The report highlights strategic areas of impact.

These are:

1. Integrated funding driving strategic investment towards economic growth of the South African economy;
2. Contributing towards the district development model; and
3. Promoting an inclusive economy.

Inclusive investment is paramount to offset systemic weaknesses in the South African economy and the dtic is at the forefront of attempts to diversify investment opportunities. 3. Agri-business projects that not only secure the nation's food supply but also create jobs.

Overall, IFG remain steadfast in their determination to forge ahead and achieve inclusive economic growth through smart and job-rich å}å~•c!ãæ|Á , }æ}&ã} *ÉÁÁ

BACKGROUND

BACKGROUND

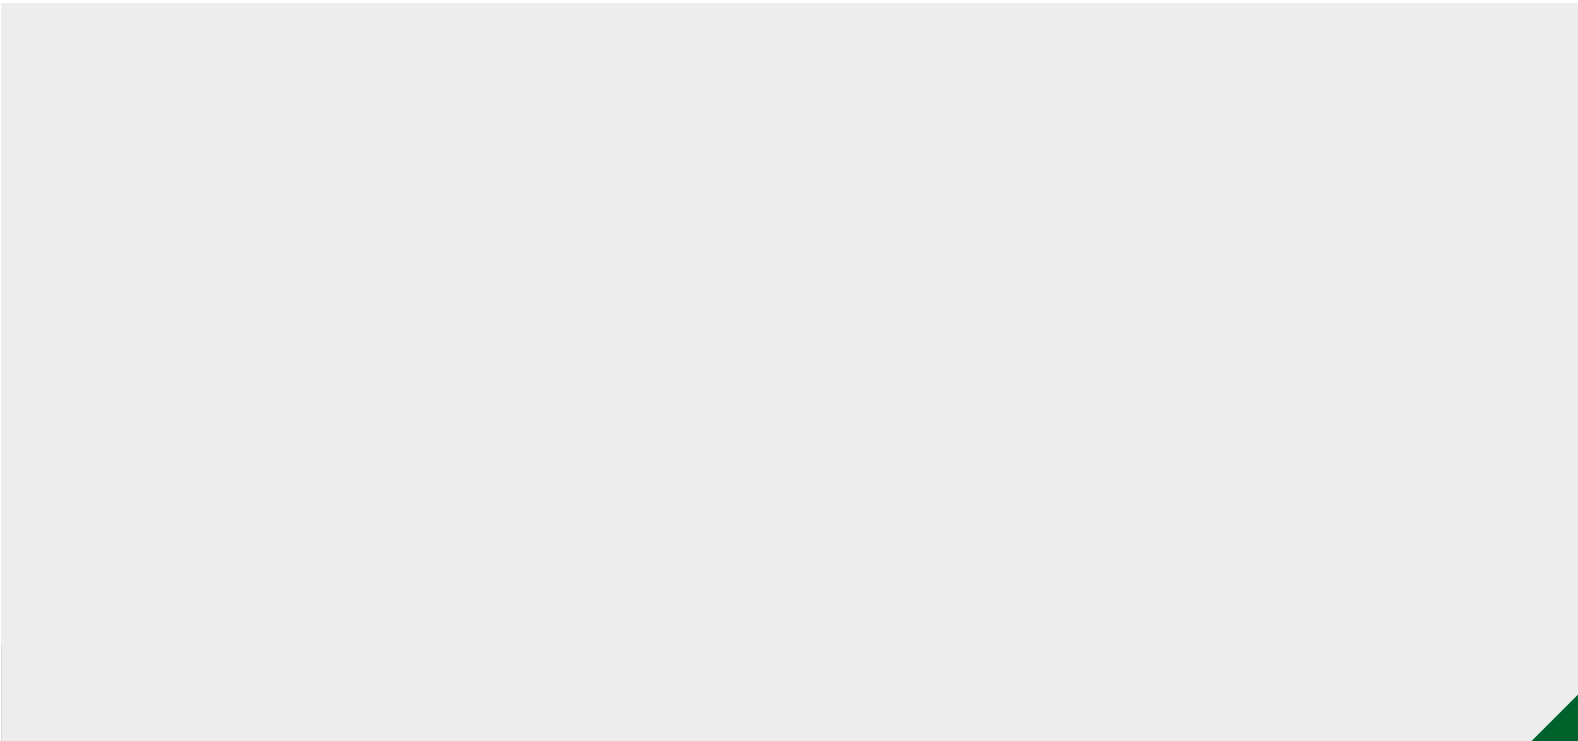

1. The South African Economy

South Africa’s economy grew by **0.6%** in 2023, a deceleration from the 1.9% recorded for 2022. Electricity shortages, rail and port logistical challenges, and lower international commodity prices hampered economic activity. High unemployment, poverty and inequality continued during 2023.

The Department of Trade, Industry and Competition (the dtic) heeds the call to these economic problems and plans to trade smarter, industrialise faster

2. The Department of Trade Industry and Competition

The vision of the dtic is a dynamic industrial, globally competitive South African economy, characterised by meaningful economic transformation, inclusive growth and development, decent employment and equity, built on the full potential of all citizens.

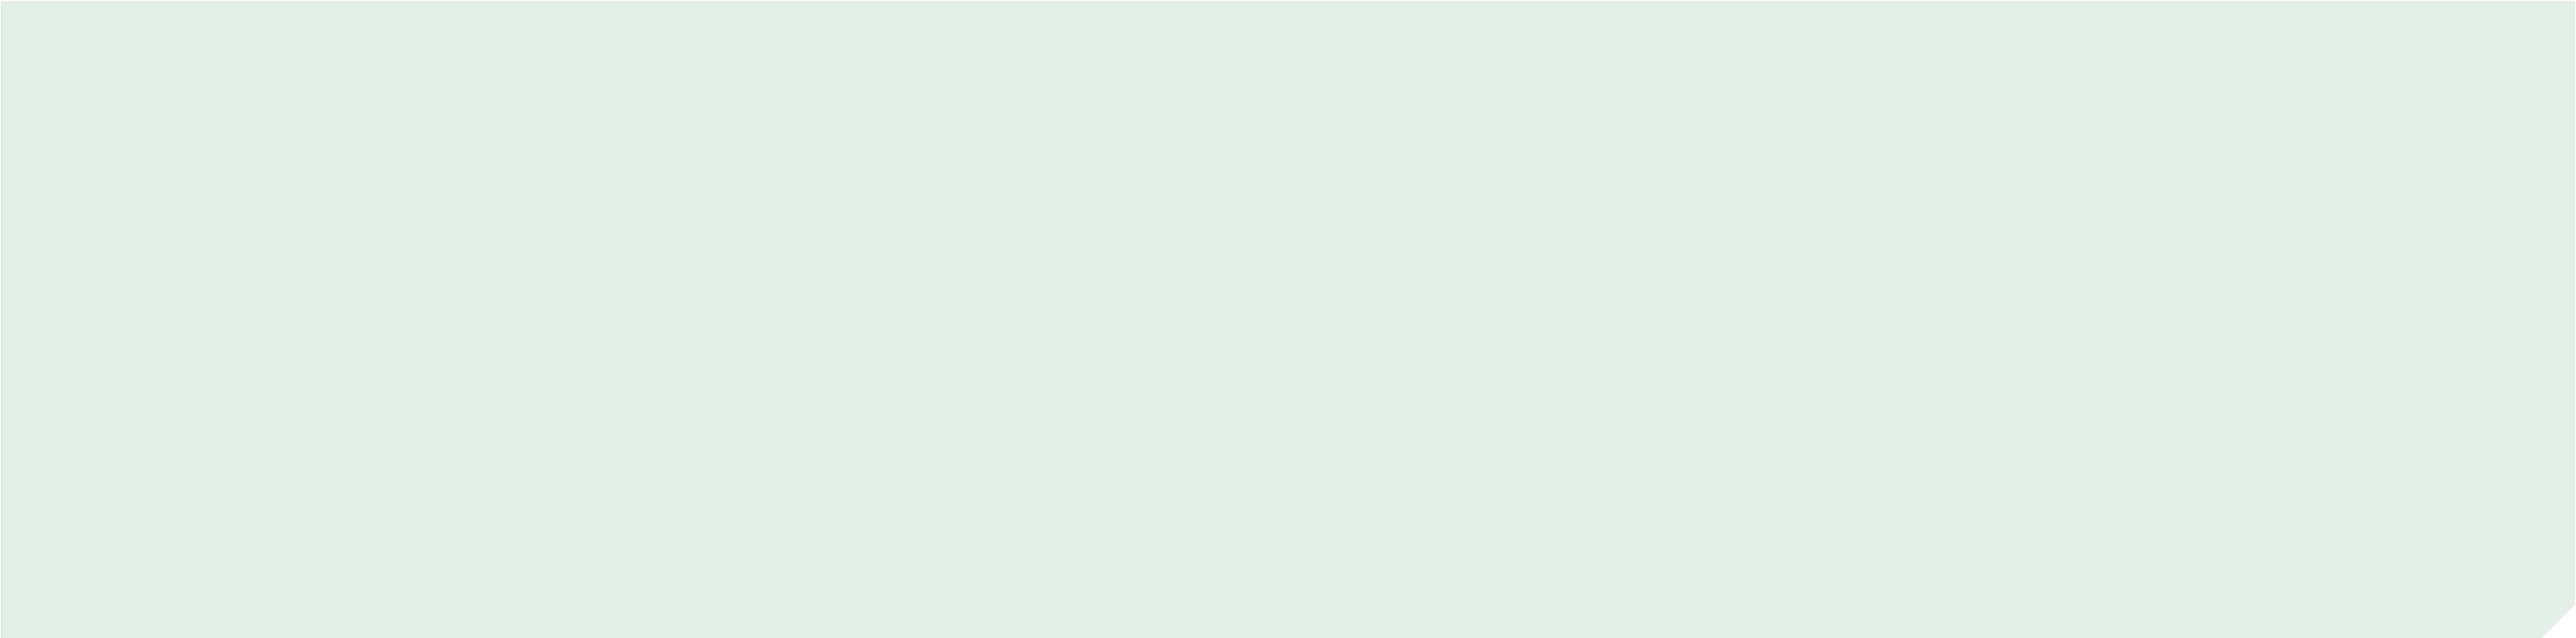

the dtic’s mission is to:

- Promote **structural transformation**, towards a dynamic industrial and globally competitive economy.
- Provide a **dfYXjWhUV`Yž` Wc a dYh]h] j Yž` Ye i]hUV`Y` UbX` gcWjU`m` fYgdcbgjV`Y` Ybj]fcb a Ybh**, conducive to investment, trade and enterprise development.
- **Broaden participation in the economy** to strengthen economic development.
- Continually **] a dfc jYh\Y`g_]`g`UbX`WUdUVj`]h]Yg** of the dtic to effectively deliver on its mandate and respond to the needs of South Africa’s citizens.
- **7ccfXjbUhY` h\Y` Wcbhf]Vi]cbg` cz` [cjYfb a Ybh** departments, state entities and civil society to effect economic development.
- **=a dfc jY` U`][ba Ybh` VYhkYYb` YWcbca]W` dc`jW]Yg**, plans of the state, its agencies, government’s political and economic objectives and mandates.

3. Introduction to the Industrial Financing Group

The Industrial Financing Group (IFG) contributes towards building a transformed, dynamic and globally competitive economy by providing industrial , }æ}&â}*Á c[Á à~•â}^••^•ÉÁ V@â•Á â•Á c@! [~*@Á { ~|cã]|^Á , }æ}&âæ|Á]! [*!æ{ { ^•Á managed by three institutions, the dtic through the Incentive Branch (IB), the Industrial Development Corporation (IDC) and the National Empowerment Fund (NEF).

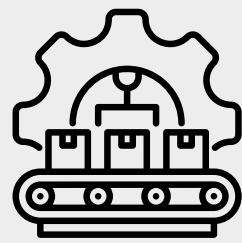

The Incentive Branch

The IB within the dtic offers a range of business incentives including sustainable, competitive enterprises that support national priorities of industrialisation, the Branch directly administers grants that are designed on a cost-sharing and reimbursement model. The objectives of these incentives are aligned with economic development criteria, including increasing employment, expanding global market share, green technology, localisation, transformation and regional spread.

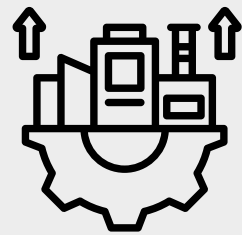

THE IB HAS TWO MAIN OBJECTIVES:

OBJECTIVE 1

To support industrial development that will enhance productivity and bolster competitiveness through designing, administering, monitoring and evaluating incentives programmes, based on industrial policies and sector Master Plans.

OBJECTIVE 2

To contribute to the accelerated growth of manufacturing and internationally traded services over the long term through the provision of incentives for industrial development.

THE IFB SCHEMES ARE IMPLEMENTED ACROSS FIVE CLUSTERS:

Manufacturing Investment Cluster

The Manufacturing Investment Cluster focuses on funding manufacturing (black, women and youth) to invest in the economy and create jobs for South Africans, particularly for black, women and youth employees from historically disadvantaged communities and marginalised regions. Incentives in this cluster include:

6`UW`-bXi ghf]U`]ghg`GW\Y a Y`fl6=GŁ

5 i hc a ch]jY`=b jYgh a Ybh`GW\Y a Y`fl5=GŁ

Agro-processing Support Scheme (APSS)

5e i UW i`h i fY`8Y jY`cd a Ybh`9b\UbWY a Ybh`Dfc [fU a a Y`fl589DŁ

Manufacturing Support Programme (MSP)

Innovation Cluster

The Innovation Investment Cluster supports innovation and technology development. The funding is structured to encourage collaboration between industry and academia to research and develop pioneering prototypes that are ready for commercialisation. Targeted areas of innovation include the fourth industrial revolution, health and food security and the green economy. Incentives in this cluster include:

Technology and Human Resources for Industry Programme (THRIP)

Support Programme for Industrial Innovation (IPID)

Services Investment Cluster

The Services Investment Cluster comprises incentives geared to stimulate economic activity and job creation in the services sector with an emphasis on youth employment. These incentives also support the country's export revenue through offshoring (black, women and youth) in the domestic economy. Incentives in this cluster include:

:`cVU`6 i g]bYgg`GYf j]WYg`=bWYbh] jY`fl : 6GŁ`

:]`a`UbX`HY`Y j]g]cb`DfcXi Wh]cb`=bWYbh] jY`fl:]`a`UbX`HJŁ`

Infrastructure Investment Cluster

The Infrastructure Investment Cluster supports the spatial policy instruments driven by the dtic, namely the Special Economic Zones (SEZ) and the Industrial Parks Revitalisation Programme (IPRP). These incentives aim to enhance industrial infrastructure and industrial development through:

Special Economic Zones (SEZs)

The Critical Infrastructure Programme (CIP)

=bXi ghf]U`DUf`g`fl=DgŁ`

Export Promotion Cluster

The Export Promotion Cluster supports industrial competitiveness leading to export growth, mainly through funding to showcase South African products and services abroad, as well as funding feasibility studies for projects with high export potential. Incentives in this cluster include the:

9 Idcfh`AUf`Yh]b`[`UbX`=b jYgh a Ybh`5gg]ghUbWY` (EMIA)

GYWhcf!GdYW]UW` Assistance Scheme (SSAS)

Capital Projects Feasibility Programme (CPFP)

Partnering you.
Growing the economy.
Developing Africa

The Industrial Development Corporation

Established in 1940 through an Act of Parliament, the IDC is owned by the South African Government. IDC priorities are aligned with the national policy direction as set out in the National Development Plan (NDP) and Industry Master Plans. Its mandate is to maximise the impact on development through job-rich industrialisation and contribute to the creation of a more inclusive economy through the funding of black-owned and empowered companies, Black Industrialists, and women’s and youth-owned and empowered enterprises.

Presented below are some of the funding programmes (on-balance and partnership off-balance funds) which had approvals and/or disbursements in the 2023/24 financial year.

Agri-Industrial Fund (AIF)

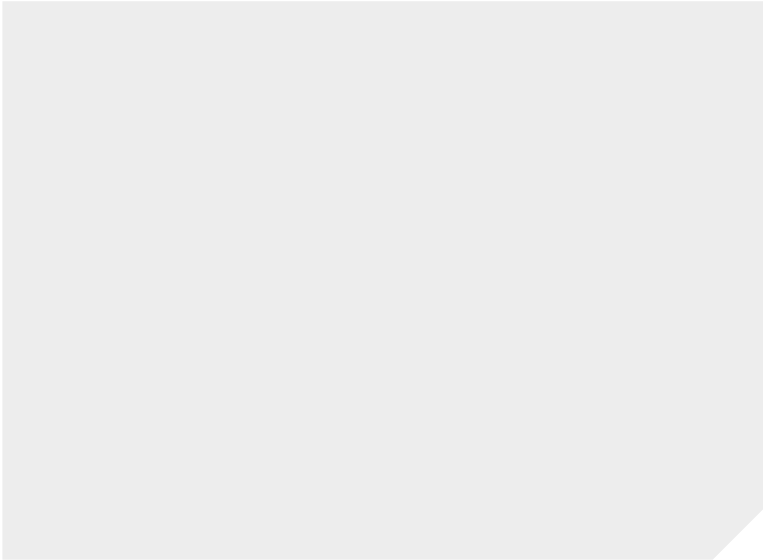

The IDC, in partnership with the Department of Agriculture, Land Reform and Rural Development (DALRRD) offers the Agri-Industrial Fund that aims to develop and implement high-impact, black-owned, large-scale commercial agricultural projects.

Green Tourism Investment Programme (GTIP)

An initiative of the Department of Tourism and managed by the IDC, the programme encourages and assists privately-owned tourism enterprises to adopt responsible tourism practices by installing solutions to reduce their energy and water consumption and costs.

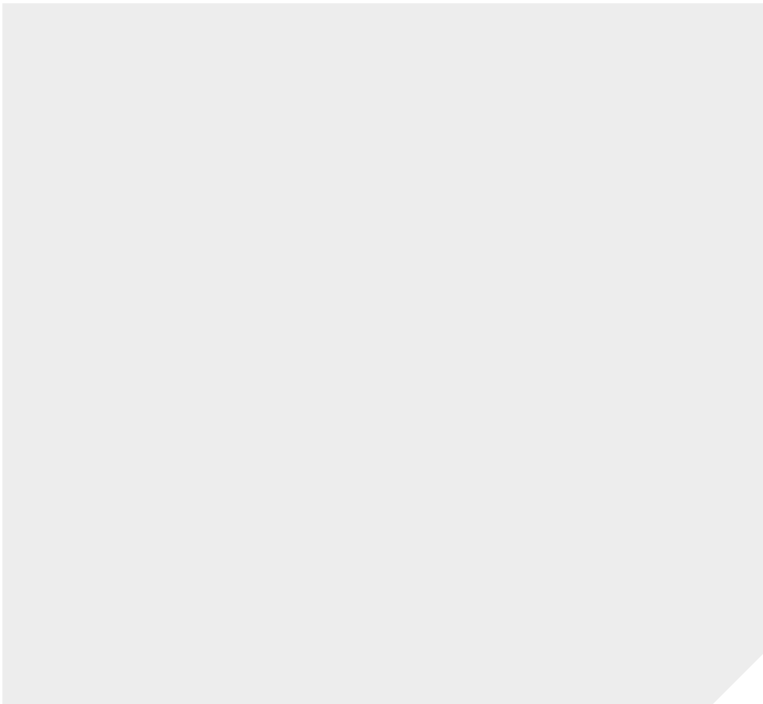

Textile and Clothing Industry Development Fund (CTFLGP)

Aims to grow employment and improve overall competitiveness of the clothing, textiles, footwear, leather and leather goods manufacturing industries. The CTFLGP is administered by the CTFLGP Desk at the IDC on behalf of Sector Branch within the dtic.

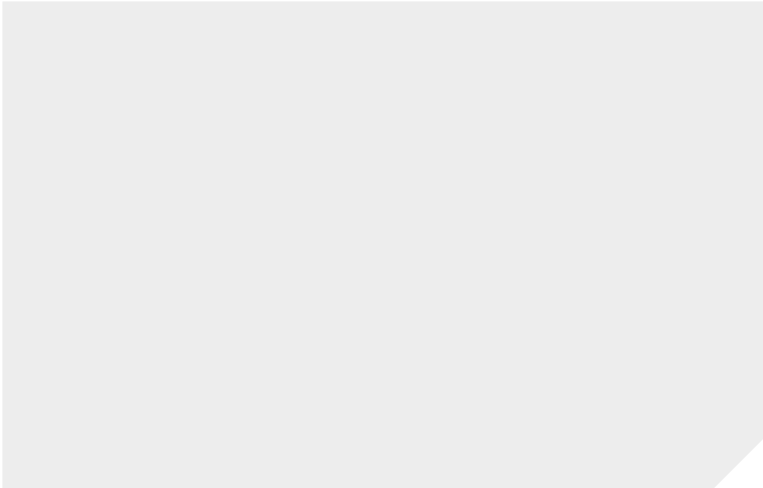

**? \cYVY'=bbc jUh]cb'Dfc a ch]cb'
Programme (KIPP)**

Offers capital and business support to SMME's during the early stages of commercialisation to enable them to penetrate the market with their locally developed innovations.

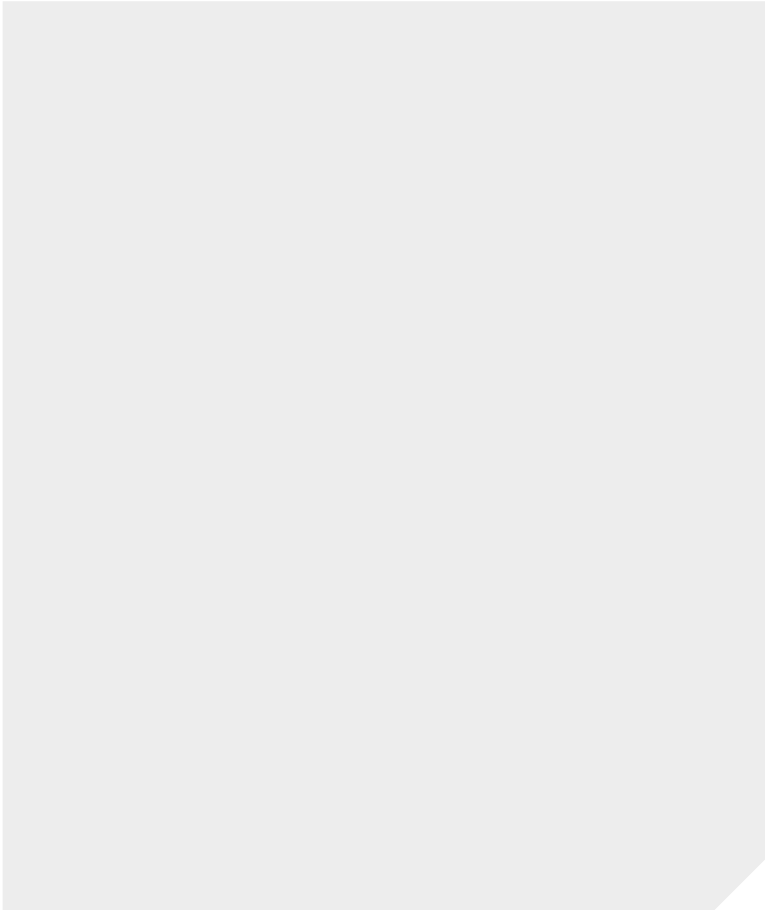

Social Employment Fund (SEF)

Aimed at tackling unemployment through strengthening partnerships with a wide range of social and civic partners, enabling them to offer meaningful work opportunities (in areas such as health, education and early childhood development) that serve communities and promote the greater good.

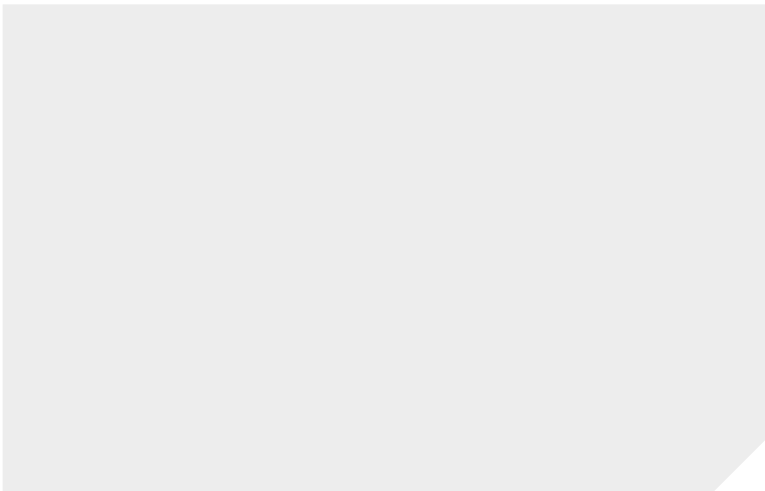

Tirisano Construction Fund

Established in 2017 as a trust, the fund supports the development and enhancement of the construction industry in South Africa while promoting social infrastructure.

**Hckbg\]d'9Wcbc a m'DUfhbYfg\]d': i bX'
(TEPF)**

The Township Economy Partnership Fund (TEPF) is a partnership between the Gauteng Department of Economic Development (GDED), the Gauteng Enterprise Propeller (GEP) and the IDC. It provides funding to vulnerable small businesses, based in townships, that are unable to access funding from private funding institutions, government and other business support programmes.

**AUb iZUWh i f]b['7c a dYh]h] jYbYgg'
Enhancement Programme (MCEP)**

A partnership fund, administered on behalf of the dtic, which offers manufacturing companies incentives to raise their competitiveness and retain jobs.

5. Structure of this Report

The report focuses on a performance overview of the IFG, based on applicable and key indicators from the dtic’s 2023/24 Annual Performance Plan.

The report then highlights the 2023/24 approvals and provides more detailed reporting on the disbursements with key themes on economic inclusion, localisation, exports and green industrialisation. A brief sector analysis is provided, followed by case studies to demonstrate these themes. Finally, the challenges experienced by the IFG are explored, and recommendations from lessons learnt are listed.

More detail on the IDC’s and NEF’s performance can be found in their respective annual reports on each institution’s website.

Across the key manufacturing industries that reported **investment multiplier of 3 each**. This means that **investment multiplier of 3 each** thereby contributing to increased economic activity.

Within the automotive industry, the seven OEMs funded in 2023/24 generated 65% of the total investment of R9.2 billion. Collectively, those OEMs that received disbursements through the Automotive Investment Scheme (AIS) administered by the Incentive Branch within the dtic, reported 398 556 units. This is 63% of the overall South African production of **633 337** vehicles.

398 556
units produced

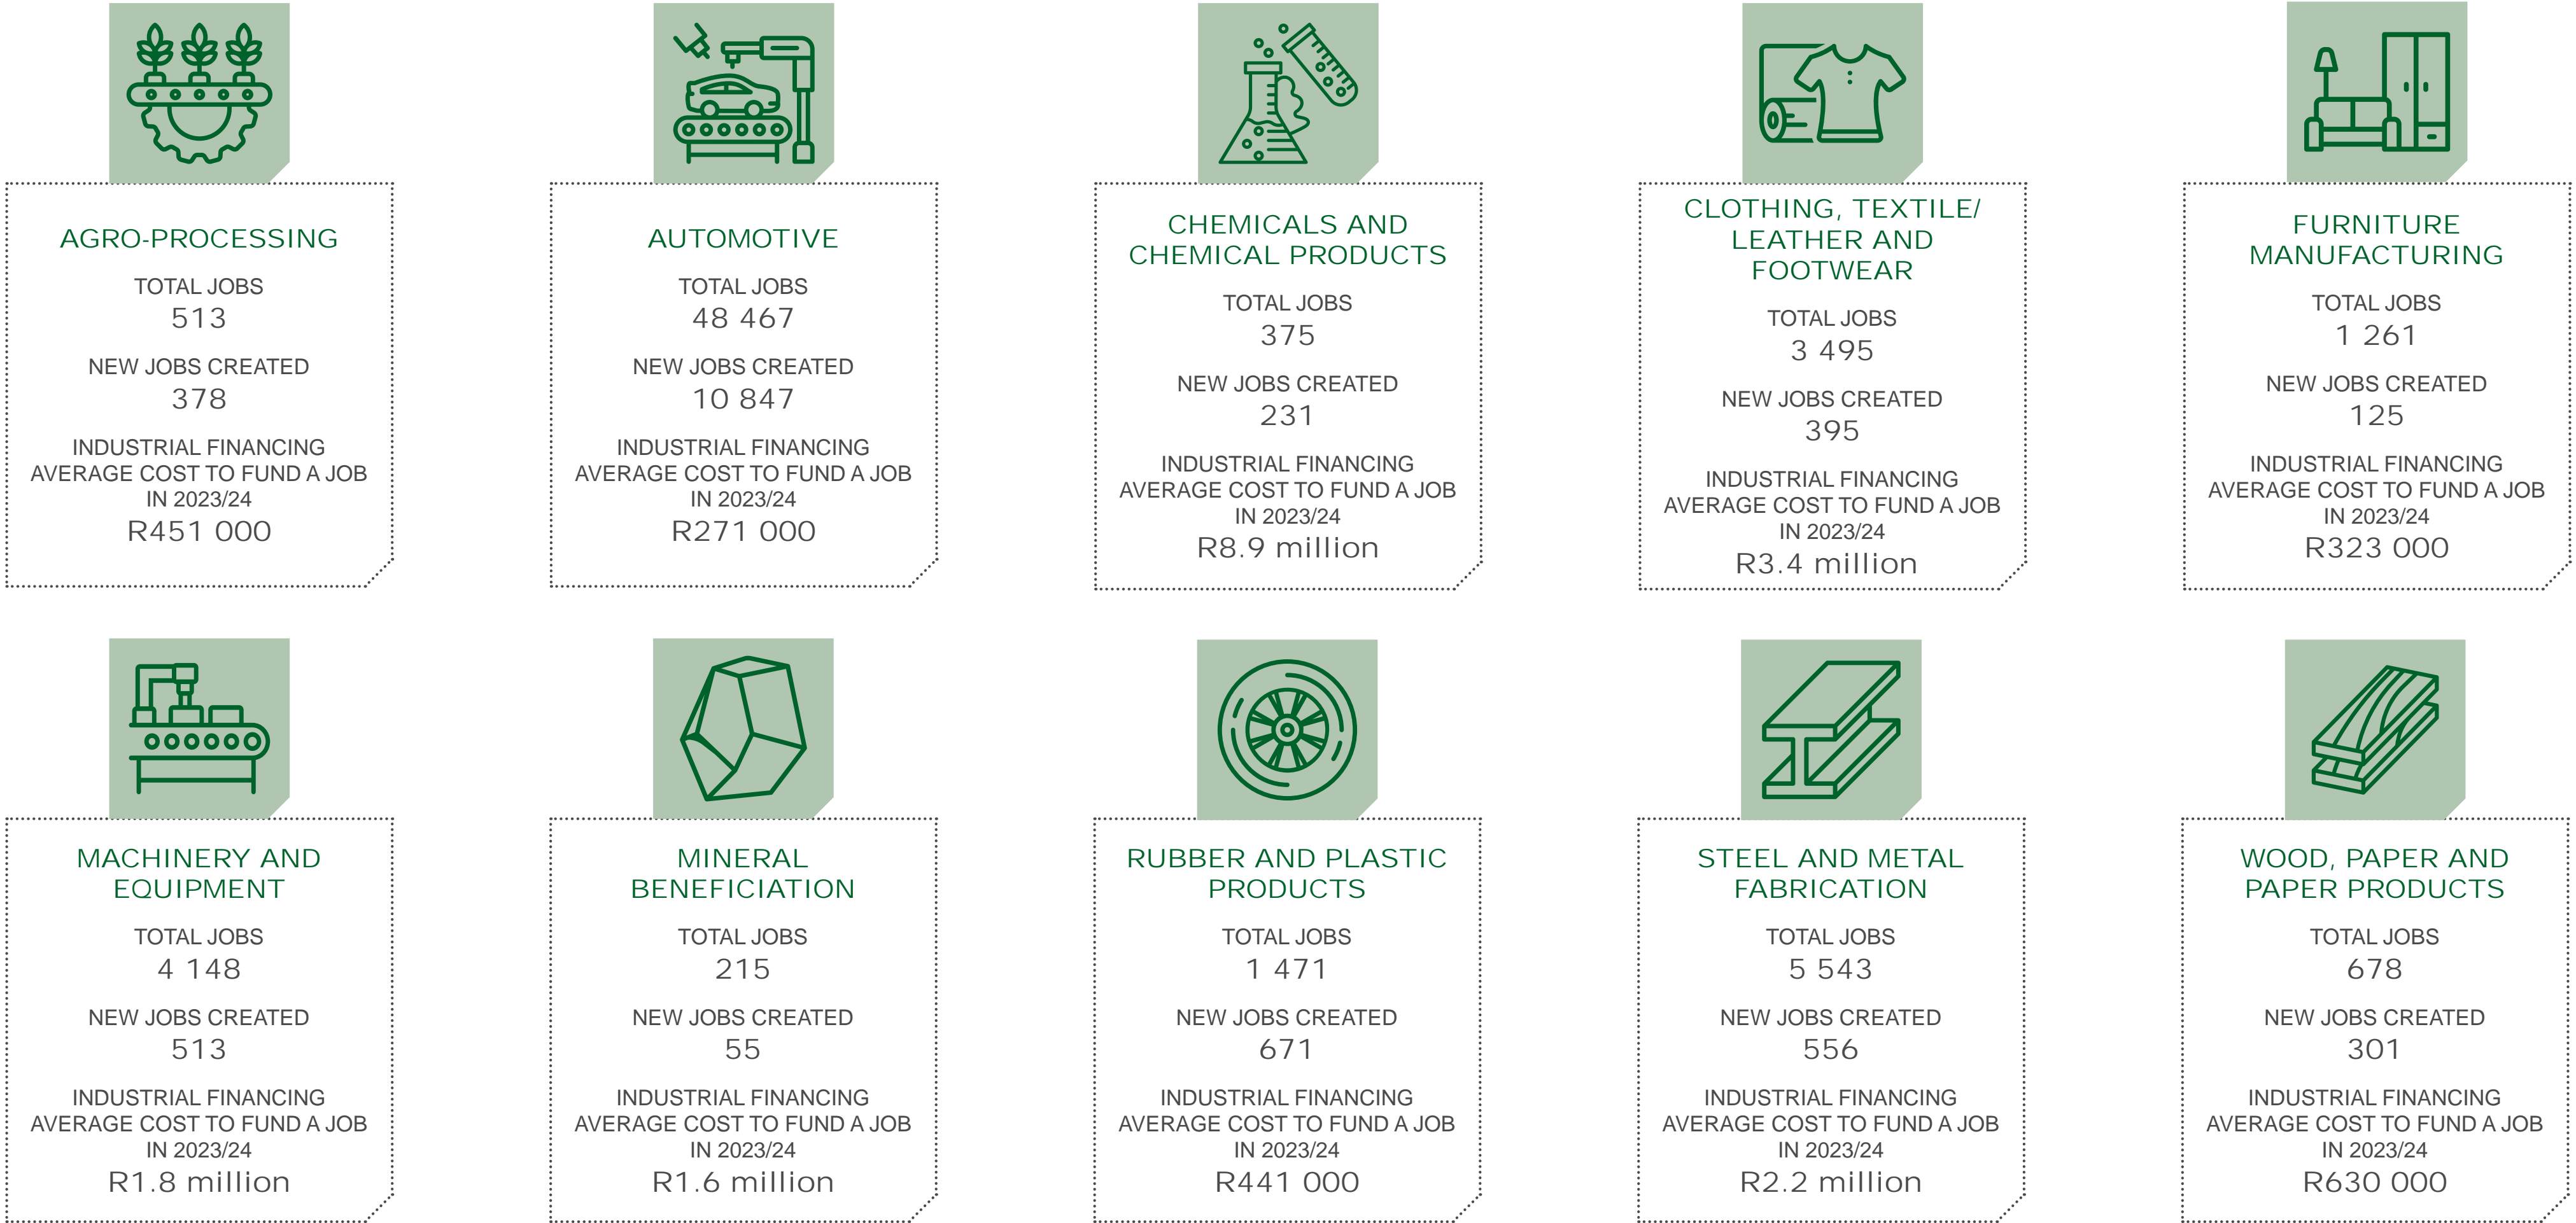

63%
produced in the country

	OEM	Vehicles
	ISUZU Motors South Africa (Pty) Ltd	6000
	BMW South Africa (Pty) Ltd	10000
	Ford Motor Company of Southern Africa (Manufacturing) (Pty) Ltd	6000
	Toyota South Africa Motors (PTY) LTD	SUVs, Minibus taxis, 6000
	Mercedes-Benz South Africa Limited	10000
	BAIC Automobile SA (Pty) Ltd	SUVs, Passenger 10000
	ANCOR WUVG	10000

Aligned with the investment generated, the automotive industry created substantially more new jobs compared to the other manufacturing industries. About 5 900 new jobs were created by an automotive component manufacturer that produces wire harnesses for light motor vehicles. It is operating from a factory in the iLembe District of KwaZulu-Natal.

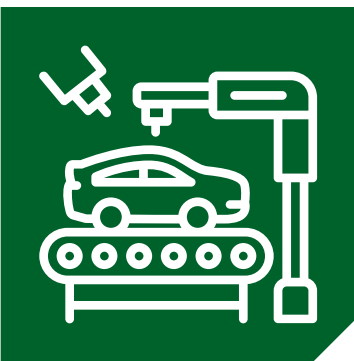

The average cost for IFG to fund job creation is lowest in the automotive industry with the cost per job at R271 000 compared to the chemicals industry, where the average cost to fund a job is R10.5 million.

Depicted here is the additional output produced by manufacturers operating in key industries.

The additional output produced in 2023/24 compared to the previous period and is an indicator of the impact of the funding. The automotive & machinery sector produced R7.9 billion local additional output produce wire harnesses, rear axle assemblies, car seats, automotive glass and tyres.

Fortunately, Rishav Juglall has these qualities in bucketloads. The youngster, buoyed by his marketing and economics background founded **FcW_m'6fUbXg** in 2011 after he discovered he could undercut retailer pricing on many household cleaning products. This realisation came when his mother asked him to buy a glass-top stove cleaner, which he found at a leading store.

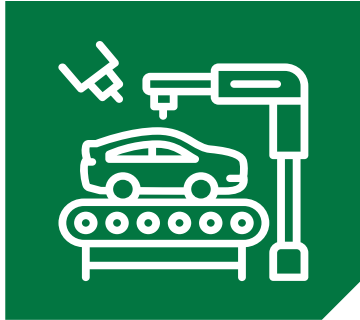

Ever curious, Rishav did a little research and found a similar product manufactured by Weiman in Illinois, USA. At the time, it was Walmart's top-rated brand. He captured the attention of Weiman executives after he submitted a sales pitch to introduce its product range in South Africa. So impressed were these decision-makers that they sent Rishav free samples to test the market. It would prove a clean sweep for all concerned.

Between 2015 to 2018, the Rocky team bottled its products by @æ} âÉÁ [] |^Áà~^â} *ÁæÁâ^•\c [] Á , ||^!Áâ} ÁG€FÌÉÁ , @^} ÁâcÁ!^| [&æc^âÁ from Durban to Johannesburg and opened a **2000m²** facility at Riversands Incubation Hub.

Impressed by the ingenuity of the entrepreneur and his great chances of success, the IDC approved funding to enable Rocky Brands to expand and ensure its products meet the stringent quality requirements of South Africa's leading retailers.

There seems little doubt that this will transpire, as Rishav is cleaning up in other areas too, having been recognised as one of the country's most enterprising and innovative youngsters by scooping top honours in the Ferro Coating Resins Group Durban chemical cluster competition, followed by the Pick n Pay Supplier of the Year title in 2022.

Stellantis is geared to accelerate domestic motor manufacturing with the promise of **50 000** new vehicles leaving its Eastern Cape production line annually. Stellantis is currently the world’s fourth largest OEM in its sector and plans to produce the recently launched Peugeot Landtrek bakkie. This extends Peugeot’s longstanding history in South Africa, which has spawned **82** dealerships and dates back to the 1960s.

The IDC, courtesy of its mandate to fast-track the growth of the automotive and transport industry, is comfortably in the driving seat, having already approved funding to establish the manufacturing plant in which all the Stellantis import replacement and export revenue generation action will take place.

The plant will produce petrol and diesel vehicles, with the capability to switch to both battery and plug-in hybrid variants of the Landtrek. The potential for local production of the fuel cells for this bakkie is being researched. In addition to its funding, the IDC is setting up the Stellantis NewCo Workers Trust, enabling employees of the company to have equity.

In this partnership, the IDC takes its lead from the South African Automotive Masterplan which aims to bolster the country’s competitiveness in vehicle assembly. The project looks certain to attract further key investments, given its strategic contribution to positioning Eastern Cape as a leading automotive hub in sub-Saharan Africa.

Food is key to survival, rendering agriculture as the heart of any nation. The agriculture sector is viewed as a critical component of the South African economy. However, agricultural production contracted by **12.2%** mainly due to the challenges of animal diseases experienced in the livestock and poultry industries, load shedding, delays at the ports and poor rail infrastructure.

Despite these challenges, resilience of this sector is noted with **920 000** registered employees and exports reaching a new record of **R251 billion** at the end of 2023.

IFG will continue to invest in this sector due to its potential for job creation. This will be

done through the development of small-scale farmers to ensure food security and to supply organic and nutritional food to meet the growing demand of health-conscious consumers across the globe.

IFG disbursed **R325 million to 22 SMMEs** and women-owned projects, with the latter category reporting over **620 jobs**. **R302 million** was disbursed to **6`UW_!ckbYX` U[f]!V i g]bYggYg**. Medicinal cannabis cultivated with indoor hydroponic system at Belhes plant.

Belhes is a start-up company that aims to construct, obtain, license, operate and manage a medicinal cannabis growing and processing plant, based in Gqeberha, Eastern Cape. The company was established by Chief Heston David Botha in 2017. Since then, Belhes has partnered with several Khoi cannabis growers to conduct research and development, under an SAHPRA research license, on the best cultivation and harvesting. The process was conducted over a 12-month period, with indoor hydroponic systems eventually proving the best method.

The company started investing in the land, construction material and equipment to kick- start the commercial cannabis

production and processing plant in a controlled environment. As part of IDC’s role in developing a medical cannabis value chain, funding was approved for Belhes to construct, license and operate the plant.

Medical cannabis is a job-rich industry as it is a hand-picked high value crop. South Africa has the required expertise in the Horticulture and Pharmaceutical sectors to capitalise on this growing industry, by taking a proactive approach in the development of this new industry.

KMF Holdings is a mixed agriculture business comprising a poultry operation, three cattle studs, and cash-crop farming of maize and wheat. The company operates on 1,200 hectares of land on which it operates in Lichtenburg and the Magaliesberg, acquiring properties in 2014, 2016, and 2019 and leasing more land in 2020.

With the support received, KMF is now poised for the next major step in its evolution. The company applied for funding to build a red-meat abattoir, a feedlot and a rendering plant, all of which are necessary facilities for KMF to successfully grow into its next phase.

The IDC funding will allow KMF to supply customers directly and, once its facilities are operational, KMF will be able to supply retailers, wholesalers and butchers directly as well as build an export market. KMF’s growth trajectory means a leap in job creation with an expected 104 positions that will be added to the current 40. While the new jobs will primarily be for farmworkers and managers, KMF will be growing its administrative capacity too. Employees are given in-service training on the farms.

Chicks at the Roadgrass Investments commercial broiler facility.

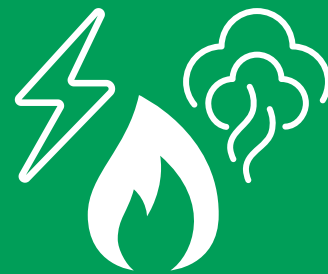

Roadgrass Investments, a black-owned and managed agribusiness, was established 15 years ago by the Mabogoane family. Their operations encompass broiler production and livestock activities, including cattle, sheep, ducks and goats. The primary focus is on broiler chickens.

The business runs a fully commercial chickens broiler business in Delmas, Mpumalanga and livestock operations in Balfour, Mpumalanga. The chickens are typically sold at approximately

33 days old, the ideal age for slaughter-ready broilers in South Africa.

The funding provided aligns with IDC's strategy of supporting black-owned agricultural enterprises and fostering inclusive development as advocated by the Poultry Master Plan. The project contributes to increasing the number of slaughter birds from black poultry producers.

The four founders of **Pele Green Energy**, a black-owned vertically integrated independent power producer, were in their 20s when they took the renewable energy plunge. Fifteen years later, the company has grown into a leading sponsor, shareholder, developer, operator and renewable assets manager. With the IDC by their side, they are well on their way to satisfying their vision of large-scale structural transformation in the sector. The partnership, now in its 11th year, is formalised through HoldCo, an entity intended to streamline funding processes, reduce borrowing costs and support the company's growth. The partnership has enabled Pele Green to secure financing for a range of projects, including the development of new renewable energy capacity and the expansion of existing operations. The IDC's support has been instrumental in enabling Pele Green to power ahead alongside global players.

The IDC has invested directly in Pele Green and in other Pele Group entities, furthering the company's investments in Redstone CSP, Khanyisa IPP and Knowledge Pele. Indirect support includes senior debt in project vehicles in which Pele Green has a minority stake. During 2023/24, the Corporation

has provided a R1.5 billion loan to Pele Green to fund equity in eight projects and to fund project development activities. With this new bottom-line boost, Pele will add **1 045MW** of energy capacity to South Africa's economy and create **2 372** new construction and operational jobs.

The IDC's support has been instrumental in enabling Pele Green to power ahead alongside global players. Over the last eight years, Pele has grown from a preferred minority Black Economic Empowerment partner in the Renewable Energy Independent Power Producer Procurement Programme projects, to lead sponsor in utility-scale projects with commercial and industrial sector off-takers.

Interventions to support industrial infrastructure are crucial to improving industrial parks, Special Economic Zones (SEZ) and other infrastructure critical to accelerating the growth of manufacturing and internationally traded services in South Africa.

To contribute towards the development of industrial infrastructure in the country, IFG disbursed R1.2 billion to 27 infrastructure/construction projects during the 2023/24 period. 76% of this funding was for the construction of bulk infrastructure (such as fuel storage facilities, water and road infrastructure) top structures mainly in six SEZs, as well as for the refurbishment of three industrial parks.

The construction of kUfY\c igYg' UbX' **fuel storage facilities** at the Saldanha Bay IDZ located in the West Coast District Municipality.

The construction of top structures for Ford Motor Company South Africa at the Tshwane Automotive SEZ to manufacture **Hybrid Electrical Motor Vehicles**.

The construction of V i` _Y`YWhf]WU`ž`kUhYf' **and road infrastructure** board manufacturing plant in the Gert Sibande District.

Ford Motor Company South Africa is investing in the Tshwane Automotive SEZ to set up a facility where **base frames are manufactured for the Ford Ranger**. The facility also accommodates component manufacturers to have nearby facilities to reduce the costs of transporting components to the nearby Silverton plant where the vehicles are assembled. This investment is solidifying Ford's commitment to manufacture vehicles in South Africa and continue contributing to job security.

SEZ FUND ADMINISTERED BY THE INCENTIVE BRANCH

The SEZ incentive aims to provide capital for bulk and related infrastructure that leverages local and foreign direct investment.

SEZs are geographically designated areas reserved for targeted economic activities to promote trade, economic growth and industrialisation as part of the Economic product and include the following types: a free port, free trade zones, Industrial Development Zones (IDZ) or sector development zones.

To accelerate the impact of industrial infrastructure

The Industrial Zones Programme (IZP), located within the IDC, was established to fast track the operational phases of SEZs by attracting new investors, providing technical support such as developing attractive value propositions and completing projects with the scheduled time frames.

- Requesting investor due diligence.
- The establishment of Skills Hubs to support Youth and SMME capacity building.

Ensuring that SEZs are aligned with Spatial Development Frameworks and District Development Plans and that participation is from all spheres of government as well as the private sector.

INDUSTRIAL PARKS

Infrastructure development in state-owned industrial parks is supported as part of the Industrial Parks Revitalisation Programme (IPRP), which is a key intervention to promote decentralisation of industry to less developed areas and within rural and township economies.

More than R695 million
has been disbursed since
14 Industrial Parks

To address the challenges experienced by funded industrial parks, the dtic, through the **of Southern Africa** to improve and tighten governance of the funding model. In addition to this, a new **Eastern Cape** is also being developed that will increase opportunities for township and rural economies supply chains as well as require working with provinces, local government and their funded agencies to ensure sustained impacts emanating from industrial parks.

Ongoing refurbishment of a warehouse at Seshego IP (source DBSA).

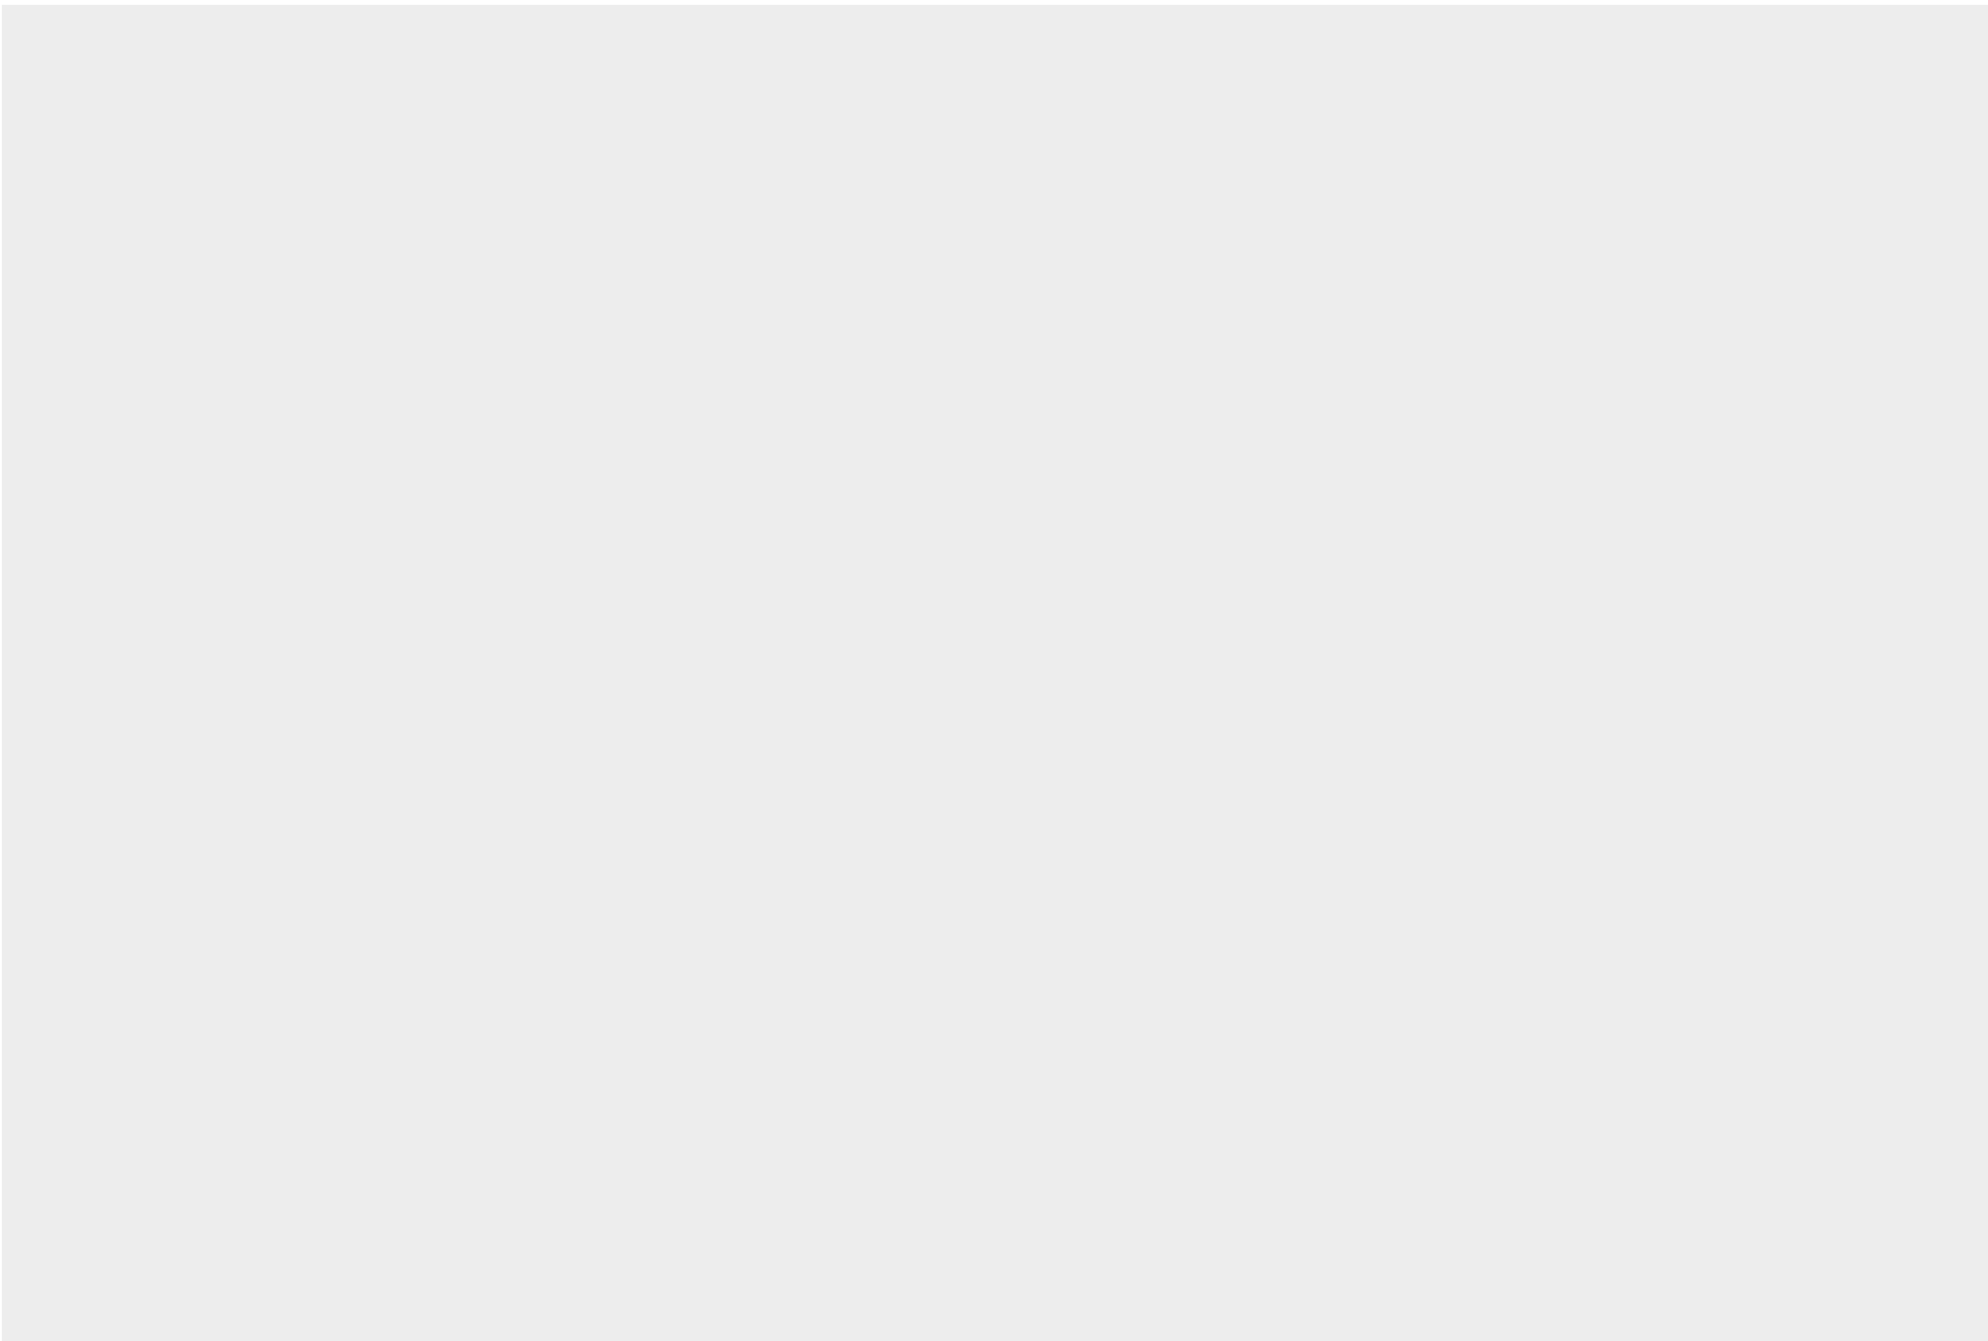

BOTSHABELO INDUSTRIAL PARK (IP)

The main purpose of the Botshabelo IP, located in the Free State, is to create employment for community members in the surrounding areas, attracting investment and encouraging manufacturing. The renovation has attracted R500 million investment so far and has created 5 000 permanent jobs through the full functionality of 108 factories. The Botshabelo IP also features a digital hub, launched in 2022 which serves as a centre of excellence to promote digitalisation and industrialisation.

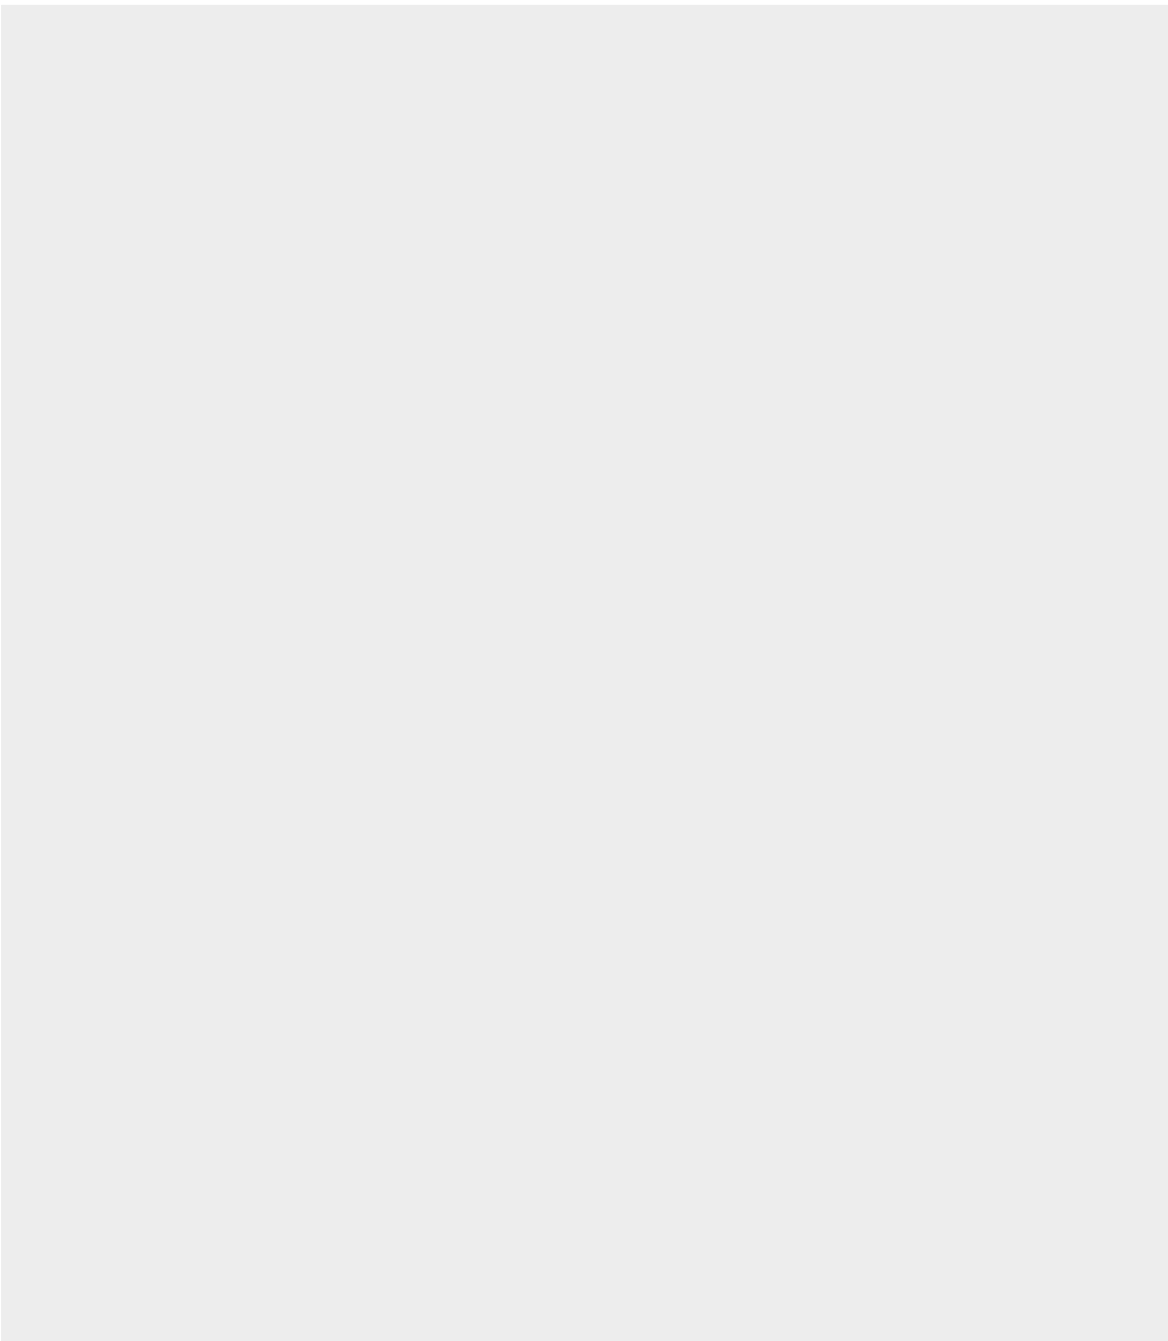

SESHEGO INDUSTRIAL PARK (IP)

The refurbishment of 11 factories/warehouses in the Seshego IP was approved in July 2021. One of these warehouses is earmarked to be a digital hub that will empower youth and unemployed people from nearby communities through cross-cutting digital technologies and information and communication digital,

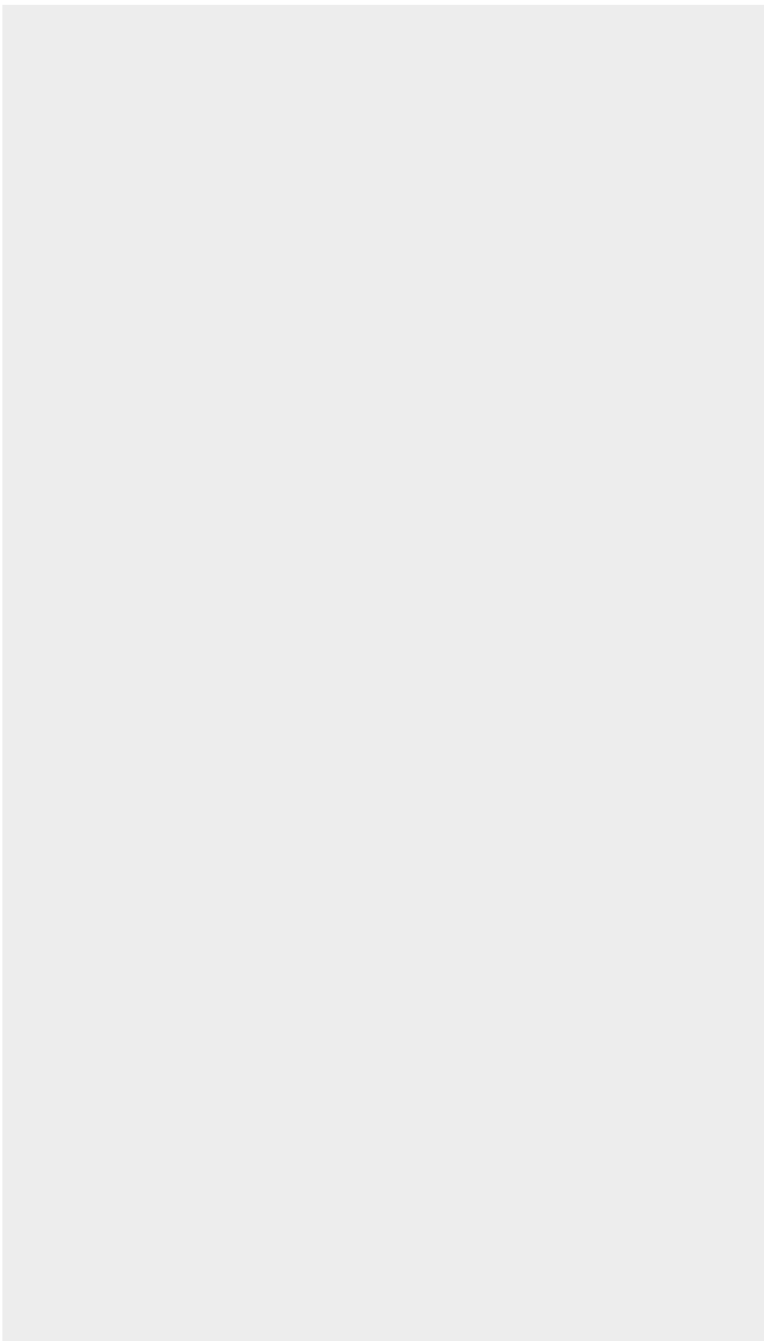

cross-cutting as well as information and communication technology, skills training, and providing access to work spaces that encourage collaborative work and information sharing amongst start-up accelerator programmes and business incubators. To date, the design and layout for these factories has been completed and SMMEs appointed for work that has started on all 11 factories/warehouses, including the one earmarked as a digital hub. As part of the refurbishment, 14 local SMMEs were contracted and 141 construction jobs were created with employees hired from the local communities in the Capricorn District Municipality. The construction is 65% complete.

Construction of guard house at Uppington IP.

Security fence at Uppington IP.

Water drainage pipe placed during construction of Uppington IP.

UPINGTON INDUSTRIAL PARK (IP)

The Uppington IP was approved in July 2021 for Phase 1 to invest in security and road infrastructure, as well as storm water drainage and electrical infrastructure. The IP is the central point of the Northern Cape industrial corridor and is situated close to the Uppington airport. It aims to attract investors operating in the renewable energy, aviation, agro-processing, automotive and business incubation industries, as well as reducing poverty and unemployment in the district.

To date, the IP’s design and layout has been completed, the site established and 20 SMMEs appointed for some of the construction work. The construction of a high security metal invisible fence, as well as three guard houses, roads, fences and storm water drainage is 93% complete. As part of the construction, 20 local SMMEs were contracted and 69 construction jobs were created, with employees hired from the local community.

OCEANS UMHLANGA: DECONGESTING A PRIME TOURIST DESTINATION

Oceans Umhlanga (Pty) Ltd, based in eThekweni, was approved for **R22.5 million** funding for the construction and expansion of public transport facilities such as roads, a taxi rank, concrete walls and lateral support road pieces along the corner of Lighthouse Road and Lagoon Drive and alongside the Radisson Hotel at Umhlanga Rocks.

The construction project is **40%** complete. Once completed the project is expected to reduce travel time in the area. This will reduce the travel time for commuters from nearby townships, reduce delivery times and increase road safety. The road project will also benefit the hospitality industry as Umhlanga is a holiday destination for domestic and international visitors.

ROSSLYN HUB: CREATING A NEW AUTOMOTIVE HUB FOR AFRICA

Rosslyn Hub is a mixed-use development located in the heart of Rosslyn, in the City of Tshwane. The Hub is a R500 billion investment project planned for development over a 50-year period that will enable the integration of a new world-class logistics node and vehicle distribution centre. It aims to make Tshwane the automotive capital for vehicle manufacturing in Africa.

It was approved for the Critical Infrastructure Programme to construct bulk infrastructure, including a new road and bridge, widening [~Á|æ}^•Á~[!Á^çã•cã} *Á! [æã•ÉÁæ}ãÁc!æ~, &Á&ã!&|^•ÉÁ So far, the Hub has reported an investment of R20 million along with the employment of 58 construction workers. The project is also creating working opportunities for communities in the greater GaRankuwa, Soshanguve and Winterveld areas.

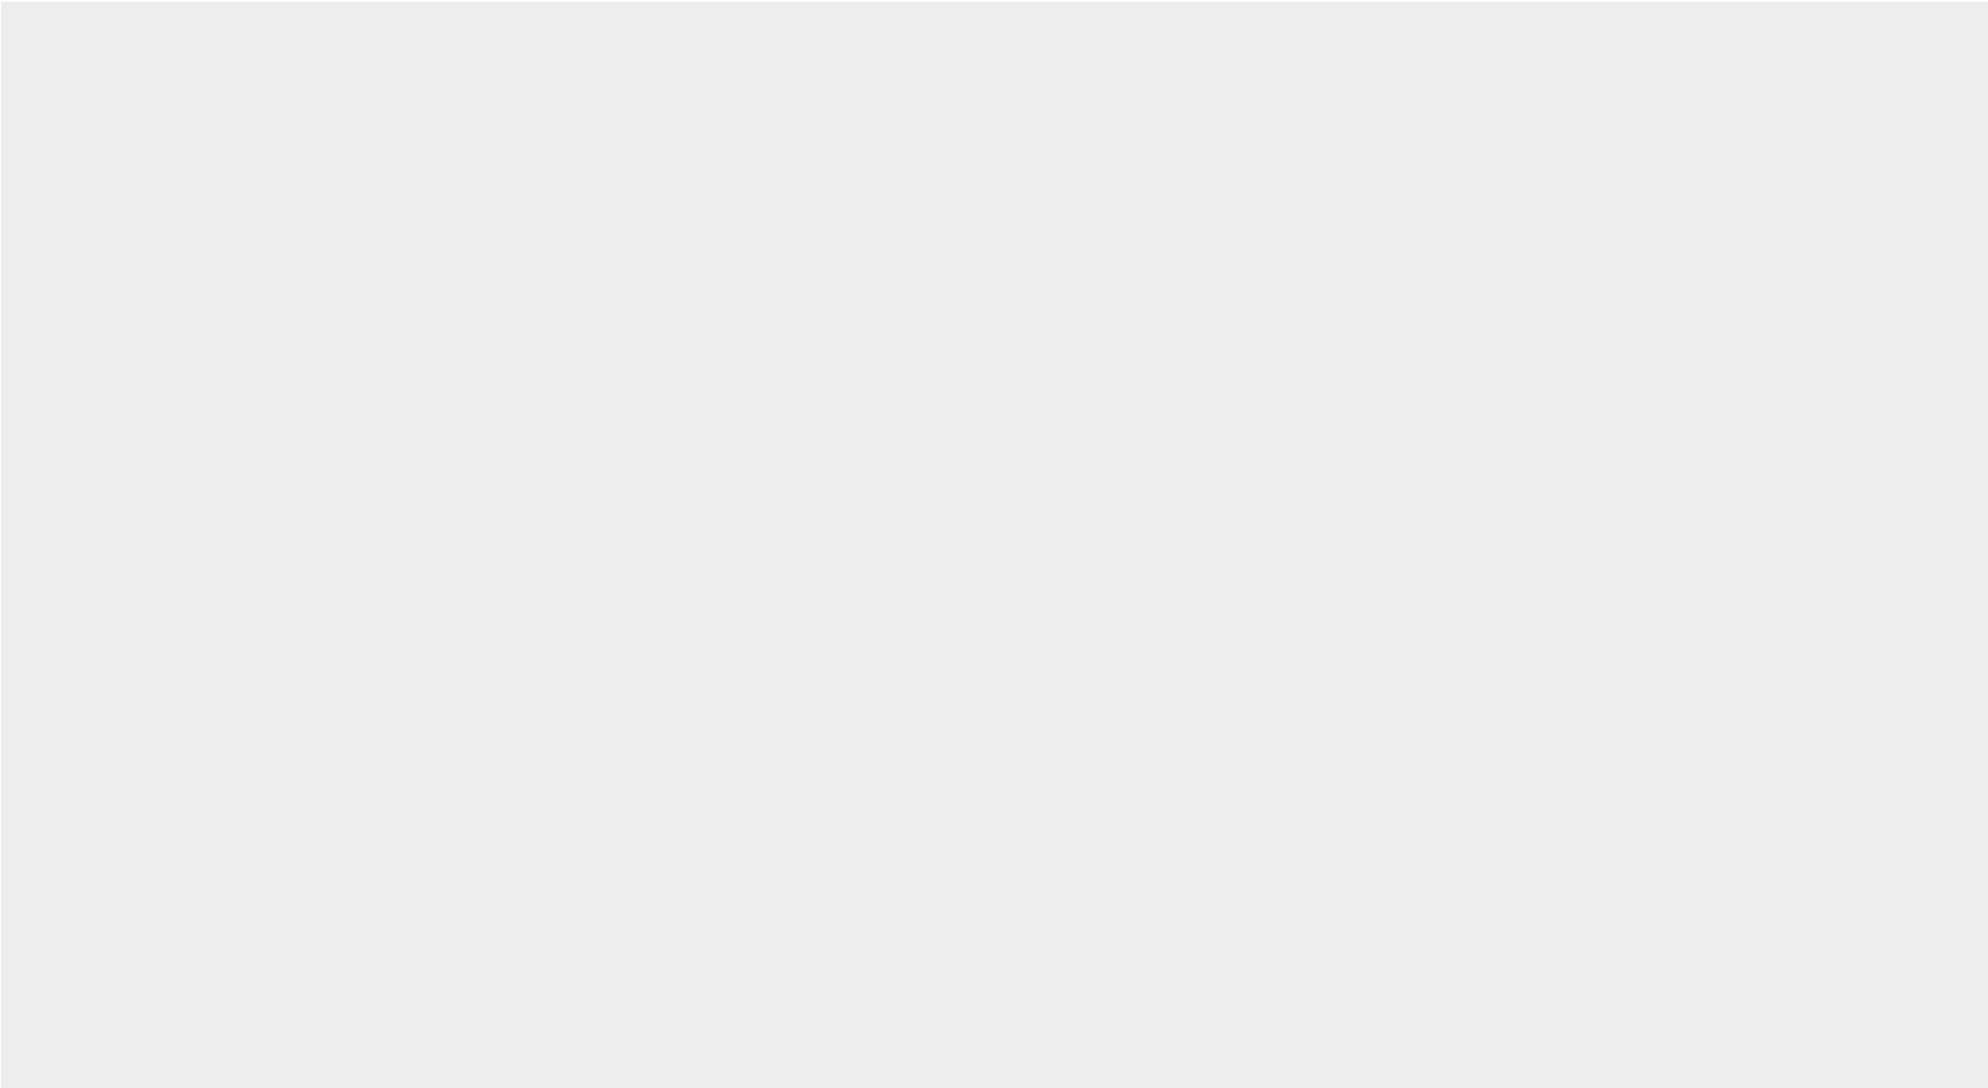

Once the CIP project is completed, it is envisaged that the new and improved roads will enable easy access to the Hub and link it to the N4 highway and Transnet’s freight link.

Established in 2014, **NJM Projects and Supplies Pty Ltd** is a black youth-owned, full-service logistics company providing transportation services in the Mining and related sectors. The company is based in the John Taolo Gaetsewe district, Northern Cape and is predominately involved in the transportation of manganese from the Northern Cape to the ports of Saldanha Bay and Port Elizabeth.

NJM evolved into a prominent player in the logistics industry, with plans to grow even further in this predominantly untransformed industry. To support this expansion the IDC provided capital that will go towards the purchase of additional trucks and trailers.

This transaction is one of many that originated as part of the IDC’s SME-CONNECT partnership programme, through which similar opportunities are leveraged from the Enterprise Supplier Development programmes of corporates. The Programme falls under the IDC’s Small Business Finance and Regions Division whose main objective is to support SMME’s and regional economic growth

The NEF will be implementing the following during the next year:

Strategically positioning smaller retailers to induce demand for agriculture businesses (food and other agro-processing) and manufacturers (like furniture)

Strengthening support for independent Black-owned retailers in townships is essential for ensuring their sustainability, so local customers have alternatives to large supermarkets. Smaller retailers are valuable community assets, often offering specialised products that may not be available in larger stores.

Funding franchises as it remains a relevant entry point for novice entrepreneurs given its blueprint approach.

MPC Managed Solutions (Pty) Ltd is a third-party service provider of online English tutoring with service centres based in the Nelson Mandela Bay Metropolitan A i b]W]dU`]hm`]b`h\Y`9UghYfb`7UdYz`7]hm`cZ`7UdY`Hc kb` Metropolitan Municipality in the Western Cape, YH\Y_k]b]` AYhfc dc`]hUb` A i b]W]dU`]hm`]b` ? kUNi`i! Natal and the City of Johannesburg Metropolitan Municipality in Gauteng. It is currently supported through the Global Business Services incentive.

Through a contract with a Gibraltar based company,MPC offers online English tutoring for clients in Japan, Spain, Russia, the United States of America, Venezuela, Poland and Taiwan. Over the last four years this contract has generated export revenue of **R360 million**.

The GBS is currently supporting **296** of the company’s **316 jobs**. These include **278 youth** and **246 female employees**. Employees come from areas such as Salt River in Cape Town, Chatsworth and Inanda in KwaZulu-Natal, as well as Orange Farm and Orlando West in Gauteng.

All of MPC’s incentivised jobs are non-complex, enabling new entrants to the labour market to access employment immediately after completing high school.

GLOBAL BUSINESS SERVICES

NUTUN BUSINESS SERVICES: CREATING JOB SECURITY FOR YOUTH

Nonkululeko Ntekola, Customer Services Agent.

Bihib' 6ig]bYgg' GYfjjWYg' Gc ih\` Africa (Pty) Ltd is a third-party offshore service provider located in the **City of Johannesburg, Gauteng**. It is currently being supported through Global Business Services to expand into the international market.

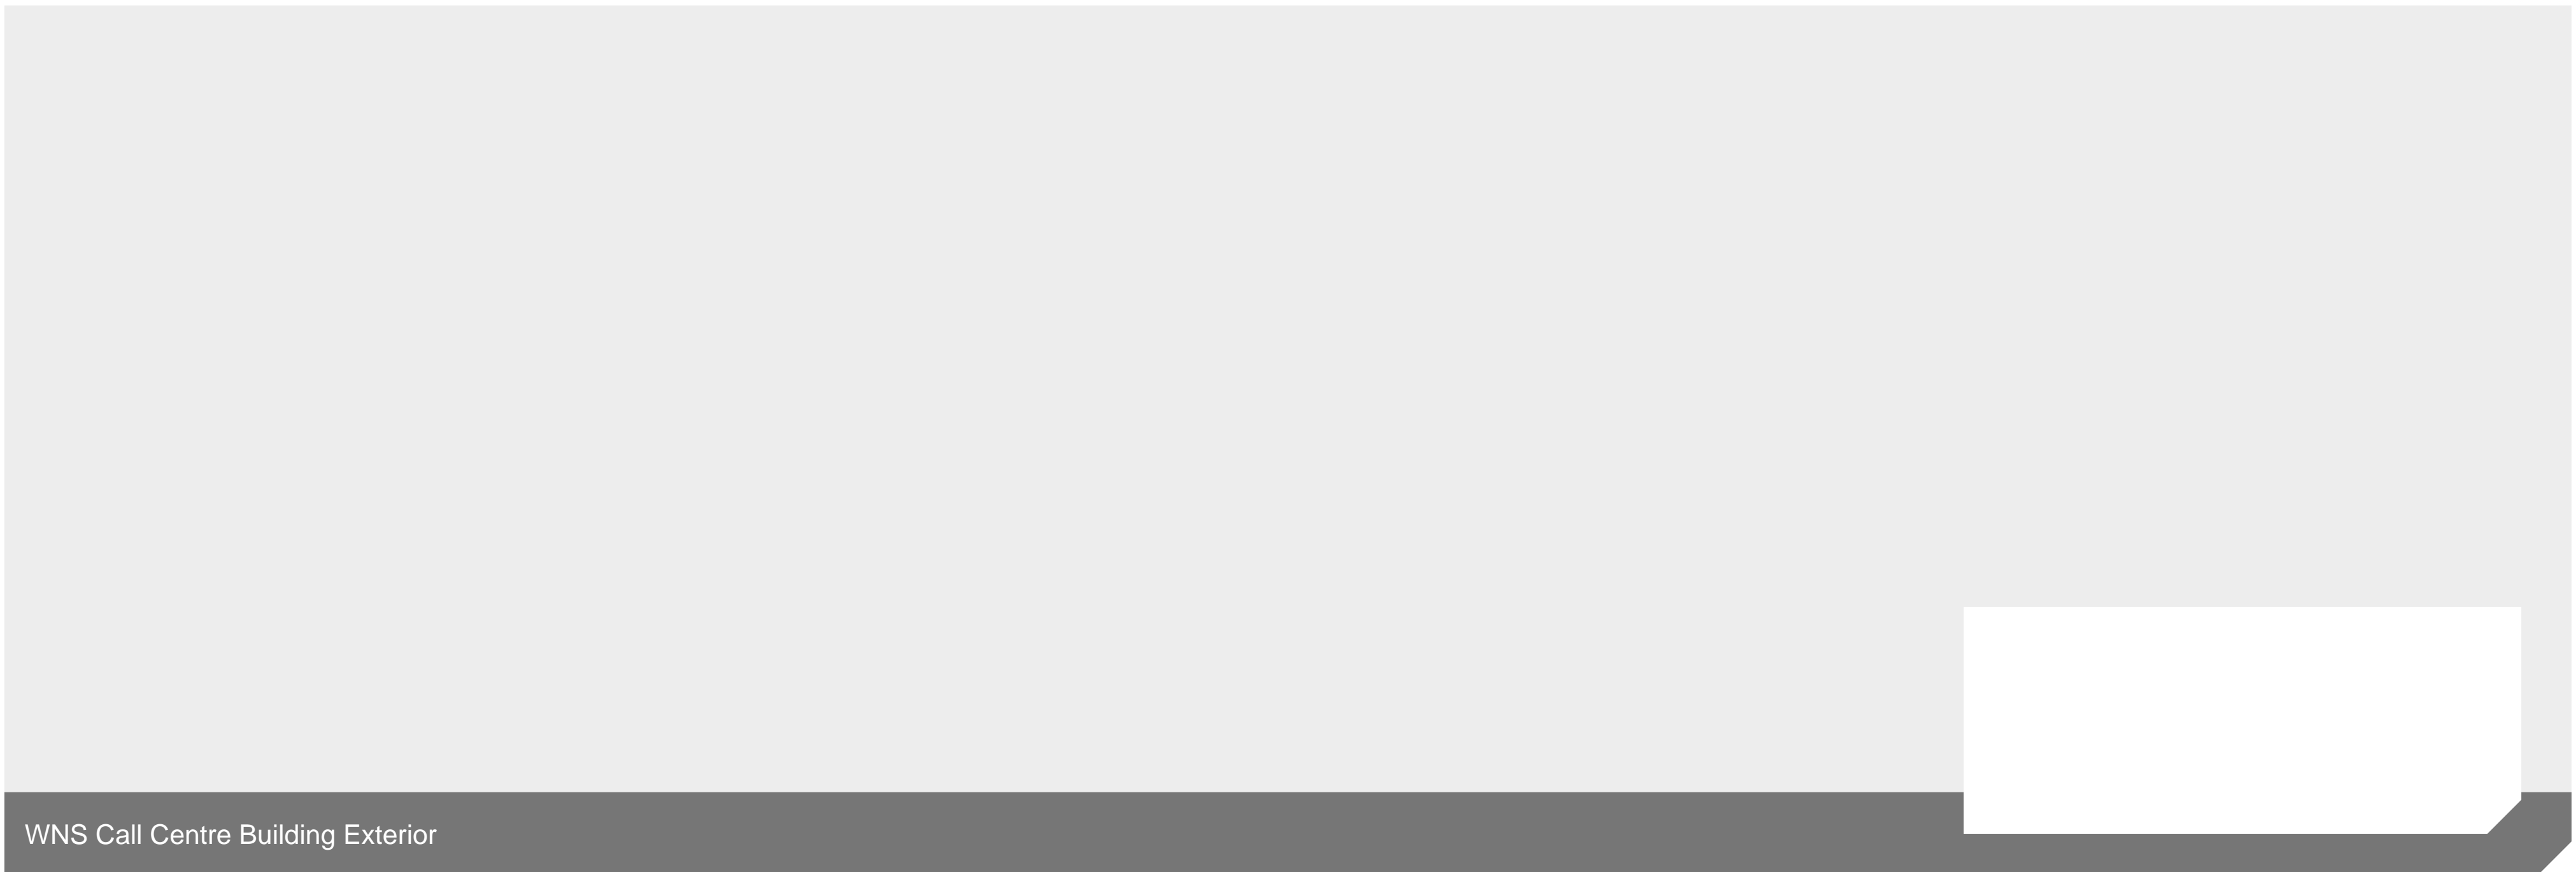

Through funding from the incentive, the company provides debt collection, customer services and sales support to UK- and US-based clients in the Energy, Retail and Banking sectors. This has resulted in export revenue of **R221 million** in the last three years. Clients from the United Kingdom and United States were attracted to South Africa based on the neutral accent of local English speakers, the higher retention rates of employees and the lower operation costs compared to international competitors, as

well as the state-of-the-art internet and telephone network infrastructure.

The company is providing long term job security through a 10-year contract. GBS is currently funding **256** of the company's **485 jobs** which includes **228 youth** and **197 female employees**.

Work opportunities created for graduates as well as more experienced South Africans through the GBS funding, includes two highly complex, six complex and **248 non-complex jobs**. Employees are supported with on-the-job induction training required for contracts being serviced, while some also receive supervisor training.

Luzuko Dakada, Customer Services Agent.

WNS Call Centre Building Exterior

WNS Global Services SA is a third-party service provider operating in the **debt collection services, customer services, sales and marketing** sectors. The company provides debt collection services, customer services, sales and marketing services. It was approved for the Global Business Services incentive to expand its operations and attracted seven-year contracts that generated export revenue of **R762 million** to date, enabling the operator to contribute towards job security.

The GBS incentive contributed to the creation of **2 516 jobs** bringing

the company's total to **2 516 jobs**. These include **1 610 youth and 1 291 female employees**. Work opportunities are created for new entrants to the workforce. Employees are supported with on-the-job induction training as well as learnerships.

AGILUS SOLUTIONS: CREATING AGILE, EFFECTIVE SOLUTIONS FOR COST-SAVINGS

Agilus Solutions, a black female-owned company based in the City of Johannesburg, Gauteng, has been operating since 2017, providing software solutions to various industries.

The company was approved by the Support Programme for Industrial Innovation to develop a SaaS (Software as a Service) solution that provides procurement data analytics solutions to small, medium and large companies. The software solution is a cloud-based portal learning technology that analyses a company’s procurement data to provide insight on cost savings.

Five employees were involved in the development of the prototype, which is currently being marketed at conferences and expos with three potential clients expressing

In the Middle: Professor Cletos Mapiye (Principal Investigator) and his team of postdoctorates, postgraduates and undergraduates.

Dr Yonela Njisane (Post Doctoral Research Fellow) in the labs performing feed, fecal and urine sample analysis for chemical composition and digestibility of the sorghum feed.

Chumani Farming CC, t/a Amazimba-BFF, based in the Buffalo City Metropolitan Municipality, East London, Eastern Cape was approved for funding from the Technology and Human Resources for Industry Programme to conduct research on sorghum/amazimba as an alternate feed for beef. Climate change and high demand for maize prompted the search for climate-smart, cheaper and higher energy feed for cattle.

The company partnered with the Agricultural Research Council, Fort Hare University and the University of Western Cape to conduct research on the impact of graded sorghum feed on

the quality of beef. The feed prototype was developed, and trial testing is complete with the results concluding that sorghum feed does produce quality beef products.

Sorghum feed is expected to give local commercial beef farmers and emerging communal farmers a competitive edge with the production and exporting of quality beef as ongoing climate change negatively impacts the supply of maize.

Hotstuff Innovations, is a black youth- owned SMME located in the East London Industrial Development Zone in the Buffalo City Metropolitan Municipality, Eastern Cape. It was established in 2014 to research innovative concepts and to develop technologies for various industries.

The company was approved for funding through the Support Programme for Industrial Innovation to develop a digital parking management system featuring a user-friendly interface that will display real time occupancy of parking bays across municipalities in both rural and urban areas.

Users will be able to download the parking app on their smart phones, which will show them the occupancy status of parking bays before they arrive at the parking area. They can also pay

for their parking with a QR code.

The patent for the proof of concept for this app was registered and published in October 2020. To develop the prototype, Hotstuff Innovations hired 13 employees, 10 of whom are from the Mdantsane, Duncan Village and Zwelitsha townships.

Hotstuff Innovations is targeting Buffalo City, Nelson Mandela Bay and Mangaung Municipalities for the initial product roll-out. The prototype of the app is projected to be completed and tested by September 2025.

LOL Tech is a black-owned and Soweto-based start-up that was founded by Simphiwe Mazibuko and his late brother Sipho Mazibuko. Established in 2015, LOL Tech is a mobile application available on the Google Play store and is available for download. It is an all-inclusive educational support system that can be utilised by relevant stakeholders in the education space, including learners, teachers, parents, schools and most importantly, educational institutions recognised by the Department of Basic Education.

The technologically advanced education tool provides academic support and enhanced learning processes. The software platform creates a virtual environment where all

stakeholders can make use of the advanced technologies to contribute towards improving the quality of education in South Africa.

LOL Tech received funding support through the IDC’s Khoebo Innovation Promotion Programme (KIPP) for the acquisition of assets and working capital. Funding support has enabled the company to commercialise innovative technology solutions that seek to improve the quality of education in underprivileged communities and help to address the challenges facing South Africa’s education sector.

INNOVATION

ORTHO-INNOVATIONS: DEVELOPING MEDICAL DEVICES FOR SPINAL SURGERIES

Ortho-Innovations, an SMME based in the City of Tshwane, Gauteng was approved for funding from the Support Programme for Industry Innovation to develop a pedicle screw and titanium cage prototype that is used during spinal fusion surgeries. In general, pedicle screws and titanium cages provide extra support and strength during the process of bone healing and recovery. In addition to this, the innovation provides rapid bone regeneration while ensuring a higher success rate in patients receiving lower back surgeries.

The company is registered with the South African Health Products Regulatory Authority (SAHPRA) as a manufacturer and distributor of medical devices and is currently in the process of getting accreditation for quality management systems as required by SAHPRA. It is also working towards accreditation with the United States of America's Food and Drug Administration agency (FDA) in order to comply with their safety and quality standards.

Once accreditation has been received the company will start with clinical trials and marketing of the prototype both locally and internationally. Ortho-Innovations expects production to commence in 2025.

PARATREND TECHNOLOGIES: DEVELOPING MEDICAL DEVICES FOR SPINAL SURGERIES

Paratrend Technologies CC, an SMME based at the City of Cape Town, was approved for funding from the Support Programme for Industry Innovation to design and develop wheelchairs that aim to replicate the body's natural standing posture, even while sitting to reduce ligament deterioration and chronic spinal column pain caused by prolonged sitting.

The company is preparing drawings to patent the design and lodged an application to register the trademark. It expects the prototype to be developed in 2025, followed by clinical trials over a period of six months and commercialisation of the prototype in 2026.
