economic Transformation

a) Purpose

Drive economic transformation and increase participation in industrialisation.

b) Description of Sub-Programmes

- (i) **Enterprise Competitiveness** fosters and stimulates industrialisation and structural change through the development and deployment of technologies and skills for the department's economic programmes.
- (ii) **Equity and Empowerment** promotes B-BBEE and the growth of the industrial base through the black industrialist programme.
- (iii) **Regional Industrial Development** promotes regional industrial development through policies, strategies and programmes such as SEZs and industrial parks.

Outcomes, Outputs, Performance Indicators and Targets

Explanation of planned performance over the medium-term period

The Special Economic Zones and Industrial Parks Revitalisation Programme (IPRP) aim to address industrialisation and by doing so achieve Sustainable Development Goal (SDG) 9, support other SDGs and enable employment in the country. The output indicators will provide results of measurements towards these outcomes and therefore provide reflection of how the programme aligns with national priorities and the achievement thereof.

The rollout of bulk infrastructure and the top-structures for the signed-off investment projects in the SEZs and Industrial Parks was delayed due to the lockdown resulting from the COVID-19 pandemic. **the dtic** is prioritizing the construction of those investment-led infrastructure projects to support industrialisation in these areas.

Following a new approach adopted by Cabinet, national government will be actively involved in the planning and development of SEZs and Industrial Parks. This urgent intervention is a result of limited budgets across government and the lack of requisite skills to plan, develop and manage SEZs in the provinces. The involvement of the national government will be strengthened through the creation of the National SEZ Capacity Support Unit that will be based at the IDC. This Unit will coordinate and mobilise the resources and expertise at all levels to fast-track the development of infrastructure and also assist in investment promotion.

The objectives for B-BBEE are intended to enhance participation in the mainstream economy to achieve inclusivity and sustainable economic development. The goal is to achieve the delivery objectives of Outcome 4, which is to facilitate broad-based economic participation through targeted interventions to achieve more inclusive growth, as aligned to the New Growth Path (NGP) and National Development Plan (NDP). Focus shall be on transformation by creating economic opportunities in rural and township areas using B-BBEE as well as leveraging on and attracting investment for an inclusive economic growth. This shall contribute towards ensuring that the South African economy is restructured to enable the meaningful participation of black people, women, youth, people with disabilities, and rural or underdeveloped communities in the mainstream economy in a manner that has a positive impact on employment, income redistribution, structural re-adjustment and economic growth.

13.4. Programme 4: Industrial Competitiveness and Growth

a) Purpose

Design and implement policies, strategies and programmes for the development of manufacturing and related economic sectors, and contribute to the direct and indirect creation of decent jobs, value addition and competitiveness, in both domestic and export markets.

b) Description of Sub-Programmes

- (i) **Industrial Competitiveness** develops policies, strategies and programmes to strengthen the ability of manufacturing and other value-adding sectors to create decent jobs and increase value addition and competitiveness in domestic and export markets.
- (ii) **Customised Sector Programmes** develops and implements high-impact sector strategies focused on manufacturing and other value-adding sectors to create decent jobs and increase value addition and competitiveness in domestic and export markets.

Explanation of planned performance over the medium-term period

The medium-term strategy sets out a review of previous interventions, lessons learnt and the path towards a better coordinated industrial policy. The success of industrial policy is underpinned by a collaborative approach with industry, labour and other stakeholders, prioritisation of sectors, centrality of policy to the growth strategy and, importantly, coordination at the Presidency.

The modality to operationalise the Re-imagined Industrial Strategy is the application of a master-planning process that seeks to create a shared vision between industry, government and labour. The Re-imagined Industrial Strategy envisages that the adoption of Master Plans will harness the commitment by all role-players, stakeholders and beneficiaries, and purposefully implement the actions required to fulfil the vision.

The development and deployment of comprehensive industrial policy levers to support national priority sectors such as agro-processing, gas and chemicals, tourism, automotive, steel, ICT and software, creative industries, and pharmaceuticals has been highlighted as one of the key interventions. The current global pandemic – characterised by *inter alia* significant disruptions in the supply chains, shrinking global demand, greater levels of protectionism and localisation, industry liquidity challenges, and risks to job losses – necessitates that these industrial policy levers be strengthened and targeted to cushion the industries from total collapse. The effects of the pandemic, tweaks to interventions and deployment of the appropriate policy instruments will be captured in the various sector-specific Master Plans and the implementation progress reports.

13.5. Programme 5: Consumer and Corporate Regulation

a) Purpose

Develop and implement coherent, predictable and transparent regulatory solutions that facilitate easy access to redress and efficient regulation for economic citizens.

b) Description of Sub-Programmes

- (i) **Policy and Legislative Development** develops policies, laws and regulatory frameworks, and drafts legislation.
- (ii) **Enforcement and Compliance** conducts trends analyses and socioeconomic impact assessments for policies and legislation and market surveys; implements legislation on matters pertaining to liquor; monitors and evaluates the effectiveness of regulation; and oversees the performance of the department's regulatory entities (Companies and Intellectual Property Commission, Companies Tribunal, National Consumer Commission, National Consumer Tribunal, National Credit Regulator, National Gambling Board and National Lotteries Commission).
- (iii) **Regulatory Services** oversees the development of policies, laws and regulatory frameworks and the implementation of the branch mandate, and provides strategic support to branch business units, respectively, in line with legislation and applicable governance.

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Outputs	Output Indicators	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Improved regulatory environment conducive for consumers and companies as well as providing access to redress. (From the financial year 2021/22, focus will include the review of legislation and other priority legislation of the department beyond the consumer and corporate legislation.)

Quarterly Milestones for 2020/21

Output Indicators	Annual Target	Q1	Q2	Q3	Q4
Number of progress reports on the development or review of legislation developed for Minister's approval	4 progress reports on the development or review of the Companies, Liquor and National Gambling legislation developed for Minister's approval	1 progress reports on the development or review of the Companies, Liquor and National Gambling legislation developed for Minister's approval	1 progress reports on the development or review of the Companies, Liquor and National Gambling legislation developed for Minister's approval	1 progress reports on the development or review of the Companies, Liquor and National Gambling legislation developed for Minister's approval	1 progress reports on the development or review of the Companies, Liquor and National Gambling legislation for Minister's approval

Explanation of planned performance over the medium term period

The Consumer and Corporate Regulation branch aims to promote faster and more inclusive economic growth by focusing on reviewing legislation in the areas of companies, credit, copyright, performers' protection and gambling; the development of policies to close gaps and unlock growth opportunities in the areas of companies, gambling, liquor, credit, consumer protection and lotteries; and regulations on the reviewed legislation that include the National Credit Amendment Act.

The rationale is to ensure improved compliance and more effective enforcement of consumer and corporate legislation to increase investor confidence; reducing regulatory burden to lower the costs of doing business; and to ensure access to redress to citizens by strengthening legislation and implementation in consumer protection.

13.6. Programme 6: Industrial Financing

a) Purpose

Stimulate and facilitate the development of sustainable and competitive enterprises through the efficient provision of effective and accessible incentive measures that support national priorities.

b) Description of Sub-Programmes

- (i) **Broadening Participation and Industrial Innovation incentives** provide incentive programmes that promote broader participation in the mainstream economy of businesses owned by individuals from historically disadvantaged communities and marginalised regions.
- (i) **Manufacturing incentives** provide incentives to promote additional investment in the manufacturing sector. The manufacturing investment cluster comprises the Manufacturing Competitive Enhancement Programme (MCEP), the Capital Projects Feasibility Programme (CPFP), the Automotive Investment Scheme (AIS), the Export Marketing and Investment Assistance (EMIA) scheme, the Sector-Specific Assistance Scheme (SSAS), and the Section 12I Tax incentive scheme.
- (ii) **Services Investment incentives** provide incentive programmes that promote increased investment and job creation in the services sector. Programmes include the global Business Process Services (BPS) programme, and the Film and Television Production Incentive Support Programme for South African and foreign productions.
- (iii) **Infrastructure Investment Support** provides grants for two industrial infrastructure initiatives, namely SEZs and the Critical Infrastructure Programme (CIP), which are aim to enhance infrastructure and industrial development, and increase investment, and export of value-added commodities.
- (iv) **Product and Systems Development** reviews, monitors and develops incentive programmes to support the industrial strategy, and develops sector strategies to address market failures.
- (v) **Strategic Partnership and Customer Care** facilitates access to targeted enterprises by reviewing the success of incentive schemes and improving them where possible.

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Outputs	Output Indicators	Annual Targets

Explanation of planned performance over the medium-term period

The Industrial Financing branch is mandated to grow sustainable, competitive enterprises through accessible industrial finance that support national priorities. This will be achieved through evidence-based designing, administering, monitoring and evaluation of manufacturing incentive programmes based on national priorities in labour-intensive sectors, as outlined in the MTSF. These targets will be revised should the budget in cash and tax benefits be increased over the medium term. Furthermore, the branch will strengthen partnerships to increase financing to accelerate growth of the manufacturing and internationally traded services sectors.

13.7. Programme 7: Export Development, Promotion and Outward Investments

a) Purpose

Increase export capacity and support direct investment flows through targeted strategies and an effectively managed network of foreign trade and investment offices.

b) Description of Sub-Programmes

- (i) **Trade Invest Africa** facilitates deeper and broader bilateral African trade and investment relations with African economies, and supports the deepening of regional integration through an outward investment-led trade approach.
- (ii) **Export Promotion and Marketing** promotes exports of South African value-added goods and services to increase market share in targeted high-growth markets and sustain market share in traditional markets.
- (iii) **Trade and Investment Foreign Services Management Unit** promotes trade and investment, and administers and provides corporate services to the department's foreign office network of foreign economic representatives to enable South African businesses to access global markets.
- (iv) **Export Development and Support** manages the National Exporter Development Programme, which is designed to contribute to positioning South Africa as a reliable trade partner, and to improve and expand the country's exporter base.

c) The Programme will refocus its work to more actively secure outcomes in the following areas:

- (i) Strengthening exports to the rest of the African continent
- (ii) Identifying and supporting new export markets (outside of Africa) and new products for export.

Progress in relation to this will be reported for each of the indicators set out below.

Outcomes, Outputs, Performance Indicators and Targets

Explanation of planned performance over the medium-term period

The branch's main contribution is that of enhancing South Africa's export competitiveness, increasing South Africa's exporter base, and promoting trade and the economic footprint in the rest of Africa, as well as developing a sustainable long-term market-positioning and international trade and investment profile for the country. In this context, Export Development, Promotion and Outward Investments will continue to leverage market opportunities to benefit South Africa's economic development priorities in targeted markets to ensure that South Africa's exports to conventional markets stabilise and ensure higher export growth to emerging markets. The mandate of promoting the exports of value-added goods and services, within the priority sectors, with a view to broadening the export base, anchors the branch's work as articulated in the Integrated National Export Strategy (INES). In this regard, a compact and more nuanced INES will be launched. The reviewed INES will focus on four pillars, which include: 1) the enabling environment and global competitiveness; 2) increasing the demand for South African goods and services through market diversification; 3) broadening the exporter base through the National Exporter Development Programme (NEDP); and 4) strengthening strategic export-promotion mechanisms through enhancing South Africa's value proposition.

Integrated Approach – AfCFTA

The AfCFTA offers South Africa unique access to one of the fastest growing regions in the world, and positions the continent to begin developing globally connected regional value chains that will drive Africa's industrialisation and development. Trading under the AfCFTA will commence on 1 July 2020, but realising the potential of the agreement will require a sustained, coordinated effort to overcome barriers and develop joint productive structures across the continent.

the dtic's integrated approach recognises the multi-faceted demands of Africa's regional integration and develops wide-ranging coordination on key policy levers that can unlock opportunities on the continent. Under a revised Africa strategy, **the dtic** will take a whole-of-government approach to mobilising South African firms on the continent, coordinating South Africa's participation in catalytic investment projects, supporting investors seeking a gateway to Africa, and resolving barriers to trade. Partnerships with development finance institutions and state-owned enterprises will unlock crucial trade and investment finance, while new partnership models for cooperation with regional neighbours will act as a channel for more focused and practical bilateral engagements.

13.8. Programme 8: Inward Investment Attraction, Facilitation and Aftercare

a) Purpose

Support foreign direct investment flows and promote domestic investment by providing a one-stop shop for investment promotion, investor facilitation and aftercare support for investors.

b) Description of Sub-Programmes

- (i) **Investment Promotion** facilitates an increase in the quality and quantity of foreign direct investment, and domestic and outward investment by providing investment attraction, targeted lead generation and recruitment support.
- (ii) **Investment and Interdepartmental Clearing House** promotes and facilitates investment and provides support services as the investment and interdepartmental clearing house. This sub-programme also provides a specialist advisory service and fast-tracks and unblocks processes and reduces bureaucratic red tape for investors.
- (iii) **Investor Support and Aftercare** provides specialist advisory services through research, information marketing, aftercare and policy advocacy to facilitate new investment, and retain and expand existing investment.

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Outputs	Output Indicators	Annual Targets

Explanation of planned performance over the medium-term period

The branch Inward Investment Attraction, Facilitation and Aftercare will develop a focused investment promotion drive in support of the President's Investment Mobilisation drive over a five-year period of \$100 billion. The branch will further coordinate the annual South African Investment Conference by developing investment projects in the pipeline of investment announcements. It will support the newly established Investment and Infrastructure Office in the Presidency and work with the Presidential Envoys in attracting and facilitating investment.

Given the current domestic and international global economy, the branch will endeavour to mobilise R250 billion per year in domestic and foreign direct investment over the five-year reporting period.

The branch will strengthen its investment facilitation service to fast-track and unblock investment impediments to retain, expand existing and attract new investment. As part of the Aftercare the branch will endeavour to implement the commitments of projects announced at the 2018 and 2019 South African Investment Conference. It will also continue with the rollout of the One Stop Shops in provinces to support and capacitate investment facilitation.

It will further champion investment climate reform to improve the ease of doing business in South Africa and enhance the services of the Bizportal rolling out to citizens of South Africa.

13.9. Programme 9: Competition Policy and Economic Planning

a) Purpose

Develop and roll out policy interventions that promote competition issues, through effective economic planning, spatial implementation and aligned investment and development policy tools.

b) Description of Sub-Programmes

- (i) **Economic Planning** develops coherent economic plans and promotes economic planning by organs of state.
- (ii) **Spatial Economic Development Action Plans** promote spatial economic development.
- (iii) **Investment and Development** promotes public and private investment for development.
- (iv) **Provincial Economic Coordination** promotes the coherence of provincial economic development plans and other organs of state to ensure alignment with national plans or legislation.
- (v) **Competition Oversight** provides support to the Minister to carry out statutory responsibilities as required in terms of competition legislation.
- (vi) **Economic Regulatory Bodies** promote synergy between economic development policy of government and the functioning of certain economic regulators.
- (vii) **Development Finance Institutions** promote synergy between government's economic development policies and the functioning of associated financial institutions.
- (viii) **Sector and Workplace Dialogue and Capacity Building** promotes consensus at the sector and workplace levels, and builds capacity for social partners.
- (ix) **Market Inquiries, Mergers and Acquisitions, and Abuse of Dominance** participates in market inquiries, applications regarding mergers and acquisitions, and cases related to cartels, collusion and abuse of market dominance

Outcomes, Outputs, Performance Indicators and Targets

Number of analysis reports on public interest matters	4	1	1	1	1
Number of reports on coordinated actions in implementing competition policy commitments, recommendations and orders	4	1	1	1	1

Explanation of planned performance over the medium-term period

A total of 60 products are planned in the medium term. This branch aims to ensure the development and roll-out of competition policy interventions that promote competition and development within the economy. Towards that purpose, there are three work streams that will structure the working approach. The first is competition oversight, the second market inquiries, mergers and acquisitions, and abuse of dominance, and the third competition policy implementation.

Stakeholder support to the department includes the competition authorities, various government departments and other entities relevant to the content of the competition policy issues under consideration.

The MTSF requires **the dtic** to deliver on initiating one new market inquiry and implementation of recommendations of one concluded market inquiry per annum over the MTEF period. **the dtic** will initiate one inquiry as part of the products under the output indicator “*number of analysis reports on public interest matters*” in Quarter 3 2020/21. The implementation of recommendations of one concluded market inquiry will be delivered under the output indicator “reports on coordinated actions in implementing competition policy commitments, recommendations and orders” in Quarter 4 2020/21. The achievement of these specific quarterly targets is subject to the confines imposed by the COVID-19 national disaster declaration and regulations.

The declaration of the COVID-19 national disaster necessitated a re-focus of content work to three key areas, during the 2020/21 financial year:

1. Supporting regulatory work with regard to preventing unfair pricing and abuse of dominance;
2. Closer scrutiny of mergers and acquisitions in relation to strategic considerations; and
3. Protection of public interest commitments made in the past.

Progress in relation to these three areas will be contained in reports to the Ministry.

13.10. Programme 10: Economic Research and Coordination

a) Purpose

Develop and roll out legislative processes to facilitate an inclusive economy through interventions to increase competitiveness in the economy.

b) Description of Sub-Programmes

The branch provides socio-economic research support to the rest of the Department. This includes macro-economic, micro-economic and sectoral research and economic modelling to inform economic policy development. This research and policy analysis seeks to identify potential strategic threats and opportunities, develop appropriate mitigation measures for the threats, and support the development of interventions to unlock the opportunities.

- (i) **Economic Research and Policy Coordination** manages economic research and policy coordination.
- (ii) **Macro-Economic Policy** evaluates and develops macro-economic policy options to promote decent work outcomes.
- (iii) **Microeconomic Policy** evaluates and develops microeconomic policy options to promote decent work outcomes.
- (iv) **Growth Path and Creation of Decent Work** develops growth path options for South Africa and fosters the creation of decent work.
- (v) **Productivity, Entrepreneurship and Innovation** promotes productivity, entrepreneurship and innovation.

This work will focus more actively on supporting and enhancing the core outputs of Programme 2 to 9 above.

Outcomes, Outputs, Performance Indicators and Targets

Number of research reports produced	6	1	2	2	1

Explanation of planned performance over the medium-term period

A total of 50 major policy and research studies are planned in the medium term. The branch seeks to understand and propose policy options through careful socio-economic research and policy assessment to facilitate inclusive growth with impacts at local, district, metro, provincial and national level. Socio-economic research, policy assessments and interventions will be developed through stakeholder dialogue with social partners.

14. Information Technology Plan (2019/2024)

The department has developed a five-year Information and Communications Technology (ICT) strategic plan, which is supportive of the department's objectives and government outcomes. It provides key insight into the current state of ICT in the department and paves a definitive path on how to achieve the desired future state driven by the principle of digital transformation.

ICT Objectives

The departmental ICT plan is informed by the following objectives:

- to provide agile ICT solutions that address business priorities;
- to provide information security, ICT service continuity and efficiency;
- to provide ICT enabled capabilities for improved information management; and
- to direct OCIO and business on ICT compliance requirements.

ICT Strategic Framework Components

The ICT Plan is built on four pillars: digital transformation; next-generation infrastructure; customer experience and service delivery; and resource management.

- **Digital transformation:** The process to exploit the latest digital technologies and practices to create a robust new digital business model (digitally transform **the dtic**). The focus is on digital government platforms; mobile apps; data protection; process automation; data collection, analytics and management; business intelligence; integrated performance management; and IoT.
- **Next-generation infrastructure:** The implementation of ICT solutions for cloud, security, disaster recovery and business continuity.
- **Customer experience and service delivery:** To improve user experience of ICT and the way they interact with it. The focus is to improve multi-channel services and customer fulfilments; provide integrated solutions; enable streamlined digital customer experience; improved connectivity and accessibility; flexible business ICT systems; and strengthened partnerships.
- **Resource management:** The purpose of resource management is to ensure effective management of ICT resources and investments; maximised benefits through effective governance, planning and management processes; and delivery of sustainable ICT services.

ICT Offerings

The offerings that will be provided to employees, economic citizens and **the dtic's** public entities on **the dtic** Campus include but are not limited to:

- Online incentive system: Phases 1, 2 and 3 implemented
- Modernised **the dtic** portal: Modernised and consolidated portal implemented

- NLA implementation: Phases 4, 5 and 6 implemented
- Online permit solution: Management and issuing of permits
- Information management: Information Governance implemented as per plan
- Digital business transformation: Business Intelligence, Internet of Things (IoT), Cloud
- ICT infrastructure optimisation
- Microsoft migration: Migrated from Novell to Microsoft platform
- Cyber Security: Expand and improve on current cyber and information security programme
- New network design implemented: New network implemented

Strategic Focus Areas 2020/21

The Strategic ICT focus areas for 2020/21 are:

- Online incentive system: Phases 1, 2 and 3 implemented
- Business intelligence
- Microsoft migration: Migrated from Novell to Microsoft platform

15. Key Strategic Risks

The coronavirus, an external shock described by the WHO as a pandemic, demonstrates its potential global impact and the interdependence of the South African economy with the rest of the world. The South African government has swiftly responded to the virus, coordinated through the establishment of the National Coronavirus Command Council (NCCC). A national lockdown was declared on 27 March 2020 and this has imposed short-term economic hardship across the breadth of the economy. This lockdown was required to stop the exponential spread of COVID-19 and consequent loss of life. **the dtic** is at the forefront of the development of mitigation strategies to minimise the impact of this virus on the South African economy.

Key risks from the pandemic

Key Risk	Risk Mitigation
Investor State Dispute Settlement (ISDS) against the government arising from Bilateral Investment Treaties (BITS), due to government measures during COVID-19 and post-recovery	<ul style="list-style-type: none"> Possible support call for complete moratorium on all ISDS claims brought by investors against governments Possible support call for permanent restriction on all arbitration claims related to government measures targeting health, economic and social dimensions of the pandemic and its effects.
Reduced participation of small and medium sized companies in the economy – closures, little/lesser opportunities in value-chains	<ul style="list-style-type: none"> Become big supplier of food and PPEs Use SEZs to be hubs of production Enhance regional value chains in Africa
Major increase in business rescue, liquidations and job losses	If Branch are considering a blended financial offering considering other offerings, like interest-free loans
FDI in strategic sectors may pose risk to national security, national interest and public as SA does not have a general FDI screening mechanism	Possible Amendment to Protection of Investment Act (2105) by TPNC Branch that enables the establishment of FDI screening mechanism
Increased merger activities – distressed companies being taken over (impact on jobs) and increase in market concentration – companies closing	Engage National Treasury for additional funding for the support to distressed companies.

Outcome	Key Risk	Risk Mitigation
Increased intra-Africa trade to support Africa regional development	Lack of commitments made by countries and the non-adherence to the commitments made for implementation	Liaise with NEDLAC and Labour to get their buy in
Increased and enhanced instruments for spatial development of targeted regions and economic transformation (designation)	Non-compliant applications resulting in non-designation	the dtic to actively monitor compliance with localisation measures
Increased industrialisation through the development of Master Plans in	Non-delivery of commitments from the Industry	Ministerial engagements with industry to unblock and fast-track

Outcome	Key Risk	Risk Mitigation
National Priority sectors		commitments
Increased localisation through the designation of products	Perpetual dependence on imports and the lack of creating jobs	Identification of public tenders for products not locally produced and facilitation of increase in number of functional small businesses and/or new entrants into priority sectors
Increased accessible industrial finance measures to support investment in priority sectors in line with approved Master Plans	Inability to effect the industrial financing mandate	Prioritisation of incentive schemes
Promote the growth of exports in the economy as a generator	Inability to promote South African products and penetrate foreign markets	Integrate the value chain support to Private sector and promotions at targeted market
Increased strategic investments	Difficulty in attracting investors	Require policy certainty and clarity
Policy tools and implementation strategies which contribute to an efficient, competitive economic environment, balancing the interests of workers, owners and consumers and focused on economic development	Inadequate integration of provisions of the Competition Act	Supporting the coordination of initiatives to be implemented at local economies and Integration of competition targets and interventions required by the Competitions Act, in programs of the dtic

16. Public Entities

Name of Public Entity	Mandate	Outcomes	Annual Budget (2020/21)	
<p>Companies and Intellectual Property Commission (CIPC)</p>  <p>Companies and Intellectual Property Commission a member of the dti group</p>	Companies Act, 2008 (Act No. 71 of 2008), as amended	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	0
			Own generated Income	615,848,000
			Total revenue	615,848,000
<p>Export Credit Insurance Corporation (ECIC)</p> 	Export Credit and Foreign Investments Insurance Act, 1957 (Act No. 78 of 1957)	Promote the growth of exports in the economy as a generator of jobs and contributor to GDP growth	Government grant	162,710,000
			Own generated Income	770,911,000
			Total revenue	933,621,000
<p>National Consumer Commission (NCC)</p>  <p>NATIONAL CONSUMER COMMISSION a member of the dti group</p>	Consumer Protection Act, 2008 (Act No. 68 of 2008)	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	54,346,000
			Own generated Income	1,900,000
			Total revenue	56,246,000
<p>National Consumer Tribunal (NCT)</p> 	National Credit Act, 2005 (Act No. 34 of 2005), as amended	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	48,739,000
			Own generated Income	11,290,645
			Total revenue	60,029,645
<p>Companies Tribunal (CT)</p>  <p>Companies Tribunal a member of the dti group</p>	Companies Act, 2008 (Act No. 71 of 2008), as amended	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	16,167,000
			Own generated Income	0
			Total revenue	16,167,000

Name of Public Entity	Mandate	Outcomes	Annual Budget (2020/21)	
National Credit Regulator (NCR)  National Credit Regulator	National Credit Act, 2005 (Act No. 34 of 2005), as amended	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	72,981,000
			Own generated Income	86,531,402
			Total revenue	159,512,402
National Empowerment Fund (NEF)  National Empowerment Fund Growing Black Economic Participation	National Empowerment Fund Act, 1995 (Act No. 105 of 1995)	Increased and enhanced instruments for spatial development of targeted regions and economic transformation	Government grant	0
			Own generated Income	260,691,186
			Total revenue	260,691,186
National Gambling Board (NGB)  National Gambling Board South Africa a member of the dti group	National Gambling Act, 2004 (Act No. 7 of 2004)	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	31,090,000
			Own generated Income	0
			Total revenue	31,090,000
National Lotteries Commission (NLC)  National Lotteries Commission a member of the dti group	National Lotteries Act, 1997 (Act No. 57 of 1997)	Improved regulatory environment conducive for consumers and companies as well as providing access to redress	Government grant	0
			Own generated Income	1,433,000,000
			Total revenue	1,433,000,000
National Metrology Institute of South Africa (NMISA)  Your Measure of Excellence	Measurement Units and Measurement Standards Act, 2006 (Act No. 18 of 2006)	Increased industrialisation through the development of Master Plans in National Priority sectors	Government grant	225,635,000
			Operation	105,894,000
			Infrastructure	119,741,000
			Own generated Income	18,359,680
			Total revenue	243,994,680
National Regulator for Compulsory Specifications (NRCS) 	National Regulator for Compulsory Specifications Act, 2008 (Act No. 5 of 2008)	Increased industrialisation through the development of Master Plans in National Priority sectors	Government grant	127,932,000
			Own generated Income	236,328,575
			Total revenue	364,260,575

Name of Public Entity	Mandate	Outcomes	Annual Budget (2020/21)	
South African Bureau of Standards (SABS) 	Standards Act, 2008 (Act No. 8 of 2008)	Increased industrialisation through the development of Master Plans in National Priority sectors	Government grant	254,571,000
			Own generated Income	459,499,000
			Total revenue	714,070,000
South African National Accreditation System (SANAS) 	Accreditation for Conformity Assessment, Calibration and Good Laboratory Practice Act, 2006 (Act No. 19 of 2006)	Increased industrialisation through the development of Master Plans in National Priority sectors	Government grant	29,032,000
			Own generated Income	76,532,847
			Total revenue	105,564,847
The Competition Commission 	Competition Act, 1998 (Act No. 89 of 1998)	It investigates mergers and/ or anti-competitive conduct and reflects its findings to the Competition Tribunal for a decision	Government grant	294,093,000
			Own generated Income	32,929,593
			Total revenue	327,022,593
The Competition Tribunal 	The Competition Amendment Act (Act No. 18 of 2018)	Adjudicates on mergers and prohibited practice cases that involve anti-competitive outcomes achieved either through co-ordinated conduct between competing firms or through unilateral conduct by a dominant firm	Government grant	33,176,000
			Own generated Income	10,503,471
			Total Revenue	43,679,471
The Industrial Development Corporation (IDC) 	The Industrial Development Corporation Act, 1940 (Act 22 of 1940)	Steel Development Fund: to finance initiatives, which directly address steel competitiveness issues Tirisano fund contributes to the transformation of the construction industry through the development and promotion of construction firms owned	Government grant	0
			Own generated Income	17,612,000,000
			Total revenue	17,612,000,000
		(IDC also manages the Steel Development Fund, Tirisano Fund, Clothing and Textile Programme and the loan component of the Manufacturing Competitiveness Enhancement Programme)		

Name of Public Entity	Mandate	Outcomes	Annual Budget (2020/21)	
		and managed by black people		
The International Trade Administration Commission (ITAC) 	The International Trade Administration Act, 2002 (Act No. 71 of 202)	Creation of fair trade conditions that will boost South Africa's economic development and growth. ITAC comprises three core business units, namely Tariff Investigations, Trade Remedy Investigations and Import and Export Control	Government grant Own generated Income Total revenue	99,685,000 1,516,000 101,201,000

17. Public Private Partnerships

the dtic has a PPP agreement for office accommodation in operation for a period of 25 years. The agreement commenced in August 2003, and provides for the designing, financing, building, operating/maintaining and transferring of **the dtic's** campus. This fully serviced office accommodation is provided to **the dtic** and two other government departments, as well as some public entities located on the campus. As part of the Public-Private Partnership (PPP) the concessionaire will, for the duration of the contract period, own and maintain assets such as the equipment, buildings, improvements on the land and the majority of the furniture. Departmental assets excluded from this agreement include departmental vehicles, computer equipment and certain furniture items such as may be in the regional offices.

the dti terminated its efforts to integrate Block G into the current PPP agreement as the project proved not to meet the requirements of National Treasury Regulation 16 which outlines the procurement requirements. Further to that, an independent Performance Audit and Benchmarking project was embarked upon. The results indicate under-performance by the concessionaire and this was independently confirmed by the lender's technical advisory team. A process is underway to determine the most appropriate method of addressing the challenges.

Name of PPP	Purpose	Outputs	Current value of agreement (R thousand)	Date when agreement expires
the dti campus PPP	Fully serviced office accommodation for the dti	Design, finance, build, operate and transfer of the dti campus	870 000 (NPV at financial close)	August 2028

Part E: Technical Indicator Descriptions (TIDs)

Programme 1: Administration

Indicator Title	Percentage (%) of People with a Disability employed
Definition	The percentage (%) of People with Disability employed in the Department
Source of data	PERSAL
Method of Calculation or Assessment	$(\text{Total no of People with Disabilities employed}) \div (\text{Total establishment}) \times 100$
Means of verification	Report
Assumptions	PERSAL
Disaggregation of Beneficiaries (where applicable)	3.5% over a period of 5 years
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly and annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	Percentage (%) of Women at Senior Management Service level
Definition	The percentage (%) of Women employed on SMS level
Source of data	PERSAL
Method of Calculation or Assessment	$(\text{Total no of Women employed on SMS level}) \div (\text{Total establishment}) \times 100$
Means of verification	Report
Assumptions	PERSAL
Disaggregation of Beneficiaries (where applicable)	50% over a period of 5 years
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly and annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	Number (No.) of Interns appointed
Definition	Total number of Interns appointed in the Department
Source of data	PERSAL
Method of Calculation or Assessment	Adding the number of all Interns appointed
Means of verification	Report
Assumptions	PERSAL
Disaggregation of Beneficiaries (where applicable)	54 Interns over 2 years (duration of the contract)
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple Count
Reporting Cycle	Quarterly and annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	Percentage (%) of eligible creditors payments processed within legal timeframes
Definition	It is the percentage of creditors payments processed within the legal timeframes as required by PFMA. It tracks the department's commitment to the set timeframes as per the requirements of the PFMA
Source of data	BAS
Method of Calculation or Assessment	Date logged at help desk until date authorized on BAS system
Means of verification	Monthly reports on payment statistics
Assumptions	Cumulative
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly and Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	Directorate: Financial Accounting

Indicator Title	Percentage (%) implementation of COVID-19 Plan
Definition	Percentage(%) implementation of the COVID-19 Plan
Source of data	COVID-19 Implementation Plan
Method of Calculation or Assessment	(No. of action items per Covid-19 plan where compliance has been met)/ (Total no. action items per Covid-19 plan against which compliance must be demonstrated) x 100
Means of verification	Implementation Plan Report
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	100% compliance annually over 5 years
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Monthly, Quarterly and annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	Number (No.) of COVID-19 Reports produced
Definition	Status reports on implementation of COVID-19 Plan
Source of data	COVID-19 Implementation Plan
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Monthly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	Percentage % Implementation of the NMOG Phase 2 Plan
Definition	Percentage(%) implementation of the NMOG Phase 2 Plan
Source of data	NMOG Phase 2 Implementation Plan
Method of Calculation or Assessment	(No. of action items per NMOG Phase 2 Plan where compliance has been met)/ (Total no. action items per NMOG Phase 2 plan against which compliance must be demonstrated) x 100
Means of verification	Implementation Plan Report
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	30% compliance in 2020/21 and 70% compliance in 2021/22
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly and annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Corporate Management Services Branch

Indicator Title	A report on the Implementation of the Shared Services Framework
Definition	Development of a Framework on the Shared Services Model approved by the Director General of the dtic, the aim of which is to aimed to assist in increased efficiencies and effectiveness within the dtic portfolio of entities
Source of data	Report on the Shared service implementation framework Minutes of the meetings held with relevant stakeholders Engagements with the dtic portfolio of entities / attendance register
Method of Calculation or Assessment	Simple count
Means of verification	Framework on the Shared Services Model approved by the Director General of the dtic
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	None
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	Directorate: Entities internal audit and forensics

Programme 2: Trade Policy, Negotiations and Cooperation

Indicator Title	Number of status reports on regional economic integration
Definition	Report on regional economic integration achieved through the following negotiations TFTA and AfCFTA. Status reports on AfCFTA will include: (1) progress on tariff elimination following the finalisation of schedule of tariff concessions with negotiating parties and (2) progress on trade in services negotiations in priority sectors through the finalisation of schedules of specific commitments
Source of data	RSA negotiating position reports
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	(1) Implementation of AfCFTA is 1 July 2020 (2) Tariff reductions are on the basis of reciprocity (3) 90% of tariff lines will be cut by 20% in year one. If this is not done, then a further cut by 20% in the following years will not take place. (4) 90% of tariff lines will be cut by 20% over a 5 year period.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly (TFTA) and Quarterly (AfCFTA)
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: TPNC

Indicator Title	Number of status reports on implementation of trade agreements
Definition	Status reports on implementation of (1) SADC-EU Economic Partnership Agreement (2) SACU-Mozambique Economic Partnership Agreement with the UK (3) AGOA
Source of data	Approved biannual implementation status reports
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi-Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: TPNC

Indicator Title	Number of status reports on engagements in BRICS, G20 and the WTO
Definition	Report on engagements in Global Fora (BRICS, G20 and the WTO)
Source of data	Approved bi-annual reports
Method of Calculation or Assessment	Simple count
Assumptions	None
Means of verification	Reports
Disaggregation of Beneficiaries (where applicable)	N/A

Indicator Title	Number of status reports on engagements in BRICS, G20 and the WTO
applicable)	
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi-Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: TPNC

Programme 3: Spatial Industrial Development and Economic Transformation

Indicator Title	Number of implementation reports on SEZ and the National SEZ Capacity Support (PMU) submitted to Minister
Definition	Report on implementation of SEZ Act and the National SEZ Capacity Support (PMU) prepared
Source of data	Minutes of the meetings. Engagements with SEZs / attendance register / exchange of letters and emails. Consolidated SEZs entity reports.
Method of Calculation or Assessment	Simple Count
Means of verification	Report
Assumptions	Increase in the number of SEZs designated.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi-Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Spatial Industrial Development and Economic Transformation

Indicator Title	Number of implementation reports on the Industrial Parks submitted to Minister
Definition	Report on the implementation of Industrial Parks prepared
Source of data	Quarterly reports from implementing partners
Method of Calculation	Simple Count
Means of verification	Report
Assumptions	Advance on the phase of implementation
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative (Year-End)
Reporting Cycle	Bi-annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Spatial Industrial Development and Economic Transformation

Indicator Title	Number of implementation reports on the economic transformation submitted to the Minister.
Definition	Implementation on the B-BBEE Amendment Act, Regulation and its implementing tool (BI).
Source of data	Quarterly register of Stakeholder Engagements. CIPC Quarterly Report. BIs formal communication to potential markets (letters and email) markets (letters and email)
Method of Calculation or Assessment	Simple count
Means of verification	Based on report compiled or received from implementing partners. Minutes from the meetings, attendance register, formal communication to potential markets (letters and email). Based on report compiled or received from implementing partners
Assumptions	Increase in the number of Black people participating in the economy

Indicator Title	Number of implementation reports on the economic transformation submitted to the Minister.
Disaggregation of Beneficiaries (where applicable)	Report to have information on Designated Groups (Women, Youth and People with disabilities)
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi-Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Spatial Industrial Development and Economic Transformation

Indicator Title	Number of interventions to support BIs in the manufacturing Sectors (non-financial)
Definition	Implement BI programmes through non-financial support provided to BIs in Manufacturing sectors in terms of access to markets, technical support and capacity building.
Source of data	Minutes from the meetings, attendance register, formal communication to potential markets (letters and email)
Method of Calculation or Assessment	Simple Count
Means of verification	Minutes from the meetings, attendance register, formal communication to potential markets (letters and email)
Assumptions	Increase in the number of Black Industrialists supported
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG

Programme 4: Industrial Competitiveness and Growth

Indicator Title	Number of Master Plans as per Re-imagined Industrial Strategy submitted to Minister by March 2021
Definition	Re-imagined Industrial Strategy and the preparation of Master Plans in National Key Priority sectors
Source of data	Master Plans submission to Minister
Method of Calculation or assessment	Quantitative
Means of verification	Master plans
Assumptions	No increase in unemployment through sustained number of jobs and the creation of new jobs
Disaggregation of Beneficiaries (where applicable)	NA
Spatial Transformation (where applicable)	NA
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Industrial Competitiveness and Growth

Indicator Title	Number of progress reports of Implementation of Master Plans
Definition	Implementation of Master Plans in National Key Priority sectors
Source of data	Quarterly reports submitted to Minister
Method of Calculation or assessment	Quantitative
Means of verification	Quarterly progress reports
Assumptions	No increase in unemployment through sustained number of jobs and the creation of new jobs
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Industrial Competitiveness and Growth

Indicator Title	Number of progress reports on the support measures to industry to increase localisation of PPE across sectors
Definition	Tracks the progress of support measures to industry to increase the localisation of PPE across sectors
Source of data	Quarterly progress reports submitted to DG
Method of Calculation or Assessment	Simple count
Means of verification	Report
Assumptions	Increased localisation
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded

Indicator Title	Number of progress reports on the support measures to industry to increase localisation of PPE across sectors
Indicator Responsibility	DDG: Industrial Competitiveness and Growth

Indicator Title	Number of designation requests prepared for Minister per year
Definition	Tracks the number of designation requests prepared for Minister per year
Source of data	Designation requests in the form of submissions to Minister
Method of Calculation or Assessment	Simple count
Means of verification	Report
Assumptions	Increased localisation
Disaggregation of Beneficiaries (where applicable)	NA
Spatial Transformation (where applicable)	NA
Calculation Type	Cumulative
Reporting Cycle	Bi-annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Industrial Competitiveness and Growth

Programme 5: Consumer and Corporate Regulation

Indicator Title	Number of progress reports on the development or review of legislation developed for Minister's approval
Definition	<p>Progress reports prepared for Minister's review. To report progress made on Companies, Credit and Gambling legislation</p> <p>4 progress reports on the development or review of the Companies, Liquor and National Gambling legislation developed for Minister's approval</p>
Source of data	Progress reports on the development and review of the Companies and Gambling legislation.
Method of Calculation or Assessment	Simple count
Means of verification	Progress reports
Assumptions	Delays in the development of legislation at various stages in the process
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG:CCR

Programme 6: Industrial Financing

Indicator Title	Value (Rand) of projected investments to be leveraged from projects/enterprises approved
Definition	The total value of projected investments to be leveraged through approved enterprises/ projects (ADEP, AIS, APSS, BIS, CIP, GBS & Film). The total value of projected investments in case BIS equals total projected costs (including incentive grant) of all the enterprises/ projects approved. Exception: AIS projected investment is based on qualifying investment.
Source of data	Signed Adjudication Committee Minutes
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report, Supporting Schedules, and Portfolio of Evidence
Assumptions	Approved projects/enterprises will commit to the value of projected investments
Disaggregation of Beneficiaries (where applicable)	Target for women: N/A Target for youth: N/A Target for people with disabilities: N/A
Spatial Transformation (where applicable)	Contribution to spatial transformation priorities: N/A Spatial impact area: N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target met or higher
Indicator Responsibility	DDG: Industrial Financing

Indicator title	Economic recovery programme submitted for approval
Definition	Economic Recovery Programme developed and implemented
Source of data	Report on the development and implementation of economic recovery programme
Method of Calculation / Assessment	Simple count
Means of Verification	Report on the development and implementation of economic recovery programme
Assumptions	Report on the development and implementation of economic recovery programme
Disaggregation of Beneficiaries (where applicable)	Target for women: N/A • Target for youth: N/A • Target for people with disabilities: N/A
Spatial Transformation (where applicable)	Contribution to spatial transformation priorities: N/A • Spatial impact area: N/A
Calculation Type	Cumulative (year-end)
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Industrial Financing Branch

Indicator title	Enhancement of domestic industrial finance system to increase access to funding for enterprises
Definition	Report on enhancement of domestic industrial finance system submitted
Source of data	Report on enhanced domestic industrial finance system submitted
Method of Calculation / Assessment	Simple count
Means of Verification	Report on enhanced domestic industrial finance system submitted for approval
Assumptions	Report on enhanced domestic industrial finance system submitted
Disaggregation of Beneficiaries	Target for women: N/A

Indicator title	Enhancement of domestic industrial finance system to increase access to funding for enterprises
(where applicable)	<ul style="list-style-type: none"> • Target for youth: N/A • Target for people with disabilities: N/A
Spatial Transformation (where applicable)	Contribution to spatial transformation priorities: N/A
Calculation Type	Cumulative (year-end)
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Industrial Financing Branch

Programme 7: Export Development, Promotion and Outward Investments

Indicator Title	Number of companies financially benefitted from EMIA support for
-----------------	--

	digital export promotion initiatives
Definition	The number of companies financially benefitted from EMIA funding
Source of data	EMIA Adjudication committee minutes
Method of Calculation / Assessment	Simple count
Means of verification	Reports
Assumptions	Based historical data
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Biannually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Export Development, Promotion and Outward Investments

Indicator Title	Number of companies assisted under EDS inclusive of WYPD
Definition	The number of companies benefitted from EDS inclusive of WYPD
Source of data	Number of companies attending Export Capacity Building engagements, training, workshops, GEPP
Method of Calculation / Assessment	Simple count
Means of verification	Reports
Assumptions	Based historical data
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Biannually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Export Development, Promotion and Outward Investments

Indicator Title	Number of barriers processed by the Export Barriers Monitoring Mechanism
Definition	Number of resolution plans drafted for export barriers reported to the Export Barriers Monitoring Mechanism
Source of data	EBMM database
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Export Development, Promotion and Outward Investments

Indicator Title	Number of new applications developed or improved on the Export Data Assistant (EDA) platform
Definition	Number of additional functions added to the dtic's export data and research platform, the Export Data Assistant, including the completion of supporting research projects that enable these functions.

Indicator Title	Number of new applications developed or improved on the Export Data Assistant (EDA) platform
Source of data	Export Data Assistant platform
Method of Calculation or Assessment	Simple count
Means of verification	Comparison to archived versions of the EDA
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Export Development, Promotion and Outward Investments

Indicator Title	Number of research reports produced
Definition	Number of policy-focused research reports produced on export-related topics.
Source of data	Reports
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Export Development, Promotion and Outward Investments

Programme 8: Inward Investment Attraction, Facilitation and Aftercare

Indicator Title	Value (Rand) of investment projects facilitated in pipelines
Definition	It is the value of FDI being facilitated by Investment South Africa over a financial year. Each prospective investment has an indicated investment value in Rands which collectively equates to the overall investment value
Source of data	Shows the value of FDI facilitated by Investment South Africa over a financial year
Method of Calculation or Assessment	Web-based projects registry or manual entry
Means of verification	Base on the rand/\$ exchange rate at date of entry on the web-based or manual registry
Assumptions	Cumulative
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Quarterly
Reporting Cycle	No
Desired performance	Target achieved or exceeded
Indicator Responsibility	Acting Head: Inward Investment Attraction, Facilitation and Aftercare

Indicator Title	Preserve investments and implement investment projects of the 2018 and 2019 investment conference
Definition	It is the number of unblockings and fast tracking of investor issues
Source of data	A list of unblockings and fast tracking of investor issues completed
Method of Calculation or Assessment	Simple count
Means of verification	Emails or reports
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	Acting Head: Inward Investment Attraction, Facilitation and Aftercare

Indicator Title	Number of statistical reports on Company registration within one day
Definition	Registering a company in South Africa
Source of data	Statistical Reports by CIPC
Method of Calculation or Assessment	Simple count
Means of verification	Actual Companies registered by CIPC
Assumptions	Cumulative
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Annual
Reporting Cycle	Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	Acting Head: Inward Investment Attraction, Facilitation and Aftercare

Programme 9: Competition Policy and Economic Planning

Indicator Title	Number of reports on policy and statutory initiatives in support of Ministry
Definition	Reports on policy and statutory initiatives in support of Ministry
Source of data	Competition Commission, Competition Tribunal, Stats SA, Research institutions, relevant departments and public entities
Method of Calculation or Assessment	Simple count
Means of verification	Progress reports
Assumptions	Issuing of policy directives and adherence to statutory requirements
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting cycle	Quarterly
Desired performance	Comprehensive competition policy implemented in line with statutory obligations
Indicator Responsibility	Acting DDG: Competition Policy and Economic Planning

Indicator Title	Number of analysis reports on public interest matters
Definition	Analysis Reports on public interest's matters. The MTSF requires the dtic to deliver on initiating one new market inquiry and implementation of recommendations of one concluded market inquiry per annum over the MTEF period. the dtic will initiate one inquiry as part of the products under the output indicator "number of analysis reports on public interest matters" in Quarter 3 2020/21.
Source of data	Competition Commission, Competition Tribunal, Stats SA, Research institutions, relevant departments and public entities
Method of Calculation or Assessment	Simple count
Means of verification	Progress reports
Assumptions	Mergers and Acquisitions applications to Competition Commission, Consideration of Market Inquiries, and Abuse of Dominance activities
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting cycle	Quarterly
Desired performance	Informed strategic decisions on participation in competition matters
Indicator Responsibility	Acting DDG: Competition Policy and Economic Planning

Indicator Title	Number of reports on coordinated actions in implementing Competition policy commitments, recommendations and orders
Definition	Reports on coordination efforts of recommendations, commitments and orders. The MTSF requires the dtic to deliver on Initiate one new market inquiry and implementation of recommendations of one concluded market inquiry per annum over the MTEF period. The implementation of recommendations of one concluded market inquiry will be delivered under the output indicator "reports on coordinated actions in implementing Competition policy commitments, recommendations and orders" .
Source of data	Competition Commission, Competition Tribunal, Stats SA, Research institutions, relevant departments and public entities

Indicator Title	Number of reports on coordinated actions in implementing Competition policy commitments, recommendations and orders
Method of Calculation or Assessment	Simple count
Means of verification	Progress reports
Assumptions	Recommendations issued, Commitments made and Orders set down
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting cycle	Quarterly
Desired performance	Coordinated actions with impact on economic concentration
Indicator Responsibility	Acting DDG: Competition Policy and Economic Planning

Programme 10: Economic Research and Coordination

Indicator Title	Number of analytical policy reports produced
Definition	Analytical reports produced which assess alternative policy options to unlock inclusive growth, and provide policymakers and stakeholders with evidence-based policy advice.
Source of data	Research reports produced in the Branch or commissioned by the Branch.
Method of Calculation	Quantitative
Means of verification	Number of policy reports produced and circulated to EXBO.
Assumptions	
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Eight high-quality policy reports produced and circulated to EXBO to contribute to evidence-based policymaking.
Indicator Responsibility	DDG: Economic Research and Coordination

Indicator Title	Number of research reports produced
Definition	Policy-relevant, high-quality economic analysis produced to inform policymakers of key global and domestic economic trends and developments.
Source of data	Research reports and reports from government departments and entities
Method of Calculation	Quantitative
Means of verification	Number of economic research reports produced and circulated to EXBO.
Assumptions	
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Six high-quality, analytical economic research reports produced or commissioned and circulated to EXBO.
Indicator Responsibility	DDG: Economic Research and Coordination
