1. Organisational Structure

2. Foreword by the Minister

Minister of Trade, Industry and Competition Ebrahim Patel

The shift from activities to impact targets

the dtic's 2023/24 Annual Performance Plan (APP) represented a marked departure from planning and implementation of *inputs* and *activities* to an explicit focus on impact targets that matter to the South African public such as job creation, economic growth and transformation.

When I tabled the 2023/24 APP at the start of the financial year, I indicated that it was “**Version 1.0**” to reflect that the APP is a dynamic document that will be updated in the light of experience and learnings based on the new approach to delivery of **the dtic group** services. As part of the implementation process, both the targets and our activities were subjected to a comprehensive technical review of the APP, encompassing a thorough evaluation of existing indicators and definitions to align them more closely with planning principles and to better track progress towards the ambitious targets. Furthermore, the 2023 budget speech highlighted the opportunity to integrate stretch targets into the department's APP.

I am pleased to therefore table this amended APP “**Version 2.0**” which incorporates four key stretch targets, which were revised upwards. These are designed to challenge **the dtic group** to strive to meet higher impact targets by working more efficiently and/or more effectively. These targets are informed by the prevailing economic conditions, for example South Africa's export performance in the first half of the financial year suggested that the export targets would be met relatively easily without a significant change in the dtic's implementation performance. The stretch target ensures that **the dtic** and its entities are constantly seeking areas of improvement. We have revised four targets upwards in total. These are:

- **Supporting or covering 1 million jobs**

- **Creating 100,000 new jobs and work opportunities**
- **Mobilising R300 billion in investment**
- **Supporting R800 billion in manufacturing exports to the world**
- **Supporting R330 billion in manufacturing exports to Africa**
- **Driving R40 billion in additional local value-addition**
- **Supporting Black Industrialists employing 20,000 workers with R36,8 billion in output**
- **Enabling 20,000 more workers to become shareholders in the firms they work for**
- **Providing R15 billion in support to enterprises outside the five largest metros; and**
- **Providing R8 billion in support to SMMEs, women and youth-empowered businesses.**

These targets are ambitious and will require a break in some of **the dtic's** traditional ways of working and a number of the activities that officials undertake.

The period ahead will require hard work, a solutions-based approach to implementation and strong partnerships. I wish to thank the team of officials led by the Director-General, and Deputy Ministers Gina and Majola, for their hard work on putting the new APP together.

Ebrahim Patel

Minister of Trade, Industry and Competition

3. Overview by the Director-General

Acting Director-General Malebo Mabitje-Thompson

Our department has adopted a new approach. Instead of focusing on inputs, we are now prioritizing outcomes as a more effective way of measuring the success of our work which includes promoting industrial development, investment, competitiveness, and fair regulatory practices for domestic and international trade.

We believe that by doing so, we can better coalesce and rally resources both within and outside of the state around the outcomes that are most important to us and to the communities we serve. This enhanced approach will help us to measure our success more accurately and to demonstrate the impact of our work.

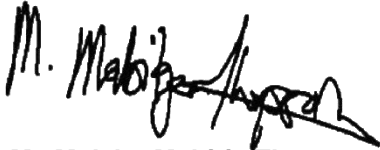

By implementing this new approach, our department is setting an example for the state in moving away from planning for audits to planning for outcomes. However, we understand that this shift may expose us to increased risk of external influences impacting our work. We take this concern seriously and acknowledge the potential for adverse performance audit outcomes.

To mitigate these risks, we will seek support from the Department of Performance Monitoring and Evaluation, National Treasury, and Auditor General to ensure that the audit practices consider the external environment in the determination of the audit outcome for our department. This approach will help us maintain a high level of accountability and transparency in our work while minimizing potential risks.

As the staff of **the dtic** we are committed to the Batho Pele principles of service delivery. We will work with stakeholders to implement this plan, be flexible and responsive to changing needs and circumstances, respond quickly to requests or complaints, and provide timely support when it is needed. We are confident that this new approach will help us better achieve our goals and make a positive impact on the lives of the people we serve.

We welcome partnership from industry, communities, various spheres of government and accountability structures as we strive to build a dynamic, globally competitive South African economy that benefits all its citizens, promotes decent employment, and advances equity.

Therefore, the APP 2023/24, prepared through consultation with management, is hereby submitted in accordance with the Revised Framework on Strategic and APPs.

A handwritten signature in black ink, appearing to read 'M. Mabitje-Thompson', with a stylized flourish at the end.

Ms Malebo Mabitje-Thompson
Acting Director-General

4. Official sign-off

It is hereby certified that this APP was:

- developed by the management of the Department of Trade, Industry and Competition (**the dtic**) under the guidance of the Minister, Mr Ebrahim Patel;
- prepared in line with the current strategic plan of **the dtic**; and
- accurately reflects the performance targets, which **the dtic** will endeavour to achieve given the resources made available in the budget for 2023 to 2024.

PART A: OUR MANDATE

5. Vision

A dynamic, industrial, and globally competitive South African economy, characterised by meaningful economic transformation, inclusive growth and development, decent employment and equity, built on the full potential of all citizens.

6. Mission

the dtic's mission is to:

- promote structural transformation, towards a dynamic industrial and globally competitive economy;
- provide a predictable, competitive, equitable and socially responsible environment, conducive to investment, trade and enterprise development;
- broaden participation in the economy to strengthen economic development;
- continually improve the skills and capabilities of **the dtic** to effectively deliver on its mandate and respond to the needs of South Africa's economic citizens;
- coordinate the contributions of government departments, state entities and civil society to effect economic development; and
- improve alignment between economic policies, plans of the state, its agencies, government's political and economic objectives and mandate.

7. Values

the dtic's values are:

- to advance South Africa's Constitution, notably the chapters on human rights, cooperative governance and public administration;
- to promote decent work outcomes (more and better jobs), industrialisation, equitable and inclusive growth and social inclusion;
- operational excellence in regard to service delivery standards, international best practices, Batho Pele Principles, continuous improvement and ethical conduct;
- intellectual excellence in regard to continuous shared learning, innovation, relevant knowledge and skills improvement, and knowledge management; and
- quality relationships with regards to improved and continuous communication, honesty, respect, integrity, transparency, professionalism, ownership, leadership and teamwork.

8. Updates to the relevant legislative and policy mandates

Reviews and Amendments will be undertaken on the following:

- The Companies Amendment Bill will be processed for Cabinet, focused on ease of doing business, indicators on wage differentials and where necessary, measures to combat money laundering and terrorism.
 - The following needs to be also addressed in the Companies Act to give effect to the President's response to the Zondo Commission Report:
 - *"The recommendation to **amend the Companies Act** so as to permit applications for a director to be declared delinquent to be brought even after two years is accepted and will form part of a review of the Companies Act that is expected to be concluded in the 3rd quarter of 2023"*
- The work on the Copyright Amendment Bill will continue in Parliament towards finalisation, to ensure a rigorous and effective legislative regime for the creative industry and other copyright-based industries, with strengthened legal protection for rights holders.
- The National Gambling Amendment Bill is in the mediation process in Parliament.
- The first drafts of the Patents Bill and Designs Amendment Bill have been prepared. They will be tabled for consideration by Cabinet.
- Amendments to the National Building Regulations and Building Standards Act will be prepared for consideration by Cabinet, to take account of the outcome of court rulings.

9. Update on institutional policies

The policy and regulatory mandate of **the dtic** extends to large parts of the economy covering policy responsibilities as diverse as competition, trade, and gambling and consumer protection. This expansive mandate has led to the establishment of a number of entities with regulatory responsibilities, development finance institutions, and those responsible for South Africa's standards system. The "**dtic group**" therefore consists of the entities outlined in Figure 1.

Figure 1: Entities of the dtic group

The role of the Department is to carry out its mandate through use of the resources within its own control and to coordinate the activities of the entities responsible to the Executive Authority. This responsibility is spelt out more clearly in this APP compared to the APPs of previous years, through incorporating the work of the entities (the dtic-group) within a number of the dtic's own targets. .

10. Updates to institutional policies and strategies: A re-imagined industrial strategy

Our industrial strategy has to promote industrialisation with higher levels of growth and investment. At the same time, it has to overcome the core socio-economic challenges of deep levels of inequality and joblessness. These changes all require disruptive and far-reaching structural changes in long-standing economic systems. At the same time, the profound changes wrought by the pandemic, slower international trade growth and heightened tensions amongst major economies is profoundly changing the context for industrial policy.

10.1 What we mean by industrial policy

Industrial Policy historically has been defined as the state's efforts to shape the sectoral allocation of the economy and promote structural transformation by targeting specific industries, firms, or economic activities, through measures such as financial incentives, procurement policies, tax breaks, use of targeted trade policies, regulations, infrastructure development, and research and development support.

In the publication *The Industrial Policy Revolution II: Africa in the 21st Century*, Joseph Stiglitz remarks as follows:

“Recent economic history has shown that it is still possible for countries to achieve substantial growth in manufacturing, becoming successful in both manufacturing goods and product innovation. [The] resurgent industrial policy has learnt the lessons of both failure and successes elsewhere. It is smart industrial policy.

But modern industrial policy is not just concerned with expanding the industrial sector. It is predicated on the belief that government can play a constructive role in shaping the economy – indeed, there is no choice but for it to do so. That may entail encouraging the economy to move in more environmentally sustainable ways than it otherwise would; or to create more jobs. It might seek to create an economy with less inequality, or with a stronger research and development sector, or a more productive agriculture sector.

So how do societies industrialize and modernize successfully in a globalised world? And how do they maintain dynamic competitiveness? Every successful industrializing economy used a wider toolbox of measures, one that drew on core state functions.”

He then goes on to say these include:

- Shaping infrastructure and supply chain logistics to ensure that the output of emerging manufacturing industries can move cheaply and quickly between countries and from production centres to markets.
- Innovation and R&D as well as technology policies that deepen the local technological base especially by diffusing production and product innovations on a large scale. Critically, we must encourage the development and use of innovations that meet Africa's specific needs, including in rural areas, with technologies geared to the climate, biology, and logistics challenges facing the continent.
- Education, skills, and productivity policies that identify the best ways to empower millions of African workers and entrepreneurs.
- Competition policies that simultaneously improve market access and act against abuse of market power, not as aims in themselves but as tools to promote employment and industrial capacity.

- Trade policies that integrate markets, creating the critical mass and economies of scale, while maintaining space for new industries to emerge especially on a regional basis.
- Macro-policies that ensure stability and a competitive exchange rate.
- Financial policies that ensure access to finance at affordable terms, even by small and medium-sized enterprises.

Over the past number of years, industrial policy has responded to a range of objectives, from national security (typically relating to defence), economic resilience (addressing vulnerabilities in supply-chains or securing production of food or healthcare products), to deepening economic opportunities (for example SMME promotion) or employment (boosting or retaining jobs).

Industrial *strategy* aims to convert the overall policy into a practical framework for concrete government action within the new and emerging global landscape.

10.2 Our changing industrial policy

In the past few years, South Africa – like the world as a whole – has had to re-think its industrial strategy in light of changing domestic needs and a series of international shocks. This started with the pandemic and was followed by extraordinary fluctuations in our export markets and a rapid intensification in contestation between some of our major trading partners. The persistent and deepening challenges facing the national electricity grid, which escalated in 2022, underscored the need for a more vigorous and targeted industrial policy response.

At the start of the current administration (before the pandemic), **the dtic** began to re-imagine South Africa's industrial policy. It aimed to focus more clearly on strategic value chains, above all by promoting localisation and sector masterplans; to ensure that more South Africans benefit directly from the industrialisation process through job creation and more broad-based ownership of businesses; and to promote the legal and other modalities required to increase trade within Africa, through the AfCFTA.

The pandemic interrupted implementation but the approach was adapted to address the immediate challenges of shortages of critical medical products. Significant progress was made with production of medical-grade and other face-masks, hand sanitisers, ventilators and a range of therapeutic medications, for domestic use and export to other African countries. South Africa was also able to adapt one (and later two other) facilities to produce vaccines and production commenced in the first half of 2021. Billions of rands of GDP were generated through these interventions, jobs were created and health security was enhanced.

The pandemic response, captured in October 2020 in the Economic Reconstruction and Recovery Programme, prioritised support for businesses, workers and communities and the development of local manufacturing capabilities.

The reimagined industrial strategy also builds on and incorporates key aspects of other national policy documents adopted by Cabinet, including the National Development Plan, the New Growth Path framework and the Industrial Policy Action Plans. In May 2021, **the dtic** issued three policy statements, on Localisation for Jobs and Industrial Growth; A Trade Policy for Industrial Development and Employment Growth; and Competition Policy for Jobs and Industrial Development. These documents set out the core priorities and instruments for industrial policy.

10.3 The aims of industrial policy and its supportive strategy

The dtic's success indicators have to link clearly to the aims of our re-imagined industrial policy. In the 2022/23 Financial Year, **the dtic** introduced three apex outcomes to which all programmes and entities of **the dtic** group were required to contribute. These apex outcomes are

- **Industrialisation** to promote jobs and rising incomes,
- **Transformation** to build an inclusive economy, and
- **A capable state** to ensure improved impact of public policies.

Their introduction aimed to: strengthen the focus on key priorities across **the dtic** group; improve coordination within the Department; align resources to priority areas; and increase implementation efficiencies by drawing on the resources of all **the dtic's** entities.

The three apex outcomes have six underlying pillars. They reflect the core aims of our re-imagined industrial policy, and the three apex outcomes, in the form of a strategy that seeks to:

1. combine growth with transformation
2. boost local production
3. grow exports and expand African trade
4. increase levels of investment
5. establish a more reliable and low-cost energy system while greening the economy overall; and
6. grow employment.

Taken together, the industrial strategy seeks to *deepen* the domestic market by growing employment, increasing incomes and undertaking other measures to improve equity and income distribution, and to *widen* the market for South African goods and services through a stronger focus on exports to the region and other rapidly growing economies.

Research done by international and domestic agencies have pointed to the constraining effects of the economic structure on growth and its negative distributional effects. By structure we refer inter alia to:

- Unusually large income and wealth disparities by international standards, which fray the social compact and makes it harder to build consensual actions in the economy and finds expression in

periodic bouts of adversarialism in the industrial relations structure. Economic inequality has become a key blockage to development and growth.

- High levels of joblessness compared to the rest of the world, largely due to the historic reliance on capital-intensive industries dominated by a few very large companies, combined with the destruction of family farms and businesses under apartheid.
- The associated high levels of economic concentration in product markets (documented in the seminal report by the Competition Commission, issued in December 2021) with a very weak small and medium business sector by international standards, with unrepresentative ownership by race and gender in the formal sector.
- A trade structure that still relies on significant export of raw materials and import of capital and consumer goods, without sufficient deployment of commodity-based revenue for economic diversification and skills development.
- Low savings and high consumption levels, while the richest 10% of households account for over half of household consumption and over 90% of financial savings outside of pensions.
- a high carbon-intensive economy.

Over-reliance on a few geographic areas for economic output outside of the mining and agricultural sectors, so that the elimination of apartheid residential restrictions has led to mass migration to the largest metros and especially Gauteng.

While industrial strategy responds to these structural features, there are a number of strengths in the SA economy that can be built on.

First, the strategy seeks to build a new model of growth and economic inclusion that unites South Africans in the economy and promotes transformation.

To do this, the industrial strategy involves simultaneously dealing with both dimensions: boosting growth while promoting greater inclusion. A number of pro-growth policies have been put in place in recent years, ranging from economic reforms to the focus on infrastructure investment. Some of these areas are further explored below.

The set of policies aimed at promoting greater inclusion, largely under the heading of broad-based black economic empowerment, have been revamped to focus on black industrialists. In contrast to the initial emphasis on securing shares of existing companies for black investors, **the dtic** now aims to expand the number of new firms owned and run by black South Africans and to increase the industrial output and jobs created by black industrialists. During the Black Industrialist Conference held in 2022, the results of this shift in focus was evident in the case studies of successful domestic and export market penetration by firms owned by black industrialists.

In addition, more active efforts are being made to promote worker ownership in firms, with representation on corporate boards. The new worker-ownership arrangements should not only improve workers' share in profits, but provide mechanisms for the voice of labour to be heard in corporate decision-making structures. The aim is to build a real partnership for growth and development, overcoming the deep divides left by apartheid. A number of firms have now introduced worker ownership schemes and more than 400 000 workers are currently covered by such arrangements.

Second, the re-imagined industrial strategy recognises that the economy needs a production boost.

It will build local industrial capability, both for the domestic and export markets.

South Africa's import to GDP ratio is too high for an economy that desperately needs more jobs. According to World Bank figures, in 2021 imports equalled 25% of the GDP, compared to an average of 22% for upper middle income economies as a whole and between 17% and 24% for the other BRICS. Our propensity to import is out of line with peer countries and developed economies, and much of the imports could be more sensibly and sustainably produced locally.

The local industrial effort – called localisation for short - must be rooted in building both dynamic firms and an inclusive economy. Competitiveness and industrial agility are critical to longer-run localisation efforts. A localisation social compact was reached at Nedlac that identified a number of key value-chains where opportunities exist. Sector master plans developed and implemented in partnership with business and unions contain the details of how to do this. Progress has been made with the opening of new factories producing for example anaesthetics and vaccines, mainline rail lines, glassware, paper pulp and other products.

We also need practical steps to promote, where sustainable, a greater level of beneficiation of our natural resources here in South Africa. Beneficiation has been identified as a means to build a higher employment (and GDP) boost. It will require refocusing the beneficiation strategy to support fabrication (stage 4) rather than only smelting and refining, which are both capital and energy intensive. Further thought needs to be given to measures to address uncompetitive pricing of locally produced raw materials and intermediate inputs.

The re-imagined industrial policy aims to promote a range of services, taking advantage of new technologies, including artificial intelligence. South Africa's comparative advantage in this area includes engineering, construction services, logistics, security, education, healthcare and legal services. Niche tourism is a great way of attracting more people to visit South Africa while generating income for locals. These activities can generate a host of new opportunities across Africa and globally while generating jobs on a large scale.

Third, the industrial strategy focuses on increasing the level and composition of exports through trade with the rest of the world.

Trade policy needs to be a source of new jobs and expansion of the industrial economy. That requires maintaining our centres of excellence, notably the auto industry and related activities as well as mining and high-level farming. But we also need to do more to compete in more labour-intensive value chains that have driven job creation through industrialisation worldwide, including food processing; clothing and footwear; electrical appliances and electronics; plastics; and the service sector.

One of our successes has been the export of business services, including through new call-centres as a result of incentives and active support to the sector. During the pandemic lockdowns, call centres were kept open safely while their competitors elsewhere were closed.

The AfCFTA has become a central focus for trade policy. We made significant progress with its legal framework in recent years including rules of origin that favour African value-addition, and progress with protocols to guide policies on investment, intellectual property and competition. During the current financial year, the work is expected to be completed on the SACU offer on 90% of goods to be traded under the preferences. Progress is expected to be made to finalise trade-related protocols and the offer on services. These measures should provide a boost to regional trade and development in the coming years.

South Africa also has preferential access to a number of other markets, including the European Union, the United States, and Mercosur. Industrial strategy measures need to unlock the opportunities for value-added products, particularly manufacturing through this access, as has been done to date with auto and component exports. Engagement within the BRICS group can also leverage fresh investment and need to open up markets for SA's manufactured products.

More broadly, South Africa continues to advocate internationally for a fair rules-based trading system. The alternative is facing unilateral action from larger economies, whether imposing tariffs on major exports such as steel and aluminium or the accelerated imposition of carbon taxes.

Fourth, industrial strategy seeks to boost levels of investment through coordination and the use of various public policy measures, making it possible to take advantage of steps to expand our markets through localisation and exports. Coordination includes efforts to combine public measures (such as provision of infrastructure) with private investment efforts; or facilitating the speed of regulatory approvals by highlighting the growth and jobs benefits (for example visas or environmental impact assessments). Policy clarity and certainty also promotes greater investor confidence and levels of investment.

For the next five years, the national government has set a new target of R2 trillion in investment. The first year of this target overlaps with this APP and informs the indicator for investment.

Sector-level compacts in the form of masterplans provide a useful platform for increased investment, through addressing constraints to increased investment and at the same time securing commitments to higher investment levels and facilitating new investors in key sectors.

Competition and trade policies are now more clearly directed at increasing levels of fixed investment in the economy. Infrastructure investment will need to be speeded up, crowding in private investment and industrial expansion.

Development finance institutions have been given clear targets to increase levels of investment and greater coordination with the commercial banking sector will be needed.

Fifth, the strategy aims to ensure a more sustainable, reliable and affordable energy system while promoting green industrialisation and ensuring a just transition.

According to CSIR estimates, the number of hours lost to loadshedding climbed from 100 in January 2022 to over 2500 in December. This development is obviously a significant threat to employment and industrialisation, as well as living conditions. In these circumstances, a core aim of industrial policy is to enable producers to use electricity wisely and, where appropriate, to develop new sources, including both new generation for the national grid and off-grid production for their own use.

The specific electricity challenge is part of a broader disruption of the national and global energy system in response to climate change. The challenge for industrial policy is to avoid SA (and the African continent) being left behind, with stranded assets as a result of our unusually carbon-dependent economic model. But the transition also offers new opportunities for industrial processes and products that can help the world avoid the worst of the crisis.

If the 20th century becomes known as the century of crude oil and nuclear energy, the 21st century may be known as a century of renewable energy and green hydrogen. SA is well-positioned to become a key player, with our reserves of platinum group metals used as a catalyst in green hydrogen fuel-cells; as well as vanadium used in battery storage technologies. Amongst others, South Africa has already been able to increase the share of renewable electricity; embark on assembly of hybrid vehicles using a combination of internal combustion engines and electric motors; improve battery-storage and green-hydrogen technologies; and enter production of consumer products that use solar energy.

New opportunities may arise from technological breakthroughs in carbon-capture and storage and regulatory shifts such as the adoption of e-fuels. Indeed, the EU recently decided to include e-fuel driven vehicles within their permitted regulatory framework for the post-2035 car market. What these point to is the need for agility in industrial strategy as the new technologies that are shaping the green revolution are not yet settled.

A specific focus will be on the transition plan to shift to production of electric vehicles (EVs) and core components, including EV and grid batteries.

Sixth, industrial strategy as a whole must aim more clearly to promote greater levels of employment. All of the pillars of industrial policy must be geared to generating more inclusive industrialisation overall. Every economy needs a balance between high-tech, capital-intensive, highly competitive activities and more labour-intensive, often less productive industries that generate employment and support smaller producers on a mass scale. For industrial policy, the challenge is to ensure that, in South Africa, the balance shifts in ways that promote a step up in employment and self-employment.

In the future, industrial strategy has to do more to promote value chains with high labour-absorbing capacities, such as clothing and textiles, furniture, agro-processing, plastics, hospitality and tourism, retail and the public and private services in general. In addition, the social economy (sometimes called the solidarity economy) can complement traditional industrial strategies to expand job creation. The social economy includes a myriad not-for-profit producer such as coops, non-governmental organisations (NGOs), stokvels and public employment schemes.

10.4 The institutional context

Industrial strategy rests on effective institutions. To unlock the potential of these six strategic pillars, the state will need to integrate its own work and that of the private sector and labour into a more compelling growth and transformation story. Deeper integration, enhanced state capability and more alignment across the spheres of the state, including engagement at district level and around the SEZs, is imperative.

At the same time, the state has to be responsive to the needs of the main economic stakeholders. Effective industrial policies necessarily some short-term costs and trade offs. To succeed, other costs should be minimised. A successful strategy requires stronger state capacity and agility, with improved ease of doing business and less unnecessary bureaucracy and red tape, replacing them with smarter regulation.

11. Impact-focused APP

The six pillars of our re-imagined industrial policy shape our core objectives in this APP and the apex outcomes of **industrialisation, transformation and building a capable state**.

The 2023/24 APP contains 45 strategic priority areas which centre on the expected impacts and outcomes embodied in the six pillars of our industrial policy. This is a significant break from the traditional way in which APPs are constructed and provides a more meaningful set of impact targets while also clarifying the policy, financial and human resources, and other forms of interventions, which will be deployed to achieve these impacts.

This new approach is not without its own challenges.

In the past, **the dtic** targeted inputs and activities that can have a beneficial outcome and impact on jobs, industrial output, exports and investment. This was done because the Department was cognisant that many factors in the external environment that fundamentally shape key outcomes, were outside the control or influence of **the dtic** group. Examples of these external factors include the performance of the global economy (growth rates, recessions or central bank decisions which impact on demand for SA goods and services as well as the appetite of investors), geo-political developments (impact of wars and conflict), shock events (banking crises), climate change events (floods or droughts) and domestic external factors (energy availability, transport logistics, crime or confidence perceptions).

While these concerns are valid and do indeed impact on the key outputs and outcomes, a focus on inputs and activities can distort **resource allocation** (time, human resources and finances) to what has been done in the past, or to internal lobbying or to ease of achievement, rather than those actions that can help to achieve the key outcomes.

To address both these concerns, a new approach had to be found.

The Executive Authority has directed that a set of outcomes be targeted, as set out below. The key sensitivities, co-dependencies or external factors that may affect these are set out clearly in the APP. When these sensitivities or co-dependencies change, or unexpected events or shocks arise, the Executive Authority will consider these and determine whether they are sufficiently material to require a revision of targets during the course of the financial year. Revisions of targets are not unusual – what is new is the transparent factors that will influence such revisions.

While the new approach focusses substantially on meaningful outputs (for example on jobs), there are instances where a hybrid approach is adopted that has a component of input embedded in the outcome or impact. For example, while the number of enterprises benefiting from incentives can be considered an input in achieving employment and investment objectives, it is still an appropriate target because of the need for administrative efficiency to ensure that funding actually reaches firms and entrepreneurs. Similarly, programmatic interventions this year often yield their full output and outcomes in subsequent years. This is true, for instance, of measures to address ownership de-concentration in the economy.

The new approach is a step on a path to evolving performance planning and measurement to transparently account for the ways in which public resources are deployed by **the dtic** Group in support of the overarching economic policy goals of government. Our impact-focused planning will in future evolve in ways that are tightly connected with the economic goals of government as a whole, and ensure that **the dtic** plans, functions and accounts for the economic returns against public resources invested in pursuit of those goals.

The dtic's role is fundamentally to establish, administer and develop the enabling conditions and micro-economic context in ways that shape, facilitate and catalyse firm-level competitiveness and activity in order to drive a vibrant economy that delivers accelerated economic growth, inclusion and transformation.

This is a step in a new direction. It is not perfect and as indicated, comes with risks.

The new approach requires us to actively seek engagement not just about what has been achieved (or not), but about what we are doing, what we are learning, how we are responding when we miss targets, and about the quality of the decision-making and resource allocation.

We are doing this despite the obvious political risks because it is important to shift the foundations of our economic social compact to one based on more openness and engagement – and that means we embrace the new approach with all its imperfection and ambiguity and invite our partners in business, labour and civil society to join us on this journey.

The dtic's impact objectives are therefore to be a critical enabler and contributor to the delivery of the following key economic and industrial outcomes and measures that will be developed over the medium-term strategic framework and implemented in its first phase in this financial year:

The following table summarises the key assumptions underlying the targets.

Table 1: Key assumptions underlying the targets

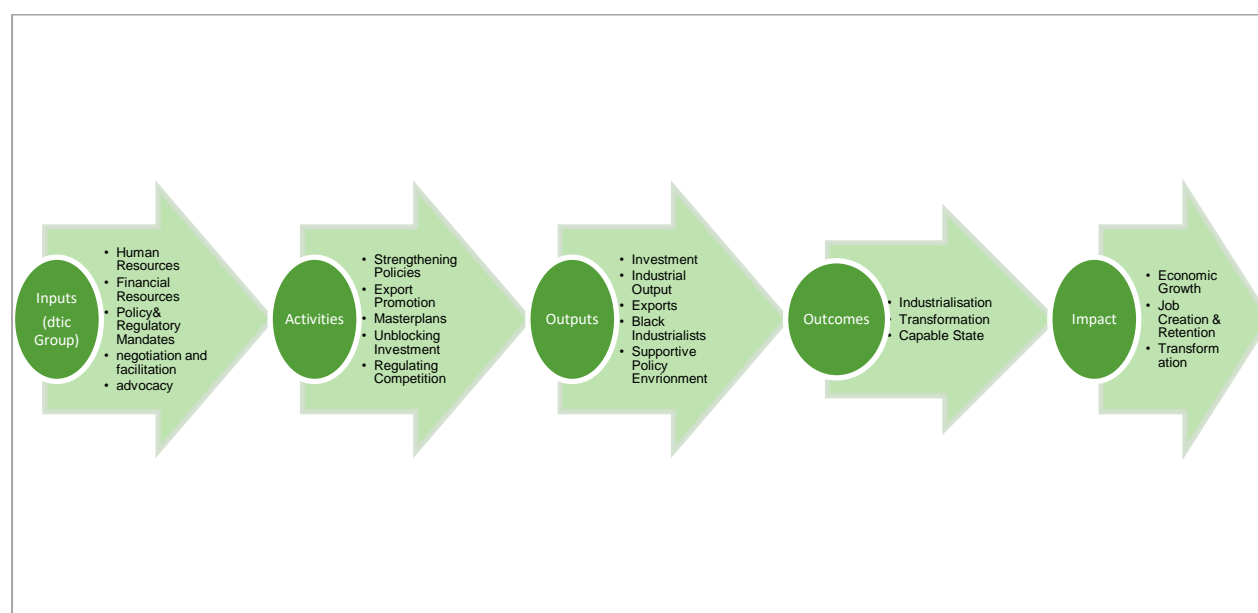

1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. No domestic recession.
2. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022.
3. No major new shock events domestically or globally (including climate catastrophes, significant instability in financial/banking systems, significant increases in oil prices).
4. Energy availability to industrial users would be on average similar to 2022 or alternatively, mitigation measures such as the tax relief for rooftop solar, would be sufficient to offset energy disruptions
5. Transport and logistics infrastructure operates at a level similar to 2022 without additional significant disruptions to rail, road, port and air freight operations.
6. All African Continental Free Trade Area (AfCTA) state parties are ready to implement tariff preference (currently only five countries have started trading preferentially on a limited number of tariff lines). Relevant negotiations facilitated by the AfCTA Secretariat to conclude outstanding issues in the AfCTA negotiations.

This new approach has been developed within the broad frame of the theory of change (ToC) methodology which demonstrates how inputs and activities contribute to desired outcomes and impact.

The ToC in figure 2 seeks to capture the essence of **the dtic's** intervention logic. The financial and human resources of **the dtic** group are the inputs that fund and resource a broad variety of activities. These activities – for example assisting companies to increase exports – may directly or indirectly result in companies securing new export orders. These export orders are considered an output of **the dtic's** activities and contributes to the achievement of the Department's apex outcomes. In this case, new export orders may contribute to both the industrialisation and transformation outcomes. For example, a company may expand production to fill new export orders and may procure inputs from empowered firms thereby contributing to the industrialisation and transformation outcomes respectively.

The aggregation of these firm and industry-level outputs and outcomes has a direct bearing on the key impacts – such as increased job creation – that are the core objectives of government's current electoral mandate.

Figure 2: Simplified Theory of Change for the dtic group

12. Defining Outputs and Setting the Context to Achieve Them

The activities of **the dtic** are expected to result in both direct and indirect outcomes.

A total of 45 Outputs have been developed to guide the work of **the dtic**-group in the financial year. These targets are divided into four types:

- 10 Core targets measure the performance and transformation of the economy and reflect some of the ultimate objectives we are trying to achieve.
- 13 Programmatic targets help us achieve the aims of our Core targets, but directly measure the impact of specific activities, such as providing industrial finance.

- 15 Enabling targets make our Programmatic targets achievable, by creating the systems and environment that make our activities work.
- 7 Contextual responsive targets often involve work outside of our core programmes and are designed to respond to pressing needs in the economy, and to encourage **the dtic** to be flexible and agile in our work.

The 10 core outputs (in the form of key targets) are as follows:

- R300 billion in investment pledges secured across the state
- R40 Billion in additional local output committed or achieved
- R800 Billion in manufacturing exports
- R330 Billion in manufacturing exports to other African countries
- R8 Billion in exports of Global Business Services (GBS)
- R40 Billion in Black Industrialist Output Achieved
- 1 Million Jobs Supported or covered by Master Plans
- 100 000 jobs to be created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)
- 23 000 jobs in Black Industrialists firms
- 20 000 additional workers with shares in their companies

12.1 Functional focus of outputs

An additional 35 outputs (programmatic, enabling or responsive to immediate needs) have been included in this APP. The following tables indicate the functional focus of these outputs. Output numbering refers to the classification in the consolidated table, found later in the section. Pillar numbering refers to the section in dealing with the aims of industrial policy. Outcome numbers refer to: Industrialisation (1), Transformation (2) and Capable State (3) though it should be seen as indicative, as one Output intended to cover a single Outcome can and does have positive spillover-effects on the other Outcomes.

12.1.1 Investment

Number	Output	Pillar	Outcome
Output 1	R300 billion in investment pledges secured across the state	4	1
Output 23	100 Investor facilitation and unblocking interventions provided	4	1
Output 17	1 New SEZs applications considered for designations	4	1,2

12.1.2 Industrial production

Number	Output	Pillar	Outcome
Output 2	R40 billion in additional local output committed or achieved	2	1
Output 11	R40 Billion in black industrialist output achieved	1	1,2

12.1.3 Exports

Number	Output	Pillar	Outcome
Output 3	R800 billion in manufacturing exports	3	1
Output 4	R330 billion in manufacturing exports to other African countries	3	1,2
Output 5	R8 billion in exports of Global Business Services (GBS)	3	1
Output 27	Commencement of South Africa's preferential trade under the AfCFTA	3	1
Output 28	10 High impact trade interventions completed	3	1,3
Output 41	4 Protocols finalised under the AfCFTA	3	3

12.1.4 Industrial support

Number	Output	Pillar	Outcome
Output 6	R30 billion in support programmes administered by or in partnership with the dtic group	1	1,2,3
Output 7	R15 billion support programmes to enterprises in areas outside the 5 main metros	1	1,2
Output 8	R8 billion in financial support programmes and procurement contracts approved to SMMES, women and youth-empowered businesses	1	1
Output 9	R7.5 billion in financial support programmes to enterprises in labour absorbing sectors	1, 6	1
Output 43	Promotion of a transparent and just adjudication process for incentive applications	1	1, 3

12.1.5 Transformation

Number	Output	Pillar	Outcome
Output 10	R 800 Million in Equity Equivalent Investment Programme agreements	1	1,2
Output 15	20 000 additional workers with shares in their companies	1	1
Output 16	10 high-impact outcomes on addressing market concentration, at sector or firm level.	1	1,2

12.1.6 Jobs

Number	Output	Pillar	Outcome
Output 12	1 million jobs supported or covered by the dtic group and / or master plans	6	2
Output 13	100 000 jobs created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)	6	1,2
Output 14	23 000 jobs in Black Industrialists firms supported	1, 6	1,2

12.1.7 Energy

Number	Output	Pillar	Outcome
Output 18	R1.3 billion in financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund	5	1,2
Output 19	1400 Megawatts of energy from projects facilitated	5	1,3
Output 20	550 Megawatts of energy available for the grid	5	1,3
Output 21	1 Energy One-stop Shop operational	5	3
Output 22	Expedited regulatory amendments and flexibility, to promote energy efficiency	5	1,2,3

12.1.8 Green economy targets

Number	Output	Pillar	Outcome
Output 29	1 Strategy and advocacy finalised responding to green trade barriers (CBAM)	5	1
Output 30	1 EV White Paper finalised	5	1
Output 31	1 Finalisation of green hydrogen commercialisation framework	5	1

12.1.9 Stakeholder engagement and impacts

Number	Output	Pillar	Outcome
Output 25	10 Business Forums hosted aimed at supporting increased FDI, exports and outward investment.	1	1,2,3
Output 32	1000 Case studies of firms, workers, entrepreneurs, professionals or communities impacted by the dtic measures: including 12 local films/documentaries telling the SA story	1	1
Output 33	52 Community outreach programmes by the dtic group	1	1,2,3
Output 37	5 Conferences, summits, and international forums hosted	1	1,2,3
Output 45	10 Successful actions completed on price monitoring and excessive pricing or price gouging	1	1,2,3

12.1.10 Addressing crime

Number	Output	Pillar	Outcome
Output 24	Grey-listing: Publication of 'Know Your Shareholder' Regulations and Follow Ups	1	3
Output 42	1 Metal trading system developed to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry	1,5	1,2,3

12.1.11 Red tape and state capability targets

Number	Output	Pillar	Outcome
Output 39	4 High-impact measures to improve the efficiency and/or effectiveness, of the dtic's policy or programme interventions.	All	3
Output 40	10 High-impact measures to reduce red tape or improve turnaround times in administration of incentives and work of agencies	1,4	1,2,3
Output 44	Assessments on trade instruments applied for and issued	2,3	1,2,3

12.1.12 Improving the capacity and responsiveness of the state and social partnership

Number	Output	Pillar	Outcome
Output 26	4 Pieces of priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament.	All	1,2,3
Output 34	6 Master Plans managed, and 1 new Master Plan finalised	All	1,2,3
Output 35	Oversight of IDC, NEF and ECIC to ensure that at least 95% of planned KPIs are achieved	All	1,2,3
Output 36	Oversight of other entities to ensure that at least 95% of planned KPIs are achieved	All	1,2,3
Output 38	50 Mergers and acquisitions where public interest conditions have been incorporated	All	1,2

All the targets in the above table are included in the work of the Department in the year ahead, and our activities will aim to achieve each of these targets. However, the targets differ in their relationship to the work of **the dtic**, and in the extent to which different parts of **the dtic** Group will prioritise them.

The full list of the 45 Output targets is set out and summarised in Table 2. More details can be found in the Technical Indicator Descriptions in the relevant Programme sections.

Table 2: Summary of Quantitative Output Targets¹

Output Number	Outputs
Output 1	R300 billion in investment pledges secured across the state
Output 2	R40 billion in additional local output committed or achieved
Output 3	R800 billion in manufacturing exports
Output 4	R330 billion in manufacturing exports to other African countries
Output 5	R8bn in exports of Global Business Services (GBS)
Output 6	R30bn in support programmes administered by or in partnership with the dtic -group
Output 7	R15 billion support programmes to enterprises in areas outside the 5* main metros

¹ Each Programme reports on its contribution to these quantitative targets. These contributions when summed represent the gross value of the target including some degree of duplication and overlap between Programmes. The removal of these results in the above net values for each of the 45 targets.

Output Number	Outputs
Output 8	R8 billion in financial support programmes and procurement contracts approved to SMMEs, women and youth-empowered businesses
Output 9	R7.5 billion in financial support programmes to enterprises in labour absorbing sectors
Output 10	R 800 Million in Equity Equivalent Investment Programme agreements
Output 11	R40 Billion in black industrialist output achieved
Output 12	1 million jobs supported or covered by the dtic group and / or master plans
Output 13	100 000 jobs created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)
Output 14	23 000 jobs in Black Industrialists firms supported
Output 15	20 000 additional workers with shares in their companies
Output 16	10 high-impact outcomes on addressing market concentration, at sector or firm level.
Output 17	1 New SEZs applications considered for designations
Output 18	R1.3 billion in financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund
Output 19	1400 Megawatts of energy from projects facilitated
Output 20	550 Megawatts of energy available for the grid
Output 21	1 Energy One-stop Shop operational
Output 22	Expedited regulatory amendments and flexibility, to promote energy efficiency
Output 23	100 Investor facilitation and unblocking interventions provided
Output 24	Grey-listing: Publication of 'Know Your Shareholder' Regulations' and Follow Ups
Output 25	10 Business Forums hosted aimed at supporting increased FDI, exports and outward investment
Output 26	4 Pieces of priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament.
Output 27	Commencement of South Africa's preferential trade under the AfCFTA
Output 28	10 High impact trade interventions completed
Output 29	1 Strategy and advocacy finalised responding to green trade barriers (CBAM)
Output 30	1 EV White Paper finalised
Output 31	1 Finalisation of green hydrogen commercialisation framework

Output Number	Outputs
Output 32	1000 Case studies of firms, workers, entrepreneurs, professionals or communities impacted by the dtic measures; including 12 local films/documentaries telling the SA story
Output 33	52 Community outreach programmes by the dtic group
Output 34	6 Master Plans managed, and 1 new Master Plan finalised
Output 35	Oversight of IDC, NEF and ECIC to ensure that at least 95% of planned KPIs are achieved
Output 36	Oversight of other entities to ensure that at least 95% of planned KPIs are achieved
Output 37	5 Conferences, summits, and international forums hosted
Output 38	50 Mergers and acquisitions where public interest conditions have been incorporated
Output 39	4 High-impact measures to improve the efficiency and/or effectiveness, of the dtic's policy or programme interventions.
Output 40	10 High-impact measures to reduce red tape or improve turnaround times in administration of incentives and work of agencies
Output 41	4 Protocols finalised under the AfCFTA
Output 42	1 Metal trading system developed to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry
Output 43	Promotion of a transparent and just adjudication process for incentive applications
Output 44	Assessments on trade instruments applied for and issued
Output 45	10 Successful actions completed on price monitoring and excessive pricing or price gouging

The following table sets out the classification of the Outputs into the 4 types, referred to above. More details can be found in Section 21 of this document:

Target type	Outputs
Core targets	1 (investment), 2 and 11 (local output), 3, 4, and 5 (exports), 12, 13 and 14 (jobs) and 15 (ownership)
Programmatic targets	6, 7, 8, and 9 (incentives and support), 10 (partner funds), 16 (market concentration), 17 (SEZ), 23 (facilitation), 27, 28 and 41 (trade), 34 (masterplans), 38 (mergers public interest conditions),
Enabling targets	25, 32, 33, and 37 (events and outreach), 35 and 36 (entity oversight), 26 (legislation), 29, 30 and 31 (green economy), 39, 40, 43, and 44 (impact assessment and capacity development), and 45 (price gouging).
Contextual response targets	18, 19, 20, 21, 22 (energy), 24 (grey-listing) and 42 (metal trading system)

Output definitions are contained in Section 16 A of the document.

12.2 Defining Outcomes

The activities and outputs contribute to the achievement of **the dtic's** apex outcomes of *industrialisation, transformation and building a capable state*.

Outcome 1: Industrialisation

In this area the goal is to build dynamic firms in the South African economy through a combination of efforts in partnership with the private sector, focusing on growth opportunities in the domestic market (through localisation, sector partnerships, beneficiation, promoting the green economy and fostering higher levels of investment) and building a wider export market (particularly in Africa) to assist with scale; and combining demand-creation with supply-side reforms at economy, sector and firm level to build industrial competitiveness and support job-creation.

The Industrialisation outcome contains the following five focus areas:

- Sector partnerships and social compacts through master plans and firm/sector level initiatives;
- Localisation, beneficiation and COVID industrial production initiatives;
- Increased and diversified exports (including value-added services such as GBS) with African countries and to other global markets;
- Green economy initiatives to shift to a less carbon-intensive industry; and
- Investment initiatives to increase the level of investment.

Outcome 2: Transformation

In this area the goal is to build economic inclusion through transformation programmes in three broad areas: first, addressing structural challenges to growth through active competition policies, particularly where concentration levels in the market limit new entrants and small and medium businesses; second, policies that promote spatial transformation, enabling more balanced and sustainable growth between rural and urban and between provinces; and third, strengthening inclusivity/transformation in the quality of growth, including promoting all kinds of income-generating employment, broadening ownership, and more inclusive corporate governance models.

The Transformation outcome contains the following three focus areas:

- Employment and ownership: Expanding economic opportunities through waged work, self-employment and the social economy, and promoting more equitable ownership (black industrialists, women, youth, worker ownership and small businesses) and worker empowerment.
- Structural transformation: Addressing economic concentration and supporting SMMEs.

- Spatial transformation: Promoting more equitable and sustainable spatial development including through the use of the District Development Model and integration of work into its 52 spatial units; and developing a new model for district spatial industrial initiatives (including SEZs and Industrial parks model) and promoting the township economy.

Outcome 3: Capable State (implementation/effective delivery)

In this area, the goal is to build greater capacity to ensure that national objectives are achieved through a new culture of partnership in the economy, characterised by greater responsiveness and nimbleness by the Department and its 17 entities, which includes promoting smart regulation (through cutting red-tape, ensuring fit-for-purpose and effective regulation, reviewing internal processes and legislation/regulations), and working closely with other parts of the state to forge a social compact with business and labour.

The Capable State outcome contains the following five focus areas:

- Department: Building strong capacity in **the dtic** and streamlining its work, reviewing programmes to determine its impact and relevance, strengthening forensic capacity under **the dtic** shared services programme in its commitment against fraud and corruption.
- Entities: Building the entity staffing, governance capacity, and quick response; developing shared services; and rationalisation of functions and integration of work between entities and with the department.
- Smart regulation: Address red tape and compliance in internal processes and in legislation and regulations; enable fit-for-purpose regulations.
- Coordination with other parts of the state: Ensuring effective support functions from other public entities in order to achieve **the dtic** outcomes.
- Contribute to social compact with other social partners.

All the output indicators in the APP are directly linked to each outcome to ensure a focused and result driven approach to the work done by the department.

12.3 Defining Impact

The inputs, activities, outputs and outcomes reflected in the preceding sections are important elements of the work of **the dtic group**. However, citizens, enterprises and workers are primarily concerned with the **impact** of these on South Africa's key economic challenges such as investment, economic growth, jobs and transformation.

Consequently, the 2023/24 APP focuses on the likely impact of its outputs and outcomes on the following key areas:

- **Investment** – as this is a reliable indicator of future economic growth;
- **Job retention** – as economic downturns often lead to job losses and the associated loss of skills as well as exposing affected workers to heightened risk of inter-generational poverty;

- **Job creation** – as SA's high unemployment rate is economically and socially unsustainable;
- **Industrial output** – as this is an important component of GDP; and
- **Black Industrialists' output and jobs** – as this is an important (although limited) measure of the extent of transformation in the industrial sector.

13. Updates to relevant court rulings

During the 2022/23 financial year, nine (9) court judgments were issued in matters involving the Department. The relevant court rulings are primarily operational in nature and will have no effect on the department's new APP, save in the instance of amendments to be affected to one law, the National Building Regulations and Building Standards Act.

PART B: STRATEGIC FOCUS

Updated situational analysis

14. External environment

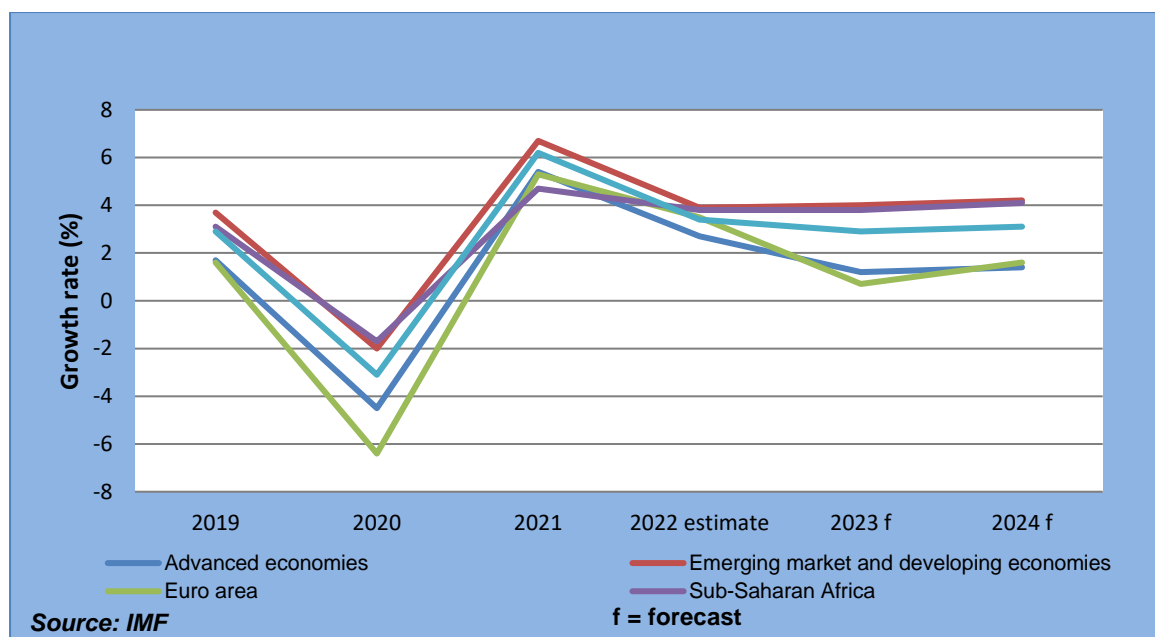

14.1 Global Economic Context

The global economic outlook has deteriorated recently due to monetary policy tightening aimed at containing high inflation across a range of advanced economies and emerging markets, energy and food market disruptions caused by the Russia-Ukraine conflict, and emerging geo-political threats.

Consequently, the global growth forecasts have been downgraded; and the IMF projects growth of 2.9%. This is significantly below the historical (2000–19) global average of 3.8% annual growth.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies and is expected to gradually moderate over the course of the year.

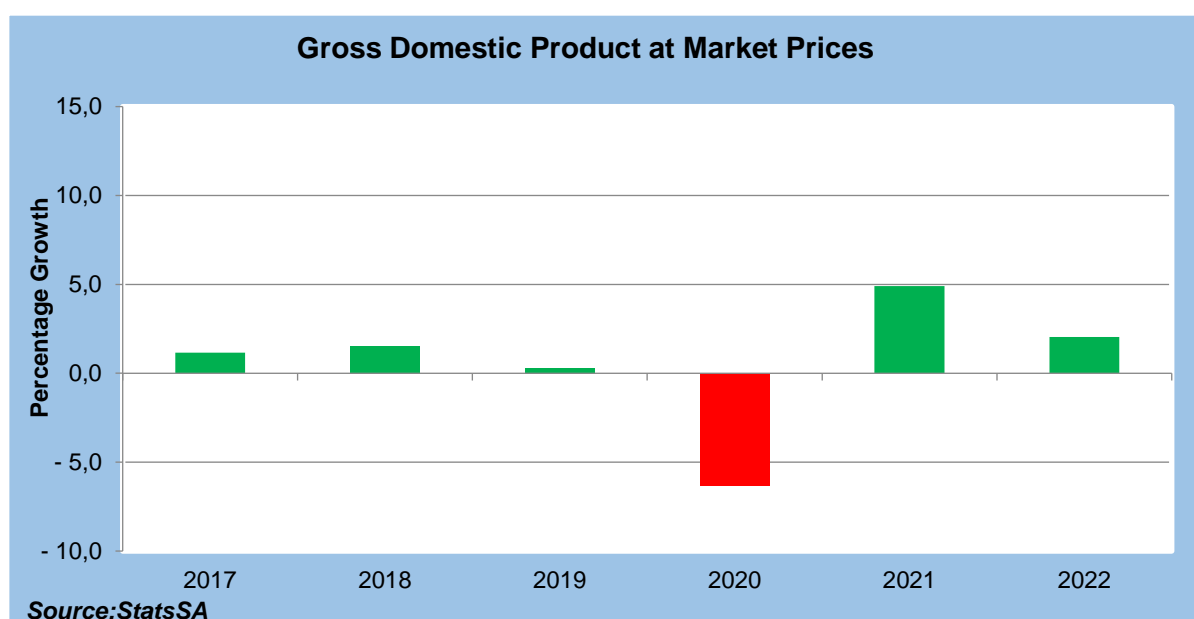

Figure 3: World real GDP growth rate (%), constant prices (projections as of January 2023)

14.2 Domestic economic context

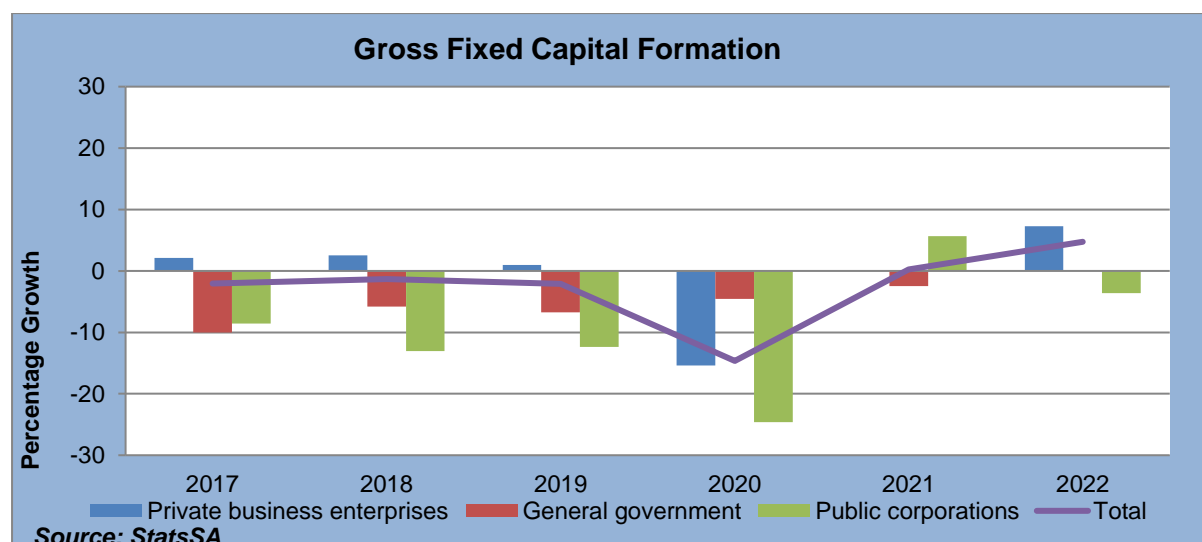

Despite continuous and severe electricity supply interruptions, GDP grew by 2.0% in 2022, following robust growth of 4.9% in 2021. Economic growth was mainly driven by the tertiary sector, averaging 3.7% growth while both the primary and secondary sectors performed poorly, recording negative growth of 3.4% and 2.0% respectively. South Africa's structural economic constraints – including unreliable electricity supply, high levels of market concentration, inefficiencies in network industries and the high cost of doing business – limit the rate at which the economy can grow and create jobs.

Figure 4: Percentage Change in GDP 2017 to 2022

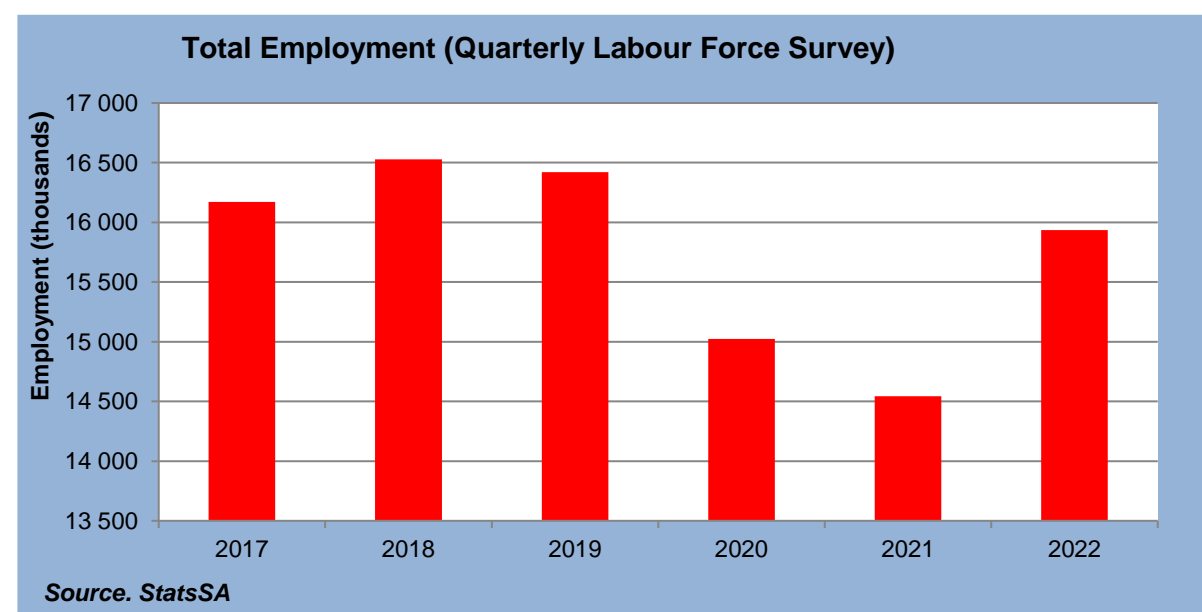

Investment performance improved in 2022, with gross fixed capital formation growing by 4.7% after disappointing growth of only 0.2% in 2021. The strengthening investment growth was driven by private-sector enterprises which grew investment by 7.3%. Investment by public corporations declined by 3.6% while general government investment was flat, in the review period.

Figure 5: Percentage change in gross fixed capital formation 2017 to 2022

South Africa's total employment increased by 1.4 million jobs in 2022, reaching 15.9 million jobs. Manufacturing employment increased by 340,000 jobs in 2022, reaching 1.6 million jobs. However, the outlook for employment may be clouded by expected slowdown in economic growth, at least in part due to electricity supply challenges.

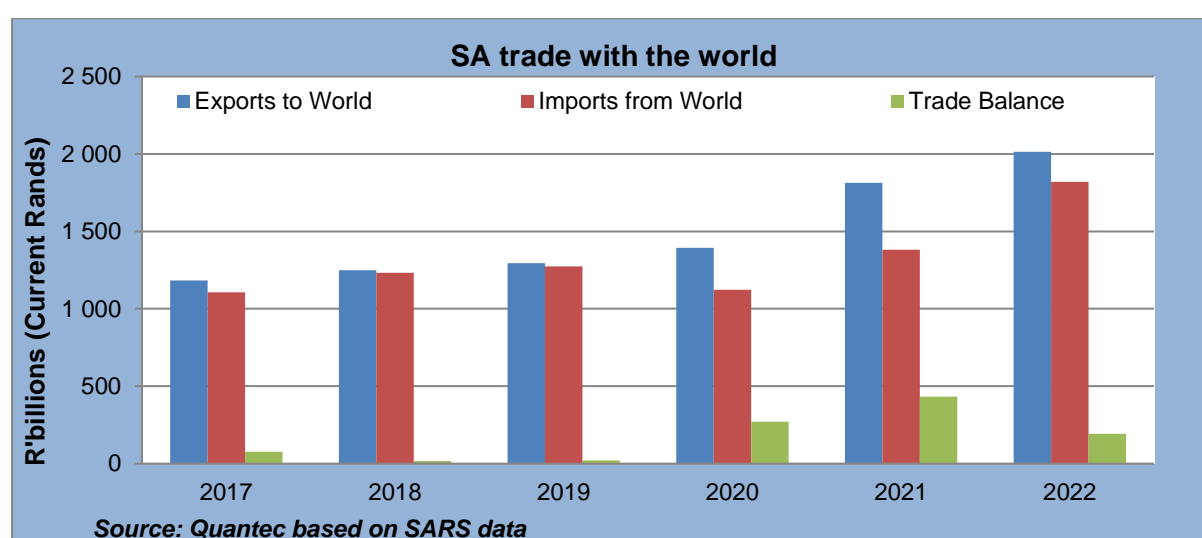

Figure 6: Employment from 2017 – 2022

According to the World Trade Organisation (WTO), the global economic outlook has deteriorated since February 2022 as a result of the war in Ukraine, prompting the WTO to downgrade its forecasts for world trade over the next two years. The WTO estimates merchandise trade volume growth of 3.0% in 2022 due to the slowing global economy, persistent inflation, monetary tightening, and the ongoing impacts of the pandemic.

Consistent with the forecast downgrade, South Africa's international trade in 2022 registered a surplus of R193 billion, down from a R432 billion in the previous year. The exports that kept the trade balance positive included rapid growth in coal exports, which expanded 121% in 2022, as compared to the previous year; followed by iron and steel (16%) and vehicles (12%).

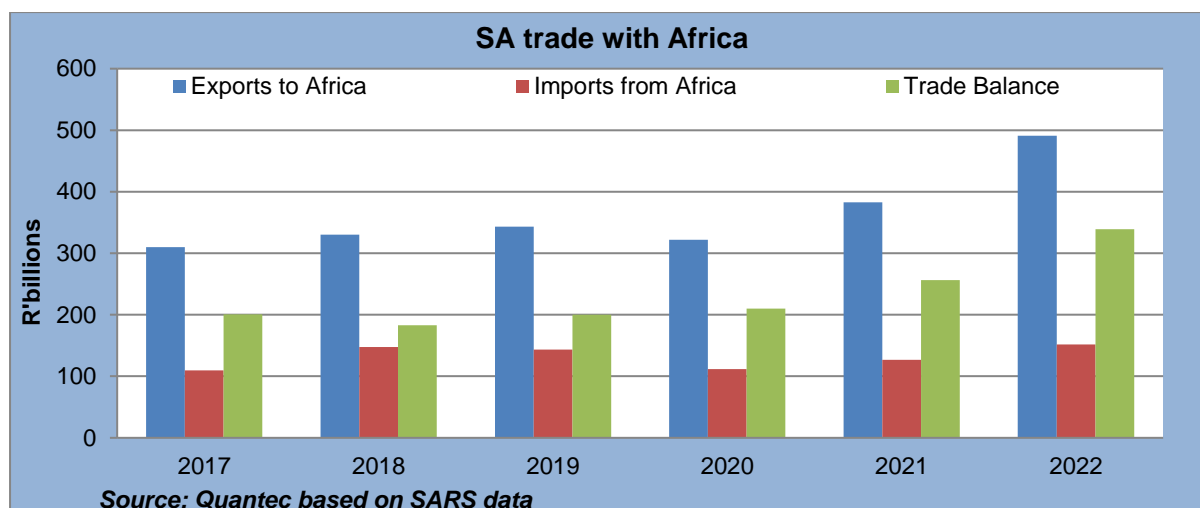

Figure 7: SA Trade with the World

Global exports grew with some of this due to use of inventory. South Africa's exports to the rest of Africa increased by 28% in 2022, Imports grew more slowly.

Although Africa and South Africa's trade prospects are expected to improve substantially in the medium- to long-term, as the African Continental Free Trade Area (AfCFTA) is implemented, presently, the Southern African Development Community is the most significant trading bloc for South Africa, both in terms of exports and imports, accounting for more than 80% of all South Africa's exports to Africa.

Figure 8: SA trade with Africa

14.3 Challenges and Opportunities

Electricity Supply Challenges

During the past financial year, energy shortages became more frequent and of longer duration, impacting on the economy in a number of ways. These include reduction in production through energy shortages, disruption of supply-chains as energy outages cascaded through the economy, increased costs of production as firms used alternate, more expensive, energy sources and slowing down new investment decisions. At the same time, the energy crisis provides opportunities for new investment in energy-supply, energy-efficiency measures and the green economy. This includes positioning SA as a source for production of green energy components. See the earlier discussion under industrial strategy for more details.

the dtic is working closely with the Presidency and the National Electricity Crisis Committee (NECOM) to develop high-impact interventions to close the energy gap.

In the coming financial year, **the dtic group** will implement eight interventions to support the Energy Action Plan launched by President Cyril Ramaphosa in July 2022. These dtic-group actions are:

- Speeding up processes to accelerate private-sector investment in electricity generation;
- Increasing levels of private-sector investment in electricity generation;
- Enabling regulatory flexibility on transformation;
- Enabling regulatory flexibility on competition laws;
- Introduction of an Energy Resilience Scheme to assist firms to mitigate the impact of load shedding;
- Measures to encourage energy efficiency;
- Measures to Protect Consumers and energy-users; and
- Interventions to support the industrialisation of renewable energy components.

Climate Change and the Just Transition

To address climate change, South Africa has adopted a 'just-transition' approach, to enable a shift in the carbon-intensity of the economy; with phased measures taking account of the impact of measures on energy availability, economic growth and impacts on workers and local economies.

Government has identified opportunities in the transition to a greener economy and work is underway to unlock those opportunities in the green hydrogen economy, hybrid and electric vehicles, renewable energy generation, and battery storage technologies.

'Grey-listing'

To address concerns about the adequacy of South Africa's regulatory and institutional capacity to address money laundering and other serious financial crimes, a programme of eight (8) actions were adopted by Cabinet. **The dtic** will contribute to its specific and limited area relating to company law and the identity of shareholders of firms.

Market access

Geo-political tensions are likely to reshape procurement strategies of major global firms, presenting a threat (limits to market access) and an opportunity (an alternate sourcing location). During the next 12 months, South Africa will need to navigate this space with national interest as the paramount guide. Given the large employment and poverty challenges, the emphasis must be on decisions that can enhance economic growth, greater investment and diversification of the economy, with greater emphasis on value-addition rather than simply raw materials exports.

14.4 Collaboration with Stakeholders

The Department works closely with business, organised labour, civil society, individual enterprises and other government entities to achieve its objectives of industrialisation, transformation and building state capacity.

Within the state, **the dtic** participates in the Economic Sectors, Investment, Employment and Infrastructure Development (ESIEID) cluster and the International Cooperation, Trade and Security (ICTS) cluster to identify synergies and collectively deliver on MTSF commitments. The Department coordinates the development of sector master plans where relevant stakeholders from government, organised labour and industry work together to develop and implement their respective sectoral master plans.

Moreover, **the dtic** participates at NEDLAC where it convenes the government constituency in the trade and industry chamber. Here, **the dtic** mobilises social partners including labour, business and various government departments and agencies to consult on policies and legislation that can contribute to the achievement of MTSF targets and seek to mobilise the resources of other stakeholders to these goals.

14.5 Spatial Economic Development

On spatial economic development and transformation, the department is part of an Economic MinMec together with the Departments of Tourism and Small Business Development at a national level, and with all nine provincial Departments of Economic Development. This helps to ensure that national policy imperatives are coordinated with provinces for more effective implementation of the MTSF. The department participates in the District Development Model (DDM) work of government through its contribution to the development and implementation of district one plans. The department contributes financially to Special Economic Zones and to rejuvenation of Industrial Parks, though these entities historically have fallen under the management of provincial governments. This creates governance challenges with the role of **the dtic** limited to funding. This is being reviewed and a new pilot approach will be extended to a further new SEZ. **The dtic** contributes to a suite of industrial support programmes to enterprises from all districts.

14.6 State of the Nation Address (SONA) 2023 and ERRP

Following the State of the Nation Address in February 2023, the following priorities identified in SONA have been taken into account in setting the targets and the KPIs:

- Implementation of master plans;
- Promotion of local production and consumption (localisation);
- Investment;
- Trade;
- Economic transformation;
- Creation of work opportunities through the Social Employment Fund; and
- Implementation of the Just Energy Transition Investment Plan.

The dtic contributes to the achievement of the Economic Reconstruction and Recovery Plan (ERRP) adopted in 2020, through its efforts on strategic localisation, industrialisation and export promotion.

15. Internal Environment

The Department has commenced with the project on the “Fit for Purpose” structure. The roles and responsibilities identified via the “Fit for Purpose” structure will assist to address working in silos, streamline business processes, reduce administrative burdens, and reprioritise resources. It is also intended to review the overall size and shape of the Department, including the shift of personnel to reflect new priorities and the adoption of a new approach to delivery (see section below). In addition, the fit-for-purpose exercise will identify gaps in high-level professional skills in the dtic (for example in financial analysis, negotiation and project management).

The first phase of the exercise has reduced the number of Programmes from 10 to 9. This, together with the new output-based approach set out in this APP will determine the final number of posts required and the skill-levels within new posts that will be filled.

As at 31 March, the Department reported that it had 1 178 funded posts with 1 113 filled. Progress has been made with the filling of the 65 remaining posts, though some of these posts will now be adjusted to take account of the new approach and the skills that will need to be recruited. With clarity on the new Programme structure, transfers of staff to critical areas of work and the filling of management positions in the Department can now be speeded-up. Women constitute 54% of senior managers. Within the staff complement, 4.1% of staff are people with a disability. Youth represents 13.3% of the employees.

The Department will strengthen an environment that is professional, ethical, dynamic, competitive, and customer-focused to ensure effective and efficient service delivery.

Values

the dtic values inform the conduct of our employees of

- Quality Relationships,
- Operational Excellence and
- Intellectual Excellence.

These values are the glue that promotes cohesive teams and the bedrock for building a high-performing Department that places great emphasis on caring for its employees.

Implementing the new approach

The following constitute the broad outlines of the implementation plan, building on a series of workshops and planning sessions held between the Ministry and senior staff:

1. Following tabling of the APP, each Chief Directorate will provide training sessions for staff on the targets and develop an action plan that (a) lists very concisely what they must contribute to the new targets and (b) on that basis, develops an action plan which specifies both what they will do differently and what remains unchanged.
2. Each Programme Head will produce output dashboards tracking the impact of work undertaken, on the following schedule:
 - a. Weekly, for their own management purposes
 - b. Fortnightly, for the Accounting Officer and the Executive team and for information for the Ministry
 - c. Monthly, for review by the Ministry
 - d. Quarterly, for the reporting within Government and to Parliament
3. The Office of the Director General will review resource allocations and align budget resources to the targets more clearly, within and between programmes. This will have two aspects: first, a general review of effectiveness of **the dtic** funding programmes, including to non-profit institutions, to determine what the scope for redirecting funds are and to effect such changes; and second, to identify where resources are needed for the output targets and deploy resources to the critical needs.

4. The department will simultaneously engage with the external stakeholders whose support is critical to achieving the goals, within government (across the three spheres) and the private sector and organised labour.

To achieve the targeted outcomes, **the dtic** will review and where needed, revise its resource allocation and organisational structure to take account of the new targets. Initial steps in developing a more cohesive structure have been taken with the consolidation of programmes, through merging mandates into single programmes:

- Investment (which will include spatial industrial development); and
- Competition (which will include transformation).

This will lead to **the dtic** having nine instead of 10 programmes in the new financial year.

Of the nine Programmes, six are core drivers of the targets, namely the Programmes on

- Trade;
- Investment/Spatial Industrial Development;
- Sectors; Incentives;
- Exports; and
- Competition/ Transformation.

They will be principally responsible for getting the targets over the finishing line. While most of the Programmes have core areas of focus, the integrated approach requires that each contributes outside its traditional core area. For example, the Trade branch will not focus only on negotiation and administration of trade agreements, but will now also have a mandate to contribute to jobs, investment, community outreach and writing up of case studies of impact of trade policies on the lives of South Africans. The Sector Programme's targets will be reviewed to shift the programme from notionally a 'coordinating role', to a programme of more active front-line company support across different sectors.

Two Programmes are essential support services to the core programmes, namely Programmes on Administration and on Research. These programmes provide the range of services, such as overall coordination, external stakeholder management, monitoring and evaluation, human resource management, financial management, ICT, legal, office facilities and research that will now need to be provided in innovative ways to support the new targets. In addition, the Administration Programme, through the Office of the Director General provides oversight support in respect of all entities that report to the Ministry.

In the year ahead, the research programme will be realigned to support the data and research needs of the core driver programmes more fully. The programme will allocate a senior research specialist to each core programme, who will be responsible for analysing the data and research needs of the programme, will allocate or acquire resources (internal or external) to support the programme, and will oversee the data and research outputs being provided by these resources.

The department will promote a transparent and just adjudication process for incentive applications and establish a redress mechanism for queries and complaints regarding decisions of the Incentives Adjudication Committee.

Financial Plan (Expenditure Estimates)

Trade Industry and Competition	Audited outcome	Audited outcome	Audited outcome	Adjusted Appropriation	Medium-term expenditure estimates

* The 2019/20 audited outcome is the sum of the audited outcomes for the Economic Development Department and the Department of Trade and Industry. The two departments' total audited outcome excludes an amount of R60 million, relating to the Presidential Infrastructure Coordinating Commission that was transferred to the Department of Public Works and Infrastructure (DPWI) in line with the changes and reconfiguration of the executive portfolios and departments ushered in by the 6th Administration.

PART C: MEASURING PERFORMANCE

While the previous sections of this APP has set out the new approach, this section provides a more detailed account of what the 45 Outputs are intended to cover and how performance will be measured. The existing tools used to evaluate impact and outcomes have focused largely on a more mechanical approach focused on compliance; this will need to be updated to take account of the new approach set out in this APP.

16. (A) Cross- Cutting Alignment – Implementing the Integrated Approach

The following section outlines the 45 outputs/ targets planned for the 2023/24 financial year and the contributions each Programme will provide.

In addition, the department has prioritised two cross-cutting areas that should be a focus across the outcomes:

- **Gender Mainstreaming:** In line with Government's commitment to women-empowerment, programmes must ensure gender mainstreaming in the work of **the dtic** and programmes reporting on transformation. This includes:
 - o Prioritisation of empowering women as workers, entrepreneurs and managers including through the deployment of targeted resources. The Department will monitor progress in providing targeted financial support to designated groups, captured in outputs 8, 9, and 10;
 - o The use of regulatory power and coordination functions to support the increasing and meaningful participation of designated groups in activities such as export promotion, investment unblocking, competition settlements, and worker ownership opportunities;
 - o The re-alignment of its procurement practices in order to meet the target of 40% of public procurement awarded to women-owned enterprises. The Department is confident that the target can be met within the next two FYs; and
 - o The continued focus on **the dtic group's** interventions that benefit women indirectly such as industrial finance, masterplans, empowerment funding and export promotion which benefit sectors which employ large numbers of women. These sectors include the clothing, textiles, footwear and leather value-chains, as well as furniture, agro-processing, food-processing, beverages, film and GBS sectors.
- **District Development Model:** The Department will continue mainstreaming the District Development Model (DDM) in its work through emphasis of the coordination of **the dtic's** work with other spheres of government while undertaking a renewed outreach programme which takes **the dtic group's** services to the 52 districts and metros. These activities will be monitored through DDM dashboards which locate key departmental activities and impacts in districts and metros and will be used to identify catalytic projects in districts with a limited industrial base.

While all Programmes will work across the 45 outputs, the detailed contribution of each will vary. Programme 1 will be required to provide enabling services to other Programmes for the identified outputs, as set out in the Note below.

Note 1: To enhance the delivery of the core outputs, Programme 1 will provide agile and credible support services for each of the 45 Outputs, through the following activities:

- Promotion of a values-based and service-oriented organisational culture
- Re-assignment of human resources and provision of specialists for identified core outputs
- Re-prioritisation of the funding through shifting and virements of the budget to the core programmes
- Automation of manual customer-facing systems and provision of a responsive and reliable internet capability
- Prioritise the drafting of contracts, legal opinions, litigation and legislation relating to core outputs
- Prioritise accommodation needs of core outputs

There are a number of co-dependencies and contributions across the state that will be required to achieve the outcome. The Operational Plan will set out the partnerships and contributions of among others:

- National departments, including Energy, Environment, National Treasury, Public Enterprises, Electricity, Transport
- Provinces and local government
- State-owned enterprises and regulators.

The 45 Outputs are set out below.

OUTPUT 1: R400 BILLION INVESTMENT PLEDGES SECURED ACROSS THE STATE

This output requires **the dtic** to use all its resources to secure pledges for new investment in the SA economy.

This covers among others, pledges announced at the SA Investment Conferences; investments facilitated by InvestSA, settlement agreements or conditions in Mergers and Acquisitions (M&A) or other competition areas; reciprocal commitments in trade measures; counter-party investment plans for all incentive programmes across **the dtic-group**, commitments unlocked through masterplans and BEE programmes such as the Equity Equivalent Investment Programme (EEIP).

The contribution by the different Programmes is set out below, organised under core Programmes for this output; cross-cutting support from Programme 1 and additional support from other Programmes.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21 and 2021/2023. The Department is able to draw on the target set for Programme 3 (Invest SA) in previous financial years and its participation in the SA Investment Conferences. Last year, the overall target of **the dtic** was R120 billion. The new target is a significant step-up on the level of investment mobilisation required from **the dtic** in the past and reflects the announcement by the President in the February 2023 State of the Nation Address on the new R2 trillion investment target for the next 5 years. In addition, the output supports both Priority 2 (Economic Transformation and Job Creation) and Priority 7 (A Better Africa and World) of the MTSF.

It is intended that the target will be set as follows:

Year 1: R300 billion

Year 2: R350 billion or R650 billion cumulative;

Year 3: R400 billion or R1,050 billion cumulative;

Year 4: R500 billion or R1,5 trillion cumulative; and

Year 5: R600 billion or R2,1 trillion cumulative.

The IDC and NEF will contribute R60 billion to the 2023/24 target.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 1: R300billion in investment pledges secured across the state	Value of investment facilitated	Programme 2 Trade: Value (R50 million) of investment facilitated through reciprocal commitments	New Indicator	New Indicator	New Indicator	R300bn	R350bn	R400bn
		Programme 3 Investment and Spatial Industrial Development: Value (R200 billion) of investment tracked and facilitated through investment support and Special Economic Zones						
		Programme 4 Sectors: Value (R1.5 billion) of investment facilitated by sectors through Master Plans and sector-specific interventions including Poultry, Chemicals Cosmetics Pharmaceutical Plastics, Aerospace and Defence, Industrial Procurement, Electro-Technical, and Metals.						
		Programme 6 Incentives: Value (R25 billion) of investment facilitated through industrial financial support						
		Programme 8 Transformation and Competition: Value (R18 billion) of investment facilitated through mergers and reciprocal commitments						

OUTPUT 2: R40 BILLION IN ADDITIONAL LOCAL OUTPUT COMMITTED OR ACHIEVED

This output is intended to show the impact of **the dtic** group interventions on manufacturing and productive services output. It will be measured on a gross basis, from projects that are championed by **the dtic** group or through social compacting. This includes for example, projects financially supported by **the dtic** group; projects which entail localisation of a product previously imported; projects which result from competition agreements where a merging entity commits to supplier development; and projects which expand production to meet new export demand.

Output will be calculated by summing the follow two categories:

- i. Actual increased output at firm or product level in this FY, confirmed by the company concerned, and which may have resulted from interventions in the current or two prior FYs; and
- ii. Projected new additional local output in the following five FYs resulting from commitments secured from firms or investors in the current FY.

Where necessary, projections of the levels of output will be made by **the dtic** group based on information secured from companies or credible industry associations. Different branches will set sub-targets, for example, the film incentive will target achieving additional local spending of R530million. In addition, the targeted contribution from the IDC is R2, 4 billion and the NEF R100 million.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This is the first time this measure is included in the APP. It is anticipated that the target could be higher for the next and outer years of the MTEF. Output 2 is aligned to Priority 2 (Economic Transformation and Job Creation) of the MTSF. Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 2 R40 Billion in additional local output committed or achieved	Value (Rand) of additional local output committed or achieved	Programme 2 Trade Policy: Value of (R20 billion) additional local industrial output as a result of the utilisation of rebates	New Indicator	New Indicator	New Indicator	R40bn	R50bn	R60bn
		Programme 3 Investment and Spatial Industrial Development: Value (R 1 billion) for companies supported through investment drive						
		Programme 4 Sectors: Value of (R2.5 billion) contributed by sectors through localisation (Sugar, Aerospace & Defence, Primary minerals, Industrial Procurement, Metals Electro Technical)						

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
		Programme 6 Incentives: Value of (R1.1 billion) projected additional local output: Projected local output and Actual local output						
		Programme 8: Actual and projected value(R6 billion) of local output						

OUTPUT 3: R800 BILLION IN MANUFACTURING EXPORTS

This output reflects the impact of interventions across **the dtic** group which result in exports of manufactured goods.

It will be measured based on SARS or trade partner data (where appropriate), based on the Narrative Classification System. The export targets for this FY and the MTEF period are based on SARS customs data, adjusted to only account for exports originating in South Africa.

Interventions contributing to this output include **the dtic** group's contribution to a stable and predictable production and trade environment; financial support to companies wishing to enter the export market; provision of duty rebates to encourage export of value-added goods; and sector policies such as the Automotive Production and Development Programme (APDP) that underpins South Africa's successful export of Autos to demanding markets in the US and EU.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. The export targets have been set based on historical export trends while adjusting for changing economic conditions. These include a forecast slowdown in global trade (with the WTO estimating global volume growth of only 1%); declining prices for key commodities (particularly petrochemicals and some metals); a slowdown in the post-COVID export surge in key products (notably automotive); and a progressive normalisation of exports in products disrupted by the war in Ukraine (notably coal). These trends suggest that South African global manufacturing exports might reach ZAR 700 billion as the baseline target informing departmental objectives, which possibly could stretch to ZAR 750 billion should economic conditions be supportive. Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 3 R800billion in manufacturing exports	Value of exports in manufacturing sectors	Programme 2 Trade Policy: Value of (R300 billion) manufacturing exports facilitated under rebates, drawbacks, non-proliferation export permits and APDP	New Indicator	New Indicator	New Indicator	R800bn	R800bn	R900bn
		Programme 3 Investment and Spatial Industrial Development: Value of (R15 billion) of manufactured exports, through projects supported by investment & projected value of exports to be generated in designated SEZs.						
		Programme 4 Sectors: Value of (R410 million) manufacturing exports Facilitated through sectoral interventions						
		Programme 7 Exports: Value of (R170.35billion) manufactured exports, including supported through export councils and export promotion initiatives						

OUTPUT 4: R330BILLION IN MANUFACTURING EXPORTS TO OTHER AFRICAN COUNTRIES

This output reflects the impact of interventions across **the dtic** group which result in exports of manufactured goods to countries on the African continent.

It will be measured based on SARS or trade partner data (where appropriate), based on the Narrative Classification System. The export targets for this FY and the MTEF period are based on SARS customs data, adjusted to only account for exports originating in South Africa.

Interventions contributing to this output include **the dtic's** work to secure the AfCFTA agreement which provides preferential access to member states' markets; export insurance especially for exports to Africa; financial support to companies for export promotion activities; and provision of duty rebates to encourage export of value-added goods. The export targets have been set based on historical export trends while adjusting for changing economic conditions.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 and 7 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcomes: Industrialisation and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 4 R330 billion in manufacturing exports to other African countries	Value of exports in manufacturing sectors to Africa	Programme 2 Trade Policy: Value of (R25 billion) manufactured exports to other African countries facilitated under rebates, drawbacks and APDP	New Indicator	New Indicator	New Indicator	R330bn	R340bn	R380bn
		Programme 4 Sectors: Value of (R93 million) manufactured exports to other African countries facilitated through sectoral interventions						
		Programme 7 Exports: Value of (R65.15billion) manufactured exports to other African countries, including supported through export councils and export promotion initiatives						

OUTPUT 5: R8BILLION IN EXPORTS OF GLOBAL BUSINESS SERVICES

This output reflects the value of exports by companies in the Global Business Services sector.

It will be measured by the value of exports of companies in the GBS sector which have been supported by **the dtic** in the previous and current FYs. The value will be calculated from the quarterly reports that beneficiary companies are required to submit to **the dtic**.

Export targets have been set based on historical export trends while adjusting for changing economic conditions. This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 and 7 of the MTSF.

Outputs, Output Indicators/Definition, Programme Interventions and Annual Targets

Outcomes: Industrialisation and Transformation			Audited / Actual Performance			Annual Target (MTEF Period)		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 5 R8 billion in exports of Global Business Services (GBS)	Value of exports of Global Business Services	Programme 6 Incentives: Value (R5 billion) of exports of Global Business Services	New Indicator	New Indicator	New Indicator	R8bn	R9bn	R8bn

OUTPUT 6: R30 BILLION IN SUPPORT PROGRAMMES ADMINISTERED BY OR IN PARTNERSHIP WITH THE DTIC-GROUP

This output reflects the value of financial support provided by **the dtic** group to enterprises.

It is measured as the value of financial support approved (but not necessarily disbursed) by **the dtic**, IDC and NEF including grants, loans, and equity and export promotion funds. Also included in the definition are financial disbursements from competition settlements, disbursements by the Social Employment fund, and BEE-mandated funds such as the employment equity investment programme (EEIP). In addition, the IDC and NEF will contribute R30 billion to the annual target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Indicators/Definition, Programme Contribution and Annual Targets

Outcomes: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 6 R30billion in support programmes administered by or in partnership with the dtic -group	Value (Rand) through support programmes administered by or in partnership with the dtic -group	Programme 6 Incentives: Value of (R5 billion) approved funding accessed by projects/ enterprises	New Indicator	New Indicator	New Indicator	R30bn	R33 bn	R36 bn
		Programme 7 Exports: Value of (R148 million) support provided to exporters to participate in export promotion initiatives						
		Programme 8 Transformation and Competition: Value (R1.1 billion) of funds from transformation and competition, including the social employment fund						

OUTPUT 7: R15 BILLION SUPPORT PROGRAMMES TO ENTERPRISES IN AREAS OUTSIDE THE 5* MAIN METROS

This output reflects the value of financial support provided by **the dtic** group to enterprises located outside of the main metro areas.

It is measured as the value of financial support approved (but not necessarily disbursed) by **the dtic**, IDC and NEF including grants, loans, and equity and export promotion funds. The beneficiary enterprise must be located outside of the Johannesburg, Ekurhuleni, eThekweni, Cape Town and Tshwane metro areas. In addition, the IDC will contribute R14 billion and the NEF R284 million towards the achievement of this target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Outputs, Indicators/Definition, Programme Contribution and Annual Targets

Outcomes: Industrialisation and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 7 R15 billion support programmes to enterprises in areas outside the 5* main metros	Value of approved funding accessed outside the 5 metros	Programme 6 Incentives: Value of (R1 billion) funding accessed by projects/enterprises outside the 5 metros Programme 7 Exports: Value of (R65 million) support provided to exporters outside the 5* main metros to participate in export promotion initiatives	New Indicator	New Indicator	New Indicator	R15 billion	R15 billion	R15 billion

OUTPUT 8: R8 BILLION IN FINANCIAL SUPPORT PROGRAMMES AND PROCUREMENT CONTRACTS APPROVED TO SMMEs, WOMEN AND YOUTH-EMPOWERED BUSINESSES

This output reflects the value of financial support provided by **the dtic** group and procurement contracts approved both to enterprises defined as SMME's, Women owned and youth empowered businesses.

It is measured as the value of financial support approved (but not necessarily disbursed) by **the dtic**, IDC and NEF including grants, loans, equity, transformation and competition agreements, and export promotion funds. The beneficiary enterprise must be an SMME as defined by the Small Business Act or is a women or youth-empowered business (defined as firms with at least 25% equity by the designated group).

In addition, the IDC will contribute R4.8 billion and the NEF R1.2 billion towards the achievement of the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. Procurement contracts approved towards women-owned enterprises and youth are measured as a percentage of all procurement contracts awarded.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 8 R8 billion in financial support programmes and procurement to SMMEs, women and youth-empowered businesses	Value of funding accessed, and support provided to SMMEs	Programme 6 Incentives: Value of (R500m) approved funding accessed by SMMEs	New Indicator	New Indicator	New Indicator	R8 Billion	R8 Billion	R10 Billion
		Programme 7 Exports: Value of (R60 million) support provided to SMME exporters to participate in export promotion initiatives						
		Programme 8 Transformation and Competition: Value (R1.1 billion) of support provided to SMMEs from transformation and competition initiatives						

OUTPUT 9: R7.5 BILLION IN FINANCIAL SUPPORT PROGRAMMES TO ENTERPRISES IN LABOUR ABSORBING SECTORS

This output reflects the value of financial support provided enterprises which operate in labour-absorbing sectors.

It is measured as the value of financial support approved (but not necessarily disbursed) by **the dtic**, IDC and NEF including grants, loans, equity, transformation and competition agreements, and export promotion funds. The beneficiary enterprise must operate in the following sectors: furniture, clothing, footwear, leather, forestry, construction, agriculture and agro-processing.

In addition, the IDC will contribute R6.3 billion and the NEF R810 million towards the achievement of the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 9 R7.5 billion in financial support programmes to enterprises in labour absorbing sectors	Value of support programmes to enterprises in labour absorbing sectors	Programme 7 Exports: Value of (R58 million) support provided to exporters in labour absorbing sectors to participate in export promotion initiatives	New Indicator	New Indicator	New Indicator	R7.5 billion	R8 billion	R9 billion
		Programme 8 Transformation and Competition: Value of (R408 million) support programmes from competition, to sectors not included in master plans – including but not limited to agriculture, construction and forestry						

OUTPUT 10: R 800 MILLION IN EQUITY EQUIVALENT INVESTMENT PROGRAMME AGREEMENTS

This output reflects the value of financial support provided to black-owned enterprises through EEIP agreements.

It is measured as the value of financial support provided through loans, grants, equity and procurement commitments in EEIP agreements approved by **the dtic**. The beneficiary firm must meet the definition of black-owned (50% or more ownership by black people as defined in the B-BBEE Act).

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 10 R 800 Million in Equity Equivalent Investment Programme agreements	Value (Rand) of loan, equity and procurement funding to support black-owned enterprises	Programme 8 Transformation and Competition: Value of (R800 million) loan, equity and procurement funding to support black owned enterprises Programme 9 Research: Will undertake impact assessment of existing EEIP agreements.	New Indicator	New Indicator	New Indicator	R800 Million	R900 Million	R 1 Billion

OUTPUT 11: R40 BILLION IN BLACK INDUSTRIALIST OUTPUT ACHIEVED

This output reflects the value of production output by Black Industrialist firms.

It is measured as the value of production output by Black Industrialist firms that have been supported by **the dtic** group. The support provided to Black Industrialists may include investments, sector interventions, industrial financing support, export initiatives and competition agreements.

In addition, IDC will contribute R 21 billion and NEF R1.7 billion towards the achievement of the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Transformation			Audited / Actual Performance			(MTEF Period)		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 11 R40 Billion in black industrialist output achieved	Value of output by Black Industrialist firms supported by the dtic group.	Programme 3 Investment and Spatial Industrial Development: Value of (R1 billion) of output by black industrialists supported through investment	New Indicator	New Indicator	New Indicator	R40 Billion	R46 Billion	R52 Billion
		Programme 6 Incentives: Value of (R3 billion) output from black industrialist projects through industrial financing support						
		Programme 7 Exports: Value of (R10 billion) output by black industrialists supported through export initiatives						
		Programme 8 Transformation and Competition: Value of (R3.3 billion) output by Black Industrialist firms supported through programme 8						

OUTPUT 12: 1 MILLION JOBS SUPPORTED OR COVERED BY THE DTIC GROUP AND / OR MASTER PLANS

This output reflects the reach of **the dtic** group's interventions in terms of jobs.

It is measured as the total number of permanent, full-time jobs in the firms and sectors that have received financial or non-financial support from **the dtic** group. It includes firms that have accessed dtic group financial support; are covered by a sector masterplan which is in implementation; are benefiting from partnership agreements such as the EEIP; are benefiting from trade measures such as tariffs, rebates or sector interventions such as the APDP; or are located in an SEZ.

In addition, the IDC will contribute 36 778 jobs; the NEF 4 985; and the NLC 10 000 to the achievement of the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 12 1 million jobs supported or covered by the dtic group and / or master plans	Number of jobs supported	Programme 2 Trade Policy: 120 000 jobs supported (direct jobs at the time of application) as a result of implemented tariff increases, rebates, APDP program and trade remedies administered Programme 3 Investment and Spatial Industrial Development: 25 000 jobs supported through SEZs (Existing), investment facilitation and unblocking Programme 4 Sectors: 600 000 jobs supported and maintained through sector interventions or covered by Master Plans Programme 5 Regulation: 20 000 (liquor and lotteries) estimated number of jobs from liquor distributors & macro manufacturers through; renewal of liquor licence registrations by National Liquor Authority and jobs supported from the national lottery	New Indicator	New Indicator	New Indicator	1 Million Jobs Supported or covered by Master Plans	1 Million Jobs Supported or covered by Master Plans	1 Million Jobs Supported or covered by Master Plans

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
		<p>funded projects across the sectors provided in the Lotteries Act</p> <p>Programme 6 Incentives: Number (25 000) of jobs supported under GBS masterplan (retained and new)</p> <p>Programme 7 Exports: 70 000 jobs supported through export initiatives</p> <p>Programme 8 Transformation and Competition: Number of (180 000) jobs retained and created by programme 8 interventions</p>						

OUTPUT 13: 100 000 JOBS CREATED

This output reflects the number of jobs and job opportunities created as a result of the interventions of **the dtic** group.

It is measured in two parts. The first measurement is the total number of permanent, full-time jobs created in the firms and sectors that have received financial or non-financial support from **the dtic** group. The second measurement is the total number of 'job opportunities' created which is defined as temporary, construction, part-time, or seasonal jobs created.

This output will therefore include jobs created as part of a sector Master Plan; as a result of an export contract; new greenfield or brownfield investments; competition settlements which include supplier development or localisation; and new investments in SEZs as well as jobs under the Social Employment Fund.

The IDC will contribute 29 422 and the NEF 2 193 jobs to achieving the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 13 100 000 jobs created	Number of jobs created through the dtic programmes: - 50 000 social economy fund part-time or temporary job opportunities; - 50 000 full-time jobs	Programme 2: Trade Policy: Jobs created (direct jobs at the time of application) as a result of implemented tariff increases, rebates, APDP program and trade remedies administered (500) Programme 3: Investment and Spatial Industrial Development: Number (7860) of Jobs created through SEZs and companies supported through investment Programme 4: Sectors: Number of jobs created	New Indicator	New Indicator	New Indicator	100 000	110 000	120 000

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
		(1459) through sector interventions Programme 6: Incentives: Number of new permanent jobs created (10 000) and number of construction job opportunities (3 000) Programme 8: Transformation and Competition: Number of new jobs created through mergers and support programmes and social economy fund (58000)						

OUTPUT 14: 23 000 JOBS IN BLACK INDUSTRIALISTS' FIRMS SUPPORTED

This output reflects the number of jobs supported in Black Industrialist firms.

It is measured as the number of jobs supported in Black Industrialist firms which have received financial or non-financial support from **the dtic**, IDC or NEF. This includes export promotion support; competition settlements; or BEE agreements.

The IDC will contribute 4 985 and the NEF 4 750 jobs to the achievement of the target.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 14 23 000 jobs in Black Industrialist Firms supported	Number of jobs in Black Industrialist firms supported by the dtic group	Programme 6 Incentives: Number of jobs supported (retained and new) (3 000) by BIS projects Programme 7 Exports: Jobs supported (6 500) in BI firms through export initiatives Programme 8 Transformation and Competition Number of (3 000) jobs in Black Industrialist firms supported by the dtic group or who benefit from BBBEE policies	New Indicator	New Indicator	New Indicator	23 000	24 000	25 000

OUTPUT 15: 20 000 ADDITIONAL WORKERS WITH SHARES IN THEIR COMPANIES

This output reflects the additional number of workers who acquire shares in the companies they work for. It is measured as additional workers owning shares in their companies as a result of **the dtic group's** interventions including but not limited to competition agreements.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 and 6 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 15 20,000 additional workers with shares in their companies	Additional workers with shares in their companies as represented in commitments made	Programme 8 Transformation and Competition: Number (20 000) of additional workers with shares in their companies as a result of competition initiatives	New Indicator	New Indicator	New Indicator	20 000	30 000	40 000

OUTPUT 16: 10 HIGH-IMPACT OUTCOMES ON ADDRESSING MARKET CONCENTRATION AT SECTOR OR FIRM LEVEL

This output reflects the number of high-impact outcomes as a result of competition interventions.

It is measured as the number of impact assessments provided to the Executive Authority and includes interventions such as addressing regulatory measures to increase competition; implementation of Competition Commission recommendations; facilitating the participation of farmers, firms and stakeholders in market inquiries; and investigations by the BEE Commission which result in competition or transformation in a sector or enterprise.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 16 10 high-impact outcomes on addressing market concentration at sector or firm level	Impact assessments on high impact outcomes on addressing market concentration at sector or firm level	Programme 8 Transformation and Competition: Number (10) of impact assessments on high impact outcomes on addressing market concentration at sector or firm level	New Indicator	New Indicator	New Indicator	10	10	10

OUTPUT 17: 1 NEW SEZs APPLICATIONS CONSIDERED FOR DESIGNATIONS

This output involves the preparation of the necessary documents including the business case and investment commitments required for the designation of new SEZs. It is measured as the number of SEZ applications submitted to the Executive Authority.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the MTSF commitments captured in Priority 2 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Transformation			Audited / Actual Performance			(MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 17 1 new SEZs applications considered for designations	Number of New SEZ designated and support work with provinces related to industrial parks	Programme 3: Investment and Spatial Industrial Development: Facilitate the process for designation of SEZs, support the planning, design, management, governance and institutional structure in line with the SEZ Act, facilitation support to companies in newly designated SEZs; and support work with provinces related to industrial parks	New Indicator	New Indicator	New Indicator	1	1	3

OUTPUT 18: R1.3 BILLION IN FINANCIAL SUPPORT TO ENTERPRISES INCLUDING SMMEs TO MITIGATE IMPACT OF LOAD SHEDDING THROUGH ENERGY RESILIENCE FUND

This output involves the creation of the Energy Resilience Fund and its effective implementation to mitigate the impact of load shedding on enterprises.

It is measured as the financial support approved for enterprises to make investments in for example, renewable energy generation, battery and generator back- up systems, and associated essential components. The output will be implemented by primarily **the dtic** Programme 6, the IDC and the NEF.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and the Energy Action Plan announced in July 2022. Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 18 R1.3 billion in financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund	Value (Rand) of financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund	Programme 6 Incentives: Value (R240 m) of Energy Resilience loan funding accessed by SMMEs and provide oversight to IDC and NEF to ensure implementation of R1,3 billion fund	New Indicator	New Indicator	New Indicator	R 1.3 billion	1.4bn	1.5bn

OUTPUT 19: 1400 MEGAWATTS OF ENERGY FROM PROJECTS FACILITATED

This output involves the facilitation, funding and unblocking of projects in the energy sector.

It is measured as the estimated electricity generation capacity of the various projects supported by **the dtic** group at approval stage. Once a project is in commercial production, it will be reflected in Output 20. The IDC is supporting projects with an estimated generation capacity of 600 MWs.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and the Energy Action Plan announced in July 2022.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 19 1400 Megawatts of energy from projects facilitated	Number of Megawatts from projects facilitated	Programme 3 Investment and Spatial Industrial Development: 800 Megawatts (MW) of new energy projects supported through investor facilitation and unblocking	New Indicator	New Indicator	New Indicator	1400MW	1500MW	1600MW

OUTPUT 20: 550 MEGAWATTS OF ENERGY AVAILABLE FOR THE GRID

This output reflects the electricity generation capacity of projects that are in commercial production.

It is measured as the electricity generation capacity of the various projects supported by **the dtic** group that are available for connection to the national grid. Given the complex nature of grid synchronisation, availability of transmission lines and Eskom's ability to actually connect projects in various provinces to the grid, this output does not measure actual grid connection as this is outside of the control of **the dtic** and the project developers. The IDC is supporting projects with an estimated generation capacity of 325 MWs.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the Energy Action Plan announced in July 2022.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Capable State			Audited / Actual Performance			Annual Target (MTEF Period)		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 20 550 Megawatts of energy available for the grid	Megawatts of energy available for the grid	Programme 3 Investment and Spatial Industrial Development: 230 MW energy projects completed energy available for the grid	New Indicator	New Indicator	New Indicator	550MW	550MW	750MW

OUTPUT 21: 1 ENERGY ONE-STOP SHOP (EOSS) OPERATIONAL

This output refers to the establishment of an EOSS to unblock investment in the energy sector.

The target is the operational functioning of the EOSS in the FY.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and the Energy Action Plan announced in July 2022.

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 21 1 Energy One-Stop Shop (EOSS) operational	Establishment of the physical Energy One-Stop-Shop (EOSS)	Programme 3: Investment and Spatial Industrial Development: Roll out and implementation	New Indicator	New Indicator	New Indicator	Phase 1 - Physical EOSS	-	-

OUTPUT 22: EXPEDITED REGULATORY AMENDMENTS AND FLEXIBILITY, TO PROMOTE ENERGY EFFICIENCY

This output refers to the introduction of flexibilities in the regulated activities that fall within the mandate of **the dtic** and which could facilitate investment in the energy sector. The target will be measured against the publishing of regulations allowing for regulatory flexibility where required and the fast-tracking of compulsory specifications for approval by the Executive Authority.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and the Energy Action Plan announced in July 2022.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 22 Expedited regulatory amendments and flexibility, to promote energy efficiency	Publishing of regulations when necessary and expedited publishing of energy efficiency compulsory specifications.	Programme 4 Sectors: Number of expedited compulsory specifications issues for energy efficiency Programme 8 Transformation and Competition: Number of block exemptions for energy suppliers and users	New Indicator	New Indicator	New Indicator	4	1	1

OUTPUT 23: 100 INVESTOR FACILITATION AND UNBLOCKING INTERVENTIONS PROVIDED

This output refers to the provision of investor facilitation services including assistance to unblock regulatory barriers which may impede investment in the energy sector. The output will be measured through a simple count of investor facilitation and unblocking interventions.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and the Energy Action Plan announced in July 2022.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 23 100 investor facilitation and unblocking interventions provided	Investor facilitation and unblocking interventions provided	Programme 3: Investment and Spatial Industrial Development: Number of (100) investor facilitation and unblocking interventions provided Unblocking supported through SEZ interventions and where required, provide support with technology and digital firms that need investment	New Indicator	New Indicator	New Indicator	100	120	150

OUTPUT 24: GREYLISTING: PUBLICATION OF 'KNOW YOUR SHAREHOLDER' REGULATIONS' AND FOLLOW UPS

This output refers to the publication of regulations to strengthen the reporting requirements of companies and introduce a Beneficial Ownership Register to assist in meeting the FATF requirements for SA to be removed from its grey list. The target will be measured against the publishing of regulations, the development of the Beneficial Ownership Register, and the publication of quarterly compliance reports.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This output is aligned to the SONA of 2023.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 24 Greylisting: Publication of 'Know your Shareholder' regulations' and follow ups	Grey listing 'Know your Shareholder' regulations' Published	Programme 5 Regulations: Publication of Quarterly reports on Entities in compliance with requirements	New Indicator	New Indicator	New Indicator	2	2	2

OUTPUT 25: 10 BUSINESS FORUMS HOSTED AIMED AT SUPPORTING INCREASED FDI, EXPORTS AND OUTWARD INVESTMENT HOSTED

This output refers to the hosting of business Forums.

The target will be measured through a simple count of the number of Forums convened. A business forum is an opportunity for domestic and foreign enterprises to meet with a view to facilitating inward and outward investment and export contracts. They are typically held at the same time as an inward state visit or when the SA President visits trading partners but **the dtic** will not limit its business Forums programme to state visits as these cannot easily be planned in advance and the decision-making on state visits is not in **the dtic**'s control.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the SONA of 2023 and contributes to the achievement of Priorities 2 and 7 of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 25 10 Business Forums hosted aimed at supporting increased Foreign Direct Investment (FDI) exports and outward investment hosted	Number of Business Forums hosted aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment	Programme 7 Exports: 10 Business Forums hosted aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment Programme 2 Trade Business Forums hosted aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment	New Indicator	New Indicator	New Indicator	10	10	10

OUTPUT 26: FOUR PIECES OF PRIORITY LEGISLATION AMENDED, TABLED OR SUBMITTED TO EXECUTIVE AUTHORITY, CABINET OR PARLIAMENT

Given that this is the final year of the 6th administration, only priority legislation can be processed before the end of term of the current Parliament. The target will be measured through a simple count. The legislation that will be prioritised for processing is listed in the table below and includes the Companies Amendment Bill, the Patents Amendment Bill and the National Building Regulations and Building Standards Act.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This output is aligned to the achievement of Priority 2 commitments of the MTSF.

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 26 Four pieces of priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament	Priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament	Programme 2 Trade Policy: Patents Amendment Bill and Designs Amendment Bill submitted to the Executive Authority Programme 4 Sectors: Amendment of National Building Regulations and Building Standards Act and submitted to Executive Authority Programme 5 Regulation: Companies Amendment Bill tabled or submitted to Executive Authority	New Indicator	New Indicator	New Indicator	4	2	3

OUTPUT 27: COMMENCEMENT OF SOUTH AFRICA'S PREFERENTIAL TRADE UNDER THE AfCFTA

This output focuses on finalising a number of protocols and the trade offer that would allow SA to begin trading at preferential rates under the AfCFTA.

The target will be measured by reference to SACU's offer being accepted by the AfCFTA Council, and the finalisation of the clothing and autos rules of origin.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This output is aligned to the achievement of Priority 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 27: Commencement of South Africa's preferential trade under the AfCFTA	Facilitate the start of preferential trading in goods under the AfCFTA by: - Submitting SACU 90% Tariff offer to the AfCFTA Secretariat - Facilitating changes to Customs and Excise Act and gazetting thereof by SARS to implement SACU tariff offer by March 2024 - Reporting on progress to finalise the outstanding rules of origin for clothing and autos by March 2024	Programme 2: SACU 90% Tariff offer finalised and submitted to the AfCFTA Secretariat. . Facilitate changes to Customs and Excise Act and gazetting thereof by SARS to implement SACU tariff offer by March 2024. Report on the progress to finalise the outstanding rules of origin for clothing and autos by March 2024.	New Indicator	New Indicator	New Indicator	3	3	3

OUTPUT 28: 10 HIGH IMPACT TRADE INTERVENTIONS COMPLETED

This output focuses on undertaking high-impact trade interventions to facilitate trading and resolve disputes. The target will be measured by reference to a simple count of trade interventions such as resolving trade disputes; challenges with implementation of trade agreements; ITAC decisions and trade measures; bilateral trade concerns and market access challenges.

Interventions may include:

- Imposition of anti-dumping duties;
- Imposition of safeguard measures;
- Resolution of market access impediments for SA products;
- Review of Trade agreements;
- Assessment of implementation and utilization under certain trade agreements;
- Tariff and rebate measures;
- Development of import sensitivity index; and
- Trade adjustment assistance programme

High impact trade interventions refer to those actions that: -

- Enable South African firms (in sectors and value chains of interest - manufacturing, strategic services and agriculture) to sustain, retain advance and explore market opportunities and advantages in our established and in new trading partners and destination markets
- Ensure favourable access to intermediate products and inputs on a relatively favourable basis for key industrial sectors, allowing them to develop capabilities, undertake industrial learning, gain competitive advantages and where appropriate, earn sustainable foreign exchange via exports.
- Encourage investment, firm entry and advance in 'new' tradable product and service markets
- Intervene, using trade instruments in our policy toolkit, in response to market developments that have an adverse impact on firms, consumers and households

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the achievement of Priority 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 28 10 High impact trade interventions completed	High impact trade interventions including, but not limited to the following: trade disputes, challenges with implementation of trade agreements, ITAC decisions and trade measures, bilateral trade concerns	Programme 2 Trade: 10 high impact trade interventions including, but not limited to the following: trade concerns and disputes, challenges with implementation of trade agreements, tariff decisions and trade measures, bilateral trade concerns and market access challenges	New Indicator	New Indicator	New Indicator	10	10	10

OUTPUT 29: 1 STRATEGY AND ADVOCACY FINALISED RESPONDING TO GREEN TRADE BARRIERS (CBAM)

This output focuses on the development and implementation of a strategy to respond to the CBAM.

The output will be the development and implementation of a strategy which galvanises domestic stakeholders such as business and labour, and external stakeholders in other developing countries likely to be affected by the CBAM. Given that the CBAM will significantly undermine SA exports' competitiveness and EU market access, **the dtic** will put significant resources into analysing the potential impact on SA and investigating appropriate responses.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			Annual Target (MTEF Period)		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 29 1 Strategy and advocacy finalised responding to green trade barriers (CBAM)	Strategy document and advocacy actions respond to green trade barriers (Carbon Border Adjustment Mechanism (CBAM	Programme 2 Trade Policy: Finalise a strategy responding to green trade barriers (Carbon Border Adjustment Mechanism (CBAM) Advocacy and consultation with key stakeholders, like-minded and developing countries, including in SACU, SADC, AU, BRICS and engagements with EU and the WTO Programme 4 Sectors: Develop a strategy and action plan for South Africa's engagement with the EU on Carbon Border Adjustment Mechanisms Programme 9 Research: White Paper on EV, and Carbon tax border adjustment measures. Develop and implement strategy on CBAM.	New Indicator	New Indicator	New Indicator	10	10	10

OUTPUT 30: 1 EV WHITE PAPER FINALISED

This output refers to the finalisation of a strategy and roadmap for electric vehicles.

The SA auto sector and its substantial exports are likely to be affected by a number of SA's trading partners' decision to encourage the adoption of electrical vehicles. Stakeholders are in agreement that SA needs to move quickly to Conclude the electric vehicle strategy and roadmap; develop and implement an appropriate framework for government agencies to purchase SA made NEVs; Develop and implement social compacts with business for participating organisations to develop NEVs; and Work with the private sector to incentivise the development of charging infrastructure.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 30 1 EV White Paper finalised	White paper on New Energy Vehicle finalised	Programme 4 Sectors: White paper on New Energy Vehicle Strategy and Roadmap completed	New Indicator	New Indicator	New Indicator	1	Nil	Nil

OUTPUT 31: 1 FINALISATION OF GREEN HYDROGEN COMMERCIALISATION FRAMEWORK

This output refers to the finalisation of SA's green hydrogen commercialisation framework, following the public comment process.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 31 1 Finalisation of Green Hydrogen commercialisation framework	Green Hydrogen commercialisation framework finalised	Programme 4 Sectors: Finalisation of Green Hydrogen Commercialisation Framework	New Indicator	New Indicator	New Indicator	1	Nil	Nil

OUTPUT 32: 1000 CASE STUDIES OF FIRMS, WORKERS, ENTREPRENEURS, PROFESSIONALS OR COMMUNITIES IMPACTED BY THE DTIC MEASURES; INCLUDING 12 LOCAL FILMS/ DOCUMENTARIES TELLING THE SA STORY

This output refers to production of 1 000 case studies of firms, workers, entrepreneurs, professionals or communities impacted by **the dtic** measures; including 12 local films/documentaries telling the SA story.

The output will be measured through a simple count of **the dtic** success stories profiled by **the dtic** programmes and entities through written case studies, examples used in presentations, website highlights, advertising campaigns and social media platforms; as well as financing of 12 films that tell the SA story, including aspects of our painful history development of charging infrastructure. Programme contribution of **the dtic** entities and partner funds contribute the following towards the achievement of each output.

The top 1000 case studies will be drawn from the following indicative targets within the dtic family:

1. B-BBEE Commission	50
2. Companies and Intellectual Property Commission (CIPC)	30
3. Export Credit Insurance Corporation (ECIC)	30
4. National Consumer Commission (NCC)	50
5. National Consumer Tribunal (NCT)	10
6. Companies Tribunal (CT)	10
7. National Credit Regulator (NCR)	50
8. National Empowerment Fund (NEF)	50
9. National Gambling Board (NGB)	10
10. National Lotteries Commission (NLC)	200
11. National Metrology Institute of South Africa (NMISA)	20
12. National Regulator for Compulsory Specifications (NRCS)	20
13. Patent Examination Board	10
14. Proudly South Africa	100
15. Social Employment Fund (SEF)	200
16. South African Bureau of Standards (SABS)	20
17. South African National Accreditation System (SANAS)	20
18. Tirisano Fund	50
19. The Competition Commission	50
20. The Competition Tribunal	10
21. The Industrial Development Corporation (IDC)	100
22. The International Trade Administration Commission (ITAC)	50

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2, 6 and 7 commitments of the MTSF.

The contribution by the nine programmes and relevant entities will entail:

The contribution of each dtic programme for information

Programme 1 Administration	50
Programme 2 Trade	50
Programme 3 Investment and Industrial Spatial Development	80 (30 from ISA and 50 from SEZs)
Programme 4 Sectors	100 (3 Per master Plan 5 per sector desk)
Programme 5 Regulation	10
Programme 6 Incentive	100
Programme 7 Exports	100
Programme 8 Transformation and Competition	100 (50 Competition and 50 EEIP)
Programme 9 Research	50

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 32 1000 case studies of firms, workers, entrepreneurs, professionals or communities' individuals impacted by the dtic measures; including 12 local films/documentaries telling the SA story	Number of the dtic success stories profiled through case studies, advertising campaigns and social media platforms	Programme 1 Administration: Number of case studies covering the dtic Group / Entities success stories	New Indicator	New Indicator	New Indicator	1000	1200	1500

OUTPUT 33: 52 COMMUNITY OUTREACH PROGRAMMES BY THE DTIC GROUP

This output refers to the undertaking of community outreach programmes by relevant programmes and entities within **the dtic** group. This entails:

- (1) Community outreach sessions showcasing the range of government support and programmes available to SMMEs (which includes bringing **the dtic**, DFIs, SARS and CIPC and other relevant agencies.
- (2) Information dashboards on each district; or
- (3) Coordination meeting with other entities to integrate **dtic** efforts within the district development model to bring the three spheres' contributions together.

Measurement will be through a simple count of community outreach initiatives completed in 52 districts by **the dtic** programmes and entities.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2, 6 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 33 52 community outreach programmes by the dtic group	Community outreach initiatives completed in 52 Districts	Programme 1 Administration: Number of community outreach initiatives completed in 52 Districts	New Indicator	New Indicator	New Indicator	52	Nil	Nil

OUTPUT 34: 6 MASTER PLANS MANAGED, AND 1 NEW MASTER PLAN FINALISED

This output refers to the continued implementation of the 7 existing Master Plans while 1 additional Master Plan is to be finalised in the FY; in addition, contribute to the hemp and cannabis Master Plan.

This output will be achieved through strategic oversight of Master Plans implementation structures and working groups including commitment of time and resources to work streams most likely to deliver economic impact. In respect of Hemp and Cannabis, it includes the matters referred to in the letter from the President dated 28 March 2023:

1. Reprioritise internal budgets, in alignment with commitments made in SONA 2023. This reprioritisation should also consider, where appropriate, the inclusion of the hemp and cannabis sector in existing **dtic** financing and incentive support instruments.
2. Delegate senior officials, including those in agro-processing, pharmaceuticals, cosmetics, and quality infrastructure (standards), who will drive the development of the hemp and cannabis sector. Additionally, the South African Bureau of Standards (SABS) and the South African National Accreditation System (SANAS) must map the Standards and Conformity Assessment capacity in South Africa. Finally, SABS will urgently need to put in place the product and process standards that will enable sector growth.
3. Participate in a Hemp and Cannabis mini-Phakisa, which will be organised by the Department of Agriculture, Land Reform, and Rural Development (DALRRD), under the leadership of Minister Didiza. The mini-Phakisa should produce an accelerated implementation plan for sector growth, with deliverables that are focused on improving the lives of South Africans.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Outputs, Output Indicators/Definition, Programme Contribution and Annual Targets

Outcome: Industrialisation, and Transformation			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

OUTPUT 35: OVERSIGHT OF IDC, NEF AND ECIC TO ENSURE THAT AT LEAST 95% OF PLANNED KPIS ARE ACHIEVED

This output refers to the implementation of effective oversight of IDC, NEF and ECIC.

The main measure is the production of Action Minutes which assess the DFIs performance against their KPI's with a target of 95% achievement of all targets set for investment commitments; funding of SMMEs; funding to projects outside 5 metros; funding of projects in labour-absorbing sectors; funding of black industrialist projects; and jobs supported

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026

		Programme 8 Number of reports setting out progress with oversight of competition entities						

OUTPUT 37: 5 CONFERENCES, SUMMITS, AND INTERNATIONAL FORUMS HOSTED

This output refers to the hosting of 5 conferences, summits and international forums. The events to be held will be drawn inter alia from the list below:

- SA Investment Conference;
- Black Industrialist Conference;
- Worker Ownership Summit;
- BRICS Ministerial meeting;
- BRICS Business Council; and
- AGOA Forum.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF as well as the SONA 2023 announcements.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 37 5 conferences, summits, and international forums hosted	Conferences, summits, and international forums hosted	Programme 2 Trade Policy: Co-ordinate the hosting of the BRICS Trade Ministers meeting Co-ordinate the hosting of the AGOA Forum Co-ordinate the hosting of the AfCFTA Council of Ministers	New Indicator	New Indicator	New Indicator	5	5	5
		Programme 3 Investment and Spatial Industrial Development: Support business forum in terms of investment promotion						
		Programme 7 Exports: Co-ordinate the hosting of the BRICS Business Forum						
		Programme 8 Transformation and Competition: Co-ordinate the hosting of the black Industrialist Conference & Worker Ownership Summit						

OUTPUT 38: 50 MERGERS AND ACQUISITIONS WHERE PUBLIC INTEREST CONDITIONS HAVE BEEN INCORPORATED

This output refers to the conclusion of 50 Mergers and acquisitions where public interest conditions have been incorporated.

The output will be measured by the number of reports on interventions in mergers on public interest issues, covering one or more of the following: employment protection; transformation including worker ownership; local supplier development; new investments; and localisation.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the achievement of Priority 2 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Industrialisation, Transformation and Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 38 50 Mergers and acquisitions where public interest conditions have been incorporated	Targets for assessing mergers for public interest and intervening in mergers on public interest issues	Programme 8 Transformation and Competition: <ul style="list-style-type: none">50 mergers and acquisitions where public interest conditions have been incorporatedPercentage (100%) of mergers notified and assessed for public interestPercentage (15%) of mergers notified will have interventions to advance the public interestPercentage (1%) of mergers notified will have agreements reached between the acquiring firm and the dtic on public interest, and presented to the Competition Tribunal	New Indicator	New Indicator	New Indicator	50	50	50

OUTPUT 39: 4 HIGH-IMPACT MEASURES TO IMPROVE THE EFFICIENCY AND/OR EFFECTIVENESS, OF THE DTIC'S POLICY OR PROGRAMME INTERVENTIONS

Output 39:

This output involves the commissioning or undertaking of evaluations of policy or programmes of **the dtic** group.

It will be measured on the basis of impact assessments provided to the Executive Authority which provide clear policy recommendations to improve, for example, the efficiency, cost-effectiveness or reach of **the dtic** or **the dtic** group's interventions.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This is the first time this measure is included in the APP.

Output 39 is aligned to the achievement of Priority 2 commitments of the MTSF.

Outcomes: Capable State			Audited / Actual Performance			Annual Target (MTEF Period)		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 39 4 High-impact measures to improve the efficiency and/or effectiveness, of the dtic 's policy or programme interventions	Number of high-impact policy measures completed	Programme 9 Research: Completed high-impact measures	New Indicator	New Indicator	New Indicator	4	4	4
		Programme 1 Administration: Will provide a package of support as set out in Note 1 on Section 16A						
		Programme 2: Trade Provide resource support if required						

OUTPUT 40: 10 HIGH-IMPACT MEASURES TO REDUCE RED TAPE OR IMPROVE TURNAROUND TIMES IN ADMINISTRATION OF INCENTIVES AND WORK OF AGENCIES

This output refers to the conclusion of 10 high-impact interventions to reduce red tape or improve turnaround times in administration of incentives and work of agencies.

The output will be measured by the number of written Impact Assessments provided to the Executive Authority and which is approved by the EA as meeting the criteria of a high-impact outcome. These may include:

- Incentives programmes reviewed to reduce red tape or improve turnaround times;
- Exporter development programme implemented to coordinate and pool support for exporters by the dtic, ECIC, IDC and NEF;
- Finalise and publish the regulations on anti-dumping, safeguards and tariff investigations to reduce red-tape in application process (ITAC); and
- Improvements in turnaround times of two key technical infrastructure processes.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to the achievement of Priority 2 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/25	2025/26
Output 40 10 High-impact measures to reduce red tape or improve turnaround times in administration of incentives and work of agencies	Number of regulations published & red tape reduction interventions	<p>Programme 2 Trade Policy: Amendments (3) to regulations on anti-dumping, safeguards and import and export controls to reduce red-tape in ITAC application process submitted to the Executive Authority</p> <p>Programme 4 Sectors: Improvements in turnaround times of two key technical infrastructure processes: - SABS: publication of standards NRCS: issuing letters of authorisation</p> <p>Programme 8 Transformation and Competition: Competition Commission/ Tribunal Rules/ Regulations published & 1 BBBEE red tape reduction taken</p>	New Indicator	New Indicator	New Indicator	10	10	10

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/25	2025/26
		Programmes 6 Incentives: Implement measures to reduce red tape in administration of incentives by reviewing programmes or processes Programme 7 Exports: 1 Exporter development programme implemented to coordinate and pool support for exporters by the dtic, ECIC, IDC and NEF						

OUTPUT 41: 4 PROTOCOLS FINALISED UNDER THE AfCFTA

This output refers to the conclusion of 4 protocols necessary for the effective functioning of the AfCFTA. The output will be measured by the conclusion of the competition, investment, women in trade and digital trade protocols.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23. This is the first time this measure is included in the APP.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF

Outputs, Output Indicators, Programme Contribution and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 41: 4 Protocols finalised under the AfCFTA 1 Cabinet Memo on the WTO Fisheries Subsidies Agreement	Protocols finalised: Protocols finalised: 1. Competition Protocol 2. Investment Protocol 3. Protocol on Women in Trade 4. Protocol on digital trade 5. Fisheries Subsidies Agreement	Programme 2: Trade Policy 1. Cabinet memorandum for the ratification of the Competition Protocol submitted to the Executive Authority 2. Investment Protocol submitted to the AfCFTA Council of Ministers 3. Protocol on Women in trade submitted to the AfCFTA Council of Ministers 4. Protocol on digital trade submitted to the AfCFTA Council of Ministers 5. Cabinet Memo on the ratification of the Fisheries Subsidies Agreement submitted to the Executive Authority	New Indicator	New Indicator	New Indicator	4	0	0
		Programme 8 Transformation and Competition: Competition protocol of AfCFTA submitted to Executive Authority						

OUTPUT 42: INFRASTRUCTURE ENTERING THE SCRAP METAL VALUE-CHAIN, EXPORT MARKET OR LEGITIMATE METAL PRODUCTION INDUSTRY

This target captures the essence of the work designed to reduce damage to infrastructure as a result of scrap metal exporters and traders.

The output will be measured by the development and implementation of a Metal Trading System which will provide quarterly reports to assist security structures to identify possible sources of stolen infrastructure.

Technical Note: This target focuses on those parts of the metal value-chain where **the dtic** has policy levers available to it e.g., issuing of export permits. It does not cover those areas where other Departments or entities have the legal or regulatory authority e.g., SAPS, SARS, FIC.

It does include:

- Development and institutionalisation of the new metal trading system: tighter monitoring and evaluation of metal trade.
- Evaluation of potential new legislation requiring cashless transactions in scrap metal trade.
- Shifting regulation of copper to fall under precious metal legislation as a “precious” metal.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

Outcomes: Capable State			Audited / Actual Performance			(MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Output 42 1 Metal trading system developed to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry	Development of a Metal Trading System to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry	Programme 4 Sectors: Development and institutionalisation of the New Metal trading system to eliminate metal infrastructure theft and damage	New Indicator	New Indicator	New Indicator	1	-	-

OUTPUT 43 – PROMOTION OF A TRANSPARENT AND JUST ADJUDICATION PROCESS FOR INCENTIVE APPLICATIONS

This output refers to the promotion of a transparent and just adjudication process for Incentive Applications.

The output will be measured by the implementation of a redress mechanism implemented for queries and complaints regarding decisions of the Incentives Adjudication Committees.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF and SONA 2022.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Interventions and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 43 Promotion of a transparent and just adjudication process for Incentive Applications	Incentives Adjudication Review Committee established	Programme 1 Administration: Establishment of the Incentives Adjudication Review committee	New Indicator	New Indicator	New Indicator	1 Annual Report	1 Annual Report	1 Annual Report

OUTPUT 44: ASSESSMENTS ON TRADE INSTRUMENTS APPLIED FOR AND ISSUED

This output refers to impact reports (both internal and statutory) on trade instruments applied for and issued across firms of different sizes.

The output will be measured by trade instruments or measures applied that are geo-spatially referenced; applied for and issued, considering race, gender, age, and other relevant demographic markers or jobs impact of measures. It will also include actions that addresses the social dimensions of trade.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 and 7 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Interventions and Annual Targets

Outcome: Capable State			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 44 Assessments on trade instruments applied for and issued	Number of assessments on trade instruments applied for and issued	Programme 2: Trade Policy Impact Assessment Reports on Trade Instruments applied for and issued or enhancements of trade instruments or measures	New Indicator	New Indicator	New Indicator	6	6	6

OUTPUT 45: 10 SUCCESSFUL ACTIONS COMPLETED ON PRICE MONITORING AND EXCESSIVE PRICING OR PRICE GOUGING

This output refers to the undertaking of 10 successful actions on price monitoring and excessive pricing or price gouging.

The output will be measured by a simple count of the successful actions undertaken including findings by the Competition and Consumer Commissions and rulings by the Competition and Consumer Tribunals.

This is a new output and output indicator with no audited actual performance for periods 2019/20; 2020/21; 2021/22 and 2022/23.

This output is aligned to achievement of Priority 2 commitments of the MTSF.

Support from core Programmes are as follows:

Outputs, Output Indicators, Programme Interventions and Annual Targets

Outcome: Industrialisation and capable state			Audited / Actual Performance			MTEF Period		
Output	Output Indicator	Target	2020/21	2021/22	2022/23	2023/2024	2024/2025	2025/2026
Output 45 10 Successful actions completed on price monitoring and excessive pricing or price gouging	Number of successful actions completed on price monitoring and excessive pricing or price gouging	Programme 5 Regulation: Number of successful actions completed on price monitoring and excessive pricing or price gouging Programme 8 Transformation and Competition: Number of successful actions completed on price monitoring and excessive pricing or price gouging	New Indicator	New Indicator	New Indicator	10	10	10

Output co-dependencies

The APP lists a set of assumptions which if they change will have a material impact on **the dtic's** ability to achieve its 45 output targets. In addition, there are fundamental factors in the *external environment* that affect almost all output targets. These factors are largely and in some cases, entirely outside of the control of **the dtic**. They will not be listed individually in the table below but are assumed to affect all output targets unless stated otherwise, they include:

- the global and domestic policy environment;
- market access;
- the availability, reliability and cost of essential economic infrastructure including water, electricity, municipal services and transport logistics; and
- the availability of appropriately skilled human resources in SA.

Cross cutting co-dependencies:

- Functional Municipal Services
- Port infrastructure and logistics
- Corruption and business forums (extortion), business and social unrest
- Law enforcement and stability to support investment
- Legal certainty and compliance
- Timely allocation of resources
- Organs of state develop a Framework for local content and the effectiveness of the Auditor General to monitor its implementation

External Environment²:

- Global & Domestic Environment;
- Reliable supply of energy;
- Efficient and responsive visa system;
- Good market access;
- Consistent water supply; and
- Supply chain stability.

² The external environment in this context refers to developments in the global and domestic economy which may impede or assist **the dtic** to meet the output target. It includes factors which are outside of the direct control of **the dtic** but which may be within the control of another government department.

All Programmes

Output Number	Outputs	Specific Co-Dependencies
Output 1	R300 billion in investment pledges secured across the state	Internal Resource and Policy Environment³: <ul style="list-style-type: none"> – Reciprocal commitments are made by private-sector enterprises accessing trade measures, and the volume of tariff applications follows historical mean over the last 36 months; – Availability of financial instruments for Sector interventions and Master Plans; – Increasing efficiency in the dtic group's funding approval processes; – Social partners are able to make commitments and able to execute on these commitments; – the dtic has expedited access (when required) to lawyers and counsel with specialised expertise in competition and related matters; – Government support in all 3 spheres and community support for SEZs; and
Output 2	R40 Billion in additional local output committed or achieved	<ul style="list-style-type: none"> – Applications for rebate permits and certificates are submitted and approved and the volume of applications follows historical mean over the last 36 months; – Social partners are able to make commitments and execute on these commitments; – Prioritisation of locally produced manufactured goods in the procurement act – Adoption and adherence to all previously agreed designations by procuring departments – Prioritisation of locally manufactured goods by procuring entities – Action against illicit and illegal trade action; – Increased efficiency from State Attorney to appoint specialised lawyers for settlement negotiations – Supported projects/enterprises commence production within the period of the incentive support and there is sufficient demand for the locally manufactured product. – Quality and pricing of products, competitiveness, low input costs
Output 3	R800 Billion in manufacturing exports	<ul style="list-style-type: none"> – Applications for rebates and drawback permits are submitted and approved and volume of tariff applications follows historical mean over the last 36 months; – Volumes of vehicles exported follow historical trends, absent of any significant variations from the mean; – SA Exporters community implement, collaborate and support the export drive; – Applications for permits for manufactured exports under the Non Proliferation Act are received; and – Reliable logistics infrastructure
Output 4	R330 Billion in manufacturing exports to other African countries	<ul style="list-style-type: none"> – Volumes of vehicles exported to other African countries follow historical trends, absent of any significant variations from the mean; – Clear programme for sector interventions in Africa; – Cost of inputs in production process is relatively stable; – SA Exporters community implement, collaborate and support the export drive; – Implementation of trade commitments by African trading partners – Removing non-tariff barriers (Cross cutter for exports)
Output 5	R8 Billion in exports of Global Business Services (GBS)	<ul style="list-style-type: none"> – Available databases and efficient responses to queries; – Availability of GBS incentive and it remains at a globally competitive level; and – Willingness of resources to move to areas of priority focus and expectations of these resources is made clear.

³ The internal environment reflects the factors over which the dtic Executive Authority and managers have substantial or significant control over such as financial or human resources.

Output Number	Outputs	Specific Co-Dependencies
Output 6	R30 Billion in support programmes administered by or in partnership with the dtic -group	<ul style="list-style-type: none"> – Policy certainty with regards to localisation; – Increased efficiency from State Attorney to appoint specialised lawyers for settlement negotiations; – Adequate marketing of the support programmes so that there is sufficient uptake by enterprises; – Incentive instruments from Treasury (EV and 12i); and – Commitments by Social Partners.
Output 7	R15 Billion support programmes to enterprises in areas outside the 5* main metros	<ul style="list-style-type: none"> – Increased efficiency from State Attorney to appoint specialised lawyers for settlement negotiations; – Adequate marketing of the support programmes outside of the 5 main metros and there is sufficient uptake by enterprises; and – Competent and efficient municipal services and support.
Output 8	R8 billion in financial support programmes and procurement contracts approved to SMMES, women and youth-empowered businesses	<ul style="list-style-type: none"> – Social partners are able to make commitments and able to execute on these commitments; – Availability of financial instruments to support SMMES; – Cooperation from role players in the provinces, municipalities and Department of Small Business; – Adequate marketing of the support programmes to SMMES, women and youth-empowered enterprises-
Output 9	R7.5 Billion in financial support programmes to enterprises in labour absorbing sectors	<ul style="list-style-type: none"> – Social partners are able to make commitments; and able to execute on these commitments (ESD, Localisation, Investment); – Availability of financial instruments to labour absorbing sectors; – Quality of applications to ensure speedy processing and implementation of the programme.
Output 10	R 800 Million in Equity Equivalent Investment Programme agreements	<ul style="list-style-type: none"> – Compliance with EEIP requirements
Output 11	R 40 Billion in black industrialist output achieved	<ul style="list-style-type: none"> – Social partners are able to make commitments and execute on these commitments; – Supported Black Industrialist projects/enterprises commence production within the agreed period and demand for manufactured product; – SOEs follow through on projected orders; and – Support from external stakeholders (e.g. DFIs, Commercial banks funding, private and public institutions).
Output 12	1 million jobs supported or covered by the dtic group and / or master plans	<ul style="list-style-type: none"> – Applications for trade measures follow historical trends, absent of any significant variations from the mean for the last 36 months; – Social partners are able to make commitments and execute on these commitments; – Actual number of jobs supported from the National Liquor Authority (NLA) and the NLC is aligned to the dtic estimates; and – Supported projects/enterprises retain current baseline jobs.
Output 13	100 000 jobs created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)	<ul style="list-style-type: none"> – Applications for trade measures follow historical trends, absent of any significant variations from the mean for the last 36 months; – Social partners are able to make commitments; and able to execute on these commitments; – Key dependency is securing further funding for the SEF programme since its funding ends at the end of the APP financial year.

Output Number	Outputs	Specific Co-Dependencies
Output 14	23 000 jobs in Black Industrialists firms supported	– Supported projects/enterprises retain existing baseline jobs and adequate funding and certainty of funding provided to the market.
Output 15	20 000 additional workers with shares in their companies	– Increased efficiency from State Attorney to appoint specialised lawyers for settlement negotiations to negotiate ESOPS
Output 16	10 high-impact outcomes on addressing market concentration, at sector or firm level	– Implementation of market inquiry recommendations by Government and other stakeholders;
Output 17	1 new SEZs applications considered for designations	– Mandatory legislative work; and – National Treasury concurrence, Cabinet approval, Municipal approvals, provincial and municipal support, community support and availability of service infrastructure.
Output 18	R1.3 Billion in financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund	– Effective collaboration with supporting Departments such as DEFF, Ministry of Electricity, DPME; – Financing options for green energy available to entities to fund inventors, generators, energy generating equipment and other renewable energy efficiencies; – Grid access, Nersa approval, economic viability including Eskom cooperation – Timely implementation of NECOM recommendations and new commitments
Output 19	1400 Megawatts of energy from projects facilitated	
Output 20	550 Megawatts of energy available for the grid	
Output 21	1 Energy One-stop Shop operational	
Output 22	Expedited regulatory amendments and flexibility, to promote energy efficiency	– Timely conclusion of consultations with external stakeholders
Output 23	100 Investor facilitation and unblocking interventions provided	N/A
Output 25	10 Business Forums hosted aimed at supporting increased FDI, exports and outward investment hosted	– Partnership with private sector to execute
Output 26	4 Pieces of priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament	– Buy in from industry and cooperation from relevant supporting organisations; and – The Companies Amendment Bill delays in sourcing the SEIAS and certification of the legal opinion, resolution of the constitutional issues.
Output 27	Commencement of South Africa's preferential trade under the AfCFTA	– AfCFTA rules of origin on clothing and autos are agreed with member states; – SACU tariff offer is approved by the Council of Ministers and the Summit; – Customs and Excise Act is amended by SARS – SA Exporters community implement, collaborate and support the export drive; – Cooperation of largest continental traders;
Output 28	10 High impact trade interventions completed	– Resolutions of trade disputes with trade partners; and – SA Exporters community implement, collaborate and support the export drive. – Implementation of ITAC decisions by SARS
Output 29	1 Strategy and advocacy finalised responding to green trade barriers (CBAM)	– Collaboration with supporting Departments such as DEFF, Ministry of Electricity, DPME, National Treasury, and key stakeholders in industry
Output 30	1 EV White Paper finalised	– Financing instruments agreed with National Treasury;
Output 31	1 Finalisation of green hydrogen commercialisation framework	– Financing instruments agreed with National Treasury; and – Supportive policy for roll out
Output 32	1000 Case studies of firms, workers, entrepreneurs,	N/A

Output Number	Outputs	Specific Co-Dependencies
	professionals or communities' impacted by the dtic measures; including 12 local films/documentaries telling the SA story	
Output 33	52 Community outreach programmes by the dtic group	N/A
Output 34	6 Master Plans managed, and 1 new Master Plan finalised	– Social partners are able to make commitments; and able to execute on these commitments;
Output 35	Oversight of IDC, NEF and ECIC to ensure that at least 95% of planned KPIs are achieved	N/A
Output 36	Oversight of other entities to ensure that at least 95% of planned KPIs are achieved	N/A
Output 37	5 Conferences, summits, and international forums hosted	– No changes in plans due to factors external to the dtic
Output 38	50 Mergers and acquisitions where public interest conditions have been incorporated	N/A
Output 39	4 High-impact measures to improve the efficiency and/or effectiveness, of the dtic 's policy or programme interventions	N/A
Output 40	10 High-impact measures to reduce red tape or improve turnaround times in administration of incentives and work of agencies	N/A
Output 41	4 Protocols finalised under the AfCFTA Fisheries Subsidies Agreement	<ul style="list-style-type: none"> – Negotiations concluded on the protocol – Protocols finalised – Cabinet memo finalised for ratification of Fisheries Subsidies Agreement – Support from key SA Government Departments
Output 42	1 Metal trading system developed to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry	– Mandatory legislative work by the SAPS and other enforcement agencies
Output 43	Promotion of a transparent and just adjudication process for incentive applications	N/A
Output 44	Assessments on trade instruments applied for and issued	N/A
Output 45	10 Successful actions completed on price monitoring and excessive pricing or price gouging	N/A

16. (B) Institutional Programme Performance Information

16.1 Programme 1: Administration

- a) **Purpose:** Provide the Department with strategic leadership, management and support services.
- b) **Description of Sub-Programmes**
 - (i) **The Ministry** provides leadership and policy direction to **the dtic**;
 - (ii) **The Office of the Director-General** (ODG) provides overall management of **the dtic's** resources;
 - (iii) **Corporate Services** provides customer-centric and integrated resource solutions in human resource management, information and communication technology, legal services and facilities management;
 - (iv) **Office Accommodation** is an allocation for accommodation services to **the dtic** regional offices and ensures continued maintenance service;
 - (v) **Financial Management** provides support to **the dtic**, with respect to financial resource allocation and the management thereof, to aid the fulfilment of the department's goals and objectives; and
 - (vi) **Marketing, Communication and Media Relations** facilitates greater awareness of the department's role and increase the uptake of its products and services as well as ensuring that it is projected positively in the media through influencing the content of all media in favour of the department.
- c) **Strategic focus for 2023/24**

The bedrock of well-functioning Programmes is a solid administration. This includes support in areas such as human resource development, effective ICT support, integrated finance systems and management coordination through the Office of the Director General.

Programme 01 is a supporting, coordinating and integrating function that holds together and directs the work of Programmes 02-09. Over the past number of years, innovations in administrative and coordinating practices in public and private institutions have enabled new ways to enhance impact. **the dtic** will need to update its systems and managerial practices to reflect such innovations.

In particular, it will need to create a high-performance environment throughout its programmes and entities, producing quality services in the economy and to the public with minimum administrative burden to its staff and to users of its services.

The Fourth Industrial Revolution (4IR) is reshaping the Government and will significantly impact how the Department will operate in future. It is, therefore, necessary and important that **the dtic** re-evaluates the traditional ways of rendering services to clients.

Implementing the current Digital Transformation Strategy will aid the Department to better engage with internal and external clients in a modern manner, enhancing agility and operational efficiency. A digitally transformed **dtic** will focus heavily on data-driven decision-making, predictive models and emerging technologies.

The following are initiatives that will be implemented in FY2021/26 to accelerate **the dtic** Digital Business Transformation Strategy (DBTS): Cyber Security, Cloud Computing, Business Intelligence, Web Based Process Automation, Refreshed Network and Telephony Infrastructure and Enterprise Architecture, an electronic collaboration tool, a project management tool, a tool for tracking of targets and Online Incentive System.

Another important focus area for the department is to retain its efforts on internal transformation. Targets over the three planning years have been set respectively for the employment of Persons with Disabilities. The department is committing to maintain the employment rate of 50% of Women in SMS over the next 3 years. The next intake of 31 interns will take place during the 2024/25 financial year, with preparatory work to occur during this financial year.

The Fit for Purpose structure project that will be implemented during 2023/24 will include a revised structure for the department, the development of a Competency Framework as well as a Skills Audit.

In addition, the Department will embark on a Culture Change project that will entail the assessment of the Department's culture, the development and implementation of plans to address gaps and challenges regarding the departmental culture as well as skills.

Office accommodation

An accessibility audit has been undertaken during Q2 2022 and the initiatives earmarked as agreed with the concessionaire will be undertaken, the costs for such will be carried under the PPP budget allocation line. The new audit has considered the latest requirements, including SANS 10400-S: 2011. There are no new buildings to be built by **the dtic** for its administrative use.

Environmental considerations – dtic campus:

The campus was built with energy and water efficiency in mind in 2003. Gardens are watered with bore-hole water. The heating, ventilation air-conditioning (HVAC) system uses a hybrid evaporative cooling and air-conditioning system, designed to take environmental factors into account. Recently installed electricity and water meters are measuring consumption to enable trend analysis.

The dtic PPPA provides for volume risk to be passed to the concessionaire whilst rate (read price escalation) risk is accepted by the department.

Programme contribution towards 4 Outputs Indicators

The following table sets out the 'Outputs' and the 'Output Indicators' as well as the targets for the number of specific outputs to be produce

Outcomes, Outputs, Output Indicators and Targets

Outcome	Output	Output Indicator	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

Explanation of planned performance over the medium-term period

To enhance the delivery of the core outputs, Programme 1 will provide agile and credible support services through the following activities:

- Promotion of a values-based and service-oriented organisational culture
- Re-assignment of human resources and provision of specialists for identified core outputs
- Re-prioritisation of the funding through shifting and virements of the budget to the core programmes
- Automation of manual customer-facing systems and provision of a responsive and reliable internet capability
- Prioritise the drafting of contracts, legal opinions, litigation and legislation relating to core outputs
- Prioritise accommodation needs of core outputs

Resources for Corporate Services

The budget allocation for Corporate Services is R591m, of which Goods and Services represents 77%. The PPP Agreement constitute a notable 74% of the Goods and Services breakdown. This represents the cost to accommodate **the dtic** and various public entities. Details of the PPP are presented in Section 19, Public-Private Partnerships. The remaining 26% is spread between Computer Services, Other and Training and Bursaries.

Resources for Office accommodation (regional offices only)

The Office Accommodation sub-programme pays for rent and any other costs that may be necessary per GIAMA and NDPWI for 3 regional offices as well as the utilities used by the offices.

16.2 Programme 2: Trade

a) **Purpose:** Build an equitable global trading system that facilitates development by strengthening trade and investment links with key economies and fostering African development, including regional and continental integration and development co-operation in line with the African Union Agenda 2063.

b) Description of Sub-Programmes⁴

- (i) **International Trade Development** facilitates bilateral and multilateral trade relations and agreements.
- (ii) **African Multilateral Economic Development** facilitates multilateral African trade relations aimed at deepening regional integration.

c) Strategic focus for 2023/24

The Trade Policy programme aims to unlock new markets for South African products, to enable greater industrialisation and to create jobs. It does so by advancing negotiations on the African Continental Free Trade Agreement, while securing South Africa's market access and policy space through strategic engagements with trading partners and at multilateral forums.

Indicators for the programme reflect a targeted programme of work for negotiations and economic diplomacy, and an expanded focus on streamlining South African firms' access to the benefits of these international engagements, by strengthening ITAC processes in its engagements and working with companies to align trade policy with their strategic imperatives.

Programme contribution towards 18 Outputs Indicators

The following table sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the targets for the number of specific outputs to be produced.

⁴ The unit of **Africa Bilateral Economic Relations** and related work has been moved from the Exports to Trade branch. Trade will start reporting on this work in Q3 and Q4⁴

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Output	Output Indicator	Annual Targets

Explanation of planned performance over the medium-term period

The structure of the work of the Branch broadly comprises engagements to improve market access for SA exports and to devise balanced international trade rules, conducive for SA's economic development. Over the medium term, the Branch will focus on operationalizing the African Continental Free Trade Area (AfCFTA).

The branch will continue to lead SA's wider bilateral trade cooperation engagements with trading partners around the world. The focus is to consolidate trade and investment relations with developed countries and diversify market access opportunities by identifying new market access opportunities in untapped markets.

The implementation of trade and investment agreements is ongoing, notably in respect to the legal commitments arising out of SA's membership of the WTO, and trade agreements with SACU, SADC, the EU, UK, EFTA and MERCOSUR. Engagement in multi-lateral forums such as the G20 and BRICS attempt to influence the positions on global trade and investment related rules, with a view to create economic opportunities for SA while also preserving policy space, particularly in support of SA industrial development.

The Branch will continue to implement SA's policy on the non-proliferation of weapons of mass destruction to ensure an effective export and import control regime to control trade in strategic goods and technologies.

16.3 Programme 3: Investment and Spatial Industrial Development

a) Purpose: Support foreign direct investment flows and promote domestic investment by providing a one-stop shop for investment promotion, investor facilitation and aftercare support for investors as well as increase participation in industrialisation

b) Description of Sub-Programmes

- (i) **Investment Promotion** facilitates an increase in the quality and quantity of foreign direct investment, and domestic and outward investment, by providing investment attraction, targeted lead generation and recruitment support.
- (ii) **Investment and Inter-Departmental Clearing House** promotes and facilitates investment and provides support services to the investment and interdepartmental clearinghouse. This sub-programme also provides a specialist advisory service, fast tracks and unblocks processes, and reduces bureaucratic red tape for investors.
- (iii) **Investor Support & Aftercare** provides specialist advisory services through research, information marketing, aftercare and policy advocacy to facilitate new investment, and retain and expand existing investment.
- (iv) **Spatial Industrial Development** promotes industrial development in targeted regions through policies, strategies and programmes such as Special Economic Zones and Industrial Parks, and Township economic initiatives, amongst others.

c) Strategic focus for 2023/24

Investment and Spatial Industrial Development are key strategies to promote a more inclusive economy. SEZ's are an important tool for unlocking investments and spatial development. The strategic focus for this year is to integrate the 2 programmes to allow for stronger collaboration and achieve levels of success and impact on expanding the level of investment in the economy.

Investment is a crucial avenue by which companies expand, improve their competitiveness, and diversify into new products and markets. While investment takes many forms, it is more impactful when it helps develop the physical infrastructure, machinery and technology, and human capacity that are essential in complex, and developmentally important, sectors such as manufacturing and value-added services. The scale and complexity of investment demands can be difficult for new firms or those under pressure, and frictions in investing can close-off opportunities for otherwise competitive firms.

Policy can help by working with firms to overcome barriers to investment, building an environment that is conducive to investment, and directing local and foreign firms to key investment opportunities.

Through the Investment Promotion Programme, the Department aims to facilitate the investment mobilisation drive of R2 trillion over 5 years (2023-2028). The Branch will roll out the Energy One Stop Shop and Provincial One Stop Shops. Through a dedicated Investment Facilitation and Aftercare service, Invest SA will fast-track and unblock permits, licensing and registrations for investors. The Branch will further host the Annual South African Investment Conference to support the implementation of the Country Investment Strategy.

Investment and Spatial Industrial Development programme is used to drive industrialisation. This programme is implemented through, amongst other instruments, the Special Economic Zones (SEZs) and Industrial Parks. Currently, the country has ten (10) SEZs located in seven (7) of the nine (9) provinces. These SEZs are at various stages of development, SEZs such as Coega, East London, Dube Trade Port and Tshwane have reached advanced stages of development with the highest numbers in investments and jobs created; the other SEZs such as Richards Bay, Saldana, and OR Tambo have also entered full operational phase characterised by large scale infrastructure development, especially development of top structures to accommodate investors. The focus will be on improved performance of the struggling Special Economic Zones and implementation of the new Spatial Development Strategy, which aims to map out and improve the impact of **the dtic** measures in all 52 district municipalities and metros.

On the other hand, **the dtic** established a Reimagined Industrial Strategy which presents an approach to industrial development and puts emphasis on building partnerships with the private sector in order to unleash job-creation and investment attraction - with a renewed strategic focus on the Township Economy, through the application of the District Development Model (DDM). The township programme aims to identify and support catalytic industrial initiatives across the 52 Districts and Metros, in collaboration with provinces and their developmental agencies. This approach will augment the IPRP through the use of refurbished industrial estates to promote township-based industrialisation and localisation, in order to drive SMME and skills development, job creation and private sector participation. A commissioned report on mapping of the townships for opportunities will be used as the baseline to streamline initiatives with existing private industrial nodes and value chains.

Programme contribution towards 12 Output Indicators

The following table sets out the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Outcomes, Outputs, Performance Indicators and Targets

Number of jobs supported, or covered by Master Plans	25 000	5 000	7 500	5 000	7 500
Number of jobs to be created through branch interventions	7 860	1 060	2 700	2 800	1 300
Number of new SEZ applications considered for designation	1	One(1) application assessed and submitted to Minister for consideration	Nil	One(1) application assessed and submitted to Minister for consideration	Nil
Number of Megawatts of energy projects facilitated	800MW	800MW	Nil	Nil	Nil
Number of Megawatts of energy available for the grid	230MW	30MW	Nil	Nil	200MW
Establishment of the physical Energy One-Stop-Shop (EOSS)	Phase 1 -Physical EOSS	Mapping of process an appointment of staff	Website & Content development	Streamlining applications and process	Physical EOSS established
Number of investor facilitation and unblocking interventions provided	100 investor facilitation & unblocking's	25	30	25	20
Number of investment conferences (SAIC) hosted	1	Nil	Nil	Nil	1

Explanation of planned performance over the medium-term period

- Investment Mobilisation drive of R2 Trillion over 5 years (2028).
- Host the Annual South African Investment Conference.
- Roll out One Stop Shops and Functional Energy One Stop Shop.
- Support the Implementation of the Country Investment Strategy.

16.4 Programme 4: Sectors

- a. **Purpose:** Design and implement policies, strategies and programmes to strengthen the ability of manufacturing and other sectors of the economy, to create decent jobs, promote inclusion and increase value addition and competitiveness, in both domestic and export markets

b. Description of Sub-Programmes

- 1. **Industrial Competitiveness** designs and implement policies, strategies and programmes to strengthen the ability of manufacturing and other sectors of the economy, to create decent jobs and increase value-addition and competitiveness in both domestic and export markets.

It is responsible for Technical Infrastructure and other programmes that contribute to these objectives. In order to support this work, R2.5 billion will be transferred to technical institutions to support sectoral work on Master Plans, industrialisation and competitiveness improvement projects. In addition, a further R402 million will be utilised over the medium term to promote localisation, and support skill improvement intervention through non-profit organisations.

- 2. **Customised Sector Programmes** designs and implements policies, strategies and programmes to strengthen the ability of manufacturing and other sectors of the economy, to inclusively create decent jobs, promote incusing and increase value addition and competitiveness, in both domestic and export markets. It is responsible for programmes run in conjunction with the Council for Scientific and Industrial Research (CSIR) and other programmes that contribute to these objectives. Over the medium term, 1.8 billion will be transferred to the IDC for the Clothing, Textiles, Leather and Footwear sectors

C. Strategic focus for 2023/24

The strategic focus of the Sector programme for 2023/24 will be to intensify the efforts towards the increasing industrialisation, enhancing competitiveness and creating decent jobs through various sector interventions. The Masterplans is one of the instruments used to achieve this in conjunction with all relevant branches across **the dtic**. As such, the branch will also develop one Masterplan in the Medical Devices sector. The branch will continue to focus on the implementation of Masterplans, notably the Automotives, Poultry, Sugar, Steel & Metal Fabrication, Clothing & Textiles and Furniture Masterplans. In addition to the Masterplans the branch will also focus on the implementation of various programmes and projects across various sectors which include but no restricted to Aerospace and Defence; Electro technical Industries and White Goods; Construction; Chemicals, Cosmetics, Plastics and Pharmaceuticals.

The economic impact of Masterplans will be achieved predominantly through the development and implementation of sector-specific industrial financing instruments in collaboration with IFB and DFI's and private sector commitments to investment and procurement. Additional instruments that contribute to Masterplan impact include; public procurement measures; trade and standards-based measures; and regulatory unblocking.

A major theme of the programme's work is to advance new green economy manufacturing, particular in relation to finalising the New Energy Vehicle Roadmap, localisation linked to utility scale and small-scale renewable projects, Green Hydrogen and energy efficiency **the dtic** will also continue to support the development and implementation of selected Masterplans for which other government departments are responsible for. These include **the dtic's** contribution to the Agro-processing leg of the Agriculture and Agro-processing Masterplan (AAMP) and the Cannabis Masterplan led by Department of Agriculture, Land Reform and Rural Development (DALRRD), the South African Renewable Energy Masterplan (SAREM) led by Department of Mineral Resources and Energy (DMRE).

The programme will continue to advocate for localisation as a fundamental part of public procurement legislation and regulation, the implementation by public entities of existing local content designations and encouragement of public entities not subject to designations to prioritise localisation in their procurement policies and practices.

The programme will aim to achieve greater alignment of its Technical Infrastructure (Standards, Quality Accreditation and Metrology) institutions with the economic impact. This includes forging closer alignment between the standards work and that of the Masterplan and other sector work. It also includes enhancing the role of standards work with green industries and energy efficiency.

Programme contribution towards 16 Output Indicators

The table that follows sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Output	Output Indicators	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

Output 12 target is not cumulative but maintained

Explanation of planned performance over the medium-term period

The Programme will implement seven Master Plans, implement measures to support various manufacturing sectors not covered by Master Plans and provide support for selected Masterplans for which other government departments are responsible for. Performance and economic impact will be achieved predominantly through:

- Negotiation of private sector commitments to investment and procurement and ongoing facilitation
- Public procurement measures
- Selected trade measures
- Standards based measures
- Regulatory unblocking

Programme work to advance new green economy manufacturing includes:

- Finalising the New Energy Vehicle Roadmap
- Localisation measures linked to utility scale and small-scale renewable projects
- Green Hydrogen
- Energy efficiency.

The Programme will coordinate localisation initiatives through:

- Actions to support legislative reforms to Public Procurement in line with industrial policy objectives
- Engaging with Organs of State on an aligned Preferential Procurement Policy
- Contribute to monitoring and evaluating the localisation impact of **the dtic** initiatives
- Coordinate with other **dtic** programmes to assure an integrated approach to localisation.

The Programme will drive greater alignment of its Technical Infrastructure with Masterplans and sector interventions including:

- Forging closer alignment between the standards work and that of the Masterplan and other sector work
- Enhancing the role of standards work with respect to green industries and energy efficiency.

Industrial Competitiveness sub- Programme

Industrial Competitiveness is vital to improving expansion of the productive sectors of the economy and fostering economic growth and job creation. The means to do so include support for firm-level for competitiveness-enhancing measures; sector-level partnerships through compacts in the form of master plans and similar measures and the use of state-instruments such as procurement of locally made products. In order to support this work, R 2, 5 billion will be transferred to technical institutions to support sectorial work on masterplans, industrialisation as well as competitiveness improvement projects. In addition, a further R 402 million will be utilised over the medium term to promote localisation, support skill improvement intervention through non-profit organisations.

Customised Sector Programme

Customised Sector Programmes Develops and implements high-impact sector strategies focused on manufacturing and other value-adding sectors to create decent jobs and increase value addition and competitiveness in domestic and export markets as set out in the Re-imagined Industrial Strategy. Over the Medium term, R 1.8 billion will be transferred to the IDC to support the textile sector. To date, jobs have been saved through this support and new jobs are being created.

16.5 Programme 5: Regulation

a) **Purpose:** Develop and implement coherent, predictable and transparent regulatory solutions that facilitate easy access to redress and efficient regulation for economic citizens.

b) Description of Sub-Programmes

- (i) **Enforcement and Compliance** conducts trends analysis and socioeconomic impact assessments for policies and legislation and market surveys, implements legislation on matters pertaining to liquor, monitors and evaluates the effectiveness of regulation, and oversees the performance of the department's regulatory entities (the Companies and Intellectual Property Commission, the Companies Tribunal, the National Consumer Commission, the National Consumer Tribunal, the National Credit Regulator, the National Gambling Board, and the National Lotteries Commission).
- (ii) **Policy and Legislative Development** develops policies, laws and regulatory frameworks; and drafts legislation.
- (iii) **Regulatory Services** oversees the development of policies, laws, regulatory frameworks and the implementation of the branch mandate, and provides strategic support to branch business units, respectively, in line with legislation and applicable governance systems.

c) Strategic focus for 2023/24

A fair economy that promotes efficient and competitive markets and protects consumers through smart regulation and legislation. Over the medium-term, the Programme will be focusing on the work completed on the Companies Amendment Bill towards corporate governance and strengthening the corporate environment in South Africa. The work that started in 2022/23, looking at the amendments to the Companies Amendment Bill, will continue. The programme will prioritise the contribution to localisation, jobs, exports and investment.

The Programme will contribute to investment facilitation, localisation, transformation and supporting industrialisation through its initiatives. To achieve the aforementioned, the Programme has various planned outputs in line with the programme mandate, which directly and indirectly contributes to the Departmental outcomes.

Programme contribution towards 6 Output Indicators

The following table sets out the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Outcomes, Outputs, Performance Indicators and Targets

Outcome	Outputs	Output Indicators	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Industrialisation, Transformation & Capable State	Output 7: R15bn support programmes to enterprises in areas outside the 5* main metros	Hosting of 20 workshops in areas outside the metros to support SMMEs	New Indicator	New Indicator	New Indicator	New indicator	20	20	20
	Output 8: R8 billion in financial support programmes and procurement contracts approved to SMMEs, women and youth-empowered businesses	Hosting of Education workshops to support SMMEs	New Indicator	New Indicator	New Indicator	New indicator	20	20	-
	Output 12: 1 million jobs supported or covered by the dtic group and/ or master plans	Number of jobs supported from liquor distributors & lotteries	New Indicator	New Indicator	New Indicator	New indicator	20 000	20 000	20 000
	Output 24: Greylisting: publication of 'Know your Shareholder Regulation' and follow ups	Grey listing 'Know your Shareholder' regulations' Published; and reports on the implementation of the Beneficial Ownership Register Regulations by the CIPC	New indicator	New indicator	New indicator	New indicator	2	2	2
	Output 26: Four pieces of priority legislation amended, tabled or submitted to the Executive Authority, Cabinet or Parliament	Number of reports on the Companies Amendment Bills tabled or submitted to Executive Authority	New indicator	New indicator	2	2	2	-	-

Outcome	Outputs	Output Indicators	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
	Output 45: 10 Successful actions completed on price monitoring and excessive pricing or price gouging	Number of reports on successful actions completed on price monitoring and excessive pricing or price gouging	New Indicator	New Indicator	New Indicator	New Indicator	10	10	10

Output Indicators: Annual and Quarterly Targets for 2023/24

Output Indicators	Annual Target	Quarterly Targets			
		Q1	Q2	Q3	Q4
Hosting of 20 workshops in areas outside the metros to support SMMEs	20	5	5	5	5
Hosting of Education workshops to support SMMEs	20 workshops	Nil	6 workshops	8 workshops	6 workshops
Number of jobs supported from liquor distributors & lotteries	20 000	1000 (liquor) and 1000 (lottery)	1000 (liquor) and 2000 (lottery)	7000 (liquor) and 4000 (lottery)	1000 (liquor) and 3000 (lottery)

Number of reports on the Companies Amendment Bills tabled or submitted to Executive Authority	2	1	Nil	1	Nil
Number of reports on successful actions completed on price monitoring and excessive pricing or price gouging	10	2	2	3	3

Explanation of planned performance over the medium-term period

The Programme will contribute to the investment facilitation, localisation, transformation and supporting industrialisation through its initiatives thereby contributing to the Medium-Term Strategic Framework and National Development Plan. To achieve the aforementioned, the Programme has various planned outputs in line with the programme mandate, directly contributing to the Departmental outcomes. Furthermore, the work, which started in the 2022/23 looking at the amendments to the Companies Bill, will be continued.

The Branch will undertake the following additional mandate in the 2023/24 financial year:

- The registration of manufacturers and distributors as per the Liquor Act of 2003. The mandate includes inspections, education, renewals and alterations to registrations. The National Liquor Authority is the internal regulator administering the Liquor Act.
- The Patents Examination Board (PEB) mandate is administered in the Branch in terms of the Patents Act. It includes the registration of patents students, oversight on exams and support to the Board and all the administrative work for the effective running of the patent's examination Board.
- Regulatory oversight of the NGB, NLC, CT, CIPC, NCC, NCT NCR and the Takeover Regulations Panel as well the NLA. The work includes administration of parliamentary questions, transfers to entities, reporting and planning of entities and attending Parliamentary meetings as well as support to the entities.
- Administration of the Specialist Committee on Company Law and the Financial Reporting Standards Council by providing secretarial and policy support.
- Intellectual property applications in terms of the Merchandise Marks Act of 1941 for the use of marks and emblems, the national flag and the protection of major events such as the Rugby.
- On-going litigation work emanating from the various pieces of legislation.
- The National Gambling Amendment Bill is in Parliament and in the Mediation process. It is pending the Parliamentary mediation process.
- Consumer protection mandate and addressing of consumer complaints on an on-going basis.
- Development of regulations to respond to on-going regulatory issues that emerge.
- Engagement with liquor, gambling and lotteries on investment, localisation and job creation. The Branch will be obtaining commitments from industry.
- Addressing enquiries and submissions on issues emanating from the public, parliament, provinces and industry related to the legislation administered by the Branch. These form part of cases from the public.
- Presentations to parliament on the implementation of the various laws administered by programme

16.6 Programme 6: Incentives

a) **Purpose:** Stimulate and facilitate the development of sustainable and competitive enterprises, through the efficient provision of effective and accessible incentive measures that support national priorities.

b) Description of Sub-Programmes

- (i) **Broadening Participation and Industrial Innovation Incentives** provides incentive programmes that promote broader participation in the mainstream economy by businesses owned by individuals from historically disadvantaged communities and marginalised regions.
- (ii) **Manufacturing Incentives** provides incentives to promote additional investment in the manufacturing sector. The manufacturing investment cluster comprises the Manufacturing Competitiveness Enhancement Programmes, the capital projects feasibility programme, the automotive investment scheme, the export marketing and investment assistance scheme, the sector-specific assistance scheme, and the section 12I tax incentive scheme.
- (iii) **Services Investment Incentives** provides incentive programmes that promote increased investment and job creation in the services sector. Programmes include the global business process services programme, and the film and television Production Incentive Support Programme for South African and Foreign Productions.
- (iv) **Infrastructure Investment Support** provides grants for two industrial infrastructure initiatives, SEZs and the Critical Infrastructure Programme (CIP), which are aimed at enhancing infrastructure and industrial development, increasing investment, and the export of value-added commodities.
- (v) **Product and Systems Development** reviews, monitors and develops incentive programmes to support the industrial strategy, and develops sector strategies to address market failures.
- (vi) **Strategic Partnership and Customer Care** facilitates access to targeted enterprises by reviewing the success of incentive schemes and improving them where possible.

c) Strategic focus for 2023/24

To improve the industrial dynamism of a number of sectors and firms, **the dtic** and its entities provide a range of competitiveness-enhancing support programmes. These programmes seek to enable job creation and industrialisation, through improved industrial competitiveness that can support greater localisation and export growth.

In the financial year, the programme and its industrial financing partners, the Industrial Development Corporation (IDC) and the National Empowerment Fund (NEF) will seek to provide support in the form of grants, loans and equity of R29 billion. The Programme will administer some of this, while others will be implemented by the IDC and NEF, with the support of the ECIC. The support will seek to attract R74 billions of private sector investment and preserve over 66 000 jobs. The IDC accounts for R48 billion and NEF for R1.2 billion of the total investment. In terms of supported jobs, IDC will contribute approximately 36 000 and the NEF about 4 900.

Indicators for the programme reflect its core financing work, while focusing on expanding the reach of industrial finance to black industrialists, women- and youth-owned enterprises as well as persons with disability-owned enterprises and to under-supported districts. Collectively, the Programme, IDC and NEF aim to inject R25 billion in projects/enterprises to expand economic activity outside of the five metros. It is envisaged that targeted financing and measures put in place to reduce the red tape will improve access to industrial financing.

Programme contribution towards 15 Output Indicators

The table that follows sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Outcomes, Outputs, Output Indicators and Targets

Outcome	Output	Output Indicators	Annual Targets

Number of regulations / guidelines published & red tape reduction interventions	2	Nil	1	Nil	1

Explanation of planned performance over the medium-term period

Over the MTEF period, the Programme, IDC and NEF, collectively termed the Industrial Financing Group (IFG), aims to attract over R74 billion of private sector investment through industrial financial support of R29 billion. As IFG continues to attract these strategic projects that drive private sector investments through the direct incentivising of projects, it is estimated that approximately 39 000 new jobs will be created by supported projects/enterprises that will manufacture an estimated value of R3.5 billion in additional local output.

In order for incentives to aptly report on these outcomes, smooth implementation of incentives is required. This is to be achieved through reviewing of processes by the IFG to reduce any unnecessary red tape administrative processes and the reviewing (and, if required, amendment) of incentive guidelines and other documents relating to implementation.

Quarterly reporting will enable tracking of progress against the key outcomes, including that of the Global Business Services Masterplan to ensure that implementation is on track and does not impede the attainment of the outcomes directly linked to this sector, that is, employment, particularly for the youth and export revenue of services. Another key outcome that the IFG continues to track is transformation. IFG encourages this outcome through financial support to black industrialists, women- and youth-owned enterprises as well as providing support to the districts outside the five metros and supporting the development of economic infrastructure in districts with serious infrastructure constraints.

The incentives branch will implement various financial support to businesses affected by load shedding. The support will also include concessionary loans for transition alternative energy solutions that include the installation of solar and inverters.

16.7 Programme 7: Exports

a) **Purpose:** Increase export capacity and support direct investment flows, through targeted strategies, and an effectively managed network of foreign trade and investment offices.

b) Description of Sub-Programmes

- (i) **⁵Africa Bilateral Economic Relations** facilitates deeper and broader bilateral African trade and investment relations with African economies and supports the deepening of regional integration
- (ii) **Export Promotion and Marketing** promotes exports of South African value-added goods and services to increase market share in targeted high-growth markets and sustain market share in traditional markets.
- (iii) **Trade and Investment Foreign Services Management Unit** promotes trade and investment and administers and provides corporate services to the department's foreign office network of foreign economic representatives to enable South African businesses to access global markets.
- (iv) **Export Development and Support** manages the National Exporter Development Programme, which is designed to contribute to positioning South Africa as a reliable trade partner and improve and expand the country's exporter base.

c) Strategic focus for 2023/24

Exports provide a significant opportunity for SA to expand industrial output and provide bigger markets for local firms. It is an essential element of the country's industrialisation agenda. The programme will focus on improving the total value of exports, the composition of exports (with greater SA value-addition), the composition of exporters (by drawing in more black and women-led firms) and the spatial composition of exporting firms.

The Programme will continue with initiatives launched in 2022/23 to further support firms to reach strategic export markets, through a more concentrated focus on those markets. The focus will be to unlock the opportunities presented by the implementation of the African Continental Free Trade Area (AfCFTA) and to obtain opportunities in markets in the United States, Asia, Europe, the Middle East and Latin America.

*The unit of **Africa Bilateral Economic Relations** and related work has been moved from the Exports to Trade branch. Trade will start reporting on this work in Q3 and Q4⁶*

Dedicated plans will be developed for existing networks launched in 2022/23, and additional networks will be developed to create frameworks for companies to succeed in complex markets, while making it easier for companies to access export finance, marketing avenues, and a flexible basket of advice and support suited to their unique needs.

Programme contribution towards 16 Output Indicators.

The following table sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Explanation of planned performance over the medium-term period

The branch will promote exports to other African countries, through:

- Targeted marketing efforts
- Close working together with the ECIC, IDC and NEF as well as other Programmes of **the dtic**

Promote export growth for jobs by improving institutional support to exporters; through:

- The development of compacts with export councils
- Developing export partnerships and export networks
- Hosting Business Forums aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment
- Addressing and unblocking challenges faced by exporters

Promote the diversification of participants in export activities by expanding support to black industrialists, women- and youth-owned enterprises; through:

- Providing export promotion and capacity development support to 300 black-, women-, youth and persons with disabilities owned enterprises
- Supporting output by black industrialist firms
- Supporting jobs in black industrialist firms

Diversify the composition of South Africa's export basket by providing structured support to priority sectors and markets; through the development of Export Action Plans for Master Plans focusing on AfCFTA, AGOA, Asia and Europe.

Improve the accessibility of exporter support by reducing red tape in the processes of the ECIC and EMIA programme.

Diversify the spatial composition of exporters by undertaking targeted export promotion and capacity building activities in under-supported Districts.

Electricity Crisis and Just Transition

In order to further support increased investment in and production of machinery and equipment, as well as services in the green energy and power sectors, required for expanding South Africa's electricity capacity, the branch will assist companies in these products and sectors to participate in targeted export promotion initiatives.

Additionally, **the dtic** network of Foreign Offices has been tasked with publicizing opportunities for Independent Power Producer (IPP) projects and component manufacturing in wind, gas, solar PV and inverters. Key to this drive is also monitoring and responding to investor concerns around energy availability.

Linked to the above initiatives, the Branch will also leverage State Visits and associated Business Forums hosted to secure and unlock export and investment opportunities for South African companies in the electricity, New Energy Vehicles (NEVs), and green hydrogen sectors, identified as part of the government's Just Energy Transition Investment Plan (JET IP).

Economic Reconstruction and Recovery Plan (ERRP)

The Export branch's key contribution to the Economic Reconstruction and Recovery Plan (ERRP) is with regards to the ERRP focus area of strategic localisation, industrialisation and export promotion. The branch's detailed work programme is aimed at expanding the exporter base and promoting South African manufactured exports in support of growing exports, thereby providing larger markets and increased demand, contributing to expanded local industrial output.

16.8 Programme 8: Transformation and Competition

a) **Purpose:** Develop and roll out policy interventions that promote transformation and competition issues through effective economic planning, aligned investment and development policy tools.

b) **Description of Sub-Programmes**

(i) **Economic Planning and Advisory:** Promotes integrated economic planning analysis of economic plans and advancement of competition priorities.

(ii) **Implementation Coordination and Competition Oversight** promotes the implementation economic development plans that are aligned with competition decisions, orders, and recommendations and to provide support to the minister to carry out responsibilities as required in terms of competition legislation.

(iii) **Investment and Development:** Promotes public and private investment for development.

(iv) **Equity and Empowerment** promotes broad-based black economic empowerment (BEE) and the growth of the industrial base through the black industrialist programme.

c) **Strategic focus for 2023/24**

Competition policy is an important means to build both a more dynamic and a transformed economy. Concentrated markets – namely product sectors where a small number of firms controls the bulk of output and market share – together with exclusionary behaviour by dominant firms limit the ability of new entrants, particularly SMMEs and start-up firms by black South Africans. Policy can assist in a number of ways: by market inquiries conducted by the competition authorities in concentrated sectors; through public interest measures that mitigate higher levels of economic concentration; and through competition law enforcement.

The Programme aims to improve the developmental impact of Competition policy, by ensuring mergers and acquisitions are accompanied by appropriate commitments on those public interest matters set out in the legislation; by working with Competition authorities to address heavily concentrated sectors and by supporting the development of the Social and Solidarity Economy. Indicators for the programme reflect the centrality of development considerations in **the dtic's** approach to Competition issues, and efforts to respond to persistently high levels economic concentration.

Economic transformation has been promoted through empowerment instruments such as B-BBEE legislation, codes and customised sector measures such as Sector Charters. Since 2003 when the B-BBEE legislation was promulgated, there has been substantive progress in B-BBEE implementation, whilst more should be done to create economic opportunities for all South Africans. Work on B-BBEE has placed increased focus on promoting Employee Share Ownership Programmes (ESOPs) and Broad-Based Ownership Schemes (BBOS). Lastly, BBBEE policy is used as an instrument to expand the base of black entrepreneurs and industrialists in the economy.

Programme contribution towards 23 Output Indicators

The table that follows sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Outcomes, Outputs, Output Indicators and Targets

Number of reports on 10 successful actions completed on price monitoring and excessive pricing or price gouging	10	1	2	2	5

Explanation of planned performance over the medium-term period

The Competition Policy branch will evaluate merger applications and engage firms to secure social compacts that support public interest considerations, including on:

- Employment
- Spatial impact on regions
- Industrial impact on industries and regions
- Exports
- Transformation

Monitor and support the implementation of previous merger agreements that have public interest commitments, including on

- Employment
- Spatial impact on regions
- Industrial impact on industries and regions
- Exports
- Transformation

Coordinate initiatives to address market concentration, through:

- Following-up on the recommendations and findings of past market inquiries
- Following-up on the recommendations and findings of the Economic Concentration Report

Exercise oversight over the Competition Authorities by reviewing all regulatory and legislative required documents. Actively assist the Competition Commission and Tribunal to reduce red tape by promoting reduction of timeframes and revision of forms and notices.

Implementation of the Social and Solidarity Economy (SSE) policy framework.

In the last financial year (2022/23), the Social Employment Fund, managed by the IDC, exceeded the jobs target set by President Ramaphosa, through the Presidential Employment Stimulus. The target set was for 50 000 work opportunities to be created, and the SEF created 65 033 unique work opportunities.

The SEF concluded its second round of funding allocation recently, and a total amount of 36 Strategic Implementing Partners were approved, in comparison to the previous round, where there were 28 Strategic Implementing Partners.

The SEF continues to be a rich source for case studies, and we continue working on gathering case studies to contribute towards the APP target set.

The jobs target for the 2023/24 financial year is still 50 000 work opportunities to be created. The SEF will receive its final allocation of R787,9m for the 2023/24 financial year.

There has been no indication that further funds will be allocated to the SEF, although a submission for a request for further funding was submitted to National Treasury for the next MTEF round, and we await the outcome of this from National Treasury.

16.9 Programme 9: Research

a) **Purpose:** Undertake economic research; contribute to development of trade and industrial policies and guide policy, legislative and strategy processes to facilitate inclusive growth.

b) Description of Sub-Programmes

(i) **Economic Research and Policy Coordination:** Undertakes economic research, contributes to the development of policy options, and guides policy through consultation with stakeholders.

(ii) **Macroeconomic and Microeconomic Policy:** Evaluate and develop macro-economic and micro-economic policy options to achieve inclusive growth, promote decent work outcomes, productivity, entrepreneurship and innovation.

(iii) **Growth Path and Decent Work:** Develops and coordinates Master Plans and constituency-based (business, labour and community) interventions to support the creation of decent work, entrepreneurship and innovation.

c) Strategic focus for 2023/24

Policy effectiveness is the product of a number of factors, from evidence-based policymaking, to good market information, to smart implementation. Research on what the evidence shows for particular policy-choices or implementation measures; or that identifies policy or implementation options, can enhance decisions of executive authorities and Programme managers.

This Programme provides services to Programmes 2 to 8 and its effectiveness is a function of how well its products align with the needs of the executive authority and the branches of **the dtic**.

The Programme aims to create an enabling environment for the work of **the dtic**, furnishing officials with the market intelligence and coordination mechanisms they need to deliver. Indicators for the programme reflect a focus on building systems to better understand priority sectors and **the dtic's** own work, with an expanded focus on impact assessment aiming to help guide reforms and improvements across the work of the Department.

This programme has 12 Output Indicators

The table that follows sets out more precisely the 'Outputs' and the 'Output Indicators' as well as the target for the number of specific outputs to be produced.

Outcomes, Outputs, Output Indicators and Targets

Outcome	Output	Output Indicator	Annual Targets						
			Audited /Actual Performance			Estimated Performance	MTEF Period		
			2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

Number of report on High-impact measures to improve the efficiency and/or effectiveness, of the dtic's policy or programme interventions	4	Nil	Nil	2	2

Explanation of planned performance over the medium-term period

The Research branch will focus on:

- Securing and packaging data of relevance to the work of the branches; including through production of analytical reports in the following areas:
 - Export market opportunities; and
 - Bilateral trade trends.

- Compiling of data and updating of the dashboards for:
 - Worker ownership;
 - Black Industrialist Census;
 - Quarterly Black Industrialist Survey; and
 - District Development Model (DDM) districts.

- Undertaking impact assessments of:
 - SA Investment Conference;
 - EEIP agreements; and
 - The EU's Carbon Border Adjustment Mechanism.

17. Updated key strategic risks and mitigation from the Strategic Plan

Risks to the department are:

Outcome	Key Risk	Risk Mitigation
Industrialisation- I1. Sector partnerships and social compact through master plans and firm/sector level initiatives	Lack of commitment and buy in for masterplans and the supporting social compacts	<ol style="list-style-type: none"> 1. Compile and maintain a coherent and consistent group of Masterplan exporters to inform product/markets and for implementation 2. Working with DPME-introducing M&E dashboard to monitor and evaluate progress-across all MPs 3. Conducting training in sectors within Masterplans, re SMMEs dependent on buy-in and commitment 4. Require dedicated resources to facilitate interactions/interventions between government and SEZs 5. IFB to collaborate with ICG for drafting and implementation 6. IFB to collaborate with IIFA and consult with relevant industry on an annual basis 7. Minister to approve Masterplans for the consultations with sectors for social compacts
Industrialisation I2. Localisation, beneficiation and COVID industrial production initiatives	Lack of uptake by the private sector for the promotion and implementation of localisation, due to Government not creating the enabling environment	<ol style="list-style-type: none"> 1. Develop a Matrix for opportunities of each district and their requirements, review against their spend to determine their needs to advise on local procurement. Dedicated assessment program across 4 quarters of the year and produce reports, detect misalignment and advise- 2. Communicate to DDM on reports of noncompliance and requiring intervention 3. Establish inter stakeholder group on Localisation.
Industrialisation I3. Increased and diversified exports with African countries and to other global markets	Non delivery of commitments from the industry	<ol style="list-style-type: none"> 1. Development of a list of exporters and the countries being exported to-working with SALGA. 2. Engage with exporters on trade barriers and assist in unblocking 3. Seek new markets for exports
Industrialisation I4. Green economy initiatives to shift to a less carbon-intensive industry	Inability of the private sector to implement green economy requirements	<ol style="list-style-type: none"> 1. Policies must be improved and approved-for certainty and mkt development for business 2. Create strategy to rollout to all other SEZs and IPs-with specialist in the green economy-via modelling 3. Engage with CEOs at the quarterly forum on the importance of the project and its ability to transform the development of SEZs and IPs. 4. Arrange for visits to SEZs and IPs that have implemented initiatives. 5. Biannual targeted awareness sessions to encourage incentive applications 6. Discussions with NT for tax allowance packages and additional budget 7. Arrange for experts from the dtic and the private sector to engage with the SEZs and IPs on the value of green economy initiatives.

Outcome	Key Risk	Risk Mitigation
Industrialisation I5. Investment initiatives to increase the level of investment	Lack of Business/investor confidence and the poor operating environment preventing investments	<ol style="list-style-type: none"> 1. Training and development, building capacity in local municipalities to deal with investors. 2. Will request dedicated political intervention (DDM model) 3. Head: ISA to coordinate the development of MoUs with provinces and municipalities for the branch support on investment promotion 4. Enhancement of the CRM system 5. Maintenance and update of the Ease of Doing Business website 6. Interface with SEZs, IPs and Districts through ICT based platform (Webinars, etc.) 7. One on one stakeholder engagements (meetings and workshops) to ensure that all stakeholders understand what the projects entail and their obligations. 8. Investment promotion activities will be tailored to the needs of individual firms, SEZs and IPs that are at various stages of development (SID and ISA collaboration)
Transformation T1. Ownership transformation: Promoting a greater spread of ownership in the economy (black industrialists, women and youth) and worker empowerment – including through review of the impact of current policy.	adequate implementation of the Worker Ownership provision	<ol style="list-style-type: none"> 1. Review legislation, conduct studies and, stakeholder engagement 2. Expand exporter base by including women owned BI and youth making branch export ready and create awareness. 3. Compile register/portal of major companies who must disclose information and use for stakeholder engagements 4. Longer term solution (over the next years) =change in legislation for company to volunteer information or CIPC via legislation to make it mandatory
Transformation T2. Structural transformation: Addressing economic concentration and supporting SMMEs.	Lack of uptake and appetite from SMMEs in rural areas and outside	<ol style="list-style-type: none"> 1. Determine what info is required and for what purpose (needs clarity) 2. DDM model (include in DDM's agenda for discussion) 3. Review incentives available for SMMEs and propose making these less stringent 4. IFB to involve all Branches when creating incentives to understand needs 5. Prioritisation of key recommendations for implementation from past market inquiries 6. Policy instruments will be used for every merger and acquisition 7. Communicate the requirement for a strong competition law and enforcement to drive it
Transformation T3. Spatial transformation: Promoting equitable spatial development through District Model Reporting and integration of work into 52 spatial units; and developing a new model for district spatial industrial initiatives (including SEZs	Inability to develop a new model for spatial industrial initiatives and to promote township, economy	<ul style="list-style-type: none"> • 1. Training and development, building capacity in local municipalities to deal with investors. • 2. Political Intervention (DDM include in agenda) • 3. Map areas of concern and obtain solutions via various sources (agencies, offices, depts., municipalities, metros).

Outcome	Key Risk	Risk Mitigation
and Industrial parks model) and promoting the township economy.		4. Interface with SEZs, IPs and Districts through ICT based platform (Webinars, etc.) 5. the dtic to advice on governance issues at the Steering Committee meetings. 6. Older and more successful SEZs will be invited to attend steering committee meetings to advise the applicants from the onset of the application. 7. Engage with provinces and SEZs at the quarterly CEO Forum.
Capable State C1. Department: Building strong capacity in the dtic and streamlining its work.	Inability to implement a structure which is fit for purpose, to successfully achieve the mandate and service delivery of the department (target missed in previous FY)	1. Shared Services project seeks to address the efficiencies in the IT space 2. CMSB will be embarking on quarterly customer satisfaction surveys to understand the challenges experienced by all Branches in the services provided by them - Org Design Procurement process - Org Design Project commencement: - Business - Process mapping; - organizational design; - Job Analysis and - Job Evaluation 3. DG and DDG posts targeted for filling and in process 4. Fit for Purpose project to address the structure and skills transfer 5. Approved critical posts and in the process of being filled
	Duplications and too many manual processes and reporting requirements in the Department	Continued appointment of project steering committees all projects commissioned to consultants
	Exposure to cyber security threats	1. Upgrade / replace / decommission the old software / systems 2. ICT Security Awareness to the dtic per communication plan 3. Review and approve Cyber Security Strategy 4. Develop and approve Threat and Vulnerability Management Framework NOTE – Cannot phase out BAS (National Treasury System)
	Employees of the Department are exposed to fire hazard and potential fatality	1. Monitoring rectification plan implementation regarding any non-conformances reported per fire engineering report 2. Produce quarterly progress reports and letters of default to concessionaire on significant risks encountered during reviews.
	Inability of the Department to meet its service delivery due to the ICT failures	Procurement of additional redundant Internet Services through an external Service Provider
Capable State C2. Entities: Building the entity staffing, governance capacity, quick response; developing shared services; and rationalisation of functions and integration of work between entities and with the department.	Inability to provide adequate entity oversight	1. Proposal for staffing of the PEO Unit submitted to Minister 2. Development and implementation of the Oversight framework 3. Proposals on rationalisation of entities submitted to Minister (per the commissioned study)
Capable State	Inability to reduce internal red tape and regulatory burden and promote	1. CMSB Legal to conduct a review of all legislation in the Department and ensure that

Outcome	Key Risk	Risk Mitigation
C3. Smart regulation: Address red tape and compliance in internal processes and in legislation and regulations; enable fit-for-purpose regulations.	achievement of departmental objectives and inclusive participation in the economy.	<ul style="list-style-type: none"> only relevant and applicable legislation is on the website 2. Minister to consider and respond to reports, submissions of the Department timeously, for implementation 3. Request minister's intervention where and when required 4. Identify and develop systems to monitor the reduction of red tape 5. Review of EMIA guidelines in order to lessen administration burden 6. Strategies of the Department will include a wide network of consultations with stakeholders
Capable State C4. Coordination with other parts of the state: Ensuring effective support functions from other public entities in order to achieve the dtic outcomes.	Uncoordinated planning with the entities	<ul style="list-style-type: none"> 1. Strategy session for the dtic and entities- led by Minister 2. Implement a Entitles Forum with PEO and Branches 3. MOUs with entities to streamline the processes
Capable State C5. Contribute to social compact with other social partners.	Inability to obtain commitments for social compacts	<ul style="list-style-type: none"> 1. Obtain clarity of what is allowable 2. Narratives on practices which NT has, to be imparted to all

18. Public Entities

ITAC comprises three core business units, namely Tariff Investigations, Trade Remedy Investigations and Import and Export Control	Government grant	121 427 000
			Own generated Income	1 485 000
			Total revenue	122 912 000

19. Public-Private Partnerships

the dtic has a PPP agreement for office accommodation in operation for a period of 25 years. The agreement commenced in August 2003, and provides for the designing, financing, building, operating/maintaining and transferring of **the dtic**'s campus. This fully serviced office accommodation is provided to **the dtic** and one other government department, as well as some public entities located on the campus. As part of the Public-Private Partnership (PPP) the concessionaire will, for the duration of the contract period, own and maintain assets such as the equipment, buildings, improvements on the land and the majority of the furniture. Departmental assets excluded from this agreement include departmental vehicles; computer equipment and certain furniture items such as may be in the regional offices.

To address deficient performance that had been reported on earlier regarding the concessionaire party, a new FM Sub-contractor was duly appointed in 2021 and the remedial works that had been required to rectify the under-performance, was continued during the 2022/23 year albeit not at the desired pace anticipated.

The updating of the financial model gave rise to a marginally adjusted unitary payment following its conclusion. Variation orders are initiated from time to time to address small changes to the infrastructure such as office alterations. In this regard the accessibility audit results which require action will be addressed through such means, i.e., an appropriate variation order.

the dtic has during the latter part of 2022-initiated discussions with GTAC of the NT regarding the timely planning of the handover stage of the PPP considering the age of the agreement. In accordance with GTAC advice, procurement of specialist advisors, including of various engineering disciplines, will be initiated towards the latter part of 2023/24. This will be done towards formal condition assessment and timely planning of life cycle replacement processes in line with the handover provisions of the PPP. Options post hand-back will be explored in conjunction with GTAC as subjected to the relevant Treasury Regulations governing PPPs.

the dtic is not planning any other office accommodation infrastructure that would materially impact on the current situation at present.

Matter of importance, **the dtic** is currently proceeding towards an arbitration regarding a dispute related to headcount / occupancy usage of **the dtic** campus, which the concessionaire translated into a claim against the department.

Name of PPP	Purpose	Outputs	Current value of agreement (R thousand)	Date when agreement expires
the dtic campus PPP	Fully serviced office accommodation for the dtic	Design, finance, build, operate and transfer of the dtic campus	870 000 (NPV at financial close)	August 2028

PART D: TECHNICAL INDICATOR DESCRIPTIONS (TIDs)

OUTPUT 1

R300 BILLION INVESTMENT PLEDGES SECURED ACROSS THE STATE

Indicator Title	Value of investment facilitated
Definition	This covers Pledges announced at the SA Investment Conferences; investments facilitated by InvestSA and SEZs, settlement agreements or conditions in M&A or other competition areas; reciprocal commitments in trade measures; counter-party investment plans for all incentive programmes across the dtic-group, commitments unlocked through masterplans and BEE programmes such as the EEIP
Source of data	Announcements, emails, Web-based projects registry or manual entry, correspondences, information from other contributing Programmes and DFIs
Method of Calculation or Assessment	Simple Count
Means of verification	Based on the Rand/\$ exchange rate at date of entry on the web-based or manual registry, information from other contributing Programmes and DFIs
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022). 3. No major new shock events domestically or globally (including climate catastrophes, significant instability in financial/banking systems, significant increases in oil prices). 4. Energy availability to industrial users would be on average similar to 2022 or alternatively, mitigation measures such as the tax relief for rooftop solar, would be sufficient to offset energy disruptions. 5. Transport and logistics infrastructure operates at a level similar to 2022 without additional significant disruptions to rail, road, port and air freight operations. 6. All African Continental Free Trade Area (AfCFTA) state parties are ready to implement tariff preference (currently only five countries have started trading preferentially on a limited number of tariff lines. Relevant negotiations facilitated by the AfCFTA Secretariat to conclude outstanding issues in the AfCFTA negotiations.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDGs of contributing Programmes

OUTPUT 2

R40 BILLION IN ADDITIONAL LOCAL OUTPUT COMMITTED OR ACHIEVED

Indicator Title	Value (Rand) of additional local output committed or achieved
Definition	<p>Manufacturing and productive services output, measured on a gross basis, from projects that are championed by the dtic group or through social compacting. This covers two areas:</p> <ol style="list-style-type: none"> First, increased local output at firm or product level in this FY, confirmed by the company concerned, and which may be based on interventions in current or prior years; and Second, projected additional local output in the following five financial years, based on commitments by firms or investors. Where necessary, projections of the levels of output will be made by the dtic-group. Different branches will set sub-targets.
Source of data	Submitted application forms by projects
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Reports and Signed Adjudication Committee Minutes
Assumptions	<ol style="list-style-type: none"> Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022). OUTPUT 3

R800 BILLION IN MANUFACTURING EXPORTS

Indicator Title	Value of exports in manufacturing sectors
Definition	<p>Manufactured exports in current Rands, from SARS or trade partner data, measured on the narrative classification system methodology.</p> <p>Technical Note: Export targets have been set based on historical export trends while adjusting for changing economic conditions. These include a forecast slowdown in global trade (with the WTO estimating global volume growth of only 1%), declining prices for key commodities (particularly petrochemicals and some metals), a slowdown in the post-COVID export surge in key products (notably automotive), and a progressive normalisation of exports in products disrupted by the war in Ukraine (notably coal), and exchange rates remaining near 2022 levels. Export targets are based on SARS customs data, adjusted to only account for exports originating in South Africa; and are categorised using the Narrative Classification System. These trends suggest that South African global manufacturing exports might reach ZAR 700 billion as the baseline target informing departmental objectives, which possibly could stretch to ZAR 800 billion should economic conditions be supportive.</p>
Source of data	Reports
Method of Calculation or Assessment	Simple count
Means of verification	SARS, Trade Partner data
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. R15 BILLION SUPPORT PROGRAMMES TO ENTERPRISES IN AREAS OUTSIDE THE 5* MAIN METROS

Indicator Title	Value of approved funding accessed outside the 5 metros
Definition	Financial support in line with Output 6* definition and disbursed for projects operating outside of the Johannesburg, Ekurhuleni, eThekweni, Cape Town and Tshwane.
Source of data	Incentive application forms/Incentive claim forms and BAS incentive reports for the Incentive Branch and Reports for IDC, NEF, competition and BEE mandated funds
Method of Calculation or Assessment	Simple count
Means of verification	Signed/Preliminary Quarterly Report and Supporting Schedule
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022). 3. No major new shock events domestically or globally (including climate catastrophes, significant instability in financial/banking systems, significant increases in oil prices). 4. Energy availability to industrial users would be on average similar to 2022 or alternatively, mitigation measures such as the tax relief for rooftop solar, would be sufficient to offset energy disruptions. 5. Transport and logistics infrastructure operates at a level similar to 2022 without additional significant disruptions to rail, road, port and air freight operations. 6. All African Continental Free Trade Area (AfCFTA) state parties are ready to implement tariff preference (currently only five countries have started trading preferentially on a limited number of tariff lines. Relevant negotiations facilitated by the AfCFTA Secretariat to conclude outstanding issues in the AfCFTA negotiations.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDGs of contributing Programmes

OUTPUT 8:

R8 BILLION IN FINANCIAL SUPPORT PROGRAMMES AND PROCUREMENT TO SMMEs, WOMEN AND YOUTH-EMPOWERED BUSINESSES

Indicator Title	Value of funding accessed, and support provided to SMMEs
Definition	Financial support in line with Output 6* definition disbursed to SMME firms as defined by the Small Business Act, and to women and youth-empowered businesses (namely firms with at least 25% equity by the designated group). This also includes actions that will move the dtic procurement progressively towards 40%.
Source of data	Incentive claim forms and BAS incentive reports, reports for IDC, NEF, Orders issued by SCM, Centralised Supplier Database and B-BBEE certificates and signed quarterly reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed/Preliminary Quarterly Report and Supporting Schedule
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. 100 000 JOBS CREATED

Indicator Title	Number of jobs created through the dtic programmes: - 50 000 social economy fund part-time or temporary job opportunities; - 50 000 full-time jobs
Definition	<p>Number of new jobs in sectors and firms who have accessed dtic programmes or have a sector masterplan in place or are linked to partnership agreements or competition/trade-mandates funds or are covered by dtic regulatory measures directed at supporting jobs; and includes all jobs in the social employment fund.</p> <p>Technical Note: This target consists of two parts. The SEF is designed to create <u>temporary</u> job opportunities responding to high structural unemployment and poverty. The target is to create 50 000 job opportunities and it is unlikely that these jobs will be sustained beyond the period of SEF funding. The second element of this target is the creation of 50 000 full-time jobs. These will be sustainable, permanent jobs which can be tracked over time.</p>
Source of data	Quarterly report of total number of jobs reported by companies/firms that have received financial and non financial support from the dtic group , emails and letters from companies
Method of Calculation or Assessment	Quantitative, cumulative year-end count
Means of verification	<ul style="list-style-type: none"> Total number of permanent, full-time jobs created in the firms and sectors that have received financial or non-financial support from the dtic group total number of 'job opportunities' created which is defined as temporary, construction, part-time, seasonal jobs created
Assumptions	<ol style="list-style-type: none"> Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. OUTPUT 39

4 HIGH-IMPACT MEASURES TO IMPROVE THE EFFICIENCY AND/OR EFFECTIVENESS, OF THE DTIC'S POLICY OR PROGRAMME INTERVENTIONS

Indicator Title	Number of high-impact policy measures completed
Definition	Impact Assessments provided to the Executive Authority which provide policy recommendations to for example improve the efficiency, cost-effectiveness, reach, impact of policy or programme interventions implemented by the dtic or the dtic group
Source of data	Relevant reports
Method of Calculation or Assessment	Simple count
Means of verification	Impact Assessments reports provided
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022). 3. No major new shock events domestically or globally (including climate catastrophes, significant instability in financial/banking systems, significant increases in oil prices). 4. Energy availability to industrial users would be on average similar to 2022 or alternatively, mitigation measures such as the tax relief for rooftop solar, would be sufficient to offset energy disruptions. 5. Transport and logistics infrastructure operates at a level similar to 2022 without additional significant disruptions to rail, road, port and air freight operations. 6. All African Continental Free Trade Area (AfCFTA) state parties are ready to implement tariff preference (currently only five countries have started trading preferentially on a limited number of tariff lines. Relevant negotiations facilitated by the AfCFTA Secretariat to conclude outstanding issues in the AfCFTA negotiations.

Indicator Title	Facilitate the start of preferential trading in goods under the AfCFTA by: <ul style="list-style-type: none"> - Submitting SACU 90% Tariff offer to the AfCFTA Secretariat - Facilitating changes to Customs and Excise Act and gazetting thereof by SARS to implement SACU tariff offer by March 2024 - Reporting on progress to finalise the outstanding rules of origin for clothing and autos by March 2024
Definition	Preferential trading in goods under the AfCFTA to commence
Source of data	SACU 90% Tariff offer Document setting out SA Country-proposals on Rules of Origin for clothing products and automobiles
Method of Calculation or Assessment	Quantitative, simple count
Means of Verification	SACU 90% tariff offer submitted to the AfCFTA Secretariat Minutes of the meeting of the AfCFTA Council of Ministers Report on the progress to finalise the Rules of Origin for clothing products and automobiles Letter to the Minister of Finance to request SARS to publish amendments to the Customs and Excise Act
Assumptions	AfCFTA rules of origin on clothing and autos are agreed SACU tariff offer is approved by the Council of Ministers and the Summit Minister of Finance amends the Customs and Excise Act
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth/N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade Branch

Linked to output 28

Indicator Title	Number of high impact trade interventions to facilitate market access for SA products completed
Definition	High impact trade interventions including, but not limited to the following: trade concerns and disputes, challenges with implementation of trade agreements, tariff decisions and trade measures, bilateral trade concerns and market access challenges
Source of data	Briefings, inputs, technical preparatory documents for trade dispute settlement at the WTO Engagements with other countries Reports on implementation and utilization of certain trade agreements Reports on ITAC tariff and rebate measures ITAC import sensitivity index ITAC Trade adjustment assistance program Supporting evidence for ITAC decisions and trade measures, which includes trade remedy and tariff measures, are contained in, amongst others, ITAC reports issued once measure is implemented by SARS
Method of Calculation or Assessment	Quantitative, cumulative count at year end

Means of Verification	Report on the 10 high impact trade interventions completed
Assumptions	Meetings between relevant countries take place to discuss and resolve the disputes and concerns Applications for tariff adjustments and rebates are approved and implemented by SARS WTO Dispute Settlement Body meets
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth/N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade Branch and ITAC Commissioner

Linked to Output 29

Indicator Title	Finalise a strategy and undertake advocacy efforts to respond to green trade barriers (Carbon Border Adjustment Mechanism (CBAM))
Definition	Development of a widely consulted strategy to respond to the EU Carbon Border Adjustment Mechanism on affected SA industries
Source of data	Document setting out the impact of CBAM on SA industries Engagements with key stakeholders (e.g., industry and relevant government departments) Engagements with SADC, SACU and AU Engagements with like-minded developing countries Engagements with the EU Consultations at the WTO
Method of Calculation / Assessment	Quantitative, simple count
Means of verification	Strategy to respond to green trade barriers (CBAM) submitted to the Executive Authority
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Annually
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade

Linked to output 36

Indicator Title	Number of reports on 95% achievement of KPIs and the impact of the work of entities (ITAC)
Definition	Quarterly meetings held between Trade Branch and ITAC to ensure that ITAC is able to achieve 95% of its APP KPIs
Source of data	Agenda of meetings taking place Minutes of meeting taken
Method of Calculation or Assessment	Quantitative, simple count
Means of verification	Minutes of meetings
Assumptions	ITAC submissions approved by the Executive Authority and decisions implemented by SARS where applicable
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG Trade and ITAC Commissioner

Linked to Output 37

Indicator Title	Conferences, summits, and international forums coordinated (BRICS)
Definition	Report on the co-ordination of hosting of the BRICS Trade Ministerial meeting
Source of data	Briefings and reports on engagements with BRICS Trade Ministers Joint report of the BRICS Trade Ministers meeting
Method of Calculation or Assessment	Quantitative, simple count
Means verification	Reports on co-ordination of hosting of the BRICS Trade Ministerial meeting
Assumptions	BRICS Ministerial meeting takes place
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade

Linked to Output 37

Indicator Title	Number of conferences, summits, and international forums coordinated (AGOA Forum)
Definition	Report on the co-ordination of the hosting of the AGOA Forum
Source of data	Briefings and reports on engagements with the US, African Union Commission, African Ambassadors in Washington DC and AGOA-eligible countries, as well as with private sector and civil society. Outcome of the AGOA Mid-term review Outcome document of the AGOA Forum AGOA Forum Program List of invitations
Method of Calculation or Assessment	Quantitative, simple count
Means verification	Final Report of the AGOA Trade Ministers
Assumptions	AGOA Forum takes place
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade

Linked to Output 37

Indicator Title	Number of conferences, summits, and international forums coordinated (AfCFTA CoM)
Definition	Report on the co-ordination of hosting of the AfCFTA Council of Ministers
Source of data	Briefings and reports on engagements with AfCFTA Council of Ministers AfCFTA Council of Ministers program Joint report of Senior Officials meeting
Method of Calculation or Assessment	Quantitative, simple count
Means verification	Minutes of the AfCFTA Council of Ministers meeting
Assumptions	AfCFTA Council of Ministers meeting takes place
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade

Linked to Output 40

Indicator Title	Amendments (3) to regulations on anti-dumping, safeguards and import and export control to reduce red-tape in ITAC application process submitted to Executive Authority
Definition	Regulations and interventions to reduce red tape and improve turnaround time in ITAC application processes
Source of data	Submissions/memos to Trade Branch from ITAC on <ul style="list-style-type: none"> - Draft regulations anti-dumping - Draft regulations on safeguards and - Draft regulations on Export and Import control
Method of Calculation or Assessment	Quantitative, cumulative count at year end
Means of Verification	Draft regulations on anti-dumping, safeguards and import and export control submitted to the Executive Authority
Assumptions	Draft regulations are approved by the Executive Authority
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth/N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Annually
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade and ITAC Commissioner

Linked to Output 41

Indicator Title	Cabinet memorandum on ratification of Competition Protocol submitted to the Executive Authority Protocol on Investment submitted to the AfCFTA Council of Ministers Protocol on Women in trade submitted to the AfCFTA Council of Ministers Protocol on digital trade submitted to the AfCFTA Council of Ministers Cabinet Memorandum on ratification of the WTO Fisheries subsidies Agreement submitted to the Executive Authority
Definition	Protocols under the AfCFTA aimed at broadening African economic integration, improving Africa's competitiveness and enhancing inclusive socio-economic development through legal frameworks to promote cooperation on cross-border anti-competitive practices, increased intra-African investment flows that promote sustainable development, standards for the enforcement of Intellectual Property Rights, harmonised rules on digital trade, as well as support measures for women and youth in trade to benefit from the AfCFTA.
Source of data	SA position on the Protocol on Competition SA position on the Protocol on Investment SA position on the Protocol on Women in Trade SA position on the Protocol on Digital Trade Draft WTO Fisheries Subsidies Agreement
Method of Calculation or Assessment	Quantitative, simple count
Means of Verification	Cabinet memo on the ratification of the Competition Protocol under the AfCFTA submitted to the Executive Authority

	Protocol in Investment submitted to the AfCFTA Council of Ministers Protocol on Women in trade submitted to the AfCFTA Council of Ministers Protocol on Digital trade submitted to the AfCFTA Council of Ministers Cabinet memo on ratification of WTO Fisheries Subsidies Agreement submitted to the Executive Authority
Assumptions	Negotiations concluded and Protocols adopted by the AfCFTA Council of Ministers Fisheries Subsidies Agreement adopted by WTO Members
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG: Trade and DDG Competition

Linked to Output 42

Indicator Title	Number of assessments on Trade Instruments Applied for and issued
Definition	Reports (both internal and statutory) on the impact of trade instruments applied for and issued or enhancements of trade instruments or measures
Source of data	Internal and statutory reports prepared by ITAC
Method of Calculation or Assessment	Quantitative, simple count
Means of verification	Impact assessment reports prepared by ITAC
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	Target for Women: N/A Target for Youth: N/A Target for People with Disabilities: N/A
Spatial Transformation (where applicable)	Reflect on contribution to spatial transformation priorities: N/A Reflect on spatial impact area: N/A
Reporting Cycle	Bi-annually
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG Trade and ITAC Commissioner

Programme 3: Investment and Spatial Industrial Development

Linked to Output 1

Indicator Title	Value (Rand) of investment facilitated through investment support and Special Economic Zones
Definition	This covers pledges announced at the South African Investment Conferences; investments facilitated by InvestSA, settlement agreements or conditions in M&A or other competition areas; reciprocal commitments in trade measures; counter-party investment plans for all incentive programmes across the dtic -group, commitments unlocked through masterplans and BEE programmes such as EEIP, investments covered by the dtic and other government departments
Source of data	Emails, correspondence and reports
Method of calculation	Simple count
Means of verification	Emails, correspondence and reports
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator responsibility	DDG Investment and Spatial Industrial Development

Linked to Output 2

Indicator Title	Value of additional local output committed or achieved through investment
Definition	Shows the number of investment projects in progress, implemented or launched
Source of data	Submitted application forms by projects, emails, correspondence by companies, reports
Method of calculation	Simple count
Means of verification	Reports, emails and correspondences
Assumptions	Improved domestic and global economic conditions
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 3

Indicator Title	Value of manufacturing exports sectors facilitated through branch interventions
Definition	R700 Billion in manufacturing exports
Source of data	<p>Manufactured exports in current Rands, from SARS or trade partner data, measures on the narrative classification methodology.</p> <p>Technical Note: Export targets have been set based on historical export trends while adjusting for changing economic conditions. These include a forecast slowdown in global trade (with the WTO estimating global volume growth of only 1%), declining prices for key commodities (particularly petrochemicals and some metals) a slowdown in the post-COVID export surge in key products (notably automotive), a progressive normalisation of exports in products disrupted by the war in Ukraine (notably coal). Export targets are based on SARS customs data, adjusted to only account for exports originating in South Africa; and are categorised using the Narrative Classification System. These trends suggest that South African global manufacturing exports might reach ZAR 700 billion as the baseline target informing departmental objectives, which possibly could stretch to ZAR 750 billion should economic conditions be supportive.</p>
Method of Calculation or Assessment	Quantitative, simple count
Means of verification	Reports, emails, correspondence by companies
Assumptions	Applications for rebates and drawback permits are submitted and approved and volume of tariff applications follows historical mean over the last thirty-six months.
Disaggregation of Beneficiaries (where applicable)	<p>Target for Women: N/A</p> <p>Target for Youth: N/A</p> <p>Target for People with Disabilities: N/A</p>
Spatial Transformation (where applicable)	<p>Reflect on contribution to spatial transformation priorities: N/A</p> <p>Reflect on spatial impact area: N/A</p>
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG Investment and Spatial Industrial Development

Linked to Output 11

Indicator Title	Value of support on Black Industrialist Output achieved through branch interventions
Definition	Output by Industrialist firms
Source of data	Data, correspondences, reports, emails from companies
Method of Calculation or Assessment	Simple count
Means of verification	Reports, emails, correspondences
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	N/A
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 12

Indicator Title	Number of jobs supported, or covered by Master Plans
Definition	Number of jobs in sectors and firms who have accessed the dtic group programmes, have a sector masterplan in place, are linked to partnership agreements or competition/trade-mandates funds, are covered by the dtic regulatory measures directed at supporting jobs (including trade, competition and empowerment) or are covered by projects funded by dtic -entities.
Source of data	Reports, emails, templates, correspondence by companies
Method of Calculation or Assessment	Quantitative, cumulative year-end count
Means of verification	Reports, emails, templates, correspondence by companies
Assumptions	Jobs secured through SEZs and Investment conference
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG Investment t and Spatial Industrial Development

Linked to Output 13

Indicator Title	Number of jobs created through branch interventions
Definition	Number of new jobs in sectors and firms who have accessed dti programmes or have a sector masterplan in place or linked to partnership agreements or competition/trade-mandates funds or are covered by dtic regulatory measures directed at supporting jobs; and includes all jobs in the social employment fund. 100 000 jobs be created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)
Source of data	Database/ Quarterly reports, emails, correspondence by companies
Method of Calculation or Assessment	Quantitative, cumulative year-end count
Means of verification	Reports, correspondence by companies, emails
Assumptions	Jobs secured through SEZs and Investment conference
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Reporting Cycle	Quarterly
Desired performance	Actual performance meets targeted performance
Indicator Responsibility	DDG Investment t and Spatial Industrial Development

Linked to Output 17

Indicator Title	Number of new SEZ applications considered for designation
Definition	Designation of Special Economic Zones to attract investment, create jobs and promote value added exports. A submission on the proposed SEZs will be prepared for Minister's consideration for designation, which includes a viable business plan, containing inter alia verifiable investment commitments, and clear roles and responsibilities for all spheres of government and resource allocation by each
Source of data	Proposals for new SEZs designations for Minister's consideration
Method of Calculation or Assessment	Simple count
Means of verification	Submission to the Minister
Assumptions	Designated SEZ
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative (Year-end)
Reporting Cycle	Bi-annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 19

Indicator Title	Number of Megawatts of energy projects facilitated
Definition	MW of energy projects facilitated
Source of data	Project plans, announcements, applications, reports, emails, correspondence, launches & site visits
Method of Calculation or Assessment	Simple Count
Means of verification	Report
Assumptions	Projects reaching financial closure
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 20

Indicator Title	Number of Megawatts of energy available for the grid
Definition	No of MW of energy available for the grid
Source of data	Reports, emails, correspondence by companies
Method of Calculation or Assessment	Simple Count
Means of verification	Report
Assumptions	Financial closure and regulatory approval
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target Achieved
Indicator Responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 21

Indicator Title	Establishment of the physical Energy One-Stop-Shop (EOSS)
Definition	1 Energy One-stop Shop operational
Source of data	Business Case, presentations
Method of Calculation or Assessment	Simple count
Means of verification	Reports
Assumptions	Applications submitted via EOSS
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple Type
Reporting Cycle	Quarterly
Desired performance	Physical EOSS Phase 1
Indicator Responsibility	DDG: Investment and Spatial Industrial Development

Linked to Output 23

Indicator Title	Number of investor facilitation and unblocking interventions provided
Definition	100 Investor facilitation and unblocking interventions provided
Source of data	Enquiries, applications, correspondence with departments and agencies
Method of Calculation or Assessment	Simple
Means of verification	Reports with Approvals, recommendations, and correspondence with departments and agencies
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple
Reporting Cycle	Quarterly
Desired performance	Target Achieved not Achieved
Indicator Responsibility	DDG Investment and Spatial Industrial Development

Linked to Output 37

Indicator Title	Number of investment conferences (SAIC) hosted
Definition	Hosting of the South African Investment Conference
Source of data	Supporting documents such as investment pledges, correspondences, site visits, progress reports and launches information, including information from IFB and DFIs
Method of Calculation or Assessment	Simple count
Means of verification	Reports, correspondence from companies
Assumptions	Improved domestic and global conditions
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Yearly
Desired performance	Target achieved exceeded
Indicator Responsibility	DDG Investment and Spatial Industrial Development

Programme 4: Sectors

Linked to Output 1

Indicator Title	Value (Rand) of investment facilitated by branch interventions
Definition	Track and monitors the investment facilitated by sectors desks
Source of data	Email evidence from Director or Chief Director
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments -An investment friendly environment -Consistency in energy supply -Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 2

Indicator Title	Value (Rand) of additional local output committed or achieved by branch interventions
Definition	Tracks and monitors the value generated by sectors desks through localisation interventions
Source of data	Email evidence from Director or Chief Director
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments An investment friendly environment Consistency in energy supply Regulations and instruments available to support localisation Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 3

Indicator Title	Value (Rand) contributed by branch through manufacturing exports
Definition	Tracks and monitors the impact of sector desks contributions made through manufacturing exports
Source of data	Email evidence from Director or Chief Director
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments An investment friendly environment Consistency in energy supply Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 4

Indicator Title	Value (Rand) contributed by branch through manufacturing exports to the rest of Africa
Definition	Tracks and monitors the contributions made by branch through manufacturing exports to African markets
Source of data	Progress report submitted to DG
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments A support programme for Africa is in place
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 12

Indicator Title	Number of jobs supported and maintained through branch interventions
Definition	Tracks and monitors the number of jobs supported and maintained through interventions by sector desk
Source of data	Email evidence from Director or Chief Director
Method of Calculation or Assessment	Quantitative
Means of verification	STATSA (QLFS,QES), Industry Assoc Data, Quarterly reports, Letters from Companies, Emails from companies
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consistency in energy supply Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Not Cumulative but maintained
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Output 12 target is not cumulative but maintained

Linked to Output 13

Indicator Title	Number of jobs created through branch interventions
Definition	Tracks and monitors the number of jobs created through interventions by sector desks
Source of data	Email evidence from Director or Chief Director
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager Quarterly report of total number of jobs reported by companies/firms that have received financial and non financial support from the dtic group , emails and letters from companies,
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consistency in energy supply Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 14

Indicator Title	Number of jobs supported through branch interventions in Black Industrialist firms
Definition	Tracks and monitors the number of jobs created in supported Black industrialist firms through interventions by sector desks
Source of data	Email evidence from Director or Chief Director entailing jobs by black industrialists firms
Method of Calculation or Assessment	Quantitative
Means of verification	Signed off dashboard from Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consistency in energy supply Information is readily available
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 22

Indicator Title	Number of compulsory specifications for Energy Efficiency submitted to the Executive Authority
Definition	Tracks the compulsory specifications that are to be enforced within the energy efficiency sector
Source of data	Submission attached to compulsory specifications signed off by DDG: Sectors
Method of Calculation or Assessment	Simple count
Means of verification	Submission submitted to DG
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Commitment by Technical Infrastructure institutions to commit and deliver timeously
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Not applicable
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 26

Indicator Title	Amendment of National Building Regulations and Building Standards Act submitted to Executive Authority
Definition	Reviews and improves the current National Building Regulations submitted to Executive Authority
Source of data	Signed submission submitted to ODG
Method of Calculation or Assessment	Quantitative
Means of verification	Email evidence of DDG: Sectors signed off submission to Executive Authority
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consensus reached by social partners on the policy nuance and actions to drive the amendment of the National Building Regulations
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Not applicable
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 30

Indicator Title	White paper on New Energy Vehicle
Definition	Outlines a plan for achieving targets towards the completion of the New Energy Vehicle Strategy and Roadmap
Source of data	Report submitted by Chief Director: Automotives: to DDG: Sectors
Method of Calculation or Assessment	Simple count
Means of verification	Email submitted by Chief Director: Automotives to DDG: Sectors containing progress project report
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consensus reached by social partners on the policy nuance and actions to drive growth and development in the sectors An investment friendly environment Consistency in energy supply
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 31

Indicator Title	Green Hydrogen commercialisation framework finalised
Definition	Tracks and monitors the implementation of the Green Hydrogen Commercialisation Strategy
Source of data	Report submitted by Chief Director: Green Economy: to DDG: Sectors
Method of Calculation or Assessment	Quantitative
Means of verification	Email submitted by Chief Director: Green Economy to DDG containing progress on Green Hydrogen Commercialisation Strategy
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Progressive realisation of the social partners commitments towards increased production, sales, investment, jobs and/or transformation
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 34

Indicator Title	Number of reports on monitoring and evaluation of the implementation of approved Master Plans (Automotive, RCTLF, Sugar, Poultry, Furniture and Steel)
Definition	Tracks and monitors the implementation of approved Master Plans
Source of data	Quarterly Master Plan report supplemented by action minutes with the report signed off by DDG: Sectors
Method of Calculation or Assessment	Quantitative
Means of verification	Quarterly report signed off by Senior Manager
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consensus reached by social partners on the policy nuance and actions to drive growth and development in the sectors Consistency in energy supply
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 34

Indicator Title	Medical Devices Master Plan developed
Definition	Tracks the progress made towards the development of the Medical Devices Master Plan
Source of data	Progress report signed off by Chief Director to DDG: Sectors
Method of Calculation or Assessment	Quantitative
Means of verification	Progress report signed off by Senior Manager to DDG: Sectors
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Consensus reached by social partners on the policy nuance and actions to drive growth and development in the sectors An investment friendly environment in the Plastics sector Consistency in energy supply
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 36

Indicator Title	Number of reports on 95% achievement of KPIs and the impact of the work of entities
Definition	Tracks and monitors the increased efficiency of Technical Infrastructure institutions
Source of data	Action minutes of CEO's forums monitoring progress towards achievement of targets
Method of Calculation or Assessment	Quantitative
Means of verification	Submission of signed off minutes by senior manager to DDG: Sectors
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Progressive realisation of the social partners commitments towards increased production, sales, investment, jobs and/or transformation
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Not applicable
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to output 40

Indicator Title	Improvement of turnaround times of two key technical infrastructure processes (SABS / NRCS)
Definition	Tracks and monitors turnaround times within Technical Infrastructure institutions: a) SABS to improve turnaround times on publishing of standards from 365 days to 320 days b) NRCS to assess and decide on issuing a letter of authority from 120 days to 90 days
Source of data	Submission on progress of target signed off by Chief Director to DDG: Sectors
Method of Calculation or Assessment	Quantitative
Means of verification	Submission of signed off progress of target by senior manager to DDG: Sectors
Assumptions	Social partners are able to make commitments; and able to execute on these commitments Commitment by SABS to deliver on target
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi-annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Linked to Output 42

Indicator Title	Development and institutionalisation of the New Metal trading system to eliminate metal infrastructure theft and damage
Definition	Tracks and monitors the development and institutionalisation of the New Metal trading system
Source of data	Submission submitted to Minister
Method of Calculation or Assessment	Quantitative
Means of verification	Report on milestones achieved
Assumptions	Social partners are able to make commitments; and able to execute on these commitments An investment friendly environment Consistency in energy supply
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Sectors

Programme 5: Regulation

Linked to output 7

Indicator Title	Hosting of 20 workshops in areas outside the metros to support SMMEs
Definition	Education and awareness sessions conducted
Source of data	Approved reports
Method of Calculation or Assessment	Simple
Means of verification	Approved reports
Assumptions	
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Linked to output 8

Indicator Title	Hosting of Education workshops to support SMMEs
Definition	Education workshops to support SMME's
Source of data	Approved Reports
Method of Calculation or Assessment	Simple count
Means of verification	Approved Reports
Assumptions	-
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Linked to output 12

Indicator Title	Number of jobs supported from liquor distributors & lotteries
Definition	Estimated number of jobs supported by the liquor distributors / manufacturers on the annual renewal registrations and jobs supported from the national lottery funded projects across the sectors provided in the Lotteries Act
Source of data	Case Management System (CMS) and NLC approved reports
Method of Calculation or Assessment	Simple count
Means of verification	Case Management System (CMS) and NLC approved reports
Assumptions	-
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Linked to Output 24

Indicator Title	Grey listing 'Know your Shareholder' regulations' Published; and reports on the implementation of the Beneficial Ownership Register Regulations by the CIPC
Definition	Report on implementation of the Beneficial Ownership Register Regulations by the CIPC.
Source of data	Approved report from CIPC signed by Senior Manager
Method of Calculation or Assessment	Simple count
Means of verification	Approved report from CIPC signed by Senior Manager
Assumptions	Delays in submission of reports from CIPC due mainly to reports being finalized 30 days after the end of quarter
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative year end
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Linked to output 26

Indicator Title	Number of reports on the Companies Amendment Bills tabled or submitted to Executive Authority
Definition	Legislation amended, or submitted to EA
Source of data	Approved reports by Senior Manager
Method of Calculation or Assessment	Simple count
Means of verification	Reports approved by Senior Manager
Assumptions	Limited delays in the development of legislation at various stages in the legislative process
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Bi-Annual
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Linked to output 45

Indicator Title	Number of reports on successful actions completed on price monitoring and excessive pricing or price gouging
Definition	Enforcement actions on price monitoring, excessive pricing or price gouging
Source of data	Approved Reports from NCC or other regulators
Method of Calculation or Assessment	Simple count
Means of verification	Approved Reports from NCC or other regulators
Assumptions	-
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Regulation

Programme 6: Incentives

Linked to output 1

Indicator Title	Value (Rand) of investment facilitated through industrial financial support
Definition	<p>The total value of projected investments from private sector and foreign direct investments facilitated through industrial financing support from approved enterprises/ projects (ADEP, AIS, APSS, BIS, CIP, , and Film and TV)</p> <p>Exceptions:</p> <ol style="list-style-type: none"> 1. The total value of projected investments in case BIS equals total projected costs (including incentive grant) of all the enterprises/ projects approved. 2. AIS projected investment is based on qualifying investment.
Source of data	Signed Adjudication Committee (AC) minutes and Adhoc Decision Review Committee (ADRC) minutes (only for projects approved via appeals)
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule
Assumptions	Approved projects/enterprises will commit to the value of projected investments
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Quarterly
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 2

Indicator Title	Value (Rand) of additional local output projected
Definition	The total projected rand value of additional local outputs that will be produced by the approved AIS, APSS, and BIS projects in the following five years
Source of data	Incentive Application forms and/or template (based only on completed templates received from clients) and Incentive Bas reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed (by Senior Manager) Quarterly Report and Supporting Schedule
Assumptions	Approved projects/enterprises will commit to the projected local output
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 2

Indicator Title	Value (Rand) of additional local output achieved
Definition	The total actual value (rand) of additional local output achieved by AIS, APSS and BIS projects through industrial financial support.
Source of data	Incentive claim form and/or template (based only on completed templates received from clients)
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule – signed by Senior Manager
Assumptions	Supported projects are producing local output
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 5

Indicator Title	Value (Rand) of exports of Global Business Services
Definition	The total actual value (rand) of export revenue generated through supported global business services projects as reported quarterly by disbursed projects
Source of data	Incentive claim forms and BAS incentive Reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Supported projects are generating export revenue
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 6

Indicator Title	Value (Rand) of approved funding accessed by projects/ enterprises
Definition	The total value (R5 billion) of approved funding disbursed to enterprises/projects across all incentives.
Source of data	Claim forms and BAS incentive reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Approved enterprises/projects submit claims for disbursement of incentive funds
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 7

Indicator Title	Value (Rand) of approved funding disbursed to projects/ enterprises outside the 5 metros
Definition	The total value of approved funding disbursed for projects/enterprises outside of the 5 metros (Johannesburg, Cape Town, eThekweni, Tshwane, and Ekurhuleni)
Source of data	Incentive application forms/Incentive claim forms and BAS incentive reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Approved enterprises/projects outside of the 5 metros submit claims for disbursement of incentive funds
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 8

Indicator Title	Value (Rand) of approved funding accessed, and support provided to SMMEs
Definition	The total value of approved funding disbursed to SMMEs, women and youth-empowered businesses across all incentive schemes. Exceptions: GBS, Industrial Parks, and SEZ, SSAS and Film and TV
Source of data	Incentive claim forms and BAS incentive reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Approved SMMEs submit claims for disbursement of incentive funds
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 11

Indicator Title	Value of output by Black Industrialist firms supported by the dtic group
Definition	The total actual value (rand) of local output achieved by Black industrialist projects supported through incentive disbursements.
Source of data	Incentive claim forms , and/or template (based only on completed templates received from clients) and Bas incentive reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Supported Black Industrial projects are producing local output
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 12

Indicator Title	Number of jobs supported under GBS masterplan (retained and new)
Definition	Actual number of jobs supported under GBS
Source of data	Incentive claim forms and Bas incentive report
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Projects/enterprises are supporting jobs as per approval
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 13

Indicator Title	Number of new permanent jobs created
Definition	The actual number of new permanent jobs created (10 000) by disbursed projects/enterprises (ADEP, AIS, APSS, BIS, CIP, and GBS).
Source of data	Incentive claim forms and Bas incentive report
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Projects/enterprises are supporting jobs as per approval
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 13

Indicator Title	Number of construction job opportunities (Part time or temporary job opportunities)
Definition	Actual number of construction jobs supported (3 000) from disbursed infrastructure projects (CIP).
Source of data	Incentive claim forms and BAS incentive report
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	disbursed projects are creating construction jobs
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 14

Indicator Title	Number of jobs in Black Industrialist firms supported
Definition	The total number of jobs supported (new and retained) as reported by Black Industrialists and black-owned projects at the time of disbursement.
Source of data	Incentive claim forms and Bas incentive reports
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Supported Black Industrialists projects/enterprises are retaining existing baseline jobs and creating new jobs..
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 18

Indicator Title	Value (Rand) of financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund
Definition	Financial support to enterprises including SMMEs to mitigate impact of load shedding through the energy resilience fund administered through IDC and NEF. The total value of energy resilience loan funding accessed by SMMEs of R240m.
Source of data	Preliminary Reports from IDC and NEF
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedule - signed by Senior Manager
Assumptions	Enterprises including SMMEs will apply for MCEP energy resilience loan funding
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 35

Indicator Title	Number of reports on 95% achievement of KPIs and the impact of the work of entities (IDC and NEF)
Definition	Oversight of DFIs to report on achievement against their planned targets which include targets set for disbursements, disbursements to SMMEs, women and youth empowered projects and disbursements to projects outside the 5 metros.
Source of data	Preliminary report reflecting achievements against the above indicators for IDC and NEF
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report and Supporting Schedules providing oversight of the IDC and NEF achievements against their planned targets.
Assumptions	IDC and NEF provide verified information on time
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Linked to output 40

Indicator Title	Number of regulations / guidelines published & red tape reduction interventions
Definition	The total number of measures to reduce red tape in administration of incentives. Implement measures to reduce red tape in administration of incentives by reviewing programmes or processes..
Source of data	Incentives programmes or processes identified to be reviewed
Method of Calculation or Assessment	Simple count
Means of verification	Signed Quarterly Report, Programmes/processes reviewed, and submission(s) signed off by the DDG
Assumptions	Reviewed incentive programmes or processes addresses red tape issues that will result in more effective administration of incentives
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative Year end
Reporting Cycle	Bi-Annually
Desired performance	Target met or higher
Indicator Responsibility	DDG: Incentives

Programme 7: Exports

Linked to output 3(A)

Indicator Title	Value (Rand) of manufactured exports to the rest of the world – (SARS Raw Data)
Definition	Annual report outlining cumulative value of exports in manufacturing sectors, based on SARS Raw data and or Trading Partners
Source of data	Report(s) using raw data from SARS
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on exports in manufacturing sectors
Assumptions	Manufacturing exports to international markets
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 3(B)

Indicator Title	Value (Rand) of manufactured exports to the rest of the world including supported through export councils and export promotion initiatives
Definition	Annual report outlining cumulative value of exports in manufacturing sectors, based on SARS Raw data or data obtained from trading partners or reports by select exporters
Source of data	Report(s) using data from SARS, EMIA, Export Councils, the dtic agencies, Trading Partners and Exporters
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on exports in manufacturing sectors
Assumptions	Manufacturing exports to international markets
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 4(A)

Indicator Title	Value (Rand) of manufactured exports to other African countries (SARS Raw Data)
Definition	Annual report outlining cumulative value of exports to Africa in manufacturing sectors, based on SARS Raw data and or Trading Partners
Source of data	Report(s) using raw data from SARS
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on exports to Africa in manufacturing sectors
Assumptions	Manufacturing exports to Africa
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 4(B)

Indicator Title	Value (Rand) of manufactured exports to other African countries, including supported through export councils and export promotion initiatives
Definition	Annual report outlining cumulative value of exports to Africa in manufacturing sectors, based on SARS Raw data or data obtained from trading partners or reports by select exporters
Source of data	Report(s) using data from SARS, EMIA, Export Councils, the dtic agencies, Trading Partners & Exporters
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on exports to Africa in manufacturing sectors
Assumptions	Manufacturing exports to Africa
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 6

Indicator Title	Value (Rand) of support provided to exporters to participate in export promotion initiatives
Definition	Report on support provided to exporters to participate in export initiatives
Source of data	Report using data from EMIA on support provided to exporters to participate in export initiatives
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on funding provided to exporters for export initiatives
Assumptions	Exports to international markets
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 7

Indicator Title	Value (Rand) of support provided to exporters outside the 5* main metros to participate in export promotion initiatives
Definition	Report on support provided to exporters to participate in export initiatives outside the 5* main metros
Source of data	Report using data from EMIA on support provided to exporters to participate in export initiatives outside the 5* main metros
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on funding provided to exporters to participate in export initiatives outside the 5*main metros
Assumptions	Exports to international markets
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	Metros and districts outside the 5* main metros
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 8

Indicator Title	Value (Rand) of support provided to SMME exporters to participate in export promotion initiatives
Definition	Report on support provided to SMME; Women and Youth exporters to participate in export initiatives
Source of data	Report using data from EMIA on support provided to SMMEs, Women and Youth exporters to participate in export initiatives
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on funding provided to SMMEs, Women and Youth exporters to participate in export initiatives
Assumptions	Exports to international markets
Disaggregation of Beneficiaries (where applicable)	<ul style="list-style-type: none"> • SMMEs • Women • Youth
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 9

Indicator Title	Value (Rand) of support provided to exporters in labour absorbing sectors to participate in export promotion initiatives
Definition	Report on support provided to exporters in labour absorbing sectors to participate in export initiatives
Source of data	Report using data from EMIA on support provided to exporters in labour absorbing sectors to participate in export initiatives
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on funding provided to exporters in labour absorbing sectors to participate in export initiatives
Assumptions	Exports to international markets
Disaggregation of Beneficiaries (where applicable)	Labour absorbing sectors
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 11

Indicator Title	Value (Rand) of output by black industrialists supported through export initiatives
Definition	Annual report on value of output by black industrialists supported through export initiatives
Source of data	Report(s) using data from EMIA, Export Networks, Exporters and Export Councils
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on value of output supported in black industrialist firms through export initiatives
Assumptions	Support provided to exporters
Disaggregation of Beneficiaries (where applicable)	Black industrialists
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 12

Indicator Title	Number of jobs supported through export initiatives
Definition	Annual report on jobs supported through export initiatives
Source of data	Report(s) using data from EMIA, Export Networks, Export Councils and Exporters
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on jobs supported through export initiatives
Assumptions	Support provided to exporters
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 14

Indicator Title	Number of jobs supported in Black Industrialist firms supported through export initiatives
Definition	Annual report on jobs supported in black industrialist firms through export initiatives
Source of data	Report(s) using data from EMIA, Export Networks, Exporters & Export Councils
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on jobs supported in black industrialist firms through export initiatives
Assumptions	Support provided to exporters
Disaggregation of Beneficiaries (where applicable)	Black industrialists
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Annually
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 25

Indicator Title	Number of Business Forums hosted aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment
Definition	Reports on hosting Business Forums hosted
Source of data	Report on hosting of business forms
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on hosting Business Forum and institutional support provided to exporters
Assumptions	Export growth promoted by providing institutional support to exporters
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 28

Indicator Title	High impact reports on trade interventions including, but not limited to the following: trade disputes, challenges with implementation of trade agreements, ITAC decisions and trade measures, bilateral trade concerns
Definition	Reports on number of barriers affecting exports resolved
Source of data	Report(s) using data from EMIA, Export Councils, Trading Partners and Exporters
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on resolved export barriers submitted
Assumptions	Export growth promoted by providing institutional support to exporters
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 35

Indicator Title	Number of reports on 95% achievement of KPIs and the impact of the work of entities (ECIC)
Definition	Action minutes (reports) on progress of the ECIC implementing its corporate plan and meeting targets
Source of data	Report from ECIC
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on institutional support provided to exporters
Assumptions	Export growth promoted by providing institutional support to companies
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations

Linked to output 37

Indicator Title	Hosting of the BRICS Business Forum
Definition	Reports on hosting of the BRICS Business Forum
Source of data	Report on hosting of business forums
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on hosting business forum and institutional support provided to exporters
Assumptions	Export growth promoted by providing institutional support to exporters
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Linked to output 40

Indicator Title	Number of report on exporter development programme implemented to coordinate and pool support for exporters by the dtic, ECIC, IDC and NEF
Definition	Report setting out progress of implementation of exporter development programme to coordinate and pool support for exporters by the dtic, ECIC, IDC and NEF aimed at reducing red-tape
Source of data	Report from ECIC
Method of Calculation or Assessment	Simple count
Means of verification	Signed report on implementation of exporter development programme aimed at red-tape reduction
Assumptions	Red-tape reduced for effective and accessible export support processes
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative Year-End
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	CD: Exports/Operations - CD: Export Promotion and Marketing

Programme 8: Transformation and Competition

Linked to output 1

Indicator Title	Value (Rand) of investment facilitated through mergers and reciprocal commitments
Definition	It is the value of investment commitments facilitated by programme 8 over a financial year. Each investment commitment has an indicated investment value in Rand which collectively equates to the overall investment value
Source of data	Rand value identified in one or more of the following: (1) agreements reached regarding investment commitments associated with mergers, Black Industrialists, EEIP or any other work undertaken by programme 8 (2) investment commitments made orders by the Competition Authorities (the Competition Commission or the Competition Tribunal) (3) Reports from the Competition Authorities, Reports by programme 8, signed by a senior manager, with evidence file attached.
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	That a number of large mergers will be notified during the year, and that parties will negotiate investment commitments in mergers where the public interest is advanced. That EEIP applications made support the investment target and that dtic funding to Black Industrialists secures investment commitments.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 2

Indicator Title	Value (Rand) of Actual and projected local output
Definition	Rand value of commitments made to additional local industrial output and rand value of actual output, reported in the financial year
Source of data	Agreements reached regarding local production/ localisation commitments and/ or projected local production/ localisation – including commitments set out in funding agreements, merger agreements, and EEIP documentation, local production/ localisation commitments made orders by the Competition Authorities; Information/ reports obtained in monitoring competition issues (including mergers, settlements, case studies and the like), Black Industrialists and the EEIP. Dashboard with actual commitments made and dashboard with projected and/ or actual local production/ localisation.
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	Companies will provide requested information for the time periods requested
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A

Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 6

Indicator Title	Value (Rand) of funds from transformation and competition, including the social employment fund
Definition	Value (Rand) of funds from transformation and competition, including the social employment fund
Source of data	Information/ reports/ agreements/ orders from the Competition Authorities, I; the EEIP programme, the Black Industrialist programme, government entities, IDC reports.
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	The value may increase where more commitments are made by companies
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 8

Indicator Title	Value (Rand) of support provided to SMMEs from transformation and competition initiatives
Definition	Refers to value (Rand) of support provided to SMMEs from transformation and competition initiatives
Source of data	IDC, EEIP, companies, agreements
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	The value may increase where more commitments are made by companies; companies and IDC report as required
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly

Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 09

Indicator Title	Value (Rand) of support programmes from competition, to sectors not included in master plans including but not limited to agriculture, construction and forestry
Definition	Value (Rand) of support programmes from competition, to sectors not included in master plans – including but not limited to agriculture, construction, forestry and retail sector
Source of data	Orders of the Competition Tribunal; information/ reports from implementing companies/ programmes, IDC reports
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 10

Indicator Title	Value (Rand) of loan, equity and procurement funding to support black owned enterprises
Definition	Loans and grant funding committed and available to assist companies, and procurement are committed to in EEIP agreements or "EEIP-like agreements" to support transformation. Measured upon approval the dtic's approval of the EEIP agreement or "EEIP-like agreement", or upon a public commitment by the Minister of the dtic to support such agreements.
Source of data	Agreements reached regarding investment commitments, and investment commitments made orders by the Competition Authorities
Method of Calculation or Assessment	Simple count
Means of verification	Signed quarterly reports, value of financial support provided through loans, grants, equity and procurement commitments in EEIP agreements approved by the dtic
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative (Year-End)
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to Output 11

Indicator Title	Value (Rand) of output by Black Industrialist firms supported
Definition	The value of output by Black Industrialist firms supported through programme 8
Source of data	Agreements, Tribunal orders, companies, research, government departments and entities, Competition Authorities; BBBEE Commission, experts in the field
Method of Calculation or Assessment	Simple
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	That companies will provide the data requested for the time period requested
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple – cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 12

Indicator Title	Number of jobs retained and created
Definition	180 000 Jobs supported through transformation and competition initiatives
Source of data	Competition Tribunal orders, signed agreements with companies, reports/ information from companies
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	Companies are able to implement their commitments and report as requested
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Actual numbers
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 13

Indicator Title	Number of jobs created through the dtic programmes: - 8 000 full-time jobs - 50 000 Social Employment Fundpart-time or temporary job opportunities
Definition	New jobs and new job opportunities committed to/ created
Source of data	Reports from the IDC on SEF for the number of job opportunities created. Compliance reports from companies reporting on compliance to merger conditions, Competition Commission or Tribunal orders to create jobs; commitments to create jobs from Black Industrialist's and EEIP implementation information or reports from companies on how many new jobs have been created in the quarter
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	None
Disaggregation of Beneficiaries (where applicable)	Measurement of jobs opportunities for males, females, and youth – in the social economy
Spatial Transformation (where applicable)	Measured per province in the social economy
Calculation Type	Simple count
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 14

Indicator Title	Number of jobs in Black Industrialist firms supported or benefited from BBBEE policies
Definition	Jobs in Black Industrialist Firms supported
Source of data	Information or reports from B-BBEE Commission, IDC, NEF, EEIP program, Competition Authorities and/or Industrial Financing Branch
Method of Calculation or Assessment	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	That the companies supported will provide data as requested
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 15

Indicator Title	Number of additional workers with shares in their companies as a result of competition initiatives
Definition	Additional workers owning shares in their companies as a result of the dtic group's interventions including but not limited to competition agreements.
Source of data	Agreements with companies; Tribunal orders; information and reports from the companies and ESOPs, reports from dtic entities including the IDC, the NEF and the competition authorities
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	Assume large mergers take place where companies are prepared to consider and negotiate ESOPS
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 16

Indicator Title	Number of Impact assessment reports on high impact outcomes on addressing market concentration at sector or firm level
Definition	Number of impact assessments on high impact outcomes on addressing market concentration at sector or firm level. This could include the publication of market inquiry findings and recommendations on sectors/ sub-sectors; actions taken by the competition authorities in mergers that impact market structure/ behaviour; research reports on implementation or impact of market inquiry recommendations being implemented
Source of data	Research, case studies, Competition Authorities; SARS, StatsSA, experts, published articles, media
Method of Calculation or Assessment	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 22

Indicator Title	Number of reports on block exemptions for energy suppliers and users
Definition	Refers to number of block exemptions for energy suppliers and users
Source of data	Expedited regulatory amendments and flexibility to promote energy efficiency
Method of Calculation	Government, Entities and Stakeholders
Means of verification	Bi-Annual reports signed by Senior Manager
Assumptions	Report
Disaggregation of Beneficiaries (where applicable)	Issuing of policy directives and adherence to statutory requirements
Spatial Transformation (where applicable)	N/A
Calculation Type	N/A
Reporting Cycle	Bi-Annually
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 32

Indicator Title	Number of the dtic success stories profiled through case studies
Definition	the dtic success stories profiled through case studies
Source of data	Research, government and entities, Competition Authorities, EEIP programme and BBBEE Commission, online research, interviews with stakeholders, experts in the field, SARS, StatsSA, published articles, IDC, research institutes, Competition Authorities
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly
Desired performance	80% - 100% of target achieved or target exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 36

Indicator Title	Number of reports on 95% achievement of KPIs and the impact of the work of entities (Competition entities)
Definition	Quarterly reports on the oversight of competition entities
Source of data	Reports from Competition Authorities
Method of Calculation or Assessment	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	Issuing of policy directives and adherence to statutory requirements
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 37

Indicator Title	Number of conferences, summits and international forums hosted
Definition	Number of conferences, summits and international forums hosted
Source of data	Action minutes/ reports on conferences and summit held with evidence showing the programme and any media coverage of the event
Method of Calculation	Count of action minutes/ reports
Means of verification	Action Minutes/ reports signed by Senior Manager
Assumptions	We will get assistance from other branches and funding additional to the existing budget for the branch be made available to cover the cost of the Conference and Summit
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Annually
Desired performance	Meet or exceed target
Indicator Responsibility	DDG Transformation and Competition

Linked to output 38

Indicator Title	<ul style="list-style-type: none"> Percentage of mergers notified and assessed for public interest – 100% Percentage of mergers notified will have interventions to advance the public interest – 15% Percentage of mergers notified will have agreements reached between the acquiring firm and the dtic on public interest, and presented to the Competition Tribunal – 1% 50 Mergers & acquisitions where public interest considerations have been considered – 50
Definition	Mergers and acquisitions where public interest conditions have been incorporated
Source of data	Merger notification and documentation from the Competition Commission; Competition Commission reports on number of mergers approved with public interest conditions
Method of Calculation	Simple count of number of mergers approved by the Competition Commission with public interest conditions
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target met
Indicator Responsibility	DDG Transformation and Competition

Linked to output 40

Indicator Title	Number of reports on Competition Commission/ Tribunal Rules/ Regulations published & 1 BBBEE red tape reduction taken
Definition	Competition Commission/ Tribunal rules/ regulations published to reduce red tape and 1 BBBEE red tape reduction initiative undertaken
Source of data	Legislation and regulation, rules and guidelines, Competition Authorities and BBBEE Commission, research, stakeholders, experts, research bodies, published research
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Annually
Desired performance	Meet or exceed targets
Indicator Responsibility	DDG Transformation and Competition

Linked to output 41

Indicator Title	Number of Competition Protocol of AfCFTA submitted to Cabinet
Definition	The Competition Protocol for the AfCFTA be finalised
Source of data	AfCFTA, legislation, research, Competition Commission, experts, research institutes, government departments and entities, WTO, OECD, regional trade bodies and regional competition bodies
Method of Calculation	Simple count
Means of verification	Report signed by Senior Manager
Assumptions	Cabinet and ESEID, can accommodate item of work in their programme or the year
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple
Reporting Cycle	Annually
Desired performance	Meet target
Indicator Responsibility	DDG: Transformation and Competition

Linked to output 45

Indicator Title	Number of reports on 10 successful actions completed on price monitoring and excessive pricing or price gouging
Definition	10 successful actions completed on price monitoring and excessive pricing or price gouging
Source of data	Legislation and regulation, rules and guidelines, Competition Authorities and BBBEE Commission, research, stakeholders, experts, research bodies, published research StatsSA
Method of Calculation	Simple count
Means of verification	Quarterly reports signed by Senior Manager
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Simple count
Reporting Cycle	Quarterly
Desired performance	80% - 90% of target met or target exceeded
Indicator Responsibility	DDG Transformation and Competition

Programme 9: Research

Linked to Output 1

Indicator Title	Number of impact assessment reports on investment conference commitments produced
Definition	Impact assessment report on investment facilitated through the investment conference commitments
Source of data	StatsSA, SARS, the dtic, Reserve Bank ,information received from the SA Investment Conference
Method of Calculation	Simple Count
Means of verification	Impact assessment report on investment conference commitments produced -
Assumptions	The report will provide information on progress made and impact of the investment conference commitments.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One impact assessment report on investment conference commitments produced.
Indicator Responsibility	DDG: Research

Linked to Output 3

Indicator Title	Number of export market strategies produced
Definition	Export market strategy for Furniture sector
Source of data	Relevant research reports/studies, economic data sources/platforms and reports from government departments and entities.
Method of Calculation	Simple Count
Means of verification	Export market strategy produced.
Assumptions	Export market strategy will promote export growth in the Furniture sector.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One Furniture export market strategy produced.
Indicator Responsibility	DDG: Research

Linked to output 4

Indicator Title	Number of quarterly data analysis reports of manufacturing exports to rest of Africa produced
Definition	Quarterly data analysis reports on African market opportunities using appropriate quantitative tools. African countries covers all African countries that South Africa exported to and where there were demands for products.
Source of data	Trademap, SARS and the dtic
Method of Calculation	Simple Count
Means of verification	Data analysis reports on African market opportunities produced. African countries covers all African countries that South Africa exported to and where there were demands for products.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Four quarterly data analysis reports on African market opportunities using appropriate quantitative tools produced.
Indicator Responsibility	DDG: Research

Linked to Output 7

Indicator Title	Number of DDM Dashboards maintained
Definition	District-level dashboards covering district-level impact, interventions of the dtic and its entities' interventions
Source of data	the dtic programmes, research reports and reports from government departments and entities; economic databases.
Method of Calculation	Simple Count
Means of verification	District-level dashboards of the dtic and its entities' interventions maintained.
Assumptions	District-level Dashboards will provide information on the dtic and entities foot print in the districts thus inform effective interventions by the department.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	52 district-level dashboards of the dtic and its entities' interventions maintained.
Indicator Responsibility	DDG: Research

Linked to Output 10

Indicator Title	Impact Assessment on Equity Equivalent Investment Programme agreements agreed or administered
Definition	Impact assessment report on Equity Equivalent Investment Programme (EEIP) agreements agreed or administered
Source of data	Relevant reports and data platforms, inputs from the dtic Branches
Method of Calculation	Quantitative
Means of verification	Impact assessment report on Equity Equivalent Investment Programme produced.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One impact assessment report on Equity Equivalent Investment Programme produced.
Indicator Responsibility	DDG: Research

Linked to Output 11

Indicator Title	Black Industrialist Census produced
Definition	Black Industrialist Census report providing status on value of BI firms' outputs and number of jobs supported through the dtic and its group support.
Source of data	Census Questionnaires, the dtic , IDC and NEF ,Survey questionnaires
Method of Calculation	Quantitative
Means of verification	BI Census report produced.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One (1) BI Census report produced.
Indicator Responsibility	DDG: Research

Linked to output 11

Indicator Title	Quarterly surveys of BI sample to assess outlook and identify potential challenges produced.
Definition	Quarterly surveys of BI sample to assess outlook and identify potential challenges produced.
Source of data	Census Report, the dtic, IDC and NEF ,Survey questionnaires
Method of Calculation	Quantitative
Means of verification	Four quarterly surveys of BI sample to assess outlook and identify potential challenges produced.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Four quarterly surveys of BI sample to assess outlook and identify potential challenges produced.
Indicator Responsibility	DDG: Research

Linked to Output 12

Indicator Title	Number of reports on jobs supported or covered by the dtic group and Master Plans
Definition	Reports on jobs supported under SEZs produced.
Source of data	Relevant research reports/studies, economic data sources/platforms and reports from government departments and entities.
Method of Calculation	Simple Count
Means of verification	One report on jobs supported under SEZs produced
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Bi -annually
Desired performance	One report on jobs supported under SEZs produced.
Indicator Responsibility	DDG: Research

Linked to Output 15

Indicator Title	Number of Worker Ownership Dashboard updated
Definition	A dashboard on worker ownership monitoring workers with shares in their companies updated .
Source of data	SARS, JSE Ownership, economic reports, economic development databases, relevant data and reports from industries and companies.
Method of Calculation	Simple Count
Means of verification	Register on worker ownership maintained.
Assumptions	Register will assist the Department to track and monitor developments on worker ownership so as to advice or give recommendations on how this area can be improved or strengthened.
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One dashboard on worker ownership updated
Indicator Responsibility	DDG: Research

Linked to Output 25

Indicator Title	Number of bilateral trade reports produced at the request of Branches or the Executive Authority to support hosting of Business Forums
Definition	Bi-lateral Trade reports to support Business Forum engagements aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment at the request of Executive Authority and Branches.
Source of data	Relevant reports and data platforms, inputs from the dtic Branches
Method of Calculation	Quantitative
Means of verification	Bilateral trade reports produced at the request of the Executive Authority and Branches to support Business Forums aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Ten Bilateral trade reports produced at the request of the Executive Authority and Branches to support Business Forums aimed at supporting increased Foreign Direct Investment (FDI), exports and outward investment
Indicator Responsibility	DDG: Research

Linked to Output 29

Indicator Title	Number of Impact assessment reports on Carbon Border Adjustment Mechanism (CBAM) on South Africa produced
Definition	Impact assessment reports to support development of Carbon Border Adjustment Mechanism (CBAM) Strategy
Source of data	Relevant reports and data platforms, inputs from the dtic Branches
Method of Calculation	Quantitative
Means of verification	Impact assessment report on potential impact of Carbon Border Adjustment Mechanism (CBAM) on South Africa produced.
Assumptions	N/A
Disaggregation of Beneficiaries (where applicable)	N/A
Spatial Transformation (where applicable)	N/A
Calculation Type	Cumulative
Reporting Cycle	Annually
Desired performance	One impact assessment report of Carbon Border Adjustment mechanism produced.
Indicator Responsibility	DDG: Research

Linked to output 39

Indicator Title	Number of reports on high-impact measures to improve the efficiency and/or effectiveness, of the dtic's policy or programme interventions provided
Definition	Impact Assessments provided to the Executive Authority which provide policy recommendations to for example improve the efficiency, cost-effectiveness, reach, impact of policy or programme interventions implemented by the dtic or the dtic group
Source of data	Relevant reports
Method of Calculation or Assessment	Simple count
Means of verification	Impact Assessments reports provided
Assumptions	<ol style="list-style-type: none"> 1. Global growth of at least 2.9% in 2023 and with no recession in any of SA's major trading partners; with stable monetary policy regimes in place and no significant shift in global commodity prices in SA's top 10 export categories. 2. Geo-political factors would not deteriorate, i.e., the war in Ukraine would not escalate or its impact on the SA economy should not be worse than during 2022). 3. No major new shock events domestically or globally (including climate catastrophes, significant instability in financial/banking systems, significant increases in oil prices). 4. Energy availability to industrial users would be on average similar to 2022 or alternatively, mitigation measures such as the tax relief for rooftop solar, would be sufficient to offset energy disruptions. 5. Transport and logistics infrastructure operates at a level similar to 2022 without additional significant disruptions to rail, road, port and air freight operations. 6. All African Continental Free Trade Area (AfCFTA) state parties are ready to implement tariff preference (currently only five countries have started trading preferentially on a limited number of tariff lines. Relevant negotiations facilitated by the AfCFTA Secretariat to conclude outstanding issues in the AfCFTA negotiations.
Disaggregation of Beneficiaries (where applicable)	N/A

Spatial Transformation (where applicable)	N/A
Calculation type	Cumulative
Reporting Cycle	Quarterly
Desired performance	Target achieved or exceeded
Indicator Responsibility	DDG Research

20. Abbreviations and Acronyms

TERM	DEFINITION
AAMP	Agriculture and Agro-processing Masterplan
ABER	Africa Bilateral Economic Relations
ADEP	<i>Aquaculture Development and Enhancement Programme</i>
AfCFTA	African Continental Free Trade Area
AGOA	African Growth and Opportunity Act
AIS	Automotive Incentive Scheme
APDP	The Automotive Production and Development Program
APP	APP
APSS	Agro-Processing Support Scheme
AU	African Union
BAS	Basic Accounting System
B-BBEE	Broad-Based Black Economic Empowerment
BBOS	Broad-Based Ownership Schemes
BEE	Black Economic Empowerment
BI	Black Industrialist
BIS	Black Industrialist Scheme

SADC	Southern African Development Community
SAIC	South Africa Investment Conference
SALGA	South African Local Government Association
SANAS	South African National Accreditation System, a public entity reporting to the dtic
SANS	South African National Standards
SAPA	South African Poultry Association
SAREM	South African Renewable Energy Masterplan
SARS	South African Revenue Service
SASA	South African Sugar Association
SCM	Supplier Chain Management
SEF	Social Employment Fund
SEZ	Special Economic Zone
SID	Spatial Industrial Development
SIP	Strategic Infrastructure Projects
SMME	Small, Medium and Micro-Sized Enterprises
SMS	Senior Management Service
SONA	State of the Nation Address
SSE	Social and Solidarity Economy
the dtic	Department of Trade, Industry and Competition

TERM	DEFINITION
TIDs	Technical Indicator Descriptions
TOR	Terms of reference
TRIPS	Trade Related Aspects of Intellectual Property Rights
UK	United Kingdom
US	United State of America
WTO	World Trade Organisation
ZAR	South African Rands

21. Classification of Outputs

Core targets

Our nine core targets speak to the economy we are trying to achieve. These targets represent real impact in the economy, and measure crucial indicators like local output, job creation, and the performance of black industrialists. While all our targets are important, these Core targets are the apex priorities for the Department, and all programmes of the dtic are expected to contribute to the achievement of these essential Outputs.

Core targets
R300 billion in investment pledges secured across the state
R40 Billion in additional local output committed or achieved
R800 Billion in manufacturing exports
R330 Billion in manufacturing exports to other African countries
R8 Billion in exports of Global Business Services (GBS)
R40 Billion in Black Industrialist Output Achieved
1 Million Jobs Supported or covered by Master Plans
100 000 jobs to be created (50 000 social economy fund part-time or temporary job opportunities and 50 000 full-time jobs)
23 000 jobs in Black Industrialists firms
20 000 additional workers with shares in their companies

Programmatic targets

The dtic aims to achieve our Core targets through a very wide range of activities, from effectively providing industrial finance to developing the regulatory environment needed for companies to succeed. While our Programmatic targets do not encompass the entirety of our activities for the year ahead, they track the contribution made by some of our most impactful interventions. These targets represent the minimum our programmes must deliver, and set the floor – not the ceiling – for the reach of the dtic's activities in the year ahead.

Programmatic targets
R30 billion in support programmes administered by or in partnership with the dtic-group
R15 Billion support programmes to enterprises in areas outside the 5* main metros
R8 Billion in financial support programmes to SMMEs, and women and youth-empowered businesses
R7.5 Billion in financial support programmes to enterprises in labour absorbing sectors
R 800 Million in Equity Equivalent Investment Programme agreements
10 high-impact outcomes on addressing market concentration, at sector or firm level.
2 New SEZs designated and support work with provinces related to industrial parks
100 Investor facilitation and unblocking interventions provided
1 Implementation of the AFCFTA
10 High impact trade interventions completed
7 Master Plans managed and 1 new masterplan to be finalised.
50 Mergers and acquisitions where public interest conditions have been incorporated
4 Protocols finalised under the AfCFTA

Enabling targets

Delivering on these Programmatic targets, and the overall vision of our Core targets, requires strengthening the capacity of the dtic to deliver. Our Enabling targets include a diverse set of projects to strengthen the strategic direction of the department, make it easier for companies to access dtic support, and connect the dtic with the communities we serve. Some of our enabling targets mirror the previous approach to performance targeting in the dtic, with outputs that include events and reports. However, these Enabling targets now exist within the broader framework of the Core and Programmatic targets defined above, and will be assessed on both their formal achievement, and the extent to which they contribute to these essential outcomes.

Enabling targets
10 Business Forums hosted aimed at supporting increased FDI, exports and outward investment hosted.
4 Pieces of priority legislation amended, tabled or submitted to Executive Authority, Cabinet or Parliament.
1 Strategy and advocacy finalised responding to green trade barriers (Carbon Border Adjustment Mechanism (CBAM))
1 EV Strategy finalised
1 Finalisation of green hydrogen commercialisation framework
1000 Case studies of firms, workers, entrepreneurs, professionals or communities' individuals impacted by the dtic measures; including 12 local films/documentaries telling the SA story
52 Community outreach programmes by the dtic group
Oversight of IDC, NEF and ECIC to ensure that at least 95% of planned KPIs are achieved
Oversight of other entities to ensure that at least 95% of planned KPIs are achieved
5 Conferences, summits, and international forums hosted
4 High-impact measures to improve the efficiency and/or effectiveness, of the dtic's policy or programme interventions.
10 High-impact measures to reduce red tape or improve turnaround times in administration of incentives and work of agencies
Promotion of a transparent and just adjudication process for incentive applications
6 Impact assessments or enhancements of trade instruments or measures
10 Successful actions completed on price monitoring and excessive pricing or price gouging

Contextual Response targets

While our core interventions underpin the work of the dtic, the Department must remain responsive to the needs of an economy that often changes faster than our programmes. Our Responsive targets outline some of the ways we are responding to the most pressing challenges facing the country, of which the energy crisis is the foremost priority for the year ahead. As suggested by the name, Responsive targets will be updated regularly, and will always reflect the core challenges and opportunities that require additional attention.

Contextual response targets
R1.3 Billion in financial support to enterprises including SMMEs to mitigate impact of load shedding through energy resilience fund
1400 Megawatts of energy from projects facilitated
550 Megawatts of energy available for the grid
1 Energy One-stop Shop operational
Expedited regulatory amendments and flexibility, to promote energy efficiency
Grey-listing: Publication of 'Know your Shareholder' regulations
1 Metal Trading System developed to identify stolen public infrastructure entering the scrap metal value-chain, export market or legitimate metal production industry
