

Limpopo Province

Trade and Investment Limpopo

Trade & Investment Limpopo was established in September 1996 as the official investment and trade promotion and facilitation agency of the Limpopo Provincial Government.

We are the leading business development network for Limpopo companies seeking to expand operations locally, and into African and other foreign markets.

At TIL we research, package and market investment opportunities, and offer a wide range of services aimed at assisting and supporting investors to establish themselves in Limpopo or to trade with the province.

In a nutshell, we offer investors a comprehensive one-stop service to support and facilitate investment and expansion into South African, African and other international markets.

Strategic Objectives

- Seek increased added value from existing and new projects.
- Increase the Limpopo added value content of exported products.
- Create sustainable new jobs and maintain existing jobs.
- Increase equity and Broad-Based Black Economic Empowerment (BBBEE).
- Create a competitive environment in Limpopo through improved capacity and by removing obstacles to competitiveness.
- Make TIL the most effective learning organisation in Limpopo through knowledge management and sharing.
